

ENVIRONMENTAL PROTECTION AGENCY**Federal Agency Hazardous Waste Compliance Docket**

AGENCY: Environmental Protection Agency.

ACTION: EPA initial list of Federal facilities under CERCLA section 120(c).

SUMMARY: Section 120(c) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA), requires the Environmental Protection Agency (EPA) to establish a Federal Agency Hazardous Waste Compliance Docket that contains certain information regarding Federal facilities which manage hazardous waste or have potential hazardous waste problems. The following list identifies the Federal facilities to be included in the initial docket. This list of facilities will be updated every six months as new facilities are reported to EPA by Federal agencies. For each Federal facility that appears on the docket, the responsible Federal agency must complete a Preliminary Assessment to determine if response actions are necessary.

DATE: This list is current as of January 12, 1988.

FOR FURTHER INFORMATION CONTACT: RCRA/Superfund Hotline Telephone: (800)424-9348 toll-free, or 382-3000 Washington, DC and FTS.

SUPPLEMENTARY INFORMATION:**Table of Contents**

- I. Introduction
- II. Purpose of Docket
- III. Definition of Facility for Docket Purposes
- IV. Process for Establishing the Docket
- V. Facilities Not Included
- VI. Information Contained on Docket Listing

I. Introduction

The Federal Agency Hazardous Waste Compliance Docket ("docket") is required to be established under section 120(c) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9620(c), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA). The docket will contain information on Federal facilities that is submitted by Federal agencies to the U.S. Environmental Protection Agency ("EPA" or "the Agency") under sections 3005, 3010, and 3016 of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6925, 6930, and 6937.

and under section 103 of CERCLA. The initial list of Federal facilities to be updated every six months, beginning with the publication of this notice, to include new facilities on the docket that are subsequently reported to EPA by Federal agencies. The information submitted to EPA on each Federal facility, as required by the above provisions, will be contained in docket repositories located in the EPA Regional office where the facility is found. A complete national index of the information found in the Regional docket repositories will be maintained at EPA Headquarters in Washington, DC, and made available to the public. Although the Regional docket repositories are not yet in place, the Agency plans to have the Region I repository open to the public by January 1988, Region II by February 1988, and the remaining Regional repositories opened in a phased manner thereafter, with all ten repositories due to be open to the public by late spring. Additional information on how to access information found in the docket repositories will be published later. Until that time, interested parties should contact the RCRA/Superfund Hotline for information on how to arrange for review and copying of specific documents.

II. Purpose of the Docket

The purpose of the docket is three-fold: (1) To identify the universe of Federal facilities that must be evaluated to determine if they pose risk to public health and the environment; (2) to compile and maintain the information submitted to EPA on these facilities under the provisions listed in section 120(c) of CERCLA; and (3) to provide a mechanism to make this information available to the public.

It is important to clarify that the docket represents those Federal facilities that may be contaminated with hazardous substances. For instance, some facilities may have been reported under RCRA section 3010 simply because they manage or have managed hazardous waste, and not necessarily because contamination has occurred. Federal agencies have been delegated the authority under Executive Order 12580 to conduct a Preliminary Assessment (PA) for each of their facilities on the docket within 18 months of the date of enactment of SARA (i.e., April 17, 1988) as set forth in CERCLA section 120(d). The Agency has alerted Federal agencies of this requirement. EPA must ensure that the PAs are completed. This initial assessment will

help determine if a release has occurred or if a significant threat of a release is present, and whether the facility is on the CERCLA National Priorities List (NPL). Thus, the docket list is not intended to serve as an NPL for Federal facilities. It will, however, identify those Federal facilities that must be assessed. If the PA indicates that additional evaluation of the facility is necessary, the responsible Federal agency must provide to EPA, by April 1988, all the information necessary for EPA to perform a full Hazard Ranking System (HRS) evaluation of the facility. EPA will then propose the facility for inclusion on the NPL if it meets the established criteria.

