RAP Executive Summary

ID No.: SWR No. 31547

Report Date: December 7, 2015 -
Rev 1

Use this worksheet to summarize the report. Be sure to complete and submit the Checklist for Report Completeness. **Attach a chronology of activities associated with the affected property.**

Briefly describe the affected property and PCLE zones, the conclusions from the assessment activities, identify any affected or threatened receptors, and describe any other major considerations taken into account when developing this response action plan. If any portion of the response action is necessitated due to an aesthetic or nuisance condition, identify the nature of that condition and identify that portion of the response action proposed to address it. If any media that contains a PCLE zone is not addressed in this RAP, provide justification.

Property Location, Land Use, and Operations

The Union Pacific Railroad (UPRR) Houston Wood Preserving Works (HWPW) Facility at 4910 Liberty Road, Houston, Harris County, Texas (the Site) is located within unoccupied industrial land and also includes the Englewood Intermodal Yard, which is to the south of the former HWPW facilities. The Englewood Intermodal Yard is used for the transfer of box containers from rail cars to truck trailers and vice-versa. UPRR mainline rail and siding rails lie between the former HWPW and the Englewood Intermodal Yard. The Site will remain commercial/industrial for the foreseeable future. The Site was first developed for creosoting operations in 1899, and operated various creosoting operations until 1984 when operations ceased. The facility was dismantled in the early 1990s. Details of the history and previous operations at the Site have been discussed in detail in the previously submitted Affected Property Assessment Report (APAR) (ERM, 2000) and Revised APAR (ERM, 2004), as well as the RCRA Facility Assessment (RFA) Report (PRC, 1993).

The surrounding properties within a 500-foot radius of the Site, including the Englewood Intermodal Yard, consist of residential to the northwest, north, southeast, and south. The UPRR Englewood Classification Yard, commercial/industrial property, is located to the east of the Site. An area of undeveloped land and abandoned houses are located west of the Site. The 500-foot radius field survey demonstrated no current potential groundwater receptors within the residential neighborhood. No water wells, water tanks, cisterns, or windmills, or surface water bodies were encountered. The nearest surface water body is Buffalo Bayou, located approximately 1.6 miles southwest of the Site. The potential for lateral migration of groundwater from the Site to the southwest approximately 8,500 feet to Buffalo Bayou is not likely.

Assessment Results

The initial APAR prepared for the Site was submitted to the TCEQ dated June 10, 2000 (ERM, 2000). A revised APAR was submitted to the TCEQ dated June 10, 2004. Pastor, Behling & Wheeler, LLC (PBW) prepared the APAR Addendum dated July 2009 (PBW, 2009). Following comments from the TCEQ, PBW submitted the Updated APAR Addendum dated October 2010, with response to comments dated March 29, 2011. The TCEQ approved the APAR in a letter dated April 13, 2011.

As detailed in the APARs and subsequent submittal, the Affected Property consists of surface soils, subsurface soils, and groundwater affected by chemical of concern (COC) at the Site: The soil and groundwater exposure pathways were evaluated as part of the Site assessments are considered to be complete and/or anticipated to be complete.

Site stratigraphy from the ground surface to a depth of approximately 135 feet is separated into the following units: Fill Material (0 to 5 feet thick), A-Cohesive Zone (A-CZ) (8 to 15 feet thick); A-Transmissive Zone (A-TZ) (4 to 21 feet thick); B-Cohesive Zone (B-CZ) (6 to 19 feet thick); B-Transmissive Zone (B-TZ) (discontinuous, where present, 3 to 10 feet thick); C-Cohesive Zone (C-CZ)

RAP Executive Summary

ID No.: SWR No. 31547

Report Date: December 7, 2015 -
Rev 1

(8 to 20 feet thick); C-Transmissive Zone (C-TZ) (10 to 13 feet thick); D-Cohesive Zone (D-CZ) (17 to 36 feet thick); and D-Transmissive Zone (D-TZ).

As detailed in the Updated APAR Addendum (PBW, 2010), target COCs in soil and groundwater media were evaluated using the March 2010 TCEQ TRRP Residential PCLs, or Residential Assessment Levels (RALs) to establish the Affected Property. Surface and subsurface soil data collected from 1997 through June 2010, with subsequent sampling in 2013 and 2014, were evaluated to assess the Affected Property and Protective Concentration Level (PCL) Exceedance (PCLE) Zone in surface and subsurface soils. Groundwater data from the most recent sampling event (July/August 2014) were evaluated to assess COC exceedances in groundwater.

PCLE Zones

Soils

The soil critical PCLs were established for the Site by using the lower commercial/industrial PCLs for on-site soils and residential PCLs for off-site soils for the following pathways:

- $^{Tot}Soil_{Comb}$ (Tier 1);
- $^{Air}Soil_{Inh-v}$ (Tier 1); and
- $^{GW}Soil_{Ing}$ (Tier 1 or 2).

Although the former wood preserving works portion of the Site is partially covered with crushed gravel and soil, the $^{Tot}Soil_{Comb}$ pathway was evaluated as potentially complete since potential future construction activities could occur at the Site. Most of the Englewood Intermodal Yard has a concrete pavement cover, and the rail area between the HWPW and the Englewood Intermodal Yard is covered with railroad ballast, which both prevents exposure to surface and subsurface soils in the area.

Comparing the surface and subsurface soil analytical data to the appropriate critical PCLs, concentrations of 15 COCs exceeded their respective critical PCLs:

Surface Soils

- 1,2-Diphenylhydrazine
- 2,4-Dinitrotoluene
- 2-Methylnaphthalene
- Benzene
- Benzo(a)anthracene
- Benzo(a)pyrene
- Dibenzofuran
- Naphthalene
- Pentachlorophenol
- Arsenic
- Lead

Subsurface Soils

- 2-Methylnaphthalene
- Benzene
- Naphthalene
- Pentachlorophenol

The surface soil PCLE zone extends across the Original Process Area (SWMU 5) and Recent Process Area (SWMU 4), down the South Drainage Ditch (SDD) (SWMU 2), and across the Former Inactive Wastewater Lagoon (AOC 6). The PCLE zone was primarily defined by the concentrations of benzo(a)anthracene, benzo(a)pyrene, naphthalene, and pentachlorophenol in surface soils. Additional soil sampling conducted in 2013 indicates that the surface soil PCLE Zone extends into the Englewood Intermodal Yard. Additional soil sampling in 2014 indicated that the surface soil PCLE Zone

RAP Executive Summary

ID No.: SWR No. 31547

Report Date: December 7, 2015 -
Rev 1

(benzo(a)pyrene and pentachlorophenol) extended north beyond the fence to the edge of Liberty Road, but was delineated along the northeast side of the Site. Arsenic and lead were detected at concentrations greater than cPCLs in surface soil in the Englewood Intermodal Yard.

For subsurface soils, the PCLE zones for 2-methylnaphthalene, naphthalene (more mobile COCs in soils), and pentachlorophenol were extrapolated using available subsurface soil data and applying the surface PCLE zone for those two COCs to the subsurface. By using the surface PCLE zone, this assumes the PCLE zone extends from the surface to the top of the uppermost GWBU (i.e. A-TZ). However for pentachlorophenol, none of the groundwater samples from A-TZ wells collected during the July/August 2014 groundwater monitoring event had detected pentachlorophenol concentrations above the RAL, suggesting the concentrations in surface and subsurface soils are protective of groundwater. The subsurface PCLE zone is confined to the area around the Original and Recent Process Areas (SWMUs 4 and 5), with a small area of naphthalene subsoil PCLE Zone in the Englewood Intermodal Yard area.

Groundwater

A total of 106 groundwater monitoring wells have been installed on and off-site in the GWBUs A-TZ, B-CZ/B-TZ, C-TZ, and D-TZ. Groundwater in A-TZ and B-TZ generally flows across the Site to the east; groundwater flow in the C-TZ flows from northeast to southwest, and groundwater flow in the D-TZ appears to flow to the northwest.

Based on the maximum groundwater analytical data from the July/August 2014 groundwater sampling event, concentrations of the following 23 target COCs exceeded their respective RALs where detected or had a SDL greater than the cPCL (>SDL) for COCs with no detections:

VOCs

- Benzene (A-TZ, B-TZ, C-TZ)
- Ethylbenzene (B-CZ only)
- Methylene Chloride (A-TZ, B-TZ/B-CZ, & C-TZ)
- Toluene (B-CZ only)
- Vinyl Chloride (A-TZ and B-TZ)

SVOCs

- 2,4-Dimethylphenol (A-TZ, B-TZ, C-TZ)
- 2,6-Dinitrotoluene (B-TZ & C-TZ)
- 2-Methylnaphthalene (A-TZ, B-CZ/B-TZ, & C-TZ)
- Acenaphthene (C-TZ only, one well*)
- Anthracene (C-TZ only, one well*)
- Benzo(a)anthracene (A-TZ, B-CZ, & C-TZ)
- Benzo(a)pyrene (A-TZ, C-TZ, and D-TZ)
- Bis(2-chloroethoxy)methane (A-TZ & C-TZ*)
- Chlorobenzene (A-TZ only, one well)
- Chrysene (C-TZ only, one well*)
- Dibenzofuran (A-TZ, B-CZ/B-TZ, & C-TZ)
- Fluoranthene (C-TZ only, one well*)
- Fluorene (C-TZ only, one well*)
- Naphthalene (A-TZ, B-CZ/B-TZ, & C-TZ)
- Pentachlorophenol (C-TZ)
- Phenanthrene (C-TZ only, one well*)
- Phenol (A-TZ, B-CZ, & C-TZ)
- Pyrene (C-TZ only, one well*)

* - COC only detected in wells with DNAPL present

RAP Executive Summary

ID No.: SWR No. 31547

Report Date: December 7, 2015 -
Rev 1

As noted above, SVOCs acenaphthalene, anthracene, chrysene, fluoranthene, fluorene, phenanthrene, and pyrene were detected above cPCLs in only one well, MW-23C, which contained dense nonaqueous phase liquids (DNAPL) during the sampling event. These concentrations may overestimate the dissolved fraction in the groundwater; however, these COCs were included in the PCLE COC list.

The location and extent of the groundwater PCLE zones were determined by COCs present in groundwater at concentrations that exceed the critical PCL ($^{GW}GW_{ing}$) using the most recent groundwater data. Groundwater PCLE Zones were mapped for the three upper GWBUs: A-TZ, B-CZ/B-TZ, and C-TZ. One COC benzo(a)pyrene has been detected in the D-TZ GWBU during the most recent groundwater sampling event. A resample from the well confirmed the initial result. UPRR will evaluate further investigation of the D-TZ following the next sampling event.

No affected or threatened receptors are associated with the groundwater PCLE zone. Groundwater supply wells are not located in the affected area and drinking water in the area is provided by a municipal water supply (City of Houston).

Creosote DNAPL has been detected in the GWBUs A-TZ, B-CZ, B-TZ, and C-TZ as noted in soil borings and monitoring wells. The sources of DNAPL observed at the Site are likely from spills and drippings at the Site over the 80+ years of wood treating operations, with most of the releases likely occurring prior to 1984. The wood treating facility was shut down and dismantled in the early 1990s; thus, the DNAPL sources were removed over 20 years ago. UPRR completed a DNAPL Recovery Pilot Study for 24 months ending January 2015 to evaluate the effectiveness of DNAPL recovery through monthly DNAPL pumping events for 24 months. The results of the pilot test indicated that monthly DNAPL recovery activities are effective with DNAPL recovery and with overall DNAPL thicknesses either decreasing or becoming stable in the wells.

Response Action Plan

The objective of this RAP is to develop responses to protect current and future pathways from exposure to the PCLE Zones in surface soil, subsurface soil, and groundwater. The following response actions are proposed at the Site to achieve this objective:

- Surface/subsurface soil – The surface/subsurface soil PCLE Zones at the Site will be addressed as follows:
 - 1) Former HWPW Area: Remedy Standard B closure through consolidating impacted soils within the Area of Contamination (AOC) and implementing Physical Control through an engineered soil cap and asphalt roadway. Periodic inspections and maintenance of the cap and roadway will be implemented;
 - 2) Englewood Intermodal Yard: Remedy Standard B closure by implementing Physical Control using the existing concrete pavement as a cap. Periodic inspections and maintenance of the cap will be implemented;
 - 3) Railroad mainlines and siding tracks: The response action for the operational area between the Former HWPW area and the Englewood Intermodal Yard will be Remedy Standard B closure using the existing railroad ballast as a protective barrier.
 - 4) City of Houston ROW along Liberty Road: Remedy Standard B closure through limited excavation of surface soils, consolidating impacted soils within the AOC, and implementing Physical Control through an engineered concrete sidewalk. Periodic inspections and maintenance of the cap and roadway will be implemented.
- Groundwater – Remedy Standard B closure using a Plume Management Zone (PMZ) with monitored natural attenuation (MNA) for control as the response action for the groundwater

RAP Executive Summary

ID No.: SWR No. 31547

Report Date: December 7, 2015 - Rev 1

PCLE Zones within the Affected Property. For the purposes of this RAP submittal, there will be four PMZ areas:

- 1) On-Site PMZ (Main) - The on-site PMZ (Main) will include the cumulative groundwater PCLE Zone within the UPRR-owned property from the center to the east portion of the Site.
- 2) On-Site PMZ (West) - The on-site PMZ (West) will include the B-CZ/B-TZ PCLE Zone on the west side of the Site within the UPRR-owned property.
- 3) Off-Site PMZ - The off-site PMZ includes the cumulative groundwater PCLE Zone that extends off-site to the north of the Site, but not including City of Houston ROW. The proposed off-site PMZ will require institutional controls for up to 88 individual properties.
- 4) Off-Site PMZ City of Houston ROW - The off-site PMZ includes the cumulative groundwater PCLE Zone that extends off-site to the north of the Site within the City of Houston ROW.

In addition, areas where DNAPL was noted will be proposed for control under a Technical Impracticability (TI) Demonstration per 30 TAC §350.33(f). Groundwater monitoring is proposed to be performed as part of the PMZ to confirm that the lateral extent of COC concentrations greater than their respective cPCLs continue to remain within the boundaries of the PMZ. Groundwater monitoring will be initiated for both the On-Site PMZs and Off-Site PMZs following approval of the RAP. During the acquisition of landowner consent for the off-site PMZ, groundwater monitoring will be conducted concurrently with the on-site PMZ monitoring requirements. DNAPL will be recovered from wells on a periodic basis through pumping to recover the readily recoverable NAPL for the GWBUs to satisfy requirements of the “no growth” PMZ and TI Zone.

What is the selected remedy standard for this affected property? ___ A X B

List all media that contains a PCLE zone and specify the proposed response action for each media. Indicate the type of removal, decontamination, physical control and/or institutional control action that is proposed.

Media	COCs ¹	Removal	Decontamination	Control		
				Physical Control	Modified Groundwater Response Objective ²	
					PMZ	WCU
Surface Soil	Benzene, SVOCs, metals			X		
Subsurface Soil	SVOCs			X		
Groundwater	Benzene, SVOCs				X	X

Is there a media that contains a PCLE zone that is not addressed in this RAP? _____ yes X no _____

¹ Specify either a specific COC or, if the response action is the same for all COCs in one type, specify the type of COC (for example, VOCs, SVOCs, metals).

² If a modified groundwater response objective is proposed, check the type(s) of proposed modifications.

RAP Executive Summary

ID No.: SWR No. 31547

Report Date: December 7, 2015 -
Rev 1

If yes, provide justification for not addressing the PCLE zone in this RAP.

On-site land use: Residential Commercial/Industrial
Off-site land use: Residential Commercial/Industrial (check all that apply)

Is this a re-submittal or revision of a previous RAP? Yes No

If yes, explain why the RAP is being revised or resubmitted.

This RAP is being submitted with revisions based on the TCEQ Technical Notice of Deficiencies (NOD) dated August 5, 2015 on the UPRR Houston Wood Preserving Works Permit Renewal/Compliance Plan with Major Amendment, Permit/Compliance Number 50343, ISWR 31547.

