

# 2019 WEN Symposium

A facilitated dialogue among Colorado's Water Educator Network (WEN) about equity in water education and engaging diverse audiences.

## Create Equitable and Inclusive Programs

**Facilitator**  
Amber K. Kim, Ph.D.

Seeking to engage more diverse audiences? Then come join us as we discuss the work required to develop and sustain just and equitable water education programs in order to foster authentic engagement of all Coloradans. We will learn tools and techniques to evaluate our own program, explore success stories, and use our shared learning to identify potential changes to our individual program plans.

### The goals of the 2019 WEN Symposium are to:

- Establish a common understanding, language and purpose for the work needed to foster engagement of marginalized voices in water education.
- Reflect on the current state of engagement in our organizations. Evaluate and identify potential changes to individual program plans.
- Identify common approaches that have worked in Colorado communities.
- Refine goals or shared principles with the intent to develop measurable action steps.

**Keynote**  
Jorge Figueroa,  
El Laboratorio

Registration is now open! Registration will be capped at 40 participants. Scholarships are currently available for teachers from Jefferson County and Pitkin County.
