

**ENVIRONMENTAL PROTECTION AGENCY**

[FR-4145-7]

**Federal Agency Hazardous Waste Compliance Docket**

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of sixth update of the Federal Agency Hazardous Waste Compliance Docket pursuant to CERCLA section 120(c).

**SUMMARY:** Section 120(c) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA), requires the Environmental Protection Agency (EPA) to establish a Federal Agency Hazardous Waste Compliance Docket that contains certain information regarding Federal facilities that manage hazardous waste or from which hazardous substances may be or have been released. (As defined by CERCLA 101(22), a release is any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment.) CERCLA requires that the docket be updated every 6 months as new facilities are reported to EPA by Federal agencies. The following list identifies the Federal facilities to be included in the sixth update of the docket (that is, facilities not previously listed on the docket and reported to EPA since the last update to the docket, 56 FR 64898, December 12, 1991, which was current as of June 1, 1991). EPA policy specifies that for each Federal facility that is included on the docket during an update, the responsible Federal agency must complete a preliminary assessment (PA) and, if warranted, a site inspection (SI), within 18 months of publication of this notice. Such remedial site evaluation activities will help determine whether the facility should be included on the National Priorities List (NPL) and will provide EPA and the public with valuable information about the facility. In addition to the docket additions list, this notice includes a section comprising revisions (that is, corrections and deletions) to the previous docket list and a new list of the facilities on the docket that have been evaluated and determined not to be appropriate for NPL listing at this time (the No Further Response Action Planned [NFRAP] list). At the time of publication of this notice, the new total number of Federal facilities listed on the docket is 1,709.

**DATES:** This list is current as of March 1, 1992.

**FOR FURTHER INFORMATION CONTACT:** Federal Facilities Docket Hotline, Telephone: (800) 548-1016 toll free, or (703) 883-8577.

**SUPPLEMENTARY INFORMATION:**
**Table of Contents**

- I. Introduction.
- II. Revisions to the previous docket.
- III. Process for compiling the updated docket.
- IV. Facilities not included.
- V. Information contained on docket listing.
- VI. Facility status reporting.

**I. Introduction**

The Federal Agency Hazardous Waste Compliance Docket ("docket") was required to be established under section 120(c) of CERCLA, 42 U.S.C. 9620(c), as amended by SARA. The docket contains information on Federal facilities that is submitted by Federal agencies to the U.S. Environmental Protection Agency ("EPA" or "the Agency") under sections 3005, 3010, and 3016 of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6925, 6930, and 6937, and under section 103 of CERCLA, 42 U.S.C. 9603. Specifically, RCRA section 3005 establishes a permitting system for certain hazardous waste treatment, storage, and disposal (TSD) facilities; RCRA section 3010 requires waste generators, transporters, and TSD facilities to notify EPA of their hazardous waste activities; and RCRA section 3016 requires Federal agencies to submit biennially to EPA an inventory of hazardous waste sites that the Federal Agencies own or operate. CERCLA section 103(a) requires notification to the National Response Center (NRC) of a release; CERCLA section 103(c) requires reporting to EPA the existence of a facility at which hazardous substances are or have been stored, treated or disposed and the existence of known or suspected releases of hazardous substances at such facilities.

The docket serves, among others, three major purposes: (1) To identify the universe of Federal facilities that must be evaluated to determine whether they pose a risk to human health and the environment sufficient to warrant inclusion on the NPL; (2) to compile and maintain the information submitted to EPA on these facilities under the provisions listed in section 120(c) of CERCLA; and (3) to provide a mechanism to make this information available to the public.

The initial list of Federal facilities to be included in the docket was published on February 12, 1988 (53 FR 4280). Updates to the docket have been published on November 16, 1988 (54 FR

46364); December 15, 1989 (54 FR 51472); August 22, 1990 (55 FR 34492); September 27, 1991 (56 FR 49328); and December 11, 1991 (56 FR 64898). This notice constitutes the sixth update of the docket.

