Today, there are over one million kids who have been poisoned by lead from old paint. Home repairs that create even a small amount of lead dust are enough to poison your child and put your family at risk. If you live in a home or apartment that was built before 1978, make sure you renovate right with a contractor that is Lead-Safe Certified in accordance with the new EPA guidelines for any renovation or repair project. They'll know how to protect your family.
