

**ENVIRONMENTAL PROTECTION AGENCY**

[FRL-4787-7]

**Federal Agency Hazardous Waste Compliance Docket****AGENCY:** Environmental Protection Agency.**ACTION:** Notice of eighth update of the Federal Agency Hazardous Waste Compliance Docket, pursuant to CERCLA section 120(c).

**SUMMARY:** Section 120(c) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA), requires the Environmental Protection Agency (EPA) to establish a Federal Agency Hazardous Waste Compliance Docket. The docket is to contain certain information regarding Federal facilities that manage hazardous waste or from which hazardous substances may be or have been released. (As defined by CERCLA section 101(22), a release is any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment.) CERCLA requires that the docket be updated every six months, as new facilities are reported to EPA by Federal agencies. The following list identifies the Federal facilities to be included in the eighth update of the docket (that is, facilities not previously listed on the docket and reported to EPA since the last update to the docket, 58 FR 7298, February 5, 1993, which was current as of December 7, 1992). EPA policy specifies that, for each Federal facility that is included on the docket during an update, the responsible Federal agency must complete a preliminary assessment (PA) and, if warranted, a site inspection (SI) within 18 months of publication of the notice. Such remedial site evaluation activities will help determine whether the facility should be included on the National Priorities List (NPL) and will provide EPA and the public with valuable information about the facility. In addition to the list of additions to the docket, this notice includes a section comprising revisions (that is, corrections and deletions) of the previous docket list and a list of the facilities on the docket that have been evaluated and determined to be not appropriate for listing on the NPL at this time (the site evaluation accomplished [SEA] list). At the time of publication of this notice, the new total number of Federal facilities listed on the docket is 1,946.

**DATES:** This list is current as of July 16, 1993.**FOR FURTHER INFORMATION CONTACT:** Federal Facilities Docket Hotline, Telephone: (800) 548-1016 (toll free) or (703) 883-8577.**SUPPLEMENTARY INFORMATION:****Table of Contents**

- I. Introduction
- II. Revisions of the Previous Docket
- III. Process for Compiling the Updated Docket
- IV. Facilities not Included
- V. Information Contained on Docket Listing
- VI. Facility Status Reporting

**I. Introduction**

Section 120(c) of CERCLA, 42 U.S.C. 9620(c), as amended by SARA, required the establishment of the Federal Agency Hazardous Waste Compliance Docket ("docket"). The docket contains information on Federal facilities that is submitted by Federal agencies to the U.S. Environmental Protection Agency ("EPA" or "the Agency") under sections 3005, 3010, and 3016 of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6925, 6930, and 6937 and under section 103 of CERCLA, 42 U.S.C. 9603. Specifically, RCRA section 3005 establishes a permitting system for certain hazardous waste treatment, storage, and disposal (TSD) facilities; RCRA section 3010 requires waste generators, transporters, and TSD facilities to notify EPA of their hazardous waste activities; and RCRA section 3016 requires Federal agencies to submit biennially to EPA an inventory of hazardous waste sites that the Federal agencies own or operate. CERCLA section 103(a) requires notification of the National Response Center (NRC) of a release. CERCLA section 103(c) requires reporting to EPA the existence of a facility at which hazardous substances are or have been stored, treated, or disposed of and the existence of known or suspected releases of hazardous substances at such facilities.

The docket serves, among others, three major purposes: (1) To identify all Federal facilities that must be evaluated to determine whether they pose a risk to human health and the environment sufficient to warrant inclusion on the NPL; (2) to compile and maintain the information submitted to EPA on such facilities under the provisions listed in section 120(c) of CERCLA; and (3) to provide a mechanism to make the information available to the public.

The initial list of Federal facilities to be included on the docket was published on February 12, 1988 (53 FR 4280). Updates to the docket have been

published on November 16, 1988 (54 FR 46364); December 15, 1989 (54 FR 51472); August 22, 1990 (55 FR 34492); September 27, 1991 (56 FR 49328); December 12, 1991 (56 FR 64898); July 17, 1992 (57 FR 31758); and February 5, 1993 (58 FR 7298). This notice constitutes the eighth update of the docket.

Today's notice is divided into four major sections: (1) Corrections, (2) deletions, (3) additions, and (4) the SEA list. The docket corrections section lists changes in information about facilities already listed on the docket. The deletions section lists facilities that EPA is deleting from the docket. The additions section lists newly identified facilities that have been reported to EPA since the last update and that now are being included on the docket. The SEA list is the list of all docket facilities to which EPA has assigned a status-of-site evaluation accomplished.

