## Green Power Supply Options Screening Tool

Option	Logic Used to Determine Likelihood
Onsite Self Supply	If long-term commitment (question 4) is "No," then this is "No," too. Otherwise, if Net Metering and Interconnection grades are both at least a B, then "Very Likely"; if both are at least a C, then "Possibly"; if D or F, "Unlikely."
Onsite Power Purchase Agreement	If long-term commitment (question 4) is "No," then this is "No," too. Otherwise, if 3rd-Party Ownership is "Available", then "Very Likely"; if 3rd-Party Ownership is "Prohibited", then "No"; if 3rd-Party Ownership is "Undetermined", then "Possibly."
Offsite Physical Power Purchase Agreement	If the question 4, 5, or 6 is "No," then "Unlikely." Otherwise (meaning all three questions are "Yes"), if Retail Electricity Market Structure and Wholesale Electricity Market Structure are both "Competitive" then "Very Likely"; if Retail Electricity Market Structure is "Competitive" and Wholesale Electricity Market Structure is "Partial" then "Possibly"; if Retail Electricity Market Structure or Wholesale Electricity Market Structure is "Traditionally Regulated" then "Unlikely."
Offsite Financial Power Purchase Agreement	If questions 3, 4, 5, and 6 are all "Yes," then "Very Likely"; otherwise "No".
Community Solar	If Virtual Net Metering, Community, or Shared Solar Policies is "Available", then "Very Likely"; if the policies are "Proposed", then "Potentially in the Future"; and if the policies are "Not Available", then "No."
Utility Green Tariff	If Utility Green Tariff Access is "Not Available," then "No"; otherwise "Possibly."
Utility Green Power Product	If Utility Green Power (on State Policy Matrix) is "Available," then "Very Likely"; otherwise "Unlikely."
Competitive Green Power Product	If Competitive Green Power (on State Policy Matrix) is "Available," then "Very Likely"; If "Maybe", then "Possibly", otherwise "No."
Renewable Energy Certificates	If Unbundled RECs (on State Policy Matrix) is "Available," then "Yes"; otherwise "No."
