

Engines and Vehicles Compliance Information System (EV-CIS) Log of XML Schema Changes Made for Non-Road Compression Ignition 31.0 – 04/30/2021

Purpose

This document identifies XML schema modifications to the Engines and Vehicles Compliance Information System (EV-CIS) Non-Road Compression Ignition family of schemas. Modifications that involve the addition of new schema components were also made according to the current schema development paradigm per EPA XML data standard [GD2-E]. For new and modified data elements, the annotation following the data element name references the corresponding data element type description. Note that individual data elements may be used in more locations in the schemas than defined in the shared data element file.

NR Modified XML Files

EN_VER_NR_SharedDataElements_v0.95.xsd

XML Shared Data Element and Data Type File Modifications

The annotation following the data element name references the corresponding data element identifiers in the data requirements (DR) spreadsheet. Note that some data elements may be used in more locations in the schemas than defined in the DR spreadsheet.

EN_VER_NR_SharedDataElements_v0.95.xsd

The following data element updates were implemented:

- The data type for data element TestLabCode [1 to 999 (NRCI-TI164)] was changed to Integer3DigitPositiveType.
