

EPA Region 5 EDD format version 3.0.17 Release Notes

In the new EPA Region 5 EDD format version 3.0.17, we added in new dataset and sections in the EDD format. Please check the following changes in the new EDD format:

1. Field

New section: **EPAR5AlternatePosition_v3**

-This section supports the EQUIS alternate position of the sampling locations in the EDD format.

The alternate coordinates are separated from the EPAR5LOC_v3 section and it is not required. The location section (EPAR5LOC_v3) is required for the primary coordinates in NAD83. The secondary coordinates will be reported in the EPAR5AlternatePosition_v3.

New section: **EPAR5LOCPARAM_V3**

-This section shows the location parameters. This is an optional dataset.

New Section: **EPAR5SAMPLEPARAM_V3**

-This section shows the sampling parameters. This is an optional dataset.

2. Vapor Intrusion

This new section contains data of sampling taken inside of the contaminated sites or buildings.

EPAR5_VI_Bldg_Address_V3: Address and building information

EPAR5_VI_BLDG_INSPECTION_V3: Building specific data

EPAR5_VI_BLDG_PARAMETERS_V3: contains data that relate the individual samples to the batch identifier.

EPAR5_VI_LOCATIONS_V3: contains information about the location.

EPAR5_VI_OUTDOOR_LOCATIONS_V3: contains information about the location.

EPAR5_VI_SAMPLES_V3: sampling locations.

EPAR5_VI_TESTRESULTSQC_V3: contains data concerning analytical test performed on samples with quality control data elements.

EPAR5_VI_BATCHES_V3: contains data that relate the individual samples to the batch identifier.

All fields and requirement can be found in the Comprehensive manual, which will be updated in the week of January 13, 2020.