Were all the appropriate notifications made in accordance with §350.55? Yes No

If no, explain why notifications were not made:

CHRONOLOGY

Below is a summary of the site investigation and regulatory chronology at the UPRR Former Houston Wood Preserving Works facility (listed in reverse order).

Date	Description
November 2015	Union Pacific Railroad (UPRR) receives the Texas Commission on Environmental Quality (TCEQ) letter dated November 5, 2015 detailing the agency's review of the September 18, 2015 submittal titled Additional Information for Clean Closure Equivalence Demonstration. The TCEQ Industrial and Hazardous Waste (I&HW) Permits Section was unable to accept the request for discontinuing post-closure care of the former surface impoundment, Solid Waste Management Unit (SWMU) 1.
November 2015	Meeting with UPRR, Pastor, Behling & Wheeler (PBW), and the TCEQ on November 4, 2015 discussing the October 23, 2015 technical comment letter from the TCEQ.
October 2015	UPRR receives additional technical comments from the TCEQ in a letter dated October 23, 2015 on the Response Action Plan (RAP) regarding the Plume Management Zones and Technical Impracticability Demonstration provided in the Response Action Plan.
September 2015	PBW submits to the TCEQ the Additional Information for Clean Closure Equivalence Demonstration dated September 18, 2015 that included historical data and letters from 1983, 1984, and 1991 to demonstrate clean closure of the soils under the former surface impoundment (SWMU 1). The letter also included a request to cease the post-closure care for SWMU 1.
August 2015	UPRR receives Technical Notice of Deficiency (NOD) Letter dated August 5, 2015 on the RCRA Part A and B Permit Renewal Application and Response Action Plan from the TCEQ.
July 2015	PBW submits to the TCEQ the Corrective Action Monitoring Report: 2015 First Semi-Annual Event dated July 16, 2015; PBW conducts 2015 second semi-annual groundwater monitoring event for the SWMU No. 1.
April 2015	PBW submits to the TCEQ newspaper tear sheets and affidavits that public notice was published in English and Spanish in the <i>Houston Chronicle</i> on April 2 and <i>La Subasta</i> on March 31, respectively as required once the RCRA Permit Renewal/Compliance Plan with Major Amendment was administratively complete.
March 2015	TCEQ issues a letter dated March 13, 2015 declaring the RCRA Permit Renewal/Compliance Plan with Major Amendment was administratively complete on March 13, 2015.

Date	Description
February 2015	PBW submits a response letter to the TCEQ dated February 13, 2015 for the TCEQ Administrative NOD on the RCRA Part A and B Permit Renewal Application.
January 2015	PBW submits to the TCEQ the Corrective Action Monitoring Report: 2014 Second Semi-Annual Event dated January 15, 2015; PBW conducts 2015 first semi-annual groundwater monitoring event for the SWMU No. 1.
December 2014	UPRR submits the RCRA Part A and B Permit Renewal Application with Response Action Plan (RAP) to the TCEQ dated December 10, 2014. UPRR receives the TCEQ Administrative NOD Letter dated December 17, 2014.
November 2014	RCRA Permit Pre-Application Meeting with UPRR, PBW, and TCEQ dated November 6, 2014.
September 2014	UPRR holds public meeting with residents near the Site to detail institutional controls for off-site groundwater Plume Management Zone (PMZ).
July/August 2014	PBW conducts site-wide groundwater sampling event.
May 2014	PBW oversees installation of seven new monitoring wells (MW-51C, MW-76C, MW-77A, MW-78A, MW-79A, MW-80B, and MW-81B) in the Englewood Intermodal Yard to evaluate DNAPL extent and extent of chemicals of concern (COCs) in the B-CZ unit to the southeast, and one replacement well MW-34CR to replace MW-34C. Soil samples also collected from City of Houston right of way (ROW) along north perimeter of the Site.
January 2014	PBW conducts site-wide groundwater sampling event.
July 2013	PBW conducts site-wide groundwater sampling event.
February/March 2013	PBW conducts cone penetrometer testing (CPT)/rapid optical screening tool (ROST) and soil investigation at the Englewood Intermodal Yard adjacent to the UPRR Houston Wood Preserving Works (HWPW) site.
January/February 2013	PBW conducts site-wide groundwater sampling event (95 wells). PBW submits Proposed DNAPL Recovery Pilot Test letter to TCEQ dated February 5, 2013, and initiates monthly DNAPL recovery from on-site and off-site wells (10-12 wells) (planned for 24 months).
November 2012	Meet with TCEQ regarding proposed CPT/ROST investigation of Englewood Intermodal Yard based on DNAPL detected from the December 2011 investigation.
July 2012	PBW conducts site-wide groundwater sampling event.
January 2012	PBW conducts site-wide groundwater sampling event.

Date	Description
July 2012	PBW conducts site-wide groundwater sampling event.
December 2011	PBW installs additional monitoring wells in the cohesive zone B-CZ to evaluate extent of DNAPL in the B-CZ.
July 2011	PBW conducts site-wide groundwater sampling event.
April 2011	TCEQ approves the Affected Property Assessment Report (APAR) (including updates and addendums).
March 2011	PBW submits the Revised Updated APAR Addendum to the TCEQ. UPRR repairs fence around site.
January 2011	PBW conducts site-wide groundwater sampling event.
December 2010/ January 2011	UPRR/PBW submits Off-Site Notification Letters to off-site properties indicating Notice of Information Availability for the site, as required with the submittal of the Updated APAR Addendum (Oct 2012) .
October 22, 2010	PBW submits the Updated APAR Addendum to the TCEQ.
June/July 2010	PBW conducts additional soil (along northeast portion of Site) and groundwater investigation (A-TZ, B-CZ, C-TZ and D-TZ wells); including site-wide groundwater monitoring event.
February 16, 2010	UPRR Response to TCEQ Comment Letter dated November 18, 2009.
January 2010	PBW conducts site-wide groundwater sampling event; selected wells are analyzed for Volatile Organic Compounds (VOCs) by EPA Method 8620.
November 18, 2009	TCEQ Comment Letter on Revised APAR.
July 2009	PBW submits APAR Addendum to TCEQ.
January 2009	PBW conducts additional soil and groundwater investigation.
July 2008	PBW conducts additional CPT-ROST and groundwater investigation
January 2007	PBW conducts additional soil and groundwater investigation
August 2006	ERM-Southwest, Inc. (ERM) conducted additional soil and groundwater investigation
April 2006	ERM conducted additional soil and groundwater investigation
September 6, 2005	UPRR Response to TCEQ Response Letter dated August 1, 2005
August 2005	TCEQ Response to UPRR Response Letter dated June 9, 2005

Date	Description
June 9, 2005	UPRR Response to TCEQ Letter dated April 15, 2005
April 15, 2005	TCEQ Response to UPRR Response Letter dated November 19, 2004
November 19, 2004	UPRR Response to October 8, 2004 TCEQ Letter
October 8, 2004	TCEQ Comment Letter on Revised APAR
June 10, 2004	Revised APAR submitted to the TCEQ by ERM, Inc. on behalf of UPRR
November 7, 2001	Texas Natural Resources Conservation Commission (TNRCC) provides comments to July 5, 2001 response letter.
July 5, 2001	Follow-up response to November 6, 2000 TNRCC comment letter on the On-Site APAR submitted to TNRCC on behalf of UPRR.
January 9, 2001	Initial response to November 6, 2000 TNRCC comments.
November 6, 2000	TNRCC provides comments to On-Site APAR.
July 10, 2000	Affected Property Assessment Report for On-Site Property (On-Site APAR) submitted to TNRCC on behalf of UPRR by ERM.
February 20, 2000	Letter submitted to the TNRCC regarding proposed Phase 2-C investigation for further delineation of off-site areas
September 10, 1999	Phase 2-B RFI/EOC Investigation Report submitted to TNRCC on behalf of UPRR by ERM
April 27, 1998	Interim Stabilization Measures Report – Southern Drainage Ditch, submitted to TNRCC on behalf of UPRR by ERM.
February 13, 1998	Phase 2-A RFI/EOC Investigation Report submitted to TNRCC on behalf of UPRR by ERM.
January 13, 1997	RFI portion of the Phase 1 RFI/EOC Investigation Report approved by TNRCC
November 26, 1996	EOC portion of the Phase 1 RFI/EOC Investigation Report approved by TNRCC
May 23, 1996	Phase 1 RFI/EOC Report submitted on behalf of Southern Pacific Transportation Company (SPTCo) by Terranext
October 16, 1995	RFI Work Plan approved by TNRCC
September 29, 1995	EOC Work Plan approved by TNRCC
January 10, 1995	Operation and Maintenance Plan approved by TNRCC

Date	Description
November 3, 1994	Revised Compliance Schedule approved by TNRCC
October 14, 1994	RCRA Facility Investigation (RFI) Work Plan submitted on behalf of SPTCo
September 16, 1994	Extent of Contamination (EOC) Work Plan submitted on behalf of SPTCo
September 7, 1994	Revised Compliance Schedule submitted on behalf of SPTCo
August 19, 1994	Operation and Maintenance Plan and Compliance Schedule submitted on behalf of SPTCo
June 20, 1994	Permit No. HW-50343-000 and Compliance Plan CP-50343-000 issued by TNRCC.
October 1993	RCRA Facility Assessment completed on behalf of U.S. EPA by PRC Environmental Management, Inc.
May 13, 1991	RCRA Permit Application submitted by SPTCo

Note: Not all groundwater sampling events are listed in the chronology

Checklist for Report Completeness	ID No.: SWR ID 31547
	Report Date: December 7, 2015

Use this checklist to determine the portions of the form that must be submitted for this report. Answer all questions by checking Yes or No. If the answer is Yes include that portion of the report. If the answer is No, do not complete or submit that portion of the report. All form contents that are marked "Required" must be submitted. Form contents marked with an asterisk (*) are not included in the blank form and are to be provided by the person.

Response Action Objectives Associated Information: Attachment 1A, 1B	RAP Worksheet 1.0 Page 1 of 9	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 - Rev 1

Use this worksheet to describe the objectives for the response action in each media.

Response Action Objectives

List the environmental media to which this applies

Surface Soils (0 – 5 feet bgs)/Subsurface Soils (>5 feet bgs)

Repeat this section for each medium that has a different response action objective.

State the property-specific response objectives for the PCLE zone in each media in the context of the response objectives set forth in §350.32 or §350.33 as applicable. Explain how the response action is appropriate based on the hydrogeologic characteristics, COC characteristics, and potential unprotective conditions that could continue or result during the remedial period.

The Response Action Objectives (RAO) for the surface and subsurface soil PCLE Zones is to control exposure through physical barriers such that commercial/industrial workers will not be exposed to concentrations of COCs in excess of the critical human health PCLs (§350.33(a)(1)). The surface soil PCLE zone extends across the Recent Process Area (SWMU 4), Original Process Area (SWMU 5), Water Treatment and Boiler System (SWMU 6), Aboveground Storage Tank Area (SWMU 8), Oil/Water Separators (SWMU 11), down the Southern Drainage Ditch (SDD) (SWMU 2), and across the Former Inactive Wastewater Lagoon (Area of Concern (AOC) 6). The surface soil PCLE Zone also extends north of the Site onto the City of Houston right of way (ROW) and south across the UPRR main lines and into the Englewood Intermodal Yard (Attachment 1A-Figure 4A).

Three key approaches will be implemented to protect commercial/industrial workers from exposure to COCs in surface and subsurface soils:

- **Former HWPW area:** Using the Area of Contamination (AOC) approach, surface soils with cPCL exceedances in the Inactive Wastewater Lagoon (AOC 6), and areas north of the AST Area (SWMU No. 8) will be consolidated in the area of SWMUs 4, 5, and 8. This area will then be covered with a vegetated soil cap to prevent human exposure to the impacted soils. The surface soil PCLE zone along the SDD (SWMU No. 2) will be capped in place using asphalt cover as part of a roadway improvement.
- **Englewood Intermodal Yard area:** The surface soil PCLE zone in the Intermodal Yard area is currently covered with a physical barrier (concrete pavement), preventing contact and exposure.
- **UPRR Main Lines Ballast Area:** UPRR proposes to use the existing railroad ballast as an engineering control for preventing on-site worker exposure to impacted surface soils in this area.

To address potential exposure to surface soil PCLE Zone off-Site, the following will be implemented to protect residents (i.e. occasional trespasser) from exposure to COCs in surface and subsurface soils:

- **City of Houston Right of Way (ROW):** The area immediately north of the AST Area (SWMU No. 8) within the City of Houston right of way (ROW) between the UPRR property boundary and Liberty Road (approximately 6 feet wide and 550 feet long) will be addressed through a combination of soil excavation (to be placed within the capped area) and construction of a concrete sidewalk to restrict exposure to the surface soil PCLE zone.

Response Action Objectives Associated Information: Attachment 1A, 1B	RAP Worksheet 1.0 Page 2 of 9	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 - Rev 1

The Affected Property (including the entire Site (HWPW and Englewood Intermodal Yard)) will also be deed restricted for commercial-industrial land use, for the use of physical controls on surface and subsurface soil, and restrictions on soil excavation within the surface and subsurface soil PCLE Zone in accordance with §350.31(g).

Explain how the COCs will be handled, treated, disposed, or transferred to another media and document that the response action will not result in any additional potential exposure conditions due to response action activities.

Surface soils from parts of AOCs 6 and 7 and SWMU Nos. 7 and 11 will be excavated and consolidated within the Area of Contamination (Affected Property) within the former HWPW area. During consolidation activities, Site workers will operate under a site-specific health and safety plan (HASP) and impacted soils will be consolidated within the surface soil Affected Property. Any equipment and tooling that comes in contact with impacted soils will be decontaminated and managed within the AOC. Storm water protection (i.e., Storm Water Pollution Prevention Plan (SWPPP), silt fencing) and fugitive dust monitoring will be conducted during remediation activities to ensure the activities will not result in additional exposure conditions. Verification sampling will be performed at the excavation areas following excavation of soils to ensure that the affected soils containing COCs at concentrations in excess of the applicable cPCLs have been removed. Upon completion of verification sampling, the excavation area will be restored by backfilling with clean fill and/or grading.

During construction of the cap, storm water management and dust monitoring will also be conducted to minimize impacting soils outside of the Affected Property during the response action.

For areas outside of the proposed excavation, COCs in soil will be left in place at the Site and exposure will be controlled by the use of institutional controls (commercial/industrial land use) and the use of physical barriers (engineered soil cap and asphalt roadway cap for the former HWPW area and concrete and railroad ballast for the Englewood Intermodal Yard).

State the proposed “reasonable time frame” and provide the justification for that time frame in the context of any potential for unprotective exposures to exist or develop, COC characteristics, hydrogeologic and affected property characteristics. If the reasonable time frame is different for the different affected media or for particular tracts of land, be sure to discuss that. Provide how the proposed response action will meet the objectives in a reasonable timeframe.

Based on preliminary approval from the TCEQ through meeting with Corrective Action Division (on November 4, 2015), UPRR began the bidding process in November 2015 for identifying the contractor to conduct the proposed response action, including the consolidation within the Area of Contamination, construction of the asphalt roadway cap, and off-site concrete sidewalk (details provided in Worksheet 2.0). It is anticipated that the response actions will be initiated in January 2016 and completed within 180 days.

For the Englewood Intermodal Yard, soils will be left in place. A physical barrier (concrete and railroad ballast/ties/rail) is already in place to prevent exposure to surface soil in that area.

For the entire Affected Property, deed restriction of the Site to commercial-industrial use will also be implemented to prevent future exposure risk. The deed notice will be filed with the Harris County

Response Action Objectives Associated Information: Attachment 1A, 1B	RAP Worksheet 1.0 Page 3 of 9	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 - Rev 1

Clerk upon approval of the RAP. In accordance with the TCEQ regulatory guidance document *Institutional Controls Under TRRP* (RG-366/TRRP-16), proof of filing would be submitted to the TCEQ within 120 days of approval of the RAP. An example deed notice for the UPRR property is included in Appendix 4.

