

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3808-8]

Federal Agency Hazardous Waste Compliance Docket**AGENCY:** Environmental Protection Agency.**ACTION:** Notice of third update of the Federal Agency Hazardous Waste Compliance Docket pursuant to CERCLA section 120(c).

SUMMARY: Section 120(c) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA), requires the Environmental Protection Agency (EPA) to establish a Federal Agency Hazardous Waste Compliance Docket that contains certain information regarding Federal facilities that manage hazardous waste or from which hazardous substances may be or have been released. CERCLA requires that the docket be updated every 6 months as new facilities are reported to EPA by Federal agencies. The following list identifies the Federal facilities to be included in the third update of the docket (i.e., facilities not previously listed on the docket and reported to EPA since the last update to the docket, December 15, 1989). EPA policy specifies that for each Federal facility that is included on the docket during an update, the responsible Federal agency must complete a preliminary assessment and, if warranted, a site inspection, within 18 months of publication of this notice. Such remedial site evaluation activities will help determine whether the facility should be included on the National Priorities List and will provide EPA and the public with valuable information about the facility. In addition to the update list, this notice includes a section comprising revisions (i.e., corrections and deletions) to the initial docket list and the first update. At the time of publication of this notice, the new total number of Federal facilities listed on the docket is 1296.

DATES: This list is current as of April 13, 1990.**FOR FURTHER INFORMATION CONTACT:** Federal Facilities Docket Hotline. Telephone: (800) 548-1016 toll free.**SUPPLEMENTARY INFORMATION:**

- IV. Facilities Not Included

V. Information Contained on Docket Listing
VI. Proposed Docket Modification**I. Introduction**

The Federal Agency Hazardous Waste Compliance Docket ("docket") was required to be established under Section 120(c) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9620(c), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA). The docket contains information on Federal facilities that is submitted by Federal agencies to the U.S. Environmental Protection Agency ("EPA" or "the Agency") under sections 3005, 3010, and 3016 of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6925, 6930, and 6937, and under section 103 of CERCLA. The term "Federal facility" remains unchanged from that used for the initial docket and is based primarily on the RCRA definition of facility (see 47 FR 32288-9 (1982), 50 FR 28712 (1985), and 53 FR 4280 (1988)). The docket serves, among others, three major purposes: (1) To identify the universe of Federal facilities that must be evaluated to determine whether they pose a risk to public health and the environment sufficient to warrant inclusion on the National Priorities List (NPL); (2) to compile and maintain the information submitted to EPA on these facilities under the provisions listed in Section 120(c) of CERCLA; and (3) to provide a mechanism to make this information available to the public.

The initial list of Federal facilities to be included in the docket was published on February 12, 1988 (53 FR 4280). The first update was published on November 16, 1988 (53 FR 46364). The second update was published on December 15, 1989 (54 FR 51472). The third update of the docket is being published today.

Today's notice is divided into three major sections: (1) Corrections, (2) deletions, and (3) additions. The docket corrections section lists changes to information on facilities already listed on the docket. The removals section lists facilities that EPA is removing from the docket. The additions section lists newly identified facilities that have been reported to EPA since the last update and are now being included on the docket.

The information submitted to EPA on each Federal facility is contained in docket repositories located in the EPA Regional Offices where the facility is found. (See 53 FR 4280 (1988) for a description of the information required under these provisions.) Each repository contains the documents submitted to

EPA under the reporting provisions (and correspondence relevant to the reporting provisions) for each facility. A complete national index of the information found in the Regional docket repositories will be maintained at EPA Headquarters in Washington, DC, and made available to the public. This index will also be available for public review at each Regional repository. Contact the Federal Facilities Docket Hotline (800-548-1016) for information on repository locations and arrangements for reviewing and copying specific documents.