III. Definition of Facility for Docket Purposes

EPA has defined a "Federal facility," for the purpose of docket listing, based primarily on the RCRA definition of facility (see 47 FR 32288-9 (1982) and 50 FR 26712 (1985)). This property-based definition encompasses all contiguous land that is owned by a department, agency, or instrumentality of the United States. The definition includes all individual sites or units on the owner's property, including Government-owned, contractor-operated sites. EPA believes that the PA should be completed for the entire Federal facility as defined, not just for the portions or units that may have been reported. The PA should also address contamination which may be emanating from the facility onto adjacent property, consistent with CERCLA section 120(b).

EPA's use of the property-based definition is an attempt to reconcile the definition of "facility" in RCRA with the definition under CERCLA. This was necessary because information from both programs will be contained in the docket. The use of this definition also stems from the designations that are employed by the Federal agencies themselves when carrying out their programs. Most Federal agencies have specific landholdings under their jurisdiction that are confined within property boundaries, such as national parks and Department of Defense installations. Defining a Federal facility in these terms will also aid its identification by the public.

The Bureau of Land Management (BLM) appears to be the only Federal agency whose property does not conform well to EPA's facility definition. BLM owns extensive and scattered lands, particularly in the western United States, which are difficult to divide into small units of property that can be

termed "facilities" as defined above. Therefore, EPA has decided to list the individual sites owned by BLM (including sites leased to private parties) that are potentially contaminated. EPA also believes that the public can more readily identify BLM's property in the docket if individual sites are listed.

IV. Process for Establishing the Docket

In compiling the list which is being published today, EPA extracted the names and addresses of facilities from three EPA data bases which contain Federal facility information submitted under the four provisions listed in section 120(c). All Federal agencies were given the opportunity to comment on the draft list to ensure its accuracy. EPA has begun compiling the information submitted for each listed facility for inclusion in the appropriate EPA Regional docket repository. Confidential business information, as defined in 40 CFR Part 2, Subpart B (1986), will not be available for public inspection.

The following is a brief description of the four provisions that require Federal agencies to report information to EPA:

1. RCRA section 3005 establishes a permitting system for hazardous waste treatment, storage, and disposal (TSD) facilities based on EPA standards to protect human health and the environment. Information submitted

under RCRA section 3005 consists of the TSD facility permit application materials.

2. RCRA section 3010 requires waste generators, transporters, and TSD facility owner/operators to notify EPA of their hazardous waste activities.

3. RCRA section 3016 requires Federal agencies to submit to EPA an inventory of hazardous waste sites that the Federal agencies own or operate, or have owned or operated in the past.

4. CERCLA section 103(a) requires the owner or operator of a vessel or facility to notify the National Response Center (NRC) of a release of reportable quantities of hazardous substances. The NRC conveys this information to all appropriate government agencies, including EPA. In addition, CERCLA section 103(c) required an initial reporting by June 9, 1981 of known or suspected hazardous waste sites.

V. Facilities Not Included

EPA has decided not to include in the docket at this time the following three categories of facilities:

1. Facilities formerly owned by a Federal agency and now privately owned. However, facilities that are now owned by another Federal agency will remain on the docket with the responsibility resting with the current owner.

2. Small Quantity Generators (SQG's) reported under RCRA section 3010 that have never produced more than 1000 kg/month of hazardous waste.

3. Facilities that are solely transporters as reported under RCRA section 3010.

The Agency will be collecting additional information in the coming months on whether or not to include one or more of these categories in future updates to the docket, and may solicit public comment on the issues at a later date.

VI. Information Contained on Docket Listing

The list below is organized by State and then grouped alphabetically within each State by the Federal agency responsible for the facility. This information is then followed by the facility name and address (as verified by the Federal agency), the statutory provision(s) under which the facility was reported to EPA (indicated by an "X" in the appropriate column(s)), and the EPA Region where the facility is located.

J.W. McGraw,

Acting Assistant Administrator, Office of Solid Waste and Emergency Response.

Date: February 8, 1988.