Response Action Objectives Associated Information: Attachment 1A, 1B	RAP Worksheet 1.0 Page 4 of 9	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 - Rev 1

List the environmental media to which this applies

Groundwater

Repeat this section for each medium that has a different response action objective.

State the property-specific response objectives for the PCLE zone in each media in the context of the response objectives set forth in §350.32 or §350.33 as applicable. Explain how the response action is appropriate based on the hydrogeologic characteristics, COC characteristics, and potential unprotective conditions that could continue or result during the remedial period.

The RAO to address the PCLE Zone in groundwater will be through control using a modified groundwater response objective through a plume management zone (PMZ) and Technical Impracticability (TI) Zone. Per §350.33, a PMZ is proposed for the Site for the three GWBUs: A-TZ, B-CZ/B-TZ, and C-TZ, with monitored natural attenuation (MNA) as the groundwater control to meet PCLs at points of exposure (POEs) for all three GWBUs. For the purposes of this RAP submittal, the overall PMZ consists of the following four separate PMZs:

1. On-Site PMZ (Main) – The on-site PMZ (Main) will include the cumulative groundwater PCLE Zone within the UPRR-owned property from the center to the east portion of the Site.
2. On-Site PMZ (West) – The on-site PMZ (West) will include the B-CZ/B-TZ PCLE Zone on the west side of the Site within the UPRR-owned property.
3. Off-Site PMZ – The off-site PMZ includes the cumulative groundwater PCLE Zone that is a continuation of the On-Site PMZ (Main) and extends off-site to the north of the Site, but not including land designated as City of Houston ROW. The proposed off-site PMZ will require institutional controls for up to 88 individual properties.
4. Off-Site PMZ City of Houston ROW – The off-site PMZ includes the cumulative groundwater PCLE Zone that is a continuation of the On-Site PMZ (Main) and extends off-site to the north of the Site within the land designated as City of Houston ROW.

The on-site PMZs (Main and West), including the former HWPW and Englewood Intermodal Yard will be deed restricted to commercial-industrial land use and to restrict future use of groundwater on-site, as well as restrictions on soil excavation activities within the surface soil PCLE Zone on the UPRR-owned property. UPRR has proposed to file restrictive covenants with the Harris County Clerk for the off-site properties (88 off-site properties) within the proposed cumulative PMZ (includes the three individual PMZs for the A-TZ, B-CZ/B-TZ, and C-TZ GWBUs). For the off-site PMZs (88 off-site properties and City of Houston ROW), UPRR has acquired landowner consent for 52 of the off-Site properties through the restrict covenant to establish the PMZ on properties not owned by UPRR. An extensive and diligent inquiry has been conducted to locate the landowners for the remaining 36 properties, as detailed in Appendix 5.

UPRR proposes a TI demonstration (Worksheet 2.3) for GWBUs where DNAPL has been observed (i.e., in soil borings and/or monitoring wells in the A-TZ, B-CZ/B-TZ, and C-TZ) per §350.33 (f) for both the on-site property and off-site properties.

To address the NAPL, the NAPL response action objectives and endpoints using TCEQ Guidance TRRP-32 (Risk-Based NAPL Management) will be addressed through control via TI. For areas where either creosote NAPL was noted in the soil boring log in the saturated zone or is detected in monitoring wells, the TI demonstration details the difficulty of achieving groundwater PCLs in these areas because of complex hydrogeology and physical nature of creosote (discussed in Worksheet 2.3). The control

Response Action Objectives

Associated Information: Attachment 1A, 1B

RAP Worksheet 1.0 Page 5 of 9

ID No.: SWR ID
31547

Report Date: December 7,
2015 - Rev 1

endpoint will be to control the soluble NAPL fraction sufficient to create stable or shrinking PCLE zones. Methods to control the creosote DNAPL will include physical recovery (recover readily recoverable creosote DNAPL from wells with DNAPL present) or natural means (natural source zone depletion through biodegradation) at the NAPL source zone so that the dissolved-phase groundwater PCLE zone is stable (or shrinking) and the PCLE performance objectives for the TI-based “no growth” PMZ can be met.

Therefore, the current response objective per the TCEQ Guidance is to ensure compliance of NAPL zone in the overall PMZ. With the PMZs and TIs established, the response objectives will include compliance with PMZ performance criteria at the NAPL zone through control via TI and institutional controls (UPRR-owned property and off-site properties/City of Houston ROW) on groundwater use to protect exposure to residual NAPL and COCs in the GWBUs. As part of the evaluation for compliance with PMZ performance criteria, UPRR will continue the DNAPL recovery activities on a monthly basis, and will evaluate the effectiveness annually.

Explain how the COCs will be handled, treated, disposed, or transferred to another media and document that the response action will not result in any additional potential exposure conditions due to response action activities.

Groundwater will be sampled from the selected monitoring wells on a semi-annual basis, and purge water from sampling events will be drummed for proper disposal (waste stream currently on the Notice of Registration (NOR)), stored within the Container Storage Area (CSA) (Unit 4 on the NOR), and disposed of in accordance with state and federal regulations and requirements.

Recovered creosote DNAPL from the Corrective Action System Wells will be managed at the Site in containers (i.e. drums) within the CSA. In accordance with the RCRA Permit and Compliance Plan, recovered DNAPL will be stored in the CSA, then transported and disposed of in accordance with state and federal requirements within the required timeframes.

State the proposed “reasonable time frame” and provide the justification for that time frame in the context of any potential for unprotective exposures to exist or develop, COC characteristics, hydrogeologic and affected property characteristics. If the reasonable time frame is different for the different affected media or for particular tracts of land, be sure to discuss that. Provide how the proposed response action will meet the objectives in a reasonable timeframe.

For the groundwater Remedy Standard B, the proposed response action (MNA) is currently occurring at the Site. There are no potential or unprotected exposures at the Site for groundwater since none of the properties in the area use groundwater for drinking or any other purposes; and the properties are provided drinking water by the City of Houston. None of the City of Houston groundwater supply wells are in the area of the Site. In addition, no groundwater drinking wells have been identified in the area and anticipated future use of the shallow groundwater as resource is unlikely.

A review of groundwater data for the Site indicates that COC concentrations in the three GWBUs are mostly stable or decreasing at the downgradient edges at the Site (Mann-Kendall trend analysis – Attachment 2E), supporting the use of the PMZ for the groundwater PCLE Zones. With the complex hydrogeology and the nature of the creosote contamination where DNAPL has been observed, portions

Response Action Objectives

Associated Information: Attachment 1A, 1B

RAP Worksheet 1.0 Page 6 of 9

ID No.: SWR ID
31547

Report Date: December 7,
2015 - Rev 1

of the groundwater PCLE Zones are proposed to be technically impracticable for groundwater restoration (Worksheet 2.3, Attachment 2G). Therefore, with the PMZ and TI Zones, no exposures to groundwater above cPCLs are expected, and furthermore, groundwater exposure in the area will be restricted through institutional controls.

Institutional controls through deed recordation (UPRR-owned property – on-site PMZs) and restrictive covenants (off-site properties – Off-Site PMZ/Off-Site PMZ City of Houston ROW) within the PMZ and restricting the use of groundwater will be used at the Site to prevent future exposure risk until groundwater concentrations achieve critical PCLs. The deed notice for the UPRR-owned property and restrictive covenants for off-site properties will be filed with the Harris County Clerk upon approval of the RAP. The deed restriction and restrictive covenants completed to date are included in Appendix 4. In accordance with the TCEQ regulatory guidance document *Institutional Controls Under TRRP* (RG-366/TRRP-16), proof of filing for the on-site PMZ will be submitted to the TCEQ within 120 days of approval of the RAP.

Landowners for some properties within the Off-Site PMZ were not locatable. In accordance with 30 TAC §350.111(c)(3), documentation of the extensive and diligent inquiry to locate those landowners are provided in Appendix 5. Following approval from the TCEQ Executive Director, deed notices on those properties will be placed detailing the Off-Site PMZ.

Soil Response Action Objectives

When using removal and/or decontamination with controls or controls only, demonstrate how that physical control or combination of measures will reliably contain COCs within and/or derived from the surface soil and subsurface soil PCLE zone materials over time.

As previously discussed, the RAOs for surface and subsurface soil PCLE Zones is to control exposure through Remedy Standard B using physical barriers such that on-site commercial/industrial and off-site residential pathways will not be exposed to concentrations of COCs in excess of the critical human health PCLs (§350.33(a)(1)). In addition, COC concentrations in the surface and subsurface soils will not create a leachate that will lead to cPCL exceedances at the alternate point of exposure wells within the proposed PMZ. Soil responses will be implemented differently depending on the location within the Site, with controls placed in the following areas:

- **Former HWPW area:** Once the surface soils with cPCL exceedances in the Inactive Wastewater Lagoon (AOC 6), near the Location of the Former Incinerator (AOC 4) surrounding the Tank Car Storage Area (SWMU 7) and Oil/Water Separators (SWMU 11), and areas north of the Recent Process Area (SWMU 4), Original Process Area (SWMU 5) and AST Area (SWMU 8) are consolidated within the area of SWMUs 4, 5, and 8 under the Area of Contamination policy, a vapor barrier with geotextile fabric, and an engineered soil cap will be constructed to cover the consolidated soil and remaining surface soil PCLE Zone on the former wood treating works area to contain and prevent exposure to COCs within the soil PCLE Zone at the Site. The soil cap will be vegetated and sloped to minimize infiltration to control potential leachate migration from the surface and subsurface soils to the GWBUs. The surface soil PCLE zone along the SDD (SWMU No. 2) will be capped in place using asphalt cover as part of a roadway improvement. The soil cap and asphalt cap will be maintained under the post-response action care period. In these areas where surface soils will be removed, subsurface soils do not appear to be impacted above cPCLs. The subsurface soil PCLE Zone is

Response Action Objectives

Associated Information: Attachment 1A, 1B

RAP Worksheet 1.0 Page 7 of 9

ID No.: SWR ID
31547

Report Date: December 7,
2015 - Rev 1

within the areas where the proposed engineered soil cap will be constructed. Therefore, there will be no exposure to subsurface soils as well.

- City of Houston ROW: The area immediately north of the Recent Process Area (SWMU 4), Original Process Area (SWMU 5), and AST Area (SWMU No. 8) within the City of Houston right of way (ROW) between the UPRR property boundary and Liberty Road (approximately 6 feet wide and 550 feet long) will be addressed through a combination of soil excavation (to be placed within the capped area discussed above) of the top 9-inches and construction of a physical barrier (concrete sidewalk) preventing contact with surface soils and infiltration. As part of the post-response action care, the concrete sidewalk in the area of the surface soil PCLE Zone will be inspected to ensure continued residential land use protection.
- Englewood Intermodal Yard area: The surface soil PCLE zone in the Intermodal Yard area is currently covered with a physical barrier (concrete pavement), preventing contact and infiltration. As part of the post-response action care, the concrete pavement in the area of the surface soil PCLE Zone will be inspected to ensure continued on-site worker protection.
- UPRR Main Lines Ballast Area: The area between the former wood treating works area and the Englewood Intermodal Yard (approximately 100 feet width) is covered with railroad ballast, ties, and rail. UPRR proposes to use the existing railroad ballast as an engineering control for preventing on-site worker exposure to impacted surface soils in this area. Since this area is owned and controlled by UPRR, UPRR will implement a health and safety program to restrict any construction activity in the area of the railroad lines. In the event construction activities are necessary, a health and safety plan will be implemented to ensure worker protection from COCs in the surface soils.

For the approaches, the soil cap and asphalt roadway improvement will be maintained and appropriate maintenance, repair of the concrete sidewalk area north of the Site and concrete parking area in the Englewood Intermodal Yard will be performed as needed, and the railroad ballast will be maintained as part of the railroad operations.

The affected property will also be deed restricted to commercial-industrial land use and for the use of a physical control on surface soils in accordance with §350.31(g), including the City of Houston ROW.

Explain how the removal or decontamination action will reduce the concentration of COCs to the critical surface soil and subsurface soil PCL throughout the soil PCLE zone and prevent COC concentrations above the critical soil PCLs from migrating beyond the existing boundary of the soil PCLE zone.

In the areas where surface soils will be excavated, confirmation samples will be collected to confirm that the COC concentrations in the remaining soils will be below critical soil PCLs. Excavated surface soils will be consolidated within the area of SWMUs 4, 5, and 8 under the Area of Contamination policy, and an engineered soil cap will be constructed to cover the area to prevent exposure to and migration of COCs beyond the soil PCLE Zone.

Response Action Objectives Associated Information: Attachment 1A, 1B	RAP Worksheet 1.0 Page 8 of 9	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 - Rev 1

Groundwater Response Action Objectives

Name of groundwater-bearing unit to which this information applies A-TZ, B-TZ/B-CZ, C-TZ – Uppermost Groundwater-Bearing Units
 Repeat this section for each groundwater-bearing unit for which a different response action is proposed.
 Groundwater classification ___ 1 X 2 ___ 3

Is a modified groundwater response action being proposed for any part of the groundwater PCLE zone (§350.33(f)(2), (3), or (4))? X Yes ___ No

If yes, does the affected property meet the qualifying criteria for a modified groundwater response action using a waste control unit, plume management zone, or technical impracticability? X Yes ___ No

If yes, complete the appropriate portions of this report.
 If no to either question, complete the following:

Explain how the removal or decontamination action will reduce the concentration of COCs to the critical groundwater PCL throughout the groundwater PCLE zone and prevent COC concentrations above the critical groundwater PCL from migrating beyond the existing boundary of the groundwater PCLE zone.

A modified Remedy Standard B groundwater RAO will be conducted at the Site through control using a PMZ and TI Zone. MNA is proposed as a control response to address the PCLE Zones within the PMZs. Within the TI Zone, the NAPL response endpoint for the creosote DNAPL will be through the control (via TI) endpoint. The response objective will be to control the creosote DNAPL by recovery (recovery from wells with DNAPL present) at the NAPL source zone so that the dissolved-phase groundwater PCLE zone is stable (or shrinking) and the PCLE performance objectives for the TI-based “no growth” PMZ can be met at the alternate POE wells.

Explain how the response action will prevent COCs from migrating to air at concentrations above the PCLs for air if the groundwater-to-air PCLs ($^{Air}GW_{Inh-v}$) is exceeded.

The groundwater-to-air PCLs ($^{Air}GW_{Inh-v}$) were not exceeded in any representative groundwater samples collected at the Site. Groundwater samples from wells with DNAPL present have had naphthalene concentrations detected at concentrations greater than the $^{Air}GW_{Inh-v}$ PCL; however, the samples were collected in the deeper GWBUs (i.e., B-TZ/B-CZ) where the overlying groundwater in the A-TZ had naphthalene concentrations below the $^{Air}GW_{Inh-v}$ PCL. Therefore, potential for vapor migration from groundwater is low.

Explain how the response action will prevent COCs from migrating to surface water at concentrations above the PCLs for groundwater discharges to surface water if surface water is a factor.

Groundwater discharges to surface water are not a concern at the Site and no further action is required.

Explain how the response action will prevent human and ecological receptor exposure to the groundwater PCLE zone.

There are no potential or unprotective human health exposures at the Site for groundwater since none of the properties in the area use groundwater for drinking; and the properties are provided drinking

Response Action Objectives Associated Information: Attachment 1A, 1B	RAP Worksheet 1.0 Page 9 of 9	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 - Rev 1

water by the City of Houston. For the proposed response action, implementation of the PMZ and TI, and associated application of institutional controls, will also limit future use of shallow groundwater found within the PMZ.

In regards to ecological receptors, groundwater does not discharge to ground surface nor discharges to surface water. Therefore, there is not a complete or potentially complete pathway for ecological receptors.

Response Action Design Associated Information: Attachment 2A, 2B, 2C	RAP Worksheet 2.0 Page 1 of 7	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 – Rev 1

Response Action Design

Use this worksheet to provide detailed descriptions of the response action. Attach design and layout drawings and equipment specifications in Attachment 2A.

Media: Surface Soil/Subsurface Soils

List all media to which this information applies. If the response action is different for another media, complete a separate worksheet.

