

Potential Funding Sources for Reducing Lead in Drinking Water in Schools and Child Care Facilities

Office of Water (4606M)

EPA 816-B-19-005

October 2019

Introduction

The US Environmental Protection Agency (EPA) developed this guide to help schools and child care providers identify potential funding sources for lead remediation and water quality-related projects. This guide lists 4 federal programs, 79 state programs, and 115 foundations/companies providing funding opportunities. In addition to school and child care facilities, this guide may also be used to identify potential funding sources for other organizations that are concerned about drinking water consumed by children.

This document also provides information on national foundations, corporations, and state and federal agencies that have a strong commitment to supporting school and child care improvement initiatives. The national organizations listed here provide funding for environmental health, children's health, and environmental education projects. In addition, these organizations are committed to serving their local communities.

Background

The EPA encourages schools and child care facilities to implement programs for reducing lead in drinking water as part of their overall plans for maintaining healthy learning environments. Safe and healthy environments foster healthy children and may improve student performance. However, implementing a drinking water quality program that includes testing, remediation, and outreach activities can be costly. To better assist these facilities with addressing potential lead contamination in drinking water, the EPA compiled a suite of materials and resources to help schools and child care facilities implement programs and policies to reduce children's exposure to lead in drinking water. This guide provides potential funding resources to help school and child care facilities implement drinking water quality programs. **This guide is not a comprehensive list of funding opportunities for environmental initiatives and inclusion in this guide does not constitute endorsement by the EPA. This information will be updated annually.**

Lead in Drinking Water in Schools and Child Care Facilities

Exposure to lead can cause serious health problems, particularly for young children. The EPA has developed resources to help schools and child care facilities implement simple strategies for managing the risks of lead in their drinking water, including:

- Identifying potential sources of lead in their facilities.
- Monitoring their drinking water for elevated lead levels.
- Resolving problems if elevated lead levels are found.
- Communicating about their lead control programs.

You can find EPA resources and *The 3Ts For Reducing Lead In Drinking Water Toolkit* at <https://www.epa.gov/ground-water-and-drinking-water/3ts-reducing-lead-drinking-water-toolkit>.

How to Use This Guide

This guide includes information on the funding priorities, types of funding, eligibility criteria, and geographic focus of each funding source. Some of the information listed above was not publicly

INTRODUCTION

available or easily accessible for some funding opportunities. As a result, some entries may not include all of the descriptive categories mentioned above.

- From the map page of this document, users can click on the state or territory of interest.

Blue Hub Capital

Opportunity Description: This program is a community development loan fund that supports private businesses, including childcare facilities and private schools.

Eligible Organization Types: Private businesses.

Address: 10 Malcolm X Boulevard Boston, MA 02119

Website: <https://bluehubcapital.org/programs-services/loan-fund>

Contact Phone: (617) 933-5858

Email: jangaria@bluehubcapital.org

Funding Types: Loan

*This opportunity is also available to California, Connecticut, District of Columbia, Florida, Georgia, Illinois, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, Washington, West Virginia, Wisconsin.

Business Development Corporation

Opportunity Description: This funding opportunity provides small business administration loans that can be used by private businesses, such as childcare facilities, for renovation costs.

Special Notes: Opportunities are issued as a Request for Proposal (RFP).
Loan Min: \$100,000. Loan Max: \$5,000,000.

Eligible Organization Types: Private businesses.

Funding Priorities: Expansion or renovation, equipment purchases, and leasehold improvements.