The information submitted to EPA on each Federal facility is contained in the docket repository located in the EPA Regional Office of the Region in which the facility is located (see 53 FR 4280 [February 12, 1988] for a description of the information required under those provisions). Each repository contains the documents submitted to EPA under the reporting provisions and correspondence relevant to the reporting provisions for each facility. A complete national index of the information found in the Regional docket repositories is maintained at EPA's Office of Federal Facilities Enforcement in Washington, DC, and is available to the public. The index for each Region is available for public review at each Regional repository. Contact the Federal Facilities Docket Hotline (800-548-1016) for information on Regional repository locations and on making arrangements for obtaining specific documents.

**II. Revisions in the Previous Docket**

Following is a discussion of the inclusion of revisions made in the previous docket, including corrections, deletions, and additions.

**1. Corrections**

Changes necessary to correct the previous docket were identified by both EPA and Federal agencies. The changes needed varied from simple address and spelling changes to corrections of the recorded name and ownership of a facility. In addition, some changes in facility names were made to establish consistency in the docket. Many new entries are simply corrections of typographical errors. For each facility for which a correction has been entered, the original entry (designated by an

"O"), as it appeared in the February 12, 1988 notice or subsequent updates, is shown directly below the corrected entry (designated by a "C"), for easy comparison.

### 2. Deletions

Today, 98 facilities are being deleted from the docket for various reasons, such as incorrect reporting of hazardous waste activity, change in ownership, and exemption as a small quantity generator (SQG) under RCRA (40 CFR 262.44). Facilities being deleted no longer will be subject to the requirements of CERCLA section 120(d).

### 3. Additions

Today, 113 facilities are being added to the docket primarily because of new information obtained by EPA (for example, recent reporting of a facility pursuant to RCRA sections 3005, 3010, or 3018 or CERCLA section 103). For all facilities being added to the docket, it is EPA's policy that the responsible agency must complete the required PA, and, if warranted, an SI within 18 months from the date of this publication.

Of the 113 facilities being added to the docket, 10 are facilities that have reported to the NRC the release of a reportable quantity (RQ) of a hazardous substance. Under section 103(a) of CERCLA, a facility is required to report to the NRC the release of a hazardous substance in a quantity that equals or exceeds the established RQ. Release reports received by the NRC, the U.S. Coast Guard, and EPA are electronically transmitted to the Transportation Systems Center at the U.S. Department of Transportation (DOT), where they become part of the Emergency Response Notification System (ERNS) data base. ERNS is a national computer data base and retrieval system that stores information on releases of oil and hazardous substances. Facilities being added to the docket and facilities already listed on the docket for which an ERNS report has been filed are identified by the notation of "103(a)" in the "Reporting Mechanism" column.

It is EPA's policy generally not to list on the docket facilities that are SQGs and that have never generated more than 1,000 kilograms (kg) of hazardous waste in any single month. If a facility has generated more than 1,000 kg of hazardous waste in any single month (that is, if the facility is an episodic generator), it will be added to the docket. In addition, facilities that are SQGs, but that have reported releases under CERCLA section 103 or hazardous waste activities pursuant to another reporting mechanism, will be listed on the docket and will undergo

remedial site evaluation activities, such as a PA and, when appropriate, an SI. All such facilities will be listed on the docket, whether or not they are SQGs pursuant to RCRA. As a result, some of the facilities that EPA is adding today to the docket are SQGs that had not been listed on the docket but that have reported releases or hazardous waste activities to EPA under another reporting provision.

In the process of compiling the documents for the Regional repositories, EPA identified a number of facilities that had previously submitted a PA report, an SI report, a Department of Defense Installation Restoration Program report, or another Federal agency environmental restoration program report, but had not submitted a CERCLA section 103 notification form. Section 120(c)(3) of CERCLA requires that EPA include information submitted under section 103 on the docket. In general, section 103 requires certain persons to provide notice of certain releases of hazardous substances. The aforementioned Federal agency environmental restoration program reports contain information similar to information provided pursuant to CERCLA section 103 and are considered equivalent forms of notification for the docket. Thus, the Agency believes that facilities that have provided information equivalent to a CERCLA section 103 notification, such as a Federal agency environmental restoration program report, should be included on the docket, regardless of the absence of formal section 103 notification. Therefore, some of the facilities that EPA is adding today are being placed on the docket because of the above-mentioned reports.