Provide a detailed description of the response action. Describe the removal action, decontamination, treatment system(s), and/or physical or institutional control actions that are proposed for each media and discuss the reasons for choosing the response action(s). Identify and describe any ecological services analysis and compensatory restoration plan that will be utilized (if so, include the complete ESA and compensatory restoration plan in Attachment 2C).

For surface soils, the Remedy Standard B RAOs will include the following approaches based on the area of the Site:

- Former HWPW area:** Using the Area of Contamination (AOC) policy, surface soils with cPCL exceedances in the Inactive Wastewater Lagoon (AOC 6), near the Location of the Former Incinerator (AOC 4) surrounding the Tank Car Storage Area (SWMU 7) and Oil/Water Separators (SWMU 11), and areas north of the Recent Process Area (SWMU 4), Original Process Area (SWMU 5) and AST Area (SWMU 8) will be consolidated in the area of SWMUs 4, 5, and 8. As allowed under the EPA AOC policy, soils may be consolidated within the AOC (defined at the Site as the “Affected Property”) and not be considered to be removed from the land or generated. Soils removed from the proposed areas will be conducted under Remedy Standard A. The removal action has been designed to remove surface soils containing COCs at concentrations exceeding the critical PCLs (primarily $T_{ot}Soil_{Comb}$ PCLs) as shown on Attachment 2A-1a and 2A-1b. The surface soils will be excavated to the vertical extent of the PCLE zone, estimated to be a maximum of approximately 3 feet deep (no greater than 5 feet deep). Soils will be placed within the AOC near SWMU 4, 5 and 8 and covered with an engineered soil cap (Attachment 2A-1a). Based on the current areas delineated, the estimated volume of soil to be consolidated is approximately 9,800 cubic yards. The AOC approach was approved by the TCEQ in a letter dated November 5, 2015 (a copy of the letter is provided in Appendix 3).

To protect on-site commercial/industrial receptors, a vapor barrier with geotextile fabric, and an engineered soil cap (12-in clayey soil, 6-in topsoil) will be constructed to cover the consolidated soil and surface soil PCLE Zone on the former HWPW area (Attachment 2A-1a). The soil cap will be vegetated (with a pollinator /grass mix to attract pollinators in the area) and sloped to minimize infiltration over the surface/subsurface soil PCLE Zone. The vegetated cap will be maintained under the post-response action care. In the areas where surface soils will be removed, subsurface soils do not appear to be impacted above cPCLs. The subsurface soil PCLE Zone within the HWPW area appears to be only in the areas where the proposed engineered soil cap with vapor barrier will be constructed. The proposed vapor barrier will address the $AirSoil_{Inh-v}$ PCLE Zone for naphthalene detected in the subsurface soils within and near SWMU 5. Engineering details for the soil cap are provided in Attachment 2A-3 (Engineering Drawings of the HWPW Soil Cap and Roadway Improvements).

For the SDD (SWMU 2) along the southern boundary of the HWPW (Attachment 2A-1a), UPRR will construct an asphalt roadway to protect on-site commercial/industrial receptors in this area. Currently, a gravel service road used by UPRR is present in this area. Construction of

Response Action Design Associated Information: Attachment 2A, 2B, 2C	RAP Worksheet 2.0 Page 2 of 7	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 – Rev 1

the asphalt road will consist of grading the existing road material, compacting and stabilizing the existing road material, and applying a hot mix asphalt (2-inches minimum) cover. The asphalt road will be maintained under the post-response action care.

In addition, underground tanks and structures listed as SWMU 11 (Oil/Water Separators) will be removed, properly disposed of, and filled in with clean fill.

- City of Houston ROW: The off-site area immediately north of the AST Area (SWMU No. 8) within the City of Houston right of way (ROW) between the UPRR property boundary and Liberty Road (approximately 6 feet wide and 550 feet long) will be addressed through a combination of soil excavation (as part of the AOC to be placed within the capped area) and construction of a concrete sidewalk (+/-800 linear feet) to restrict exposure to the surface soil PCLE zone. A large diameter (8-in) gas utility line is present in the ROW within top five feet. To limit disturbance of the gas utility line, UPRR will excavate the top 9 inches of soil within the surface soil PCLE Zone off-site and construct a reinforced concrete sidewalk and side slope to serve as a physical barrier in the area. Details of the concrete sidewalk construction are provided in Attachment 2A-3. The concrete sidewalk will be routinely inspected as part of the post-response action care. An institutional control will be placed on the City of Houston ROW to maintain the physical control on surface soils (Appendix 5).
- Englewood Intermodal Yard area: The surface and subsurface soil PCLE zone in the Intermodal Yard area is currently covered with a physical barrier (concrete pavement), preventing contact with impacted soils for on-site workers. As part of the post-response action care, the concrete pavement in the area of the surface soil PCLE Zone will be routinely inspected to ensure on-site worker protection. Attachment 2A-1a shows the Surface Soil Affected Property and its location beneath the concrete parking lot on the Site. In addition, storm drains within the proposed response action area will be inspected and sediment in the drains if present will be sampled to evaluate if COCs from surface soils have migrated into the storm water drainage system.
- UPRR Main Lines Ballast Area: The area between the former HWPW area and the Englewood Intermodal Yard (approximately 100 feet width) is covered with railroad ballast, ties, and rail. UPRR proposes to use the existing railroad ballast as an engineering control for preventing on-site worker exposure to impacted surface soils in this area. The railroad ballast area will be maintained as part of normal railroad operations. The track is owned and controlled by UPRR. In the event construction activities are necessary within the railroad ballast area, a health and safety plan will be implemented to ensure worker protection from COCs in the surface soils and a soil management plan will be developed if soils are excavated as part of the construction activities.

The Affected Property (including the entire HWPW and Englewood Intermodal Yard Area) will also be deed restricted for commercial-industrial land use and for the use of a physical controls on surface and subsurface soil in accordance with §350.31(g). Institutional controls will also be used to prevent exposure to the COCs in the surface and subsurface soils. Deed restriction of the Site to commercial-industrial use will limit future use and document the use of the physical barrier for surface soils. The PCLE zones for surface and subsurface soils are in an area with restricted property access.

Describe all major treatment system components and equipment of the response action. Illustrate the response action design and provide equipment specifications in Attachment 2A.

Response Action Design Associated Information: Attachment 2A, 2B, 2C	RAP Worksheet 2.0 Page 3 of 7	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 – Rev 1

For surface and subsurface soils, there is no treatment system proposed. The engineering drawings for the proposed soil cap and roadway improvements are provided in Attachment 2A-3.

List permits or registrations needed to construct or implement the response action, including permits or registrations needed to conduct studies or tests. For VCP sites, list the permits that would be required if the site was not in the VCP (required by the VCP).

Permitting/Registration Authority	Type of permit/registration	Permit or registration number if already issued	Anticipated application date
Harris County Clerk	Deed restriction of on-site property to commercial-industrial use and document the use of a physical control on surface soils for both on-site and off-site (City of Houston ROW)	NA	Within 120 days of RAP approval
TCEQ	TCEQ Hazardous Waste (HW) Permit/Compliance Plan	SWR 31547 HW Permit: 50343 Expires June 10, 2015	HW Permit Renewal/Revision submitted December 10, 2014

Identify and discuss the results of any studies or tests, such as pilot studies, feasibility studies, technical impracticability studies, treatability studies, and/or toxicity studies conducted or proposed to be conducted at the affected property. Discuss the reason for the study or test and how it verifies the effectiveness and appropriateness of the chosen response action or documents that a particular response action is not appropriate for the affected property. Describe how the results of completed studies or tests determined the design or choice of response action. Attach any separate reports and supporting documentation in Appendix 3.

Not applicable for this media.

Response Action Design Associated Information: Attachment 2A, 2B, 2C	RAP Worksheet 2.0 Page 4 of 7	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 – Rev 1

Media: Shallow Groundwater – A-TZ, B-TZ, C-TZ GWBU

List all media to which this information applies. If the response action is different for another media, complete a separate worksheet.

Provide a detailed description of the response action. Describe the removal action, decontamination, treatment system(s), and/or physical or institutional control actions that are proposed for each media and discuss the reasons for choosing the response action(s). Identify and describe any ecological services analysis and compensatory restoration plan that will be utilized (if so, include the complete ESA and compensatory restoration plan in Attachment 2C).

The response action design for the groundwater PCLE Zones will be to implement the modified Remedy Standard B groundwater response action through use of two approaches:

1. PMZs (On-Site (Main and West), Off-Site, and Off-Site City of Houston ROW) for the groundwater PCLE Zones in the A-TZ, B-CZ, B-TZ, and C-TZ (discussed in Worksheet 2.1);
2. Where creosote DNAPL has been observed in soil boring logs and/or monitoring wells, a TI Zone is proposed for those GWBUs A-TZ, B-CZ, B-TZ, and C-TZ (discussed in Worksheet 2.3)

For the PMZ, MNA will be used for the physical control mechanism, which has shown to be a control for migration of the COC groundwater plumes. An evaluation of historical groundwater monitoring data and data trends for the Site indicates that natural attenuation of COCs in groundwater is occurring (Attachments 1A (evaluation of recent groundwater data) and 1B (concentration versus time graphs)). Site-specific COCs will be monitored to ensure the levels of these constituents remain stable and below cPCLs at the point of exposure (POE) wells as well as below the attenuation action levels (AAL) at the attenuation monitoring points (AMP) (Attachment 2A-2). Groundwater monitoring will be used to confirm the continued natural attenuation of COCs to concentrations below cPCLs throughout the PCLE zone; however, this will not likely be achieved in a reasonable timeframe given the presence of creosote DNAPL. Groundwater monitoring will be performed on a semi-annual basis. For the purposes of this RAP submittal, there will be four overall PMZ areas:

1. On-Site PMZ (Main) – The on-site PMZ (Main) will include the cumulative groundwater PCLE Zone within the UPRR-owned property from the center to the east portion of the Site.
2. On-Site PMZ (West) – The on-site PMZ (West) will include the B-CZ/B-TZ PCLE Zone on the west side of the Site within the UPRR-owned property.
3. Off-Site PMZ – The off-site PMZ includes the cumulative groundwater PCLE Zone that is a continuation of the On-Site PMZ (Main) and extends off-site to the north of the Site, but not including land designated as City of Houston ROW. The proposed off-site PMZ will require institutional controls for up to 88 individual properties.
4. Off-Site PMZ City of Houston ROW – The off-site PMZ includes the cumulative groundwater PCLE Zone that is a continuation of the On-Site PMZ (Main) and extends off-site to the north of the Site within the land designated as City of Houston ROW.

The On-Site PMZs (Main and West, including the former HWPW, Englewood Intermodal Yard) will be deed restricted to commercial-industrial land use and to restrict future use of groundwater on-site, as well as restrictions on soil excavation activities within the surface soil PCLE Zone on the UPRR-owned property. The Off-Site PMZ City of Houston ROW will be deed restricted to restrict future use of groundwater on-site, as well as restrictions on soil excavation activities within the surface soil PCLE Zone along a portion of the northern boundary of the Site. For the Off-Site PMZ, UPRR has acquired the necessary landowner consent on 52 of the 88 properties to establish the PMZ on properties not owned by UPRR.

Response Action Design Associated Information: Attachment 2A, 2B, 2C	RAP Worksheet 2.0 Page 5 of 7	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 – Rev 1

To address the NAPL present in the GWBUs, the NAPL response action objectives and endpoints using TCEQ Guidance TRRP-32 (Risk-Based NAPL Management) will be addressed through control via TI. For areas where either creosote NAPL was noted in the soil boring log in the saturated zone or is detected in monitoring wells, the TI demonstration details the difficulty of achieving groundwater PCLs within a reasonable timeframe in these areas because of complex hydrogeology and physical nature of creosote (discussed in Worksheet 2.3). The control endpoint will be to control the soluble NAPL fraction sufficient to create stable or shrinking PCLE zones. Methods to control the creosote DNAPL will include recovery (recover readily recoverable creosote DNAPL from wells with DNAPL present) at the NAPL source zone so that the dissolved-phase groundwater PCLE zone is stable (or shrinking) and the PCLE performance objectives for the TI-based “no growth” PMZ can be met. UPRR is currently conducting monthly DNAPL Recovery Activities to evaluate the recoverability of the DNAPL at the Site. The DNAPL recovery consists of monthly pumping events from wells with sufficient volumes of DNAPL that can be recovered. DNAPL recovery will continue on a monthly basis, but the recovery frequency and wells included in the DNAPL Recovery Activities will be evaluated on an annual basis for DNAPL recoverability and effectiveness.

Institutional controls as detailed in §350.31(g) through deed recordation (UPRR-owned property) and restrictive covenants (off-site properties) within the PMZ and TI Zone and restricting the use of groundwater will be used at the Site to prevent future exposure risk until groundwater concentrations achieve critical PCLs. Landowners for some properties within the Off-Site PMZ were not locatable. In accordance with 30 TAC §350.111(c)(3), documentation of the extensive and diligent inquiry to locate those landowners are provided in Appendix 5. Following approval from the TCEQ Executive Director, deed notices on those properties will be placed detailing the Off-Site PMZ.

Describe all major treatment system components and equipment of the response action. Illustrate the response action design and provide equipment specifications in Attachment 2A.

There is no major treatment system proposed to address the groundwater PCLE. Creosote DNAPL will be recovered from selected wells (designated as Corrective Action System Well) using manual pumping (or equivalent) methods, stored on-site at the Container Storage Area (NOR 4), and disposed of in accordance with state and federal regulations within the required timeframes.

List permits or registrations needed to construct or implement the response action, including permits or registrations needed to conduct studies or tests. For VCP sites, list the permits that would be required if the site was not in the VCP (required by the VCP).

Permitting/Registration Authority	Type of permit/registration	Permit or registration number if already issued	Anticipated application date
Harris County Clerk	Deed restriction of property to commercial-industrial use and groundwater use restriction (On-Site PMZs, Off-Site PMZ, and Off-Site PMZ City of Houston ROW)	NA	Within 120 days of RAP approval
TCEQ	TCEQ Hazardous Waste (HW) Permit/Compliance Plan	SWR 31547 HW Permit: 50343 Expires June 10, 2015	HW Permit Renewal/Revision submitted December 10, 2014

Response Action Design Associated Information: Attachment 2A, 2B, 2C	RAP Worksheet 2.0 Page 6 of 7	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 – Rev 1

Identify and discuss the results of any studies or tests, such as pilot studies, feasibility studies, technical impracticability studies, treatability studies, and/or toxicity studies conducted or proposed to be conducted at the affected property. Discuss the reason for the study or test and how it verifies the effectiveness and appropriateness of the chosen response action or documents that a particular response action is not appropriate for the affected property. Describe how the results of completed studies or tests determined the design or choice of response action. Attach any separate reports and supporting documentation in Appendix 3.

The following two studies have been conducted at the Site to evaluate the groundwater response action methods:

1. DNAPL Recovery Pilot Study; and
2. Front-end TI Demonstration Study (updated).
3. Post-Closure Care/No Further Action (NFA) Assessment for RCRA Unit 1/SWMU No. 1

PBW initiated a 24-month pilot study in February 2013 through January 2015 to evaluate DNAPL recovery at the Site by conducting tests on selected wells where DNAPL had been observed. Details of the scope of work for the pilot test were submitted to the TCEQ in a letter dated February 5, 2013 (PBW, 2013). A copy of the scope of work is provided in Appendix 3. The pilot test procedures consists of measuring the depth to groundwater surface, the depth to the groundwater/DNAPL interface, and the total depth of the well relative to the top of well casing prior to DNAPL recovery. Using a peristaltic or diaphragm pump, DNAPL is pumped from the bottom of the well until groundwater is returned in the pump discharge. The volume of recovered DNAPL is estimated from each well, and the well is gauged to measure the total depth of the well and depth to residual DNAPL following pumping. Recovered DNAPL is temporarily stored at the Containment Storage Area. PBW submitted to the TCEQ in a letter dated April 9, 2105 the results of the 24-month pilot test. A copy of the letter is also provided in Appendix 3. The conclusions from the pilot test included that once per month DNAPL recovery activities are resulting in an overall stable DNAPL thickness trend in the wells tested, and current monthly recovery frequency appears to be effective with total DNAPL volume recovered becoming stable in the wells over time. More frequent DNAPL recovery would not likely be effective at the Site. The report indicated that monthly DNAPL recovery activities following the procedures listed in the pilot test work plan would continue at the Site. DNAPL recoverability, including recovery frequency and wells included in the DNAPL Recovery Activities will be evaluated on an annual basis as part of the post-response action care reporting.