Address: 111 Executive Center Drive Enclave Building, Suite 225 Columbia, South Carolina 29210

Website: <https://www.businessdevelopment.org/daycares.html>

Contact Phone: (803) 798-4064

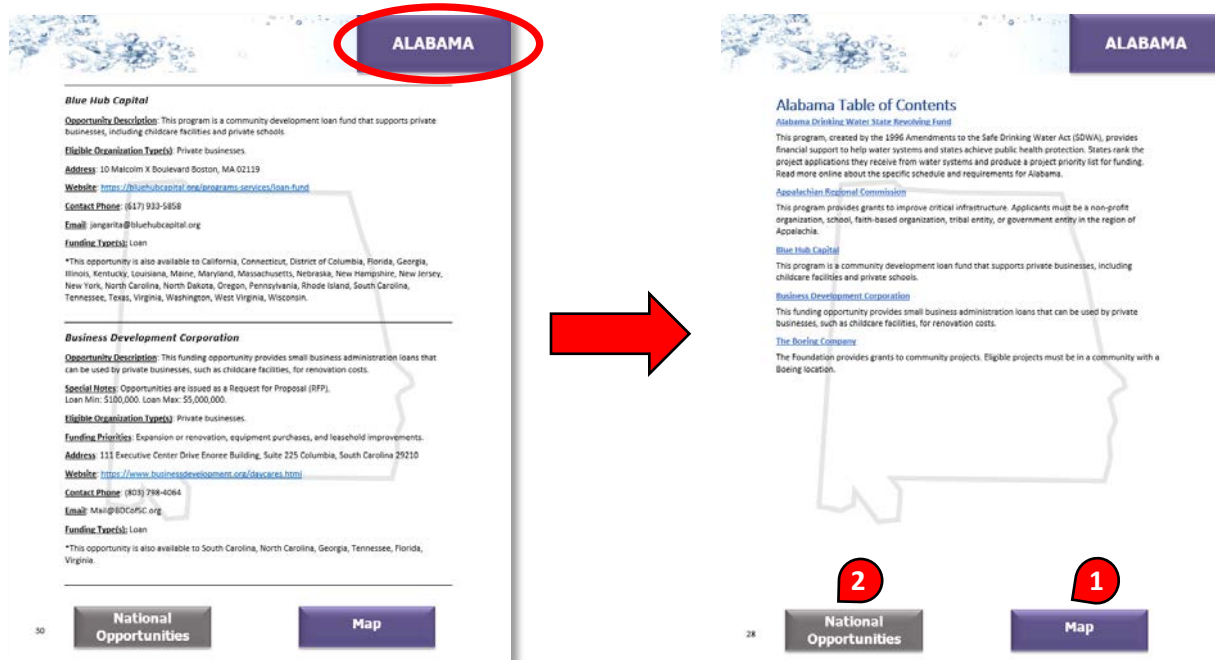

Email: Mail@BDCofSC.org

Funding Types: Loan

*This opportunity is also available to South Carolina, North Carolina, Georgia, Tennessee, Florida, Virginia.

National Opportunities | Map

- To navigate back to the table of contents, users can click on the state/territory name in the upper right-hand corner.
- To navigate back to the map, users can click on the “Map” button (1) at the bottom of the page at any time. From any page, users can also choose to look at national opportunities by clicking on the “National Opportunities” button (2) at the bottom of the page (as shown below in the example page).
- Clicking on the “National Opportunities” button will bring the user to a table of contents for sources available nationwide that functions similarly to the state sections.
- Users can review the funding sources listed under their state, as well as the national funding opportunities, to identify potential sources of support for their programs.

General Sources

Because information on funding priorities and contact information may change frequently, it is important to confirm the information provided when seeking funding.

In addition to the foundational, state, and federal sources of funding listed in this document, there are other general sources that schools, child care facilities, and funding seekers may look into. There are resources and alternative mechanisms of financing that certain organizations may be eligible to utilize. Additionally, there are upcoming programs that schools and child care facilities could seek funding from in the future. The following sections provide broad suggestions for general sources that fund seekers could inquire about beyond those listed in the national and state-specific sections of this document.