II. Revisions to the Initial Docket**1. Corrections**

Necessary changes to correct the initial docket were identified by both EPA and Federal agencies. These changes vary from simple address and spelling changes to facility names and ownership corrections. Many are simply typographical or typesetting errors. For each facility with a correction, the original entry as it appeared in the February 12, 1988, notice, the November 16, 1988, update, or the December 15, 1989, update is shown directly above the corrected entry for easy comparison.

2. Deletions

Today, 28 facilities are being deleted from the docket for a number of reasons, such as incorrect reporting of hazardous waste activity, change in Federal ownership, and exemption as a small quantity generator (SQG) under RCRA (40 CFR 262.44). Facilities being deleted will no longer be subject to the requirements of CERCLA section 120(d).

3. Additions

Today, 59 facilities are being added to the docket primarily because of new information obtained by EPA indicating that a facility should now be listed (e.g., recent reporting of a facility pursuant to RCRA sections 3005, 3010, or 3016 or CERCLA section 103). In some cases, facilities were inadvertently omitted from the initial list or prior updates. For all facilities being added in this section, it is EPA's policy that the responsible agency must complete the required PA, and, if warranted, a site inspection (SI), within 18 months from the date of this publication.

Of the 59 facilities which are being added to the docket, four are facilities which are listed in the Regional docket repositories but which were mistakenly omitted from the November 16, 1988, Federal Register notice. These four facilities, Monticello Uranium Mill Tailings Site, DOE, Utah, US Small Business Administration Cal West, SBA, New Mexico, Cornhusker Army

Ammunition Plant, Army, Nebraska, and Defense General Supply Center Richmond, DOD, Virginia, are all currently listed on the NPL.

It is EPA's policy generally not to list on the docket facilities which are SQGs and have never produced more than 1,000 kg of hazardous waste in any month. However, the Agency believes that facilities which are SQGs but have reported releases under section 103, or hazardous waste activities pursuant to another reporting mechanism, should be listed on the docket. EPA believes that such facilities should undergo remedial site evaluation activities, such as a PA and, where appropriate, a SI. All such facilities will now be listed on the docket regardless of whether they are SQGs pursuant to RCRA. As a result, some of the facilities that EPA is today adding to the docket are SQGs which had not been previously listed on the docket but which have reported releases or hazardous waste activities to EPA under another reporting provision.

In the process of compiling the documents for the Regional repositories, EPA identified a number of facilities that had previously submitted a PA report, a SI report, a Department of Defense Installation Restoration Program report, or another Federal agency environmental restoration program report, but had not submitted a section 103 notification form. Section 120(c)(3) of CERCLA requires that EPA include information submitted under section 103 in the docket. In general, section 103 requires certain persons to provide notice of certain releases of hazardous substances. The aforementioned Federal agency environmental restoration program reports contain information similar to information provided pursuant to CERCLA section 103 and are considered equivalent forms of notification for purposes of the docket. Thus, the Agency believes that facilities which have provided information equivalent to a CERCLA section 103 notification, such as a Federal agency environmental restoration program report, should be included in the docket regardless of the absence of formal section 103 notification. Therefore, some of the facilities that EPA is adding today are being placed on the docket because of the above-mentioned reports.

III. Process for Compiling the Updated Docket

In compiling the newly reported facilities for the update being published today, EPA extracted the names, addresses, and identification numbers of facilities from two EPA data bases (Hazardous Waste Data Management

System and CERCLIS, the CERCLA data base) that contain Federal facility information submitted under the four provisions listed in section 120(c).

Extensive computer checks compared the initial docket list with the information obtained from the above data bases to determine which facilities were, in fact, newly reported and qualified for inclusion on the update. In spite of the quality assurance efforts EPA has undertaken, it is possible that State-owned or privately-owned facilities may have been included. These potential problems are the result of historical procedures used to report and track Federal facility data, and the Agency is working to resolve them. Federal agencies are requested to contact EPA's Docket Coordinator in writing at the following address if revisions to this update information are necessary: Federal Facilities Docket Coordinator, U.S. EPA, 401 M Street SW. (OS-530), Washington, DC 20460.