Based on the TCEQ Technical Support Section Interoffice Memorandum (IOM) dated October 14, 2015 by Mr. Paul Lewis in the TI RAP Worksheet 2.3, PBW updated the TI Demonstration (Worksheet 2.3, Attachment 2G) highlighting the factors that inhibit groundwater restoration to cPCLs at the Site within a reasonable timeframe. These include hydrogeological factors and contaminant-related factors that limit the effectiveness of any remediation approach from achieving cPCLs where DNAPL or evidence of DNAPL has been observed. The lateral extents of the TI Zone were also revised to address comments stated in the TCEQ IOM and from a follow-up meeting with the TCEQ on November 4, 2015. The updated TI Demonstration is provided in Attachment 2G.

In the original RAP (Appendix 3C) submittal dated November 21, 2014, PBW prepared a report detailing the supporting documentation for requesting a No Further Action (NFA) and ceasing post-closure care for the Closed Surface Impoundment (Solid Waste Management Unit (SWMU) 1) at the Site. The groundwater monitoring activities over the past three years have shown compliance with groundwater protective standards, and have achieved the groundwater Remedy Standard A requirements under TRRP.

Response Action Design Associated Information: Attachment 2A, 2B, 2C	RAP Worksheet 2.0 Page 7 of 7	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 – Rev 1

As stated in the TCEQ Technical NOD dated August 5, 2015 for the RAP, the TCEQ stated that the TCEQ Remediation Division, Corrective Action Program concurred with UPRR’s request for the NFA (NOD T25). During a meeting between UPRR and the TCEQ to discuss the Technical NOD, it was agreed that additional research would be conducted by UPRR to assess if the historical documentation on the SWMU 1 closure activities in 1984 could support that the soils at the unit had been clean closed. PBW submitted additional information to the TCEQ on September 18, 2015 titled “Additional Information for Clean Closure Equivalence Demonstration” regarding the historical closure activities, agency correspondence, and sampling at SWMU 1.

The TCEQ issued a review comment letter dated November 5, 2015 on the September 18, 2015 submittal stating that *“the I&HW Permits Section is unable to accept the UPRR Company request to discontinue Post-Closure Care of the SWMU No. 1. Our review of the demonstration indicates that the data presented does not exclude the closed surface impoundment from either continuing to be monitored under compliance monitoring or detection monitoring.”*

GENERAL NOTES

- CONTRACTOR SHALL COORDINATE ALL WORK WITH APPROPRIATE UNION PACIFIC RAILROAD REPRESENTATIVES. CONTRACTOR SHALL COORDINATE ALL WORK WITHIN PUBLIC RIGHT-OF-WAY WITH THE APPROPRIATE CITY OF HOUSTON REPRESENTATIVES. CONTRACTOR IS RESPONSIBLE FOR ACQUIRING ANY NECESSARY PERMITS FOR CONSTRUCTION WITH CITY OF HOUSTON.
- CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING EXISTING ELEVATIONS, DIMENSIONS, STRUCTURE LOCATIONS, UTILITY LOCATIONS AND ALL OTHER EXISTING SITE CONDITIONS PRIOR TO INITIATING CONSTRUCTION. EXISTING INFORMATION SHOWN ON THE DRAWINGS HAS BEEN OBTAINED FROM AVAILABLE RECORDS AND IS NOT GUARANTEED TO BE CORRECT OR COMPLETE. EXISTING INFORMATION IS SHOWN FOR THE CONVENIENCE OF THE CONTRACTOR AND ANY FAILURE BY THE CONTRACTOR TO VERIFY EXISTING CONDITIONS WILL NOT RELIEVE HIM FROM THE RESPONSIBILITY OF COMPLETING THE WORK AT NO ADDITIONAL COST TO THE OWNER.
- CONTRACTOR SHALL EXPLORE AHEAD OF HIS ACTIVITIES TO DETERMINE THE EXACT LOCATION OF EXISTING STRUCTURES AND UTILITIES. EXISTING STRUCTURES AND UTILITIES NOT DESIGNATED FOR REMOVAL SHALL BE SUPPORTED AND PROTECTED FROM INJURY BY THE CONTRACTOR. IF EXISTING STRUCTURES OR UTILITIES NOT DESIGNATED FOR REMOVAL ARE BROKEN OR INJURED, THEY SHALL BE RESTORED IMMEDIATELY BY THE CONTRACTOR AT NO ADDITIONAL COST TO THE OWNER.
- ALL CONTRACTOR TRUCKS SHALL BE CLEAN BEFORE LEAVING PROJECT LOCATION TO AVOID SPILLAGE OF MATERIAL ON PUBLIC ROADWAYS. CONTRACTOR IS RESPONSIBLE FOR CLEANING UP ALL MATERIAL SPILLS ON PUBLIC AND PRIVATE ROADS.
- ACCESS TO THE PROJECT LOCATION MAY BE AFFECTED BY ADVERSE WEATHER. CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTAINING ACCESS TO THE PROJECT LOCATION AT ALL TIMES.

2 CONCRETE CONTAINER STORAGE AREA -ELEVATION
C5 NOT TO SCALE

NOTES:

1. EROSION CONTROL DEVICES AS SHOWN ON THE EROSION CONTROL PLAN FOR THE PROJECT SHALL BE INSTALLED PRIOR TO START OF LAND DISTURBING ACTIVITIES.
2. ALL EROSION CONTROL DEVICES ARE TO BE INSTALLED IN ACCORDANCE WITH THE APPROVED PLANS AND SPECIFICATIONS FOR THE PROJECT. CHANGES ARE TO BE APPROVED BEFORE CONSTRUCTION BY THE ENGINEER.
3. EROSION CONTROL MEASURES MAY ONLY BE PLACED IN FRONT OF INLETS, OR IN CHANNELS, DRAINAGEWAYS OR BORROW DITCHES AT RISK OF CONTRACTOR. CONTRACTOR SHALL REMAIN LIABLE FOR ANY DAMAGE CAUSED BY THE MEASURES, INCLUDING FLOODING DAMAGE, WHICH MAY OCCUR DUE TO BLOCKED DRAINAGE. AT THE CONCLUSION OF ANY PROJECT, ALL CHANNELS, DRAINAGEWAYS AND BORROW DITCHES IN THE WORK ZONE SHALL BE DREDGED OF ANY SEDIMENT GENERATED BY THE PROJECT OR DEPOSITED AS A RESULT OF EROSION CONTROL MEASURES.
4. IF THE EROSION CONTROL PLAN AS APPROVED CANNOT CONTROL EROSION AND OFF-SITE SEDIMENTATION FROM THE PROJECT THE EROSION CONTROL PLAN WILL BE REQUIRED TO BE REVISED AND/OR ADDITIONAL EROSION CONTROL DEVICES WILL BE REQUIRED ON SITE AT THE CONTRACTOR'S EXPENSE.
5. ALL DISTURBED AREAS SHALL BE SEEDED/HYDROMULCHED & MAINTAINED UNTIL 70% VEGETATION COVER IS OBTAINED.

SILT FENCE DETAIL
N.T.S.

SILT FENCE GENERAL NOTES:

1. STEEL POSTS WHICH SUPPORT THE SILT FENCE SHALL BE INSTALLED ON A SLIGHT ANGLE TOWARD THE ANTICIPATED RUNOFF SOURCE. POST MUST BE EMBEDDED A MINIMUM OF ONE FOOT.
2. THE TOE OF THE SILT FENCE SHALL BE TRENCHED IN WITH A SPADE OR MECHANICAL TRENCHER, SO THAT THE DOWNSLOPE FACE OF THE TRENCH IS FLAT AND PERPENDICULAR TO THE LINE OF FLOW. WHERE FENCE CANNOT BE TRENCHED IN (e.g. PAVEMENT), WEIGHT FABRIC FLAP WITH ROCK ON UPHILL SIDE TO PREVENT FLOW FROM SEEPING UNDER FENCE
3. THE TRENCH MUST BE A MINIMUM OF 6 INCHES DEEP AND 6 INCHES WIDE TO ALLOW FOR THE SILT FENCE FABRIC TO BE LAID IN THE GROUND AND BACKFILLED WITH COMPACTED MATERIAL.
4. SILT FENCE SHOULD BE SECURELY FASTENED TO EACH STEEL SUPPORT POST OR TO WOVEN WIRE, WHICH IN TURN IS ATTACHED TO THE STEEL FENCE POST. THERE SHALL BE A 3 FOOT OVERLAP, SECURELY FASTENED WHERE ENDS OF FABRIC MEET.
5. INSPECTION SHALL BE MADE EVERY TWO WEEKS AND AFTER EACH 1/2" RAINFALL. REPAIR OR REPLACEMENT SHALL BE MADE PROMPTLY AS NEEDED.
6. SILT FENCE SHALL BE REMOVED WHEN THE SITE IS COMPLETELY STABILIZED SO AS NOT TO BLOCK OR IMPEDE STORM FLOW OR DRAINAGE.
7. ACCUMULATED SILT SHALL BE REMOVED WHEN IT REACHES A DEPTH OF HALF THE HEIGHT OF THE FENCE. THE SILT SHALL BE DISPOSED OF AT AN APPROVED SITE AND IN SUCH A MANNER AS TO NOT CONTRIBUTE TO ADDITIONAL SILTATION.

STRAW BALE DIKE
N.T.S.

STRAW BALE DIKE GENERAL NOTES:

1. EACH BALE SHALL BE EMBEDDED IN THE SOIL A MINIMUM OF FOUR INCHES.
2. BALES SHALL BE SECURELY ANCHORED IN PLACE BY 2" X 2" WOOD STAKES DRIVEN THROUGH THE BALES. THE FIRST STAKE IN EACH BALE SHALL BE ANGLED TOWARD THE PREVIOUSLY LAID BALE TO FORCE THE BALES TOGETHER.
3. INSPECTION SHALL BE MADE EVERY TWO WEEKS AND AFTER EACH 1/2" RAINFALL EVENT. REPAIR OR REPLACEMENT SHALL BE MADE PROMPTLY AS NEEDED BY THE CONTRACTOR.
4. WHEN SILT REACHES A DEPTH OF 6 INCHES, IT SHALL BE REMOVED AND DISPOSED OF IN AN APPROVED MANNER.
5. AFTER THE DISTURBED AREAS OF THE SITE ARE COMPLETELY STABILIZED, THE BALES SHALL BE REMOVED AND DISPOSED OF AT AN APPROVED SPOIL DISPOSAL SITE.

ATTACHMENT 2B

PROPOSED WELL DESIGN

ATTACHMENT 2B – 1 PROPOSED MONITORING WELL NETWORK

ATTACHMENT 2B – 2 TYPICAL MONITORING WELL CONSTRUCTION

Introduction

As detailed in RAP Worksheet 2.1, the following wells are proposed to be installed:

1. Point of Exposure Wells:
 - a. B-TZ/B-CZ: PMW-82B, PMW-83B, PMW-84B
 - b. C-TZ: PMW-83C and PMW-85C
2. Corrective Action Observation Wells:
 - a. PMW-86C
3. Replacement Wells:
 - a. A-TZ: MW-18AR and MW-22AR
 - b. B-TZ: MW-22BR

The proposed new wells and replacement wells are shown on Attachment 2B-1. Monitoring wells MW-22AR and 22BR are to be installed to replace damaged wells MW-22A and MW-22B, respectively. Details of the well installation are discussed below.

Permanent Monitoring Well Installation

Soil borings for monitoring wells will be advanced using hollow stem auger, mud rotary, or sonic drilling methods. Soil samples will be collected continuously from each boring and will be logged in the field for lithology and sedimentary structure. Soil headspace samples will be collected every two feet and screened in the field for total organic vapor concentrations. In addition, soil core samples will be visually inspected for contamination and non-aqueous phase liquid (NAPL) presence.

Soil borings that will be used for monitoring well installation will be advanced as necessary to identify the top and base of the targeted groundwater bearing-unit (GWBU) (i.e., A-TZ, B-TZ, C-TZ). Based on the boring logs for previous monitoring wells drilled at the Site, it is anticipated that these borings will be advanced to the following maximum depths (subject to field conditions):

- A-TZ: approximately 30 feet below ground surface (bgs)
- B-TZ/B-CZ: approximately 36 feet to 40 feet bgs
- C-TZ: approximately 70 feet bgs.

Although the proposed borings for wells below the A-TZ will be located away from areas where NAPL has been identified, surface or isolation casing (permanent isolation casing or temporary isolation casing using sonic drilling techniques) may be installed prior to penetration of any low permeability confining unit.

Permanent monitoring wells will be constructed after the total depth of the borehole is reached. Monitoring wells will be constructed using 2-inch or larger diameter, flush-joint-threaded Schedule 40 PVC casing and 0.010-inch slotted PVC screen. Other well casing and screen materials (i.e., stainless steel) may be used instead of PVC depending on the potential for exposure to NAPL. The specific well design will be determined in the field based on the observed lithology with the goal of screening the well at the base of the targeted GWBU. It is anticipated that each well screen will be approximately 10 feet in length, but shorter screen intervals may be installed for the B-CZ wells. After the boring is completed to the total depth, the casing and screen will be lowered into the borehole through the augers or sonic isolation casing.

Once the casing and screen are in place, the remaining well materials (filter sand, bentonite pellets, and cement/bentonite grout) will be added to the hole as the augers/sonic casings are slowly removed. Depths

to the top of the annular materials will be measured with a weighted, calibrated tape and recorded on the Well Completion Log. A bentonite seal layer will be installed on top of the filter sand and will be a minimum of 2 feet in thickness. The remainder of the borehole annulus will be filled with a Portland/bentonite grout (or bentonite pellets). Each well will be completed with either a flush-grade surface completion with a 2-foot by 2-foot pad or above grade within a protective casing on a 4-foot-by-4-foot concrete pad. If an above grade completion is constructed, bollards or bumper guards should be installed around the surface completion. Typical monitoring well completion details are shown on Attachment 2B-2. After construction, the position and elevation of each monitoring well will be surveyed by a licensed, professional surveyor relative to Texas State Plane Coordinates and mean sea level.

Monitoring Well Development

A minimum of 24 hours shall elapse after well construction and before well development to allow for bentonite hydration and grout set. Development will consist initially of surging and bailing or pumping; however, the specific development method will ultimately be decided by the field personnel based on the specific conditions encountered. Temperature, pH, specific conductivity, and turbidity will be monitored during purging. Development will continue until the well produces water with stable field parameter readings (i.e., temperature, pH, conductivity) and turbidity is below 10 NTU. At least five casing volumes of water will be removed from the well during development unless the well pumps dry. If the turbidity is not below 10 NTU after 10 casing volumes of water are removed from the well, then the final turbidity will be recorded and more aggressive development procedures such as air lifting may be considered.

Monitoring Well Documentation

Documentation of well installation and development will include field boring logs, monitoring well installation forms, well development forms, and any photographs. For wells installed within the City of Houston right of way (ROW), city permits will be required prior to installing the wells. Investigation-derived wastes (IDW), such as soil cuttings, decontamination fluids, or development water, generated from the drilling activities will be stored and disposed of in accordance with state and federal requirements. Documentation of the wastes disposed of as part of the well installation will be maintained.

Following installation, a certification report will be submitted to the Texas Commission on Environmental Quality (TCEQ) detailing the well installation and related documentation.

Plume Management Zone	RAP Worksheet 2.1 Page 1 of 19	
	Associated Information: Attachments 2D, 2E	ID No.: 31547 Report Date: December 7, 2105 – Rev 1

Complete this worksheet when a PMZ is proposed as part of the response action. Include in Attachment 2D a map of the proposed PMZ with alternate POE(s) and attenuation monitoring points identified and the current groundwater PCLE zone. If a PMZ is not proposed, do not submit this worksheet.