Faith – Based Organizations

In addition to the presented funding opportunities, many faith-based organizations offer sources of funding to schools and privately-owned child care facilities seeking to reduce lead in drinking water. These organizations offer various types of financial support including grants or reduced-rate loans and usually stipulate that the applicant be affiliated with their religious community to qualify for funding. Faith-based programs tend to be targeted at child-care facilities that are located within a place of worship or religious community-center. If your child care facility or private school could potentially qualify for this type of support, visit your religious community's website or speak with a representative within your congregation to find out more about funding opportunities. To get the best results when searching for these types of programs online, use search phrases such as "early childhood development", "lead service line replacement", "capital improvement", "environmental health" or "community development".

Utilities and Municipalities

Throughout the US, many water utilities offer various forms of support for lead reduction that could potentially benefit your school or child care facility. Both privately and publicly-owned water utilities in many municipalities offer rebates or loans specifically for testing lead in water or the replacement of lead pipes. Some services, such as testing, may be offered for free. Contact a representative from your state or county's department of health or contact your water utility directly and ask about rebates or complimentary services for lead testing, service line replacement loan programs, or lead loan programs.

Bonds and Other Finance Mechanisms

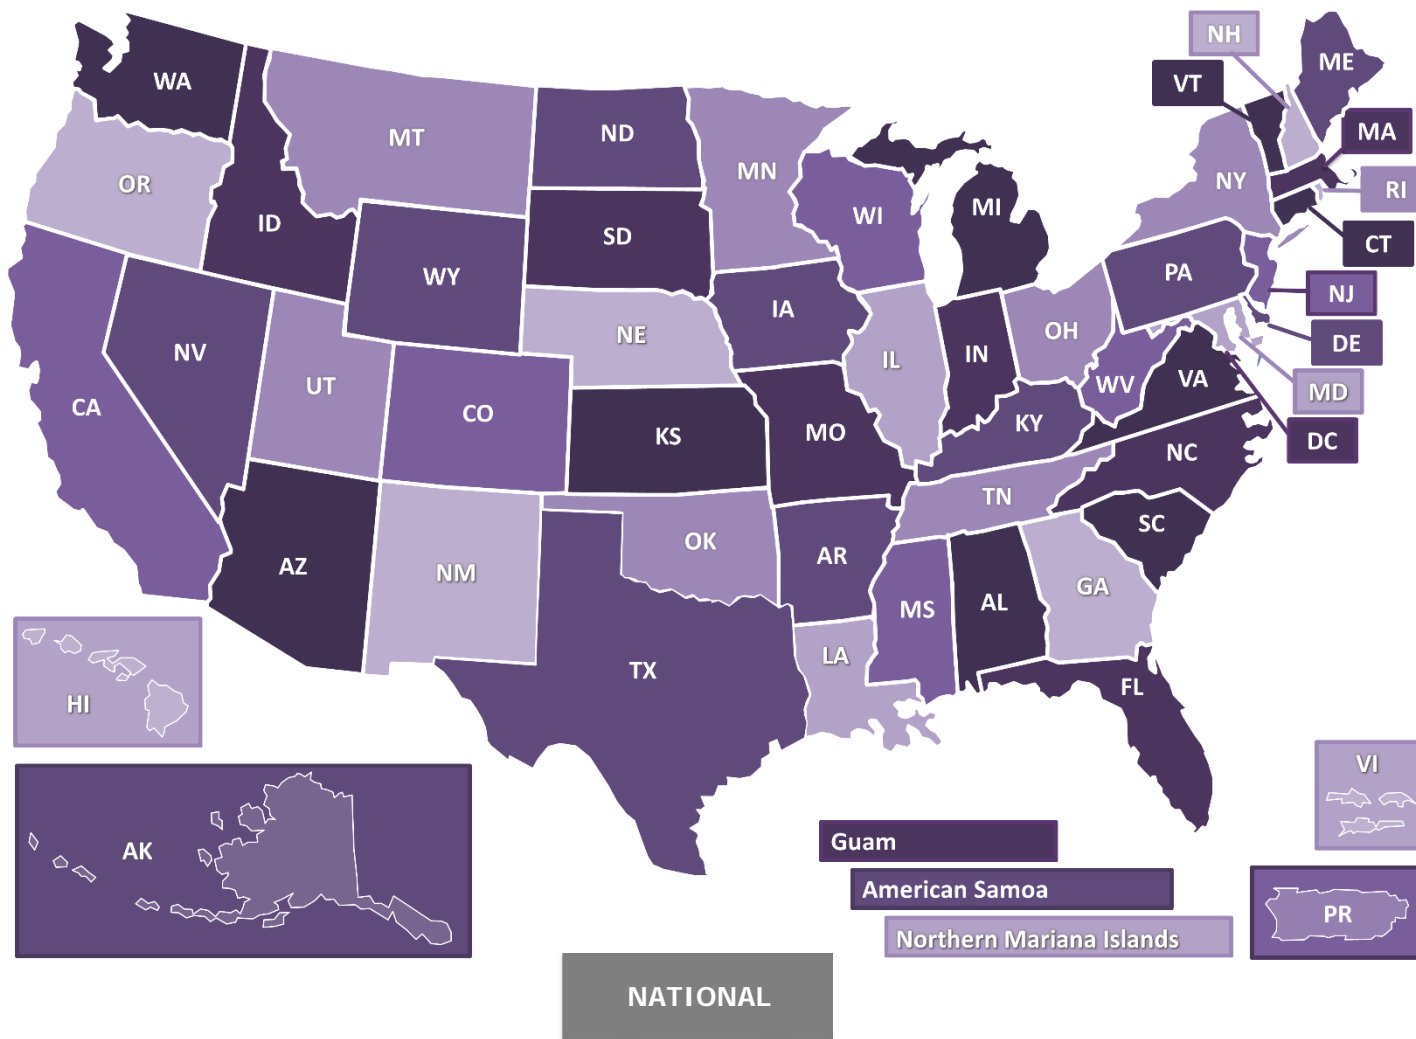

Schools are also encouraged to utilize other financial instruments to supplement the replacement of lead service lines and fixtures. The issuance of bonds is a common strategy that schools can use to finance capital improvement projects. In most states, the issuance of bonds by public schools requires voter approval via ballot initiative. Additionally, some state and federal programs