

OFFICE OF INSPECTOR GENERAL

U.S. ENVIRONMENTAL PROTECTION AGENCY

PANDEMIC

REPORT

As of July 2021

EPA OIG's Response to the **COVID-19** Pandemic

Introduction

The U.S. Environmental Protection Agency's Office of Inspector General is continuing to meet challenges posed by the coronavirus pandemic—that is, the SARS-CoV-2 virus and the resultant COVID-19 disease—by initiating audits, evaluations, and investigations related to the pandemic's impact on the EPA's and the U.S. Chemical Safety and Hazard Investigation Board's missions to protect people, public health, and the environment. We are examining and identifying how the pandemic has affected Agency programs and operations, from emergency responses to releases of hazardous substances to air quality enforcement to potential misconduct and criminal activity. We are working with our oversight partners, including other federal offices of inspectors general, the Pandemic Response Accountability Committee under the Council of the Inspectors General on Integrity and Efficiency, and the U.S. Government Accountability Office, to coordinate our work and address matters of interagency or cross-jurisdictional concern.

Our office recognizes that we are facing unprecedented times and has reinforced our commitment to conferring with congressional and Agency leadership; [issuing reports](#); and investigating waste, fraud, and abuse.

Actual and Potential Subjects of Audits and Evaluations

- Enforcement and regulatory waivers and flexibilities.
- Fraud schemes taking advantage of the crisis by marketing unsafe and non-EPA-approved products to the public.
- Agency staffing shortfalls implicating oversight of critical environmental and public health programs.
- Agency return to work and employee health and safety upon reentry.
- Maintaining strong cyber and information technology protections while most of the workforce is teleworking.
- Ability of delegated state and tribal environmental programs to meet critical environmental and public health responsibilities.
- How EPA is administering its CARES Act funding.

Pandemic-Related Reports and Announced Projects

Listed in chronological order, starting with the most recent:

[Report: EPA's National Vehicle and Fuel Emissions Laboratory Has Taken Steps to Mitigate Impact of Coronavirus Pandemic on Mobile Source Emission Compliance](#)

Report #21-E-0158, June 7, 2021. We examined how the laboratory operations and testing at the EPA's Office of Transportation and Air Quality's National Vehicle and Fuel Emissions Laboratory, which addresses emissions from a range of mobile sources, was impacted by the coronavirus pandemic. NVFEL used virtual collaboration tools, conducted remote auditing, and implemented reporting flexibilities to mitigate the impact of the pandemic, which included closing the lab. We highlighted NVFEL's efforts to minimize the potential for noncompliance during the pandemic as well as the importance of returning to full testing capacity to provide the most effective oversight of mobile sources.

[Report: EPA Did Not Conduct Agencywide Risk Assessment of CARES Act Appropriations, Increasing Risk of Fraud, Waste, Abuse, and Mismanagement](#)

Report #21-E-0128, May 4, 2021.

We assessed the internal controls that the EPA implemented to mitigate risks of fraud, waste, abuse, and mismanagement over the Coronavirus Aid, Relief, and Economic Security Act, known as the CARES Act, appropriations. We found that the Agency did not conduct an agencywide

risk assessment of internal controls or incorporate requirements from the U.S. Office of Management and Budget or the U.S. Government Accountability Office into its internal control requirements. However, we also found that three of the EPA's program offices designed internal controls to identify and mitigate fraud, waste, abuse, and mismanagement regarding the CARES Act funds.

[Report: EPA Needs to Improve Processes for Updating Guidance, Monitoring Corrective Actions, and Managing Remote Access for External Users](#)

Report #21-E-0124, April 16, 2021. Although we found that the EPA consistently met the requirements listed in the *FY 2020 Inspector General Federal Information Security Modernization Act of 2014 (FISMA) Reporting Metrics*, the deficiencies we found in the EPA's information technology internal controls could exploit weaknesses in Agency applications and hinder the Agency's ability to prevent, detect, and respond to emerging cyberthreats. Those deficiencies include not reviewing outdated procedures in a timely manner, not verifying whether corrective actions are completed, and not enforcing information system control requirements for the Agency's web application directory system.