Groundwater-bearing unit **A-TZ**

Repeat this worksheet for each groundwater-bearing unit for which a PMZ is proposed.

Groundwater classification X 2 3

Provide justification as to why the PMZ is appropriate in accordance with §350.33(f)(4)(A). Include supporting documentation in Attachment 2E.

The on-site and off-site PMZs proposed as a response action for the A-TZ PCLE zone (Attachment 2D-1) ensures that COCs will not pose a potential unacceptable risk to human health or the environment as long as the AALs are not exceeded at the respective AMPs, and COC concentrations less than cPCLs at the proposed Alternate POE wells. PMZs are appropriate for this PCLE zone based on a relatively low groundwater velocity, overall stable/declining COC concentrations, the proposed institutional controls (deed recordation (on-site PMZs) and restrictive covenants (off-site PMZs)) on use of groundwater within the PCLE Zone, and the absence of any existing water supply wells within ½-mile of the Site. In addition, there are no surface water bodies at the Site or near the proposed PMZ; therefore, there is no potential for contaminating surface waters that would be hydraulically connected to groundwater. The City of Houston provides municipal water services for all properties within the Affected Property, so there is no human health complete pathway associated with this GWBU. The Site is also within the jurisdiction of the Harris-Galveston Subsidence District (HGSD), which restricts groundwater use in the area and requires a permit application prior to drilling a groundwater well. There are permitting exemptions, but only in areas that do not have an alternative water supply. The HGSD rules are not a complete prohibition on the use of groundwater in the area, but rather the fees associated with the rules are “intended to operate as an economic disincentive to groundwater withdrawal” (HGSD, 2013).

The on-site and off-site PMZs proposed for the A-TZ PCLE zones consists of two components: 1) filing of institutional controls including deed recordation (UPRR-Owned properties) and restrictive covenants (off-site properties, City of Houston ROW) prohibiting the use of groundwater within the PMZs; and 2) performance of ongoing groundwater monitoring at the proposed AMPs and POE wells. The proposed deed recordation and restrictive covenant language, to be filed in the Harris County deed records, is included in Appendix 4.

As detailed in Attachment 1A, the PMZs for A-TZ were established using the July/August 2014 groundwater analytical data collected from the Site, in conjunction with trend analysis for groundwater analytical data from 2010 through 2014 (10 semi-annual sampling events). Comparing the maximum groundwater analytical data from the July/August 2014 groundwater sampling event to cPCLs, concentrations of 23 target COCs exceeded their respective cPCLs in at least one of the four GWBUs. For the A-TZ, the following 12 COCs were detected above cPCLs:

VOCs

- Benzene
- Methylene Chloride
- Vinyl Chloride

SVOCs

- 2,4-Dimethylphenol
- 2-Methylnaphthalene
- Benzo(a)anthracene
- Benzo(a)pyrene
- Bis(2-chloroethoxy)methane

Plume Management Zone	RAP Worksheet 2.1 Page 2 of 19	
	Associated Information: Attachments 2D, 2E	ID No.: 31547 Report Date: December 7, 2105 – Rev 1

- Chlorobenzene (A-TZ only, one well)
- Dibenzofuran
- Naphthalene
- Phenol

Of those COCs, benzene, 2,4-dimethylphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene are the most prominent COCs where the cPCL exceedances for these COCs define the PCLE Zone in the A-TZ. Therefore, the trend analyses and attenuation action levels were calculated for these five COCs (Attachment 2E). None of the COCs listed above were detected in the A-TZ at concentrations that exceeded the ^{Air}GW_{Inh-v} PCL.

The overall groundwater flow across the Site in the A-TZ is to east, until the Lockwood Street Bridge area on the far east side of the Site. As discussed in the APAR Addendum (PBW, 2009), there is a City of Houston 60-inch sanitary sewer line that cuts across the east end of the Site (Attachment 1A, Figure 5A-1) that flows north to south just west of the Lockwood Street Bridge. Based on a review of the City of Houston engineering drawing files for the sanitary sewer line, the sewer line potentially intersects the saturated A-TZ unit, and may be affecting the groundwater potentiometric surface elevation of the A-TZ (Attachment 1A, Figure 4C-1).

PBW installed a small diameter piezometer MW-69A in June 2010 in the City of Houston ROW along the west side of the sanitary sewer line south of MW-49A (Attachment 1A, Figure 1A) to evaluate the potential for site-specific COCs affecting the sanitary sewer. The location of the piezometer was chosen to evaluate if COCs in groundwater are travelling along the west side of the sanitary sewer line. Groundwater data from monitoring well MW-59A indicates that the COCs were not detected above PCLs east of the sanitary sewer line. In addition, PBW collected grab samples of fluid from the sanitary sewer line upgradient, within the Site, and downgradient of the Site to evaluate potential discharge of site-specific COCs detected in the A-TZ into the wastewater line (PBW, 2010). Samples from the sanitary sewer were collected from three manholes using a peristaltic pump and tubing inserted through the manhole covers.

Based on the analytical results from July 2010 through July/August 2014, none of the site-specific COCs have been detected above TRRP PCLs in the groundwater samples collected from MW-69A. Also, sanitary sewer water analytical results from the three sanitary sewer samples were also compared to TRRP Tier 1 PCLs for groundwater, even though the fluid in the line is not considered groundwater. Of the three samples collected in 2010, the only sample with concentrations greater than PCLs was the upgradient sample SSW1 that had a detection of bis(2-ethylhexyl)phthalate (0.0092 mg/L) above the ^{GW}GW_{ing} PCL of 0.006 mg/L; however, bis(2-ethylhexyl)phthalate is a common laboratory contaminant (as cited in 30 TAC§350.71(k)(2)(B)). The sanitary sewer sample analytical results suggest that there is not a significant mass loading of COCs from groundwater into the sanitary sewer.

As discussed in Worksheet 2.3, a TI Zone will also be established for areas where DNAPL has been detected in monitoring wells or observed in the soil boring log for the GWBUs on site and off site. Details of the TI Zone are provided in Attachment 2G.

In accordance with §350.33(f)(4)(A), both PMZs for the A-TZ Unit will be actively monitored (semi-annually). MNA will be used as a control response for the Site.

Plume Management Zone Associated Information: Attachments 2D, 2E	RAP Worksheet 2.1 Page 3 of 19	
	ID No.: 31547	Report Date: December 7, 2105 – Rev 1

Is the alternate POE proposed to be beyond the current limits of the PCLE zone? Yes No
 If yes, how far? Approximately 400 feet (§350.37(l) or (m) as applicable)
 Is it to be off-site? Yes No

On an off-site property that currently does not contain a residential-based groundwater PCLE zone?
 Yes No -

If yes and this is a Class 2 groundwater, provide the basis for concluding that this groundwater does not have a reasonably anticipated future beneficial use (§350.37(l)(3)).

The residential-based PCLE zone extends onto the off-site properties (to the north and to the east in the residential area), and on to the City of Houston ROW. The proposed PMZs extend to the closest monitoring wells where COC concentrations in groundwater are less than the cPCL based on the groundwater data collected in July/August 2014. As previously discussed, the City of Houston provides municipal water services for all properties within the Affected Property, so there is no current beneficial use for the GWBU. The Site is also within the jurisdiction of the HGSD, which restricts groundwater use in the area and requires a permit application prior to drilling a groundwater well. There are permitting exemptions for small domestic wells, but only in areas that do not have an alternative water supply. The HGSD rules are not a complete prohibition on the use of groundwater in the area, but rather the fees associated with the rules are “intended to operate as an economic disincentive to groundwater withdrawal” (HGSD, 2013).

Therefore, with the City of Houston providing water for the area, and financial disincentives placed on shallow groundwater use by the HGSD (which the Texas Supreme Court ruled in favor of the HGSD in 1977 to protect public welfare by limiting harmful pumping, which was causing ground subsidence of the land resulting in flooding (*Beckendorff v. Harris-Galveston Coastal Subsidence District (1977)*), the shallow groundwater does not have a reasonably anticipated future beneficial use in the area.

Is NAPL present? Yes No

If so, describe how the response action will achieve the performance criteria in §350.33(f)(4)(E).

§350.33(f)(4)(E) The person is required to reduce NAPLs which contain COCs in excess of PCLs within a plume management zone to the extent practicable. In the determination of adequate NAPL reduction, the executive director may consider conformance with the following criteria and other relevant factors:

- (i) readily recoverable NAPLs have been recovered;*
- (ii) the NAPLs will not generate explosive conditions as defined in §350.31(c) of this title (relating to General Requirements for Remedy Standards);*
- (iii) the NAPLs will not discharge to the ground surface, to surface waters, to structures, or to other groundwater-bearing units;*
- (iv) the vertical and lateral extent of NAPLs will not increase under natural conditions, or sufficient NAPLs have been recovered such that an active recovery system can be demonstrated to effectively control or contain migration of NAPLs (i.e., no increased NAPL extent); and*
- (v) the NAPLs will not result in the critical groundwater PCLs being exceeded at the downgradient boundary of the plume management zone or in the critical PCLs for other environmental media being exceeded at the applicable POE.*

To address the NAPL in the TI Zones for the A-TZ, the NAPL response action objectives and endpoints using TCEQ Guidance TRRP-32 (Risk-Based NAPL Management) will be achieved through control via TI based on the occurrence of DNAPL in wells completed in the A-TZ. For areas where either creosote NAPL was noted in the soil boring log in the saturated zone or is detected in monitoring wells (i.e., MW-57A and MW-78A), the TI demonstration details the difficulty of achieving groundwater PCLs in these

Plume Management Zone	RAP Worksheet 2.1 Page 4 of 19	
	Associated Information: Attachments 2D, 2E	ID No.: 31547 Report Date: December 7, 2105 – Rev 1

areas because of complex hydrogeology and physical nature of creosote (discussed in Worksheet 2.3). The control endpoint will be to control the soluble NAPL fraction sufficient to create stable or shrinking PCLE zones. Methods to control the creosote DNAPL will include recovery (recover readily recoverable creosote DNAPL from wells with DNAPL present) at the NAPL source zone so that the dissolved-phase groundwater PCLE zone is stable (or shrinking) and the PCLE performance objectives for the TI-based “no growth” PMZs can be met, including no cPCL exceedances at the alternate POE wells.

Therefore, since the wells with DNAPL lie within the proposed TI Zones (On-site and Off-Site), the current response objective per the TCEQ Guidance is to ensure compliance of NAPL in the TI Zone through control. Readily recoverable NAPL will be recovered from wells on a monthly basis in order to control potential migration from the TI Zone. In addition, institutional controls on groundwater use will be implemented to protect exposure to residual NAPL in the GWBUs.

DNAPL recovered as part of the corrective action will be stored on-site in DOT approved drums within the CSA (Unit 4), and then disposed of in accordance with all applicable laws and regulations within the applicable timeframes.

If this is a Class 2 groundwater, explain how the response action will ensure that leachate from the surface soil and subsurface soil PCLE zones will not increase concentration of COCs greater than the current measured concentrations (at time of RAP submittal). (§350.33(a)(2))

Groundwater monitoring has been on-going at the Site since 1997. Current and historical groundwater data from the A-TZ source areas (SWMU 4, 5, 8) (Attachment 1B), especially wells with data going back to 1997, suggest that the COC concentrations in the A-TZ groundwater plume were historically higher compared to present day data. Overall the primary COC concentrations are stable or decreasing. The few wells with increasing concentrations either contain DNAPL or had DNAPL noted in the GWBU on the soil boring log. Therefore, the COCs in the vadose zone (surface and subsurface soil) have reached a point where the mass loading to the A-TZ has reached a state of equilibrium and continued leachate migration to groundwater from surface or subsurface soil will not cause expansion of the groundwater PCLE Zone for the A-TZ. In addition, with the proposed PMZ for the Site, groundwater monitoring as part of the PMZ will be used to confirm that any potential leachate in the surface and subsurface soils will not cause an increase in COC concentrations in groundwater at the POE in excess of the groundwater PCL.

As part of the response action for the surface and subsurface soils in the former HWPW area, the proposed response will be to construct a capped area over the surface soil PCLE Zone. Even though the cap is not designed for hydraulic control, the cap will be constructed with compacted clay and vegetation and sloped to drain storm water. The design of the cap (sloped and vegetated) will minimize infiltration across the surface soil PCLE Zone and reduce leachate migration from the vadose zone to the A-TZ.

Provide the basis that the COCs will not migrate beyond the downgradient boundary of the PMZ at concentrations above the critical PCL. Include supporting documentation in Attachment 2E.

Since the Site was first developed for creosoting operations in 1899, various releases over time likely occurred until the Site operations ceased in 1984. The facility was dismantled in the early 1990s. There have been no other operations at the former HWPW Site in over 30 years. Given the long period of time since releases have occurred at the Site, impacts to surface soils that have migrated to the A-TZ

Plume Management Zone	RAP Worksheet 2.1 Page 5 of 19	
	Associated Information: Attachments 2D, 2E	ID No.: 31547 Report Date: December 7, 2105 – Rev 1

groundwater have likely reached a state of equilibrium, as discussed above. This is supported with the A-TZ groundwater analytical data that indicate the distribution of COCs dissolved in Site groundwater is relatively stable in the source areas. The concentration vs time graphs presented in Attachment 1B-1 through 1B-15 indicate that most of the groundwater COC concentrations are remaining relatively stable. This is confirmed for most of the wells with the Mann-Kendall statistical analysis included in Attachment 2E, except for the following wells:

- For wells MW-12A and MW-18A in the source areas, the Mann-Kendall trend analysis for 2-methylnaphthalene (MW-18A) and dibenzofuran (MW-12A and MW-18A) show increasing trends from 2010 to 2014. However, for both MW-12A and MW-18A, both 2-methylnaphthalene (Attachment 1B-3) and dibenzofuran (Attachment 1B-4) concentrations were greater in 2001 to 2002 compared to recent concentrations.
- An increasing trend for naphthalene in MW-15A was noted, but similar to MW-12A and MW-18A, the highest concentrations in this well were detected in 2001 to 2003 sampling events. None of the COCs were detected above cPCLs during the most recent sampling event.
- Increasing trends for 2-methylnaphthalene, dibenzofuran, and naphthalene were calculated for off-site well MW-33A (with probably increasing trends for benzene and 2,4-dimethylphenol); however, the most recent groundwater data indicate COC concentrations less than cPCLs.
- Increasing trends for benzene and 2-methylnaphthalene were calculated for off-site well MW-44A; however, the most recent groundwater data indicate COC concentrations less than cPCLs.

Therefore, the increasing trends calculated may be due to fluctuations over time rather than indicative of additional release causing the apparent increase. As shown on Attachment 1A, Figure 5B-20, the groundwater PCLE Zone for the A-TZ has remained stable over the past four years.

The downgradient boundary of the on-site and off-site A-TZ PMZ is located at monitoring wells MW-25A, MW-26A, MW-36A, MW-59A, MW-60A, MW-61A, and MW-69A (alternate points of exposure) (Attachment 2D-1). As previously discussed, there appears to be a groundwater divide near MW-44A on the north end and MW-49A/MW-59A on the south end just east of MW-18A (Attachment 1A, Figure 5A-1), which lines up with the 60-inch sanitary sewer line that runs north-south. Wells MW-25A, MW-59A, MW-60A, and MW-61A appear to be east of the groundwater divide. This is supported with by the low concentrations of COCs in these wells (Attachment 1A, Figure 5B-1). Fluid samples collected from the sanitary sewer line in 2010 did not indicate a significant loading of COC concentrations into the sewer line; however, the sewer line appears to serve as the downgradient groundwater control for the PMZ. Therefore, it is not anticipated that the on-site and off-site A-TZ groundwater PCLE zone will migrate beyond the proposed A-TZ PMZ boundary.