offer Credit Enhancement Programs or tax credit bonds to schools that can reduce the cost of borrowing funds for certain projects. Examples include [Qualified School Construction Bonds](#) (available nationwide) and the North Dakota Department of Public Instruction [Credit Enhancement Program](#). If you are interested in pursuing other financial mechanisms to accomplish your lead reduction goals, seek out a financial authority within your school district to learn more about your school's financial strategy.

Lead Testing and Tools

Most of the listed opportunities are in the form of financial support, but there are also resources that provide free tools and guidance documents for training and testing purposes. The [3Ts for Reducing Lead in Drinking Water Toolkit](#) provides guidance to educate and train staff on implementing lead testing programs. Further webinar and training sources can be found on the [Lead Service Line Replacement Collaborative](#) website, and others. For free sampling materials, contact [EMSL Analytical](#) for lead in water sampling bottles and your water utility for potential testing services or test kits. Additional funding sources, training and outreach materials as well as other resources can be found in the Water Finance Center's Clearinghouse. These free resources are beneficial for implementing an effective lead sampling and remediation plan when monies granted have specific eligible spending categories (e.g., a grant can only be spent on direct construction/renovation costs).

Funding Opportunities in the United States

Click on a state to view potential funding sources.

National Table of Contents

[Capital Impact Partners](#)

This institution provides funds to charter schools in the form of loans.

[Carnegie Corporation of New York](#)

The Foundation provides grants to 501(c)(3) tax exempt or equivalent organizations for non-construction related spending. Grants are given by invitation only.

[Cedar Tree Foundation](#)

The Foundation provides grants to programs designed to reduce children's exposure to toxic chemicals in their environment. Funding opportunities are issued with a request for proposal.

