## EPA BROWNFIELDS RESOURCES

*Through grants, technical assistance and educational outreach, U.S. EPA provides multiple resources to prepare brownfields for safe redevelopment.*

### PROPERTY CLEANUP

EPA funds cleanup of contaminated properties to reduce risks to public health and help facilitate redevelopment.

### CLEANUP PLANNING

EPA funds cleanup planning and coordination with regulatory agencies to help find solutions for safe redevelopment.

### ENVIRONMENTAL ASSESSMENTS

EPA funds assessments of historic property use to determine if contaminants are present and to estimate the cost of addressing environmental concerns on a property.

### FINANCING SCENARIOS

EPA funds identification of resources and the development of multi-layered funding plans to support brownfields cleanup and reuse.

### PRE-DEVELOPMENT PLANNING

EPA funds market studies, land use assessments, infrastructure evaluations and other studies to determine the types of redevelopment projects a brownfield can financially support.

### REUSE CONCEPTS

EPA funds brownfields site reuse visioning and conceptual design development to articulate specific redevelopment goals.

### COMMUNITY ENGAGEMENT

EPA funds community outreach and participation to ensure residents have a role in defining future projects that shape their neighborhood.

### WORKFORCE DEVELOPMENT

EPA funds training in environmental technician skills to support local job hiring in environmental cleanup and community revitalization.

### PARTNERSHIP BUILDING

EPA funds coordination across stakeholders and agencies to build broad support for brownfields redevelopment.