Attenuation Action Levels (AALs) have been established for Attenuation Monitoring Points (AMPs) within the centerline of the A-TZ plume in order to ensure groundwater COC concentrations do not exceed the cPCLs at the alternate point of exposure (POE) wells. Details on AAL development are provided in Attachment 2E. However, given the complex hydrogeology in the A-TZ, the primary monitoring points for the on-site and off-site PMZs will be at the proposed alternate POE wells. The proposed POE wells are shown on Attachment 2D-1. In addition, monitoring well MW-18A, which is listed as an AMP for the A-TZ, will be plugged and abandoned as part of the soil cap construction. The replacement well MW-18AR will be installed east of the current location outside of the proposed soil cap area. The proposed location is also shown on Attachment 2D-1.

Details of the monitoring plan for the A-TZ PMZ are provided in Worksheet 3.1 and Appendix 6.

Plume Management Zone	RAP Worksheet 2.1 Page 6 of 19	
	Associated Information: Attachments 2D, 2E	ID No.: 31547 Report Date: December 7, 2105 – Rev 1

Describe the methods used to determine that there are no artificial penetrations which can allow COCs to migrate from the groundwater PCLE zone to currently unaffected groundwater-bearing units. Include supporting documentation in Attachment 2E.

An on-site field survey and water-well data search was conducted, indicating no potential vertical artificial penetrations that would act as a conduit for migration of shallow groundwater into the underlying groundwater formation. However, as discussed in the APAR Addendum (PBW, 2009), two sets of fiber optic lines, Level 3 Communications and Qwest, run along the north side of the rail main lines across the entire length of the Site (Attachment 1A, Figure 5A-1). Based on conversations with both Level 3 Communications and Qwest representatives, the fiber lines run underneath SWMUs 2, 5, 4, 8, and 10/11. The fiber lines run directly underneath the drainage ditch southwest of the Site and under the SDD about 3 to 5 feet bgs. The Level 3 Communications line reportedly was directionally bored to a depth of 40 to 45 feet bgs underneath the Original and Recent Process Areas (SWMU Nos. 5 and 4, respectively) and under the AST Area (SWMU No. 8). The Qwest fiber line reportedly runs 10 to 15 feet northwest and parallel of the main rail line, and is about 5 to 10 feet bgs through the Site. Just east of SWMU No. 8, both fiber lines return to approximately 4 to 6 feet below grade and continue running northeast parallel to the rail main line. The Level 3 Communications line may act as an artificial penetration since the reported depths of the line go through both the A-TZ and into the B-CZ immediately below the primary source areas. Given the depth of the fiber optic line is below the A-TZ and likely below the B-TZ (or carbonate seams within the B-CZ), monitoring well MW-19C will continue to be monitored to evaluate if the directional bored fiber optic lines are creating a preferential pathway for COCs to migrate to the C-TZ GWBU.

In addition to the fiber lines, three City of Houston utilities were identified in the previous APAR (PBW, 2009) that cut across the Site oriented north-south just west of the Lockwood Street Bridge: 1) 60-in wastewater line, 2) 84-in water line, and 3) a 42-in storm sewer line (PBW, 2009). Through a review of the utility drawing files obtained from the City of Houston Public Works Survey Department, two of the underground utility lines (the 60-in sanitary sewer line and the 84-in water line) appear to be at depths that potentially intersect the uppermost GWBU A-TZ. The estimated depths of the utilities based on the city drawings are shown on the Geologic Cross Sections A-A', B-B', and C-C' (Attachment 1A, Figure 4C-1). The estimated base depth of the 60-in wastewater line and the 84-in water line where Cross Section B-B' crosses the utility lines is approximately 23 feet bgs (approximate elevation of 26 feet HVD). It is highly unlikely that A-TZ groundwater is seeping into the 84-in water line, given the line is under pressure (flow is south to north), constructed with welded steel pipe, and is relatively new (constructed in 2000). Sampling of the 60-in sanitary sewer line was conducted in 2010, as previously discussed.

List the attenuation action level determined for each attenuation monitoring point. Illustrate the proposed attenuation monitoring points and the groundwater PCLE zone on the map in Attachment 2D. Include all calculations and other methods of determining the attenuation action levels in Attachment 2E.

COC	Attenuation Monitoring Point (well number)	Attenuation Action Level (mg/L)	Attenuation Action Level limited by ^{Air} GW _{Inh-V} or existing COC concentration? Y/N
Benzene	MW-18A*	1.5	N
	MW-44A	0.0132	N
	MW-25A	0.005 (cPCL)	N
2,4-Dimethylphenol	MW-18A*	24	NA
	MW-44A	1.251	NA
	MW-25A	0.49 (cPCL)	NA
2 Methyl naphthalene	MW-18A*	1.5	NA
	MW-44A	0.189	NA
	MW-25A	0.098 (cPCL)	NA
Dibenzofuran	MW-18A*	0.52	NA
	MW-44A	0.147	NA
	MW-25A	0.098 (cPCL)	NA
Naphthalene	MW-18A*	26.16	N
	MW-44A	1.424	N
	MW-25A	0.49 (cPCL)	N

Note: * - Monitoring Well MW-18A is within the proposed soil cap area and will be plugged and abandoned. A replacement well (MW-18AR) is proposed to be installed outside of the capped well to the east of MW-18A (see Attachment 2D-1).

Attenuation Action Levels were not developed for other COCs since the primary COCs listed above define the PCLE Zone.

Plume Management Zone Associated Information: Attachments 2D, 2E	RAP Worksheet 2.1 Page 8 of 19	
	ID No.: 31547	Report Date: December 7, 2105 – Rev 1

Groundwater-bearing unit B-CZ/B-TZ

Repeat this worksheet for each groundwater-bearing unit for which a PMZ is proposed.

Groundwater classification X 2 3

Provide justification as to why the PMZ is appropriate in accordance with §350.33(f)(4)(A). Include supporting documentation in Attachment 2E.

The two On-site PMZs (On-Site PMZ (Main) and On-Site PMZ (West)) and Off-Site PMZs proposed (Attachment 2D-2) as a response action for the B-CZ/B-TZ PCLE zone ensures that COCs will not pose a potential unacceptable risk to human health or the environment as long as the AALs are not exceeded at the respective AMPs and exceedances of cPCLs at the proposed alternate POE wells. Both the on-site and off-site PMZs are appropriate for this PCLE zone based on a low groundwater velocity (hydraulic conductivities are indicative of saturated soils in the B-CZ (see Attachment 1A)), overall stable/declining COC concentrations, the proposed institutional controls (deed recordation and restrictive covenants) on use of groundwater within the PCLE Zone, and the absence of any existing water supply wells within ½-mile of the Site. In addition, there are no surface water bodies at the Site or near the proposed PMZs; therefore, there is no potential for contaminating surface waters that would be hydraulically connected to groundwater. The City of Houston provides municipal water services for all properties within the Affected Property, so there is no complete human health pathway associated with this GWBU. The Site is also within the jurisdiction of the HGSD, which restricts groundwater use in the area and requires a permit application prior to drilling a groundwater well. There are permitting exemptions, but only in areas that do not have an alternative water supply. The HGSD rules are not a complete prohibition on the use of groundwater in the area, but rather the fees associated with the rules are “intended to operate as an economic disincentive to groundwater withdrawal” (HGSD, 2013).

The PMZs proposed for the B-CZ/B-TZ PCLE zones consists of two components: 1) filing of institutional controls including deed recordation (UPRR-Owned properties – on-site PMZ)) and restrictive covenants (off-site properties – off-site PMZ)) prohibiting the use of groundwater within the PMZs; and 2) performance of ongoing groundwater monitoring. The proposed deed recordation and restrictive covenant language, to be filed in the Harris County deed records, is included in Appendix 4.

As detailed in Attachment 1A, the B-CZ/B-TZ on-site and off-site PMZs were established using the July/August 2014 groundwater analytical data collected from the Site, in conjunction with trend analysis for groundwater analytical data from 2010 through 2014 (10 semi-annual sampling events, Attachment 2E) and development of attenuation action levels from groundwater data collected from 2006 through 2014. Comparing the maximum groundwater analytical data from the July/August 2014 groundwater sampling event to cPCLs, concentrations of 23 target COCs exceeded their respective cPCLs in at least one of the four GWBUs. For the B-CZ/B-TZ, the following 14 COCs were detected above cPCLs (using Class 2 groundwater PCLs for both the B-TZ and B-CZ (see Attachment 1A for discussion on B-CZ as a saturated soil):

VOCs

- Benzene
- Ethylbenzene (B-CZ only)
- Methylene Chloride
- Toluene (B-CZ only)
- Vinyl Chloride

SVOCs

- 2,4-Dimethylphenol
- 2,6-Dinitrotoluene
- 2-Methylnaphthalene
- Benzo(a)anthracene
- Benzo(a)pyrene
- Bis(2-chloroethoxy)methane
- Dibenzofuran

Plume Management Zone Associated Information: Attachments 2D, 2E	RAP Worksheet 2.1 Page 9 of 19	
	ID No.: 31547	Report Date: December 7, 2105 – Rev 1

- Naphthalene
- Phenol

Similar to the A-TZ PCLE Zone, benzene, 2,4-dimethylphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene are the most prominent COCs where the cPCL exceedances for these COCs define the PCLE Zone in the B-CZ/B-TZ. Therefore, the trend analyses were conducted for these five COCs (Attachment 2E).

Since there are two distinct groundwater PCLE Zones further than 500 feet apart within the B-CZ and B-TZ, two separate on-site PMZs were established (Attachment 2D-2):

1. On-Site PMZ (Main)
2. On-Site PMZ (West)

As discussed in Worksheet 2.3, a TI Zone will also be established for areas where DNAPL has been detected in monitoring wells or observed in the soil boring log for the GWBUs on site and off site. Details of the TI Zone are provided in Attachment 2G.

In accordance with §350.33(f)(4)(A), the on-site and off-site PMZs for the B-CZ and B-TZ Unit will be actively monitored (semi-annually). MNA will be used as a control response for this unit.

Is the alternate POE proposed to be beyond the current limits of the PCLE zone? Yes No
If yes, how far? Approximately 150 feet downgradient (\$350.37(l) or (m) as applicable)
Is it to be off-site? Yes No
On an off-site property that currently does not contain a residential-based groundwater PCLE zone?
 Yes No

If yes and this is a Class 2 groundwater, provide the basis for concluding that this groundwater does not have a reasonably anticipated future beneficial use (§350.37(l)(3)).

The residential-based PCLE zone extends onto the off-site properties (to the north and to the east in the residential area), and on to the City of Houston ROW. The proposed PMZs extend to the closest monitoring wells where COC concentrations in groundwater are less than the cPCL based on the groundwater data collected in July/August 2014. As previously discussed, the City of Houston provides municipal water services for all properties within the Affected Property, so there is no current beneficial use for the GWBU. The Site is also within the jurisdiction of the HGSD, which restricts groundwater use in the area and requires a permit application prior to drilling a groundwater well. There are permitting exemptions for small domestic wells, but only in areas that do not have an alternative water supply. The HGSD rules are not a complete prohibition on the use of groundwater in the area, but rather the fees associated with the rules are “intended to operate as an economic disincentive to groundwater withdrawal” (HGSD, 2013).

Therefore, with the City of Houston providing water for the area, and financial disincentives placed on shallow groundwater use by the HGSD (which the Texas Supreme Court ruled in favor of the HGSD in 1977 to protect public welfare by limiting harmful pumping, which was causing ground subsidence of the land resulting in flooding (*Beckendorff v. Harris-Galveston Coastal Subsidence District (1977)*)), the shallow groundwater does not have a reasonably anticipated future beneficial use in the area.

Plume Management Zone Associated Information: Attachments 2D, 2E	RAP Worksheet 2.1 Page 10 of 19	
	ID No.: 31547	Report Date: December 7, 2105 – Rev 1

Is NAPL present? X Yes No

If so, describe how the response action will achieve the performance criteria in §350.33(f)(4)(E).

To address the NAPL in the TI Zone for the B-CZ/B-TZ, the NAPL response action objectives and endpoints using TCEQ Guidance TRRP-32 (Risk-Based NAPL Management) will be achieved through control via TI based on the occurrence of DNAPL in wells completed in the B-CZ/B-TZ. For areas where either creosote NAPL was noted in the soil boring log in the saturated zone or is detected in monitoring wells (i.e., MW-12B, MW-32B, MW-41B, MW-70B, MW-75B and MW-78A, and observed DNAPL in soil borings (Attachment 1A, Figure 5A-6)), the TI demonstration details the difficulty of achieving groundwater PCLs in these areas because of complex hydrogeology (B-CZ consists of thin carbonate seams with average hydraulic conductivity of approximately 2×10^{-7} cm/sec (Attachment 1A)) and physical nature of creosote (discussed in Worksheet 2.3). The control endpoint will be to control the soluble NAPL fraction sufficient to create stable or shrinking PCLE zones. Methods to control the creosote DNAPL will include recovery (recover readily recoverable creosote DNAPL from wells with DNAPL present) at the NAPL source zone so that the dissolved-phase groundwater PCLE zone is stable (or shrinking) and the PCLE performance objectives for the overall TI-based “no-growth” PMZ (includes on-site and off-site PMZs) can be met, including no cPCL exceedances at the alternate POE wells.

Therefore, since the wells with DNAPL present lie within the proposed TI Zones (On-site and Off-Site), the current response objective per the TCEQ Guidance is to ensure compliance of NAPL zone in the TI Zone through control. Readily recoverable NAPL will be recovered from wells on a monthly basis in order to control potential migration from the TI Zone. In addition, institutional controls on groundwater use will be implemented to protect exposure to residual NAPL in the GWBUs.

DNAPL recovered as part of the corrective action will be stored on-site in DOT approved drums within the CSA (Unit 4), and then disposed of in accordance with all applicable laws and regulations within the applicable timeframes.

If this is a Class 2 groundwater, explain how the response action will ensure that leachate from the surface soil and subsurface soil PCLE zones will not increase concentration of COCs greater than the current measured concentrations (at time of RAP submittal). (§350.33(a)(2))

With the B-CZ/B-TZ underlying the A-TZ, see response to this question for the A-TZ unit.

Provide the basis that the COCs will not migrate beyond the downgradient boundary of the PMZ at concentrations above the critical PCL. Include supporting documentation in Attachment 2E.

As discussed for the A-TZ PMZs, wood treating operations began at the Site over 115 years ago and continued until about 30 years ago. Given the long period of time since releases have occurred at the Site, creosote DNAPL and related COCs has migrated from the vadose zone (surface and subsurface soils) to the A-TZ groundwater, then to the B-CZ/B-TZ. There are two main areas within the B-CZ/B-TZ where the DNAPL has migrated and resulted in a PCLE Zone:

1. On-Site PMZ (Main)/Off-Site PMZs - Centered in the northeast part of the Site near SWMUs 4, 5, and 8, onto the eastern portion of the Englewood Intermodal Yard, and extending off-site (Off-Site PMZs) to the north of the Site; and
2. On-Site (West) - On the west side of the Site near MW-12B and MW-41B.

On-Site PMZ (Main)/Off-Site PMZs (including City of Houston ROW):

Plume Management Zone	RAP Worksheet 2.1 Page 11 of 19	
	Associated Information: Attachments 2D, 2E	ID No.: 31547 Report Date: December 7, 2105 – Rev 1

For the area centered over the northeast portion of the Site, predominately off-site, DNAPL has been either observed in the monitoring well soil borings (i.e., MW-35B, MW-63B, MW-68B, and others) or has been detected in the wells (i.e., MW-32B, MW-70B, MW-75B) that fall within the B-CZ/B-TZ groundwater PCLE Zone (Attachment 1A, Figure 5A-6). The fact that the PCLE Zone in the B-CZ is closely tied to where NAPL was observed suggests that there is both not a high rate of dissolved constituent migration beyond the DNAPL areas either on-site or off-site. Also groundwater velocities through the B-CZ are very low given the low hydraulic conductivity of the carbonate gravel seams within the clay unit. Proposed POE wells MW-15B, MW-36B, MW-59B, MW-67B, MW-80B and MW-81B show either no detections of the COCs or relatively stable COC concentrations well below the RALs (Attachment 1B-11 through 1B-15). This is supported with the B-CZ/B-TZ groundwater analytical data that indicate the distribution of COCs dissolved in Site groundwater is relatively stable in the source areas.