[Centers for Disease Control \(CDC\) Prevention and Public Health Funds \(PPHF\)](#)

PPHF is administered by CDC and funding is allocated to a select grouping of states every year. A portion of the PPHF is used to fund lead poisoning prevention programmatic activities. To learn if your state is currently slotted to receive PPHF funding and to find contact information for the program's administrators, visit the organization's website.

[Charles Lafitte Foundation](#)

The Foundation provides grants to projects focused on children's advocacy. Applicants must be a certified 501(c)(3) organization.

[Charter Impact Fund](#)

This program provides loans to charter schools. Qualified charter schools must have strong academic and operating performance.

[Charter Schools Development Corporation Direct](#)

This program provides loans to public charter schools with 501(c)(3) designation.

[Citigroup Foundation](#)

The Foundation provides grants to projects focused on improving cities facing challenges. Eligible applicants must be a registered 501(c)(3), a registered school, university, or a government entity to apply.

[Civic Builders](#)

This program provides loans to charter schools to cover up to 90% of renovation costs.

[Cornell Douglas Foundation](#)

The Foundation provides small grants to promote environmental health and justice. Eligible applicants must be a registered non-profit organization.

[Corning Incorporated Foundation](#)

The Foundation provides grants to a variety of programs, including programs that target at-risk youth. Eligible projects must be community-based programs where Corning has a strong presence.

National
Opportunities

Map

[Cruise Industry Charitable Foundation](#)

The Foundation provides grants to a variety of programs, including programs improving public health. Eligible applicants must be a registered non-profit organization.

[EPA Lead Testing in Schools and Child Care Program Drinking Water Grant](#)

Authorized under the Water Infrastructure Improvements for the Nation Act or “WIIN Act” of 2016 (SDWA Section 1464(d)), the EPA has established a voluntary grant program to assist local and tribal educational agencies and child care programs in testing for lead in drinking water at schools and child care programs. This Lead Testing in Schools and Child Care Program Drinking Water Grant program will include approximately \$43.7 million in funding; with approximately \$2.8 million to be allocated to assist tribal educational agencies. The grant program is designed to reduce exposure of children, who are most vulnerable, to lead in drinking water at schools and child care facilities, utilizing the EPA’s 3Ts for Reducing Lead in Drinking Water (3Ts: Training, Testing, and Taking Action) guidance, or an equivalent state program. In accordance with the America’s Waters Infrastructure Act (AWIA) of 2018 section 2006, priority must be given to assisting schools and child care facilities that are in low-income areas. AWIA also directs the EPA to provide technical assistance to recipients of the grant.

[EPA Water Infrastructure Finance and Innovation Act \(WIFIA\)](#)

WIFIA is intended to spur investment in water and wastewater infrastructure by providing affordable loans to significant projects on both the regional and national level. To qualify for WIFIA supplemental loans, projects must be deemed creditworthy and must cost at least \$20 million (or at least \$5 million for projects serving communities of fewer than 25,000 people).

[Farmer's Insurance Thank America's Teachers](#)

This opportunity provides grants to programs that help educate students. Applicants must be a teacher at the respective school holding the program.

[Ford Foundation](#)

The Foundation provides a variety of grant opportunities with unique priorities.

[Halliburton Foundation](#)

The Foundation provides grants to projects that promote health and education. Eligible applicants must be a registered 501(c)(3) or a political subdivision (schools, municipal foundations, etc.).

[Highmark Foundation](#)

The Foundation provides grants for lead testing but not remediation. Eligible applicants must be a registered non-profit organization.

[International Paper Company Foundation](#)

The Foundation provides grants for a variety of projects, including the promotion of health and wellness. Eligible projects must be in proximity of an International Paper location.

[Kopp Family Foundation](#)

The Foundation provides grants to programs that promote education and youth development.

**National
Opportunities**

Map

[Lowe's Toolbox for Education](#)

This program provides grants to schools for a variety of projects, including facility renovations and safety improvements. Grants are given by invitation only.

