

### Key

- █ Primary Node
- █ Secondary Node
- # Frequency denotes the number of mind maps that expressed this idea

### Total Surrounding Environment

The majority of mind maps began with an environmental concern and used subsequent branches to elaborate. However, a few mind maps started with a disease and then identified associated environmental exposures. In order to represent the various ways that our partners are conceptualizing environmental health, we decided to represent these ways of thinking separately.

- Safe Workplace/Recreational Space**
  - Cancer Prevention
  - Plant-Based Diet
  - Vaping
  - Wildfire
- Respiratory**
  - Asthma
  - School
  - CAFO's
- Mental & Physical Health**
  - Physiological
  - Behavioral
  - Socioeconomic

### Acronyms
