				<p>f) Question: So if I wanted to use this kill grass & weeds and I wanted to use a 30 gallon tank sprayer, what would the dilution rate be & how many gallons needed? Answer: Use in full sunshine. Completely saturate grass & weeds. There's no need to dilute the vinegar; just add to a sprayer and start using the product. This kills all the plants in the area. Avoid spraying on any grass and plants you wish to protect. It doesn't leave residue in the soil that could prevent new plants from growing. A 30-gallon tank sprayer should cover approximately a half acre & you would need 30 gallons of vinegar. That's a little less than half a football field. see less - By EcoClean Solutions SELLER on February 6, 2019</p> <p>g) This powerful vinegar solution is typically reserved for agricultural and industrial tasks</p> <p>h) Whether you want a handy garden helper or a powerful household cleaner, you can trust 30% Pure Vinegar to get the job done—naturally</p>	<p>g) SAFE, STRONG AND RELIABLE</p> <p>h) A safer alternative to harmful chemicals</p> <p>i) Whether you want a handy garden helper or a powerful household cleaner, you can trust 30% Pure Vinegar to get the job done—naturally</p> <p>j) Free of Harmful Chemicals</p>