EPA also includes privately owned, government-operated facilities (POGO) on the docket. CERCLA section 120(c) requires that the docket contain information submitted under RCRA sections 3005, 3010, and 3016, and CERCLA section 103, all of which impose duties on operators as well as owners of facilities. In addition, other subsections of CERCLA section 120 refer to facilities "owned or operated" by an agency or other instrumentality of the Federal government. This terminology clearly includes facilities that are operated by the Federal government, even if they are not owned by it. Specifically, CERCLA section 120(e), which sets forth the duties of the Federal agencies after a facility has been listed on the NPL, refers to the agency that "owns or operates" the facility. In addition, the primary basis for assigning responsibility for conducting PAs and SIs, as required when a facility is listed

on the docket, is Executive Order 12580, which assigns this responsibility to the agency having "jurisdiction, custody, or control" over a facility. An operator may be deemed to have jurisdiction, custody, or control over a facility.

### III. Process for Compiling the Updated Docket

In compiling the newly reported facilities for the update being published today, EPA extracted the names, addresses, and identification numbers of facilities from four EPA data bases—ERNS, the Biennial Inventory of Federal Agency Hazardous Waste Activities, the Resource Conservation and Recovery Information System (RCRIS), and the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)—that contain information about Federal facilities submitted under the four provisions listed in CERCLA section 120(c).

Extensive computer checks compared the current docket list with the information obtained from the above data bases to determine which facilities were, in fact, newly reported and qualified for inclusion on the update. In spite of the quality assurance efforts EPA has undertaken, it is possible that State-owned or privately owned facilities that are not operated by the Federal government may have been included. Such problems are the result of procedures historically used to report and track data on Federal facilities; the Agency is working to resolve such problems. Representatives of Federal agencies are requested to write to EPA's Docket Coordinator at the following address if revisions in this update information are necessary: Federal Facilities Docks Coordinator, Office of Federal Facilities Enforcement (OE-2261), U.S. EPA, 401 M Street SW., Washington, DC 20460.

### IV. Facilities Not Included

As explained in the preamble to the original docket (53 FR 4280), the docket does not include the following categories of facilities (note, however, that any of these types of facilities may, when appropriate, be listed on the NPL):

1. Facilities formerly owned by a Federal agency and now privately owned. However, facilities that are now owned by another Federal agency will remain on the docket and the responsibility for conducting PAs and SIs will rest with the current owner.

2. SQGs that have never produced more than 1,000 kg in any single month and that have not reported releases under CERCLA section 103 or other hazardous waste activities under RCRA.

section 3016 will not be listed on the docket.

3. Facilities that are solely transporters as reported under RCRA section 3010, will not be listed on the docket.

#### V. Information Contained on Docket Listing

As discussed above, the update information below is divided into three separate sections. The first section is a list of new facilities that are being added to the docket. The second section is a list of facilities that are being deleted from the docket. The third section comprises corrections of the docket. Each facility listed as part of the update has been assigned a code that indicates a more specific reason(s) for the addition, deletion, or correction. The code key precedes the lists.

It is EPA's policy that all facilities on the additions list to this eighth docket update must submit a PA and, if warranted, an SI to EPA within 18 months of the date of this publication. The PA must include existing information about a site and its surrounding environment, including a thorough examination of human, food-chain, and environmental targets, potential waste sources, and migration pathways. From information in the PA or other information coming to EPA's attention, EPA will determine whether a followup SI is required. An SI augments the data collected in a PA. An SI may reflect sampling and other field data that are used to determine whether further action or investigation is appropriate. This policy includes any facility for which there is a change in the identity of the responsible agency. These reports should be submitted to the Federal facilities coordinator in the appropriate EPA Regional Office.

The facilities listed in each section are organized by State and then grouped alphabetically within each State by the Federal agency responsible for the facility. Under each State heading is listed the facility name and address, the statutory provision(s) under which the facility was reported to EPA, the EPA Region in which the facility is located, and the correction codes.

The statutory provisions under which a facility reported are listed in a column titled "Reporting Mechanisms." Applicable mechanisms are listed for each facility; for example 3010, 3016, and 103c.

The complete list of Federal facilities that now makes up the docket is not being published today. However, the list is available to interested parties and can be obtained by calling the Federal Facilities Docket Hotline (800-548-1016

or 703-883-8577). As of today, the total number of Federal facilities that appear on the docket is 1,946.