Today's notice is divided into four major sections: (1) Corrections, (2) deletions, (3) additions, and (4) the NFRAP list. The docket corrections section lists changes to information on facilities already listed on the docket. The deletions section lists facilities that EPA is deleting from the docket. The additions section lists newly identified facilities that have been reported to EPA since the last update and are now being included on the docket. The NFRAP list is the list of all docket facilities to which EPA has assigned a status of No Further Response Action Planned.

The information submitted to EPA on each Federal facility is contained in the docket repository located in the EPA Regional office of the Region where the facility is found. (See 53 FR 4280 (February 12, 1988) for a description of the information required under these provisions). Each repository contains the documents submitted to EPA under the reporting provisions and correspondence relevant to the reporting provisions for each facility. A complete national index of the information found in the Regional docket repositories is maintained at EPA Headquarters in Washington, D.C., and made available to the public. The index for each Region is available for public review at each Regional repository. Contact the Federal Facilities Docket Hotline (800-548-1016) for information on repository locations and arrangements for reviewing and copying specific documents.

**II. Revisions to the Previous Docket**
**1. Corrections**

Changes necessary to correct the previous docket were identified by both EPA and Federal agencies. These changes vary from simple address and spelling changes to facility name and ownership corrections. In addition, some facility name changes were made to make the nomenclature consistent on the docket. Many are simply typographical errors. For each facility with a correction, the original entry as it appeared in the February 12, 1988, notice, or subsequent updates, is shown directly above the corrected entry for easy comparison.

**2. Deletions**

Today, 10 facilities are being deleted from the docket for various reasons, such as incorrect reporting of hazardous

waste activity, change in Federal ownership, and exemption as a small quantity generator (SQG) under RCRA (40 CFR 262.44). Facilities being deleted will no longer be subject to the requirements of CERCLA section 120(d).

### 3. Additions

Today, 66 facilities are being added to the docket primarily because of new information obtained by EPA (for example, recent reporting of a facility pursuant to RCRA sections 3005, 3010, or 3016 or CERCLA section 103). For all facilities being added in this section, it is EPA's policy that the responsible agency must complete the required PA, and, if warranted, an SI, within 18 months from the date of this publication.

Of the 66 facilities being added to the docket, 6 are facilities that have reported the release of a reportable quantity (RQ) of a hazardous substance to the NRC. Under section 103(a) of CERCLA, a facility is required to report to the NRC the release of a hazardous substance in a quantity that equals or exceeds the established RQ. Release reports received by the NRC, the U.S. Coast Guard, and EPA are electronically transmitted to the Transportation Systems Center at the U.S. Department of Transportation (DOT), where they become part of the Emergency Response Notification System (ERNS) database. ERNS is a national computer database and retrieval system that stores information on releases of oil and hazardous substances. Facilities being added to the docket and facilities already listed on the docket that have an ERNS report have the notation of "103(a)" in the "Reporting Mechanism" column.

It is EPA's policy generally not to list on the docket facilities that are SQGs and have never generated more than 1,000 kg of hazardous waste in any month. If a facility has ever generated more than 1,000 kg of hazardous waste in any month, (that is, is an episodic generator), it will be added to the docket. In addition, facilities that are SQGs but have reported releases under CERCLA section 103, or hazardous waste activities pursuant to another reporting mechanism, will be listed on the docket, and will undergo remedial site evaluation activities, such as a PA and, where appropriate, an SI. All such facilities will be listed on the docket regardless of whether they are SQGs pursuant to RCRA. As a result, some of the facilities that EPA is today adding to the docket are SQGs that had not been previously listed on the docket but have reported releases or hazardous waste activities to EPA under another reporting provision.

In the process of compiling the documents for the Regional repositories, EPA identified a number of facilities that had previously submitted a PA report, an SI report, a Department of Defense Installation Restoration Program report, or another Federal agency environmental restoration program report, but had not submitted a CERCLA section 103 notification form. Section 120(c)(3) of CERCLA requires that EPA include information submitted under section 103 in the docket. In general, section 103 requires certain persons to provide notice of certain releases of hazardous substances. The aforementioned Federal agency environmental restoration program reports contain information similar to information provided pursuant to CERCLA section 103 and are considered equivalent forms of notification for purposes of the docket. Thus, the Agency believes that facilities that have provided information equivalent to a CERCLA section 103 notification, such as a Federal agency environmental restoration program report, should be included on the docket regardless of the absence of formal section 103 notification. Therefore, some of the facilities that EPA is adding today are being placed on the docket because of the above-mentioned reports.