[Omron Foundation, Inc.](#)

The Foundation provides grants to a variety of programs, including ones improving education and health. Eligible applicants must be a registered non-profit organization.

[Reiman Foundation](#)

The Foundation has a variety of funding priorities, including education and health. Eligible applicants must be a registered non-profit organization.

[Robert Wood Johnson Foundation](#)

The Foundation provides a variety of grants for projects that promote health.

[SC Johnson Fund, Inc.](#)

The Foundation provides grants for a variety of priorities, including health and well-being. Eligible applicants must be a registered 501(c)(3) or government entity.

[Sony USA Foundation](#)

The Foundation provides grants for a variety of project types. Applicants must have 501(c)(3) non-profit status and submit a written proposal.

[The Harry Chapin Foundation](#)

The Foundation has a wide variety of funding opportunities, including education and community. Applicants must be designated as a 501(c)(3) to apply for funding.

[The Home Depot](#)

This program offers support in the form of Home Depot gift cards to supplement capital improvement projects. Applicants must be designated as 501(c) or tax-exempt public service agencies to qualify for funding.

[The Kresge Foundation](#)

The Foundation offers grants in six core areas, including health, environment, and education. Applicants must be a non-profit organization, government entity, or faith-based organization to be eligible for funding.

[The Lawrence Foundation \(CA\)](#)

The Foundation has a wide variety of funding priorities, including the environment, and offers grants to non-profit organizations and public schools.

[The Max and Victoria Dreyfus Foundation](#)

The Foundation makes small to medium-sized grants available to non-profit organizations and schools located within the US.

National
Opportunities

Map

[The Michael and Susan Dell Foundation](#)

The Foundation has a wide variety of funding opportunities in areas related to youth education, health, and the environment. Applicants must be designated as a non-profit to qualify for funding.

[The Ronald W. Burkle Foundation](#)

The Foundation has a wide variety of funding priorities, including education. Eligible organizations must be designated as 501(c)(3) and must submit a Letter of Intent (LOI) before applying.

[The Standard Charitable Foundation Grants](#)

The Foundation has multiple funding priorities, including healthy communities and education. Funding can be used to support a wide variety of programs, including capital and program support. Applicants must be a designated non-profit to be eligible for funding.

[The Tony Robbins Foundation](#)

The Foundation has a wide variety of funding priorities, including youth. To be eligible for funding, applicants must be designated as a 501(c)(3).

[The William Bingham Foundation](#)

The Foundation makes grants available exclusively to US public charities. Most grants are given by invitation only.

[US Department of Agriculture \(USDA\) Rural Development Community Facilities Direct Loan & Grant Program](#)

This program is administered by the USDA and is targeted at community facilities in small to mid-sized communities throughout the country. Any public entity that operates a community facility, as defined by the program, can apply to receive funding for up to 75% of costs for construction and renovation-related projects.

[W.K. Kellogg Foundation](#)

The Foundation offers a variety of grants that each have varying funding priorities. Visit the Foundation's website to learn more about each grant opportunity and if your organization is eligible for funding.

[Wells Fargo \(Formerly Wachovia Foundation, Inc.\)](#)

The Foundation offers environmental grants to both non-profits and universities. The Foundation's funding priorities vary by state, and information about specific funding priorities in your state can be found by visiting their website.

[Westinghouse Charitable Giving Program](#)

This program offers funding support to projects related to education with a focus on STEM, environmental sustainability, or community safety.

Funding Type(s): Grant

EPA Lead Testing in Schools and Child Care Program Drinking Water Grant

Opportunity Description: Authorized under the Water Infrastructure Improvements for the Nation Act or "WIIN Act" of 2016 (SDWA Section 1464(d)), the EPA has established a voluntary grant program to assist local and tribal educational agencies and child care programs in testing for lead in drinking water at schools and child care programs. This Lead Testing in Schools and Child Care Program Drinking Water Grant program will include approximately \$43.7 million in funding; with approximately \$2.8 million to be allocated to assist tribal educational agencies. The grant program is designed to reduce exposure of children, who are most vulnerable, to lead in drinking water at schools and child care facilities, utilizing the EPA's 3Ts for Reducing Lead in Drinking Water (3Ts: Training, Testing, and Taking Action) guidance, or an equivalent state program.