#### VI. Facility Status Reporting

In response to numerous requests from Federal agencies, EPA has expanded the docket data base to include information on the SEA status of facilities listed. A prevalent concern has been the inability to identify facilities that, after submitting all necessary site assessment information, were found to warrant no further EPA involvement at the time. Accordingly, EPA has expanded the docket data base to include a column indicating the facility's status.

The status codes are as follows:

U=Undetermined

N=Site evaluation accomplished (SEA)

P=Currently proposed for the NPL

F=Currently final on the NPL

R=Removed from the proposed NPL and no longer considered for the final NPL

D=Deleted from the final NPL

EPA changed the site assessment recommendation no further remedial action planned (NFRAP) to SEA to denote a more positive attitude and to emphasize that the determination involves an affirmative effort on EPA's part to evaluate sites.

SEA is a term used in the Superfund site assessment program to identify facilities for which EPA has found that currently available information indicates that listing on the NPL is not likely and further assessment is not appropriate at the time. SEA status does not represent an EPA determination that there are no environmental threats present at the facility or that no further environmental response action of any kind is necessary. As stated, SEA status means only that the facility does not appear, from the information available to EPA at this time, to warrant listing on the NPL, and that, therefore, no further involvement by EPA in site assessment or cleanup at the facility is anticipated. However, additional CERCLA response actions by the agency that owns or operates the facility, whether remedial or removal actions, may be necessary at a facility with SEA status.

The status information contained in the docket data base is the result of Regional evaluation of information taken directly from CERCLIS. (CERCLIS is a data base that helps EPA Headquarters and Regional personnel with site, program, and project management. It contains the official inventory of all CERCLA [NPL and non-NPL] sites and supports all site planning and tracking functions. It also integrates

financial data from premedial, remedial, removal, and enforcement programs.) The status information was taken from CERCLIS and sent to the Regional Docket Coordinators for review. The results of their reviews were incorporated into the status field in the docket data base. Subsequently, a list of all facilities having SEA status (those for which an "N" appears in the status field) was generated; this list is being published today.

Important limitations apply to this SEA status list. First, the information is accurate only as of July 16, 1993. Second, a facility's status may change at any time because of any number of factors, including new site information or changing EPA policies. Finally, the SEA status list is based on Regional review of CERCLIS data, is provided for information purposes only, and should not be considered binding upon either the agency responsible for the facility or on EPA.

The status information in the docket data base will be reviewed, and a new list of SEA facilities will be published at each docket update.

Dated: September 30, 1993.

Steven A. Herman,  
Assistant Administrator for Enforcement.

#### I. Docket Revisions

Categories of Revisions for Docket Update by Correction Code.

#### Categories for Deletion of Facilities

- (1) Small Quantity Generator
- (2) Not Federally Owned
- (3) Formerly Federally Owned
- (4) No Hazardous Waste Generated
- (5) (This correction code is no longer used.)
- (6) Redundant Listing/Site on Facility
- (7) Combining Sites Into One Facility/Entries Combined
- (8) Does Not Fit Facility Definition  
(All Are Vessels)
- (9) No Hazardous Waste (Responsible Agency Changed)
- (10) Small Quantity Generator  
(Responsible Agency Changed)
- (11) No Hazardous Waste (Temporary Storage Only)
- (12) Not Federally Owned (Small Quantity Generator)
- (13) Redundant Listing/Sites on Facility (Agencies Will Coordinate)
- (14) Small Quantity Generator (Never Actually Built) Categories for Facility Addition
- (15) Small Quantity Generator With Either a RCRA 3016 or CERCLA 103 Reporting Mechanism
- (16) One Entry Being Split Into Two/  
Agency Responsibility Being Split
- (17) New Information Obtained

Showing That Facility Should Be Included	Categories for Corrections of Facility Information	and Title (New Responsible Agency Has 18 Months To Submit PA)
(18) Facility Was a Site on a Facility That Was Disbanded; Now a Separate Facility	(20) Reporting Provisions Change (20A) Type Correction/Name Change/ Address Change	(23) New Reporting Mechanism Added at Update
(19) Sites Were Combined Into One Facility	(21) Changing Responsible Agencies (New Responsible Agency Has 18 Months To Submit PA)	(24) Reporting Mechanism Determined To Be Not Applicable After Review of Regional Files
(19A) New Facility	(22) Changing Responsible Agencies	Note: Further information on definitions of categories can be obtained by calling the Docket Hotline.