In addition, EPA has decided to include privately owned, government-operated (POGOs) facilities on the docket at this update. These facilities had previously been excluded from docket listing. Therefore, some of the facilities that EPA is adding to the docket are POGO facilities that had been previously removed from the docket but are now being restored because of the new policy outlined above.

### III. Process for Compiling the Updated Docket

In compiling the newly reported facilities for the update being published today, EPA extracted the names, addresses, and identification numbers of facilities from four EPA databases—ERNS, Hazardous Waste Data Management System (HWDMDS), Resource Conservation and Recovery Information System (RCRIS), and Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)—that contain Federal facility information submitted under the four provisions listed in CERCLA section 120(c).

Extensive computer checks compared the current docket list with the information obtained from the above databases to determine which facilities were, in fact, newly reported and

qualified for inclusion on the update. In spite of the quality assurance efforts EPA has undertaken, it is possible that State-owned or privately owned facilities, that are not operated by the Federal government, may have been included. These problems are the result of historical procedures used to report and track Federal facility data; the Agency is working to resolve them. Federal agencies are requested to write to EPA's Docket Coordinator at the following address if revisions to this update information are necessary: Federal Facilities Docket Coordinator, Office of Federal Facilities Enforcement (OE-2261), U.S. EPA, 401 M Street SW., Washington, DC 20460.

### IV. Facilities Not Included

As explained in the original docket preamble (53 FR 4280), the docket does not include the following categories of facilities (note, however, that any of these types of facilities may, where appropriate, be listed on the NPL):

1. Facilities formerly owned by a Federal agency and now privately owned. However, facilities that are now owned by another Federal agency will remain on the docket, with responsibility for conducting PAs and SIs resting with the current owner.
2. SQGs that have never produced more than 1,000 kg in any month and have not reported releases under CERCLA section 103 or other hazardous waste activities under RCRA section 3016.
3. Facilities that are solely transporters as reported under RCRA section 3010.

### V. Information Contained on Docket Listing

As discussed above, the update information below is divided into three separate sections. The first section is a list of new facilities that are being added to the docket. The second section is a list of facilities being deleted from the docket. The third section comprises corrections to the docket. Each facility listed as part of the update has been assigned a code that indicates a more specific reason(s) for the addition, deletion, or correction. The code key precedes the lists.

It is EPA's policy that all facilities on the additions list to this sixth docket update must submit a PA, and, if warranted, an SI, to EPA within 18 months of the date of this publication. A PA must include existing information about a site and its surrounding environment, including a thorough examination of the human, food-chain, and environmental targets, the potential waste sources, and migration pathways.

Based upon information in the PA, or other information coming to EPA's attention, EPA will determine whether a followup SI is required. An SI augments the data collected in a PA. An SI may reflect sampling and other field data that is used to determine if further action or investigation is appropriate. This policy includes any facility changing responsible agencies. These reports should be submitted to the Federal Facilities Coordinator in the appropriate EPA Regional Office.

The facilities listed in each section are organized by State and then grouped alphabetically within each State by the Federal agency responsible for the facility. Under each State heading is listed the facility name and address, the statutory provision(s) under which the facility was reported to EPA, the EPA Region where the facility is located, and the correction codes.

The statutory provision(s) under which a facility reported are listed in a column titled "Reporting Mechanisms." Each facility has its applicable mechanisms listed, separated by a comma; for example: 3010,3016,103(c).

The complete list of Federal facilities that now makes up the docket is not being published today. However, the list is available to interested parties and can be obtained by calling the Federal Facilities Docket Hotline (800-548-1016 or 703-883-8577). As of today, the total number of Federal facilities that appear on the docket is 1,709.