[Notification: Pandemic Impact on Authorized State RCRA Programs](#)

Project #OE-FY21-0124, February 18, 2021. The OIG is conducting an evaluation to examine the EPA Resource Conservation Recovery Act Program's operations.

[Notification: EPA's Grant Flexibilities Due to the Coronavirus Pandemic](#)

Project #OA-FY21-0108, February 8, 2021. The OIG is conducting an audit examining the EPA's implementation of the grant flexibilities permitted by the Office of Management and Budget due to the coronavirus pandemic.

Notification: Impacts of the Coronavirus Pandemic on State and Local Air Compliance Monitoring Activities

Project #OE-FY21-0065, December 14, 2020. The OIG is conducting an evaluation assessing how COVID-19 impacts air compliance monitoring by EPA-delegated state and local agencies to confirm that facilities that emit air pollution comply with the Clean Air Act and other federal air regulations.

Notification: Survey of Remedial Project Managers on the Impact of the Coronavirus Pandemic on Long-Term Cleanups at Superfund National Priorities List Sites

Project #OE-FY21-0050, December 1, 2020. The OIG is conducting an evaluation to determine the impact of the coronavirus pandemic on long-term cleanup activities at Superfund National Priorities.

Report: EPA's Initial Plans for Returning to the Office Incorporate CDC Guidance but Differ by Location

Report #21-E-0030, November 30, 2020. The 13 locations we reviewed had different guidance in their reopening plans on aspects such as face coverings, social distancing, and cleaning and disinfecting. While some differences could be warranted based on local conditions, the EPA should ensure that such differences do not place employees at an increased risk of contracting or spreading the COVID-19 disease as a result of their work location.

Report: CSB Discontinued Information Recovery Testing and Off-Site Backup Storage During the Coronavirus Pandemic

Report #21-E-0016, November 18, 2020. SB & Company, which conducted this evaluation, found that the CSB did not follow National Institute of Standards and Technology guidance to perform disaster recovery testing on major information systems during fiscal year 2020 and did not store backup media at an off-site location. The CSB may not be readily able to recover its systems' operations in the event of a disaster or isolated incident.

Report: EPA Has Sufficiently Managed Emergency Responses During the Pandemic but Needs to Procure More Supplies and Clarify Guidance

Report #20-E-0332, September 28, 2020. We assessed whether the EPA provided sufficient protective measures to its on-scene coordinators, who respond to emergency incidents, during the coronavirus pandemic. More than half of the on-scene coordinators who responded to our survey reported that the coronavirus pandemic impacted their ability to respond to emergencies. They also expressed concerns about the availability of personal protective equipment and indicated that clarification was needed on the EPA's COVID-19 guidance. Additionally, we found that COVID-19 testing was not available to on-scene coordinators before or after deploying to an incident.

Notification: EPA's Oversight of Tribal Drinking Water Systems

Project #OA&E-FY20-0044, February 1, 2021. The OIG is adjusting the scope of this work to focus on EPA Regions 9 and 10, and on the Agency's experiences working with tribal drinking water systems during the Coronavirus pandemic. The original notification was issued on May 29, 2020.

Report: EPA OIG's Response to the COVID-19 Pandemic

July 31, 2020. This report captures the OIG's early work to meet the challenges posed by the COVID-19 pandemic, including audits, evaluations, and investigations. This work is related to the pandemic's impact on the EPA's and the CSB's missions, and on public health and the environment at the core of those missions. Some potential and actual subjects of audits and evaluations include the Agency's plan to return to work, cyber and information technology protections, and Agency staffing shortfalls. Some investigative topics include fraud schemes, cybercams targeting EPA employees and contractors, and misrepresentations of the EPA's endorsement of products.

[Report: EPA's FYs 2020–2021 Top Management Challenges](#)

Report #20-N-0231, July 21, 2020. Identifying and resolving top management challenges is essential to the EPA's protection of human health and the environment. We summarized the Agency's most serious management and performance challenges and the Agency's progress in achieving those challenges. Some of the challenges we identified include maintaining human health and environmental protections, business operations, and employee safety during the coronavirus pandemic.

