How to change a EDD file from "zip" to "piz"?

It is a nice that you check your EDD using the EDP and Region 2 EDD format. We use the Sign and Submit process in EQuIS and save the EDD as "Date.EPAprogramID.EPARegion2.zip".
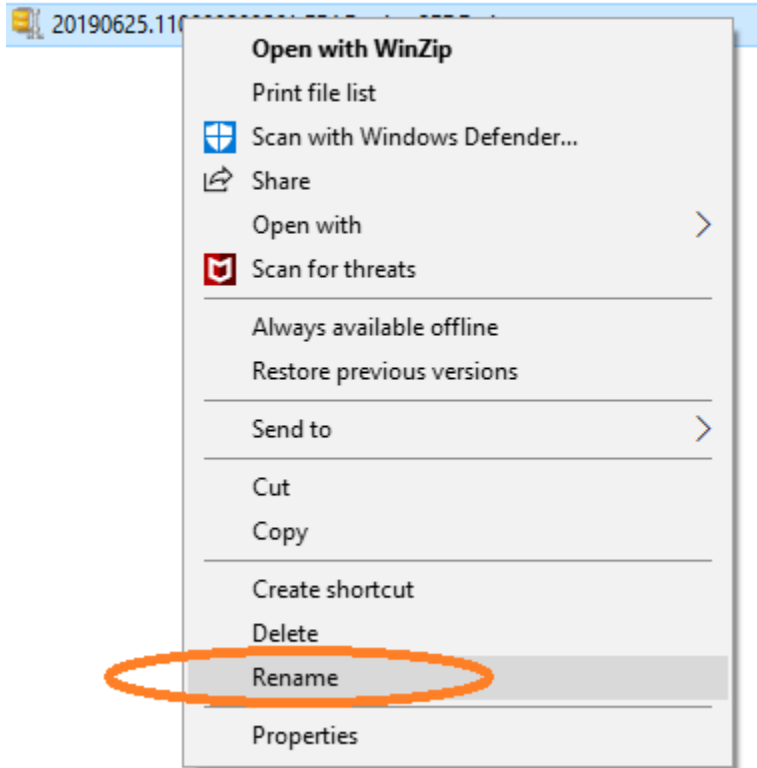

For example:

Name

20190625.11388899561.EPARegion2EDD.zip

Then, right click to the file name and click on "Rename"

Name

20190625.110

Open with WinZip

Print file list

Scan with Windows Defender...

Share

Open with   >

Scan for threats

Always available offline

Restore previous versions

Send to   >

Cut

Copy

Create shortcut

Delete

Rename

Properties

The file name part is selected

Name

20190625.11 388299561.EPARegion2EDD.zip

But we want to change the "zip" word, so we need to select the word "zip", which will look like the following:

Name

20190625.11388299561.EPARegion2EDD.

Now you can type the word "piz" and the file extension will change. You will receive a message telling you that your file may not be working if you change the file extension to "piz". You can click "OK" and then your file should look like the following:

Name

20190625.11388299561.EPARegion2EDD.piz

After you renamed the file you can send the "piz" EDD file to

Region2_equisedd@epa.gov

Reminder: you can always change the file extension back to "zip".