## VI. Facility Status Reporting

In response to numerous Federal agency requests, EPA has expanded the docket database to include information on the status of docket facilities. A prevalent concern has been the inability to identify facilities that, after submitting all necessary site assessment information, were found to warrant no further EPA involvement at this time. Accordingly, EPA has expanded the docket database to include a column indicating the facility's status.

The status codes are as follows:

U=Undetermined

N=No Further Response Action Planned (NFRAP)

P=Currently Proposed for the NPL

F=Currently Final on the NPL

R=Removed from the Proposed NPL and No Longer Considered for the Final NPL

D=Deleted from the Final NPL

NFRAP is a term used in the

Superfund site assessment program to identify facilities where EPA has found that, based on currently available information, listing on the NPL is not likely and further assessment is not appropriate at this time. NFRAP status does not represent an EPA determination that there are no environmental threats present at the facility or that no further environmental response action of any kind is necessary. As stated, NFRAP status is intended to mean only that the facility does not appear to warrant NPL listing based on the information available to EPA at this time, and that therefore no further involvement by EPA in site assessment or cleanup at the facility is anticipated. However, additional CERCLA response actions by the agency that owns or operates the facility, whether remedial or removal actions, may be necessary at a facility with NFRAP status. The status information contained in the docket is the result of regional evaluation of information taken directly from CERCLIS. (CERCLIS is a database that helps EPA Headquarters and Regional personnel with site, program, and project management. It contains the official inventory of all CERCLA [NPL and non-NPL] sites and supports all site planning and tracking functions. It also integrates financial data from preremedial, remedial, removal, and enforcement programs). The status information was taken from CERCLIS and sent to the Regional Docket Coordinators for review. The results of their reviews were incorporated into the status field in the docket. Subsequently, a list of all facilities with a NFRAP status (containing an "N" in the status field) was generated; this list is being published today.

Important limitations apply to this NFRAP status list. First, the information is accurate only as of March 1, 1992. Second, a facility's status may be subject to change at any time due to any number of factors, including new site information or changing EPA policies. Finally, the NFRAP status list is based on regional review of CERCLIS data, is provided for information purposes only, and should not be considered binding upon either the agency responsible for the facility or EPA.

The status information in the docket will be reviewed and a new list of NFRAP facilities will be published at each docket update.

Dated: June 9, 1992.

Tad McCall,  
*Acting Assistant Administrator for Enforcement.*

### I. Docket Revisions

#### Categories of Revisions for Docket Update by Correction Code

#### Categories for Facility Deletion \*

- (1) Small Quantity Generator
- (2) Not Federally Owned
- (3) Formerly Federally Owned
- (4) No Hazardous Waste Generated
- (5) (This correction code is no longer used)
- (6) Redundant Listing/Site on Facility
- (7) Combining Sites Into One Facility/Entries Combined
- (8) Does Not Fit Facility Definition (All Are Vessels)
- (9) No Hazardous Waste (Responsible Agency Changed)
- (10) Small Quantity Generator (Responsible Agency Changed)
- (11) No Hazardous Waste (Temporary Storage Only)
- (12) Not Federally Owned (Small Quantity Generator)
- (13) Redundant Listing/Site on Facility (Agencies Will Coordinate)
- (14) Small Quantity Generator (Never Actually Built)

#### Categories for Facility Addition

- (15) Small Quantity Generator with Either a RCRA 3016 or CERCLA 103 Reporting Mechanism
- (16) One Entry Being Split into Two/Agency Responsibility Being Split
- (17) New Information Obtained Showing That Facility Should be Included
- (18) Facility Was a Site on a Facility That Was Disbanded, Now a Separate Facility
- (19) Sites Were Combined into One Facility
- (19A) New Facility

\* Further information on category definitions can be obtained by calling the Docket Hotline.

#### Categories for Corrections to Facility Information

- (20) Reporting Provisions Change
- (20A) Typo Correction/Name Change/Address Change
- (21) Changing Responsible Agencies (New Responsible Agency Has 18 Months to Submit PA)
- (22) Changing Responsible Agencies and Title (New Responsible Agency Has 18 Months to Submit PA)
- (23) New Reporting Mechanism Added at Update
- (24) Reporting Mechanism Determined to be Not Applicable after Regional File Review
