# Archiving Old Manifests

- EPA is looking to start an Archival Process for Manifests whose Ship Date (date signed by the initial transporter) is greater than 3 years old.
- EPA has already heard from states and industry that the manifests must be accessible and able to be corrected.
- EPA's current thinking is archiving manifests so that they are not automatically downloaded on the EPA Dashboard, unless the site searches on them and requests that they are downloaded.
- In addition, users will still be able to search and find older manifests with reports using the custom date range function.