Special Notes: In accordance with the America's Waters Infrastructure Act (AWIA) of 2018 section 2006, priority must be given to assisting schools and child care facilities that are in low-income areas. Includes a tribal allotment.

National
Opportunities

Map

Funding Cycle: Annually (through 2021).

Estimated Funding: \$43,700,000 for FY 2018 & FY 2019.

Eligibility: The EPA has received Notices of Intent to Participate (NOIPs) from all 50 states and the District of Columbia for FY 2018 and FY 2019. The grant allotments are available on the EPA's website and are based on a funding formula that includes factors for population, disadvantaged communities, and lead exposure.

Eligible Organization Type(s): Grants will be awarded to states to assist local educational agencies. Local educational agencies include agencies as defined in section 8101 of the Elementary and Secondary Education Act of 1965; tribal education agencies as defined in section 3 of the National Environmental Education Act; and owners or operators of child care facilities.

Funding Priorities: Testing lead in drinking water in schools and child care programs.

Website: <https://www.epa.gov/dwcapacity/wiin-grant-lead-testing-school-and-child-care-program-drinking-water>

Contact: This program is being run by the states and the District of Columbia. Schools and child care facilities cannot apply directly to the EPA for funding. View contacts for this grant here:

<https://www.epa.gov/dwcapacity/wiin-2107-grant-contacts>

Funding Types: Grant

EPA Water Infrastructure Finance and Innovation Act (WIFIA)

Opportunity Description: WIFIA is intended to spur investment in water and wastewater infrastructure by providing affordable loans to significant projects on both the regional and national level. To qualify for WIFIA supplemental loans, projects must be deemed creditworthy and must cost at least \$20 million (or at least \$5 million for projects serving communities of fewer than 25,000 people).

Special Notes: WIFIA can also supplement, not replace, loan assistance that is available through State Revolving Fund (SRF) programs.

Funding Cycle: Annually.

Minimum project cost: \$5 Million (communities < 25,000 people) - \$20,000,000 (communities > 25,000 people).

Estimated Yearly Funding: \$55,000,000.

Source: <https://www.epa.gov/wifia>

Eligible Organization Type(s): Local, state, tribal, and federal government entities, partnerships and joint ventures, corporations and trusts, and Clean Water and Drinking Water State Revolving Fund (SRF) programs.

International Paper Company Foundation

Opportunity Description: The Foundation provides grants for a variety of projects, including the promotion of health and wellness. Eligible projects must be in proximity of an International Paper location.

Special Notes: "Certain municipal, county, state and federal entities (such as a school district or fire department), are eligible if a fiscal conduit letter from an affiliated tax-exempt organization (such as a school district or municipality) is attached to the online application. The letter must state that the affiliated tax-exempt organization will disperse Foundation funds for use on the approved project as The Foundation directs" (source: <http://www.internationalpaper.com/company/regions/north-america/ip-foundation-usa/apply-for-a-grant>).

Funding Cycle: In Memphis, applications are reviewed April 1 and September 1. All other US locations, applications are accepted through mid-September.

Grant Min: \$1,000. **Grant Max:** \$500,000.

Estimated Fund Assets: \$38,800,000.

Eligibility: The Foundation requires that applicants be located in communities where International Paper has an employee presence and within the vicinity of the firm's operations.

Eligible Organization Type(s): Non-profit organizations and other entities with a fiscal host as a 501(c)(3) status.

Funding Priorities: Education, hunger, health and wellness, and disaster relief.

