Program Facility			
Basic identification information for a facility site, including the facility registry identifier, geographic address, and geopolitical descriptors.			
Remarks: Although Biennial Reporters are included in the RCRAINFO database, separate Program Facility and Environmental Interest records are created in FRS to add visibility to the facilities that submit Biennial Reports and to be consistent with the way these reporters are displayed within Envirofacts. For each unique HANDLER_ID in the RCR_BR_REPORTING table that also exists in the RCR_HREPORT_UNIV table, one Program Facility and one Environmental Interest are created for that HANDLER_ID using the same logic as specified in the RCRAINFO Version 5 Data Element Mapping. If the HANDLER_ID does not exist in RCR_HREPORT_UNIV, a Program Facility and Environmental Interest is created for the HANDLER_ID using the RCR_BR_REPORTING table (instead of the RCR_HREPORT_UNIV) to populate the address data in Program Facility. Since the RCR_BR_REPORTING table has multiple records for each HANDLER_ID & ACTIVITY_LOCATION combination, the record with the latest REPORT_CYCLE and SEQ_NUMBER and the lowest HZ_PG and SUB_PAGE_NUM is selected.			
Environmental Information System Abbreviated Name	The abbreviated name that represents the name of an information management system for an environmental program.	A(20)	'BR'