IV. Facilities Not Included

As explained in the original docket preamble (53 FR 4280), the docket does not include the following categories of facilities (note, however, that any of these types of facilities may, where appropriate, be listed on the NPL):

1. Facilities formerly owned by a Federal agency and now privately owned. However, facilities that are now owned by another Federal agency will remain on the docket, with responsibility for conducting PA's and SI's resting with the current owner.
2. Facilities operated but not currently owned by a Federal agency. For example, facilities that are operated by the Federal government under State or private ownership will not be listed on the docket.
3. SQGs that have never produced more than 1,000 kg in any month and have not reported releases under section 103 or other hazardous waste activities under section 3016.
4. Facilities that are solely transporters as reported under RCRA section 3010.
5. Any Federal facility not reported to EPA pursuant to RCRA sections 3005, 3010, or 3016 or CERCLA section 103 (or an equivalent Federal agency environmental restoration program report, as discussed above).

V. Information Contained on Docket Listing

As discussed above, the update information below is divided into three separate sections. The first section comprises corrections to the docket. The second section is a list of facilities being deleted from the docket. The third

section is a list of new facilities that are being added to the docket. Each facility listed as part of the update has been assigned a code that indicates a more specific reason(s) for the correction, deletion, or addition. The code key precedes the lists.

It is EPA's policy that all facilities on the additions list to this third docket update must submit a PA, and, if warranted, an SI, to EPA within 18 months of the date of this publication. This includes any facility changing responsible agencies (codes 21 and 22). These reports should be submitted to the CERCLA Federal Facility Coordinator in the appropriate EPA Regional Office.

Facilities in each section are organized by State and then grouped alphabetically within each State by the Federal agency responsible for the facility. Under each State heading is listed the facility name and address, the statutory provision(s) under which the facility was reported to EPA (indicated by an "x" in the appropriate column(s)), the EPA Region where the facility is located, and the correction codes.

The complete list of Federal facilities that now makes up the docket is not being published today. However, the list is available to interested parties and can be obtained by calling the Federal Facilities Docket Hotline (800-548-1016). As of today, the total number of Federal facilities that appear on the docket is 1296.

Dated: July 5, 1990.

James M. Strock,
Assistant Administrator for Enforcement.

Categories of Revisions for Docket Update By Correction Code

Categories for Facility Removal

- 1 Small Quantity Generator
- 2 Not Federally Owned
- 3 Formerly Owned
- 4 No Hazardous Waste Generated
- 5 Temporary Storage/One Time Permitted Disposal
- 6 Redundant Listing/Site on Facility
- 7 Combining Sites into One Facility/Entries Combined
- 8 Does not Fit Facility Definition (All are Vessels)
- 9 No Hazardous Waste (Responsible Agency Changed)
- 10 Small Quantity Generator (Responsible Agency Changed)
- 11 No Hazardous Waste (Temporary Storage Only)
- 12 Not Federally Owned (Small Quantity Generator)
- 13 Redundant Listing/Site on Facility (Agencies will Coordinate)
- 14 Small Quantity Generator (Never Actually Built)

Categories for Facility Addition

- 15 Small Quantity Generator with either a 3016 or 103
 16 One Entry Being Split into Two/ Agency Responsibility Being Split
 17 New Information Obtained Showing that Facility Should be Included
 18 Facility was a Site on a Facility that was Disbanded. Now a Separate Facility

19 Sites were Combined into One Facility

19A New Facility

Corrections

- 20 Reporting Provisions Change
 20A Typo Correction/Name Change/ Address Change
 21 Changing Responsible Agencies (New Responsible Agency has 18 mos. to submit PA)

22 Changing Responsible Agencies and Title (New Responsible Agency has 18 mos. to submit PA)

23 New Reporting Mechanism Added at Update

24 Reporting Mechanism Determined to be Not Applicable after Regional File Review
