Carlos A Rincon  
USEPA

Border 2020 Regional Workgroup Meeting  
September 23, 2015  
El Paso, Texas

Project Name	Project Name
<p>5-1 Increase actions of coordination and surveillance on cross-border movement of hazardous materials.- 3 annual meetings, to dialogue on specific cases dealing with need of existing legislative environmental rules for cross border movement of hazardous waste.</p>	<p>5-4 Wood Pallet Manufacturing Workshop, along with inspections of pallet manufacturing facilities</p>
<p>5-2 Strengthen plant protection sanitary inspections- Insure having ample infrastructure needed for plant protection inspections and sufficient personnel to carry out cross border revisions of hazardous chemical movement, located possibly in Jeronimo, Ciudad Juarez, Chih.- Santas Teresa, NM port of entry, gauranteeing having appropriate infrastructure to execute the specific inspectiond that would define automatically an ecological route(corridor) for trucks heading to and away from POE.</p>	<p>5-5 In Texas: include additional members into Clean Texas, Texas Environmental Excellence Awards programs and also make cross-border nominations for awards at annual Environmental Summit.</p>
<p>5-3 Legislative bill for establishing economic incentives for manufacturing, corporations and industry that would motivate them to incorporate at Mexico's and at U.S. where appropriate , with existing rules and regulations, to the Audits National Program(PNAA) Create</p>	<p>5-6 TRI: factsheet will be developed for Region 6 Border area as TRI Data is released each year.</p>

Project Name	Project Name
<p>5-7 Set up an information sharing/exchange mechanism to determine what are the major contributors to atmospheric/water pollution that would direct actions within U.S.-Mexico Environmental program to focus on pollution prevention controls. SEMARNAT and State of Chihuahua Urban Development and Ecology database, output of the facilities' annual reports of operations, along with the region's emissions inventory, the documentation of the facilities production permits, and/or midyear factory report and environmental impact reports. Similarly, base information coming out from PROFEPA and other government level inspections and site visits.</p>	<p>5-10 Environmental Summits along the Texas/Mexico Border. These have been on-going in El Paso since 2000 and have not expanded to Laredo and the Rio Grande Valley. They have legislative support, community involvement and produce tangible results.</p>
<p>5-8 One stop shop to process electronic trade/commerce movements of hazardous material management- handling of waste and used tires (once there is assurance of importing scrap//used tires to Mexico). Strengthen environmental enforcement mechanisms by establishing a one-stop submittal of electronic manifest of movement of goods that are</p>