[Report: Fiscal Year 2020 U.S. Chemical Safety and Hazard Investigation Board Management Challenges](#)

Report #20-N-0218, July 6, 2020. Along with two of the challenges that we addressed previously—a lack of board members and developing a policy on the responsibilities of the board members—we identified the continuation of operations during the coronavirus pandemic as a top management challenge. The CSB is planning to limit future deployments to high-consequence incidents and to locations that can be reached through local travel. The CSB needs to develop mitigating measures and methods to handle less-than-high consequence incidents. As the coronavirus persists, the CSB also faces an investigative staffing shortage and the challenge of eventually returning its workforce to federal office spaces.

[Report: EPA's Initial Implementation of CARES Act Section 3610](#)

Report #20-N-0202, June 29, 2020. The Office of Acquisition Solutions created and provided detailed guidance to EPA contracting personnel and contractors related to reimbursements under Section 3610 of the Coronavirus Aid, Relief, and Economic Security Act, known as the CARES Act. The information in the guidance documents was consistent with the federal statute.

[Top Pandemic-Related Challenges Facing the EPA](#)

June 17, 2020. The OIG has identified initial challenges to the EPA's ability to achieve its mission, including enforcement and fraud risks; state, tribe, and

territory program implementation; and risk communication to the public. The OIG also identified internal challenges to maintaining a safe and productive workforce, including returning to work safely, effective remote technology, understanding organizational risk, and contract oversight.

[Notification: Research for Future Audits and Evaluations Regarding Effects of Coronavirus Pandemic \(SARS-CoV-2 Virus and COVID-19 Disease\) on EPA Programs and Operations](#)

Project #OA&E-FY20-0212, May 7, 2020. The OIG has initiated an overall project to research and identify topics for potential audits and evaluations related to the EPA's response to the coronavirus pandemic.

[Notification: Evaluation of EPA's Information Systems' Compliance with Federal System Security Plans Requirements \(2nd notification\)](#)

Project #OA&E-FY20-0176, May 6, 2020. One objective of this audit is to evaluate elements within the EPA's System Security Plans to determine whether they provide sufficient details to allow the EPA to make decisions regarding network security during the coronavirus pandemic. The audit also will determine whether the System Security Plans are developed and updated in accordance with the standards published by the National Institute of Standards and Technology.

Potential Investigation Targets

We take seriously our obligation to investigate fraud related to the coronavirus pandemic. We are particularly committed to investigating schemes involving potential criminal activity or misconduct that impacts the American people or thwarts the EPA's ability to fulfill its mission, as well as to investigating conduct that relies on, takes advantage of, or exploits a weakness or vulnerability in an EPA program or operation.

Types of Investigations OIG is Undertaking or May Undertake

- Fraud schemes relating to the EPA's programs and operations.
- Fraudulent claims for money that should be spent to advance an EPA program.
- Improper avoidance of obligations to pay as required by an EPA program.
- Misrepresentations of the EPA's endorsement of COVID disinfectant or other products by fraudulently applying the Agency seal, identifier, or product registration numbers to product labels or advertisements.
- Cyberscams targeting EPA employees, contractors, and grantees and state and tribal programs overseen by EPA, as well as security threats to the EPA.

EPA OIG Hotline

Our office [receives allegations](#) of fraud, waste, and abuse concerning the COVID-19 pandemic and its impact on EPA and CSB operations.

The EPA and public should be on the alert for some common practices:

- Beware of companies placing the EPA seal or an EPA registration number on their products claiming that they meet EPA standards.
- Be cautious of imported products marketed as proven to effectively block various epidemic viruses.
- Be on the lookout for websites claiming their products contain EPA-approved active ingredients that kill 99.9 percent of all viruses and bacteria, including SAR-CoV-2 virus. These companies may put the EPA logo on their websites to falsely legitimize products. For a list of EPA-approved disinfectants, please visit EPA Official List N: Disinfectants for Use Against SARS-CoV-2.
- Be wary of companies claiming that their services are endorsed or their equipment or material is certified by the EPA.