The Greater Washington Community Foundation

Opportunity Description: The Foundation has a wide variety of funding priorities and exclusively funds non-profit organizations in the greater Washington, DC metropolitan region.

Special Notes: The Foundation provides grants through a number of different initiatives. Through the Transforming Neighborhood Initiative Fund for Community Innovation, the Foundation has supported Prince George's County Public Schools and school-and community-based organizations with operating, program funding, and capacity building support.

The Foundation requires organizations submit a Letter of Intent (LOI).

Funding Cycle: Three cycles--Winter, Spring, Summer, as well as multiple deadlines for individual grants.

Grant Min: \$1,000. Grant Max: \$5,000,000.

Estimated Fund Assets: \$342,000,000.

Eligible Organization Type(s): Non-profit organizations.

Funding Priorities: General support.

Address: 1325 G Street NW, Suite 480, Washington, DC 20005

Website: <https://www.thecommunityfoundation.org/>

Contact Phone: (202) 955-5890

Email: info@thecommunityfoundation.org

Funding Type(s): Grant

*This opportunity is also available to Maryland and Washington, DC.

The Morris and Gwendolyn Cafritz Foundation

Opportunity Description: The Foundation funds projects relating to education, health, and the environment in the Washington, DC metropolitan area. Applicants should visit the organization's website to learn if they are eligible for funding.

Special Notes: Funding Cycle: March 1, July 1, and November 1.

Grant Min: \$10,000. Grant Max: \$1,000,000.

Estimated Fund Assets: \$346,900,000.

Eligibility: The website provides an eligibility quiz: <http://www.cafritzfoundation.org/apply/eligibility-quiz>.

Eligible Organization Type(s): Non-profit public charities.

Funding Priorities: Education, health, and environment.

Address: 1825 K Street N.W. Suite 1400, Washington, DC 20006

Virginia Drinking Water State Revolving Fund

Opportunity Description: This program, created by the 1996 Amendments to the Safe Drinking Water Act (SDWA), provides financial support to help water systems and states achieve public health protection. States rank the project applications they receive from water systems and produce a project priority list for funding. Read more online about the specific schedule and requirements for Virginia.

Eligibility: Applicant will be placed on a Project Priority List after applying.

Eligible Organization Type(s): Privately-owned* and publicly-owned community water systems and non-profit non-community water systems.

*Some states may have law(s) that prohibit funding privately owned water systems.

Funding Priorities: Planning and design, construction, and rehabilitation.

Address: 109 Governor Street, 6th Floor, Richmond, VA 23219

U.S. Territories Table of Contents

[Territorial Component of the Drinking Water State Revolving Fund Program](#)

Under the Territorial* component of the DWSRF Program, the EPA is authorized to provide grants to improve drinking water infrastructure in the following U.S. territories: American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands. The territories share a 1.5% allotment of the DWSRF appropriation from Congress. This 1.5% allotment is divided amongst the territories using a formula based on several factors, including population, geographical area, and infrastructure needs. The funds for American Samoa, Guam, the Northern Mariana Islands are managed by EPA Region 9, and the funds for the U.S. Virgin Islands are managed by EPA Region 2.

*Under the DWSRF Program, Puerto Rico is considered a state and operates its own state revolving fund.

Opportunity Description: Under the Territorial* component of the DWSRF Program, the EPA is authorized to provide grants to improve drinking water infrastructure in the following U.S. territories: American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands. The territories share a 1.5% allotment of the DWSRF appropriation from Congress. This 1.5% allotment is divided amongst the territories using a formula based on several factors, including population, geographical area, and infrastructure needs. The funds for Guam are managed by EPA Region 9.

*Under the DWSRF Program, Puerto Rico is considered a state and operates its own state revolving fund.

Eligible Organization Type(s): Privately-owned* and publicly-owned community water systems and non-profit non-community water systems.

*Some states or territories may have law(s) that prohibit funding privately owned water systems.

Funding Priorities: Planning and design, construction, and rehabilitation.