For wells with concentrations near or above cPCLs, the concentration vs time graphs presented in Attachment 1B indicate that groundwater concentrations are remaining relatively stable, which is confirmed with the Mann-Kendall statistical analysis (Attachment 2E), except for MW-49B, MW-70B and MW-74B. Mann-Kendall trend analyses of the groundwater data from MW-49B indicate increasing trends for 2,4-dimethylphenol, 2-methylnaphthalene, and naphthalene; and probably increasing trends for benzene and dibenzofuran using data from 2010 through 2014. Benzene concentrations in well MW-70B indicate a Mann-Kendall increasing trend; however, DNAPL is present in the well. An increasing trend was noted for 2-methylnaphthalene in MW-74B. There have been only five sampling events from MW-74B; therefore, the trends may be indicative of seasonal variation rather than a true increase that will be confirmed with additional sampling. Both MW-70B and MW-74B are located within the central portion of the plume. As shown on Attachment 1A-Figure 5B-21, the overall groundwater PCLE Zone for the B-CZ/B-TZ has remained stable over the past four years.

In addition, migration of either DNAPL or dissolved-phase COCs in the B-CZ is not likely to extend beyond the current impacted areas based on the very low hydraulic conductivity of the wells north of the Site (consistently less than 1×10^{-5} cm/sec as discussed in Attachment 1A).

On-Site PMZ (West):

On the west side of the Site, the B-TZ groundwater PCLE zone appears to be confined to three wells: MW-12B, MW-40B, and MW-41B. Historically, wells MW-12B and MW-41B have had DNAPL in-well thicknesses as thick as 15 feet (MW-12B) and 22.8 feet (MW-41B). Both wells are part of the on-going DNAPL recovery activities. In 2009, monitoring well (test well) TW-41B was installed about 40 feet north of MW-41B between MW-41B and MW-12B to serve as a possible DNAPL recovery well. The well was constructed to the same general elevations and screened intervals as MW-41B (Attachment 1A, Figure 4C-3). However, no DNAPL has been detected in TW-41B, and groundwater samples from the well have been less than RALs.

The boundary of the B-TZ PMZ on the west side is located at monitoring wells MW-38B, MW-39B, MW-42B, MW-62B, P-12, and P-11 (alternate POE wells) (Attachment 2D-2). Groundwater analytical data from these west perimeter wells indicate COC concentrations less than cPCLs, and most show either no trend or decreasing trends (Attachment 1B-16 through 1B-20). Monitoring well MW-38B is located approximately 50 feet west of MW-12B. The viscosity of the DNAPL from MW-12B was tested in 2007 with a reading of 192 centipoises, indicating a relatively viscous liquid. With groundwater data less than cPCLs in the wells in close proximity of the wells with DNAPL, this supports the limited dissolved COC migration in the area. Therefore, it is not anticipated that the B-TZ groundwater PCLE zone will migrate beyond the proposed B-CZ/B-TZ PMZ boundary.

Plume Management Zone	RAP Worksheet 2.1 Page 12 of 19	
	Associated Information: Attachments 2D, 2E	ID No.: 31547 Report Date: December 7, 2105 – Rev 1

For the B-CZ groundwater PCLE Zone on the northeast side of the Site, AALs were established for sampling points leading from MW-70B (off-site, and contains DNAPL) to MW-67B (Attachment 2E-6 through 2E-10 for benzene, 2,4-dimethylphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene, respectively) in order to ensure groundwater COC concentrations do not exceed the cPCLs at the point of exposure (MW-67B). Details on AAL development are provided in Attachment 2E. POE wells for the north and east sides of the B-CZ PMZ are shown on Attachment 2D-2. Two additional B-TZ/B-CZ wells (PMW-83B and PMW-84B (“P” indicates proposed and will be removed from the well identification once installed)) are proposed to be installed to serve as alternate POE wells and monitor the PMZ to the north of the Site (Attachment 2D-2). An additional corrective action observation well (PMW-82B) will be installed to the west of MW-35B. Details of the well installation are provided in Attachment 2B.

Describe the methods used to determine that there are no artificial penetrations which can allow COCs to migrate from the groundwater PCLE zone to currently unaffected groundwater-bearing units. Include supporting documentation in Attachment 2E.

The site-related contaminants and DNAPL have been detected in the B-CZ/B-TZ, and underlying C-TZ. PMZs are also proposed for the other GWBUs at the Site. Groundwater wells were installed in the underlying D-TZ, and until the July/August 2014 groundwater sampling event, Site-related COC concentrations have been below RALs in those wells.

An on-site field survey and water-well data search was conducted, indicating no potential artificial vertical penetrations that would act as a conduit for migration of shallow groundwater into the underlying groundwater formation. A discussion on underground utilities for A-TZ and possible communication with the B-CZ and deeper C-TZ is provided under the A-TZ summary (see RAP Worksheet 2.1, Page 13).

Plume Management Zone Associated Information: Attachments 2D, 2E	RAP Worksheet 2.1 Page 13 of 19	
	ID No.: 31547	Report Date: December 7, 2105 – Rev 1

List the attenuation action level determined for each attenuation monitoring point. Illustrate the proposed attenuation monitoring points and the groundwater PCLE zone on the map in Attachment 2D. Include all calculations and other methods of determining the attenuation action levels in Attachment 2E.

COC	Attenuation Monitoring Point (well number)	Attenuation Action Level (mg/L)	Attenuation Action Level limited by AirGW_{Inh-V} or existing COC concentration? Y/N
Benzene	MW-70B	38.45	Y -23 mg/L (Res, 30-ac Source)
	MW-33BR	3.259	N
	MW-63B	0.210	N
	MW-67B	0.005 (cPCL)	N
2,4-Dimethylphenol	MW-70B	72	NA
	MW-33BR	18.18	NA
	MW-63B	3.94	NA
	MW-67B	0.49 (cPCL)	NA
2 Methylanthalene	MW-70B	2.399	NA
	MW-33BR	0.993	NA
	MW-63B	0.3727	NA
	MW-67B	0.098 (cPCL)	NA
Dibenzofuran	MW-70B	0.6483	NA
	MW-33BR	0.3850	NA
	MW-63B	0.2158	NA
	MW-67B	0.098 (cPCL)	NA
Naphthalene	MW-70B	87.86	Y – 41 mg/L (>S) (Res, 30-ac Source)
	MW-33BR	21	N
	MW-63B	4.281	N
	MW-67B	0.49 (cPCL)	N

Note: Attenuation Action Levels were not developed for other COCs since the primary COCs listed above define the PCLE Zone.

The proposed PMZ and AMPs for the B-CZ/B-TZ are shown on Attachment 2D-2.

Plume Management Zone Associated Information: Attachments 2D, 2E	RAP Worksheet 2.1 Page 14 of 19	
	ID No.: 31547	Report Date: December 7, 2105 – Rev 1

Groundwater-bearing unit C-TZ

Repeat this worksheet for each groundwater-bearing unit for which a PMZ is proposed.

Groundwater classification X 2 3

Provide justification as to why the PMZ is appropriate in accordance with §350.33(f)(4)(A). Include supporting documentation in Attachment 2E.

The on-site and off-site PMZs proposed (Attachment 2D-3) as a response action for the C-TZ PCLE zone ensures that COCs will not pose a potential unacceptable risk to human health or the environment as long as the AALs are not exceeded at the respective AMPs or exceeds the cPCL at the alternate POE wells. The PMZs are appropriate for this PCLE zone based on a low groundwater velocity, stable/declining COC concentrations, the proposed institutional controls (deed recordation and restrictive covenants) on use of groundwater within the PCLE Zone, and the absence of any existing water supply wells within ½-mile of the Site. In addition, there are no surface water bodies at the Site or near the proposed PMZs; therefore, there is no potential for contaminating surface waters that would be hydraulically connected to groundwater. The City of Houston provides municipal water services for all properties within the Affected Property, so there is no complete human health pathway associated with this GWBU. The Site is also within the jurisdiction of the HGSD, which restricts groundwater use in the area and requires a permit application prior to drilling a groundwater well. There are permitting exemptions, but only in areas that do not have an alternative water supply. The HGSD rules are not a complete prohibition on the use of groundwater in the area, but rather the fees associated with the rules are “intended to operate as an economic disincentive to groundwater withdrawal” (HGSD, 2013).

The PMZs proposed for the C-TZ PCLE zones consists of two components: 1) filing of institutional controls including deed recordation (UPRR-Owned properties – on-site PMZ)) and restrictive covenants (off-site properties – Off-Site PMZ and Off-Site PMZ City of Houston ROW)) prohibiting the use of groundwater within the PMZs; and 2) performance of ongoing groundwater monitoring at the AMP and POE wells. The proposed deed recordation and restrictive covenant language, to be filed in the Harris County deed records, is included in Appendix 4.

The on-site and off-site PMZs for C-TZ were established using the July/August 2014 groundwater analytical data collected from the Site (Attachment 1A), in conjunction with trend analysis for groundwater analytical data from 2010 through 2014 (10 semi-annual sampling events) and development of attenuation action levels from groundwater data collected from 1997 through 2014. Comparing the maximum groundwater analytical data from the July/August 2014 groundwater sampling event to cPCLs, concentrations of 23 target COCs exceeded their respective cPCLs in at least one of the four GWBUs. For the C-TZ, the following 19 COCs were detected above cPCLs:

VOCs

- Benzene
- Methylene Chloride

SVOCs

- 2,4-Dimethylphenol
- 2,6-Dinitrotoluene
- 2-Methylnaphthalene
- Acenaphthene (one well*)
- Anthracene (one well*)
- Benzo(a)anthracene
- Benzo(a)pyrene
- Bis(2-chloroethoxy)methane (one well*)
- Chrysene (one well*)

SVOCs (cont)

- Dibenzofuran
- Fluoranthene (one well*)
- Fluorene (one well*)
- Naphthalene
- Pentachlorophenol
- Phenanthrene (one well*)
- Phenol
- Pyrene (one well*)

* - COC only detected in wells with DNAPL present

Similar to the A-TZ PCLE Zone, benzene, 2,4-dimethylphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene are the most prominent COCs where the cPCL exceedances for these COCs define the PCLE Zone in the C-TZ. Therefore, the trend analyses were conducted for these five COCs (Attachment 2E).

As discussed in Worksheet 2.3, a TI Zone will also be established for areas where DNAPL has been detected in monitoring wells or observed in the soil boring log for the GWBU (Attachment 2G).

In accordance with §350.33(f)(4)(A), the PMZ for the C-TZ Unit will be actively monitored (semi-annually). MNA will be used as a control response for this unit.

Is the alternate POE proposed to be beyond the current limits of the PCLE zone? Yes No
 If yes, how far? Approximately 100 feet (\$350.37(l) or (m) as applicable)
 Is it to be off-site? Yes No
 On an off-site property that currently does not contain a residential-based groundwater PCLE zone?
 Yes No - The residential-based PCLE zone extends onto the off-site property (to the north
 _____ and to the east).

If yes and this is a Class 2 groundwater, provide the basis for concluding that this groundwater does not have a reasonably anticipated future beneficial use (§350.37(l)(3)).

The residential-based PCLE zone extends onto the off-site properties (to the north and to the east in the residential area), and on to the City of Houston ROW. The proposed PMZs extend to the closest monitoring wells where COC concentrations in groundwater are less than the cPCL based on the groundwater data collected in July/August 2014. As previously discussed, the City of Houston provides municipal water services for all properties within the Affected Property, so there is no current beneficial use for the GWBU. The Site is also within the jurisdiction of the HGSD, which restricts groundwater use in the area and requires a permit application prior to drilling a groundwater well. There are permitting exemptions for small domestic wells, but only in areas that do not have an alternative water supply. The HGSD rules are not a complete prohibition on the use of groundwater in the area, but rather the fees associated with the rules are “intended to operate as an economic disincentive to groundwater withdrawal” (HGSD, 2013).

Therefore, with the City of Houston providing water for the area, and financial disincentives placed on shallow groundwater use by the HGSD (which the Texas Supreme Court ruled in favor of the HGSD in 1977 to protect public welfare by limiting harmful pumping, which was causing ground subsidence of the land resulting in flooding (*Beckendorff v. Harris-Galveston Coastal Subsidence District (1977)*), the shallow groundwater does not have a reasonably anticipated future beneficial use in the area.

Plume Management Zone Associated Information: Attachments 2D, 2E	RAP Worksheet 2.1 Page 16 of 19	
	ID No.: 31547	Report Date: December 7, 2105 – Rev 1

Is NAPL present? Yes No

If so, describe how the response action will achieve the performance criteria in §350.33(f)(4)(E).

To address the NAPL in the TI Zone for the C-TZ, the NAPL response action objectives and endpoints using TCEQ Guidance TRRP-32 (Risk-Based NAPL Management) will be achieved through control via TI based on the occurrence of DNAPL in wells completed in the C-TZ. For areas where either creosote NAPL was noted in the soil boring log in the saturated zone or is detected in monitoring wells (i.e., MW-17C, MW-18C, MW-23C, MW-25C, MW-34CR, MW-44C, MW-45C, MW-46C, MW-47C, MW-48C, and MW-68C, and observed DNAPL in soil borings (Attachment 1A, Figure 5A-7)), the TI demonstration details the difficulty of achieving groundwater PCLs in these areas because of complex hydrogeology (Attachment 1A) and physical nature of creosote (discussed in Worksheet 2.3). The control endpoint will be to control the soluble NAPL fraction sufficient to create stable or shrinking PCLE zones. Methods to control the creosote DNAPL will include recovery (recover readily recoverable creosote DNAPL from wells with DNAPL present) at the NAPL source zone so that the dissolved-phase groundwater PCLE zone is stable (or shrinking) and the PCLE performance objectives for the overall TI-based “no-growth” PMZ (includes on-site and off-site PMZs) can be met, including no cPCL exceedances at the alternate POE wells.

Therefore, since the wells with DNAPL present lie within the proposed TI Zones (On-site and Off-Site), the current response objective per the TCEQ Guidance is to ensure compliance of NAPL zone in the TI Zone through control. Readily recoverable NAPL will be recovered from wells on a monthly basis in order to control potential migration from the TI Zone. In addition, institutional controls on groundwater use will be implemented to protect exposure to residual NAPL in the GWBUs.

DNAPL recovered as part of the corrective action will be stored on-site in DOT approved drums within the CSA (Unit 4), and then disposed of in accordance with all applicable laws and regulations within the applicable timeframes.

If this is a Class 2 groundwater, explain how the response action will ensure that leachate from the surface soil and subsurface soil PCLE zones will not increase concentration of COCs greater than the current measured concentrations (at time of RAP submittal). (§350.33(a)(2))

With the C-TZ underlying the A-TZ and the B-CZ/B-TZ, please see response to this question for the A-TZ unit (RAP Worksheet 2.1, page 11).

Provide the basis that the COCs will not migrate beyond the downgradient boundary of the PMZ at concentrations above the critical PCL. Include supporting documentation in Attachment 2E.

Wood treating operations began at the Site over 115 years ago and continued until about 30 years ago. Given the long period of time since releases have occurred at the Site, creosote DNAPL and related COCs has migrated from the vadose zone (surface and subsurface soils) to the A-TZ groundwater, to the B-CZ/B-TZ, and to the C-TZ. The PCLE Zone for the C-TZ groundwater appears to correlate well with where DNAPL was observed in the C-TZ sand in the soil borings or where DNAPL has been detected in the monitoring wells. The center of the groundwater PCLE Zone appears to be in the vicinity of MW-23C (near SWMU 4 and 6), and extends off-site to the northeast near the Lockwood Street Bridge

Plume Management Zone	RAP Worksheet 2.1 Page 17 of 19	
	Associated Information: Attachments 2D, 2E	ID No.: 31547 Report Date: December 7, 2105 – Rev 1

overpass (DNAPL present in wells MW-25C, MW-44C, MW-45C, and MW-46C). Unlike the A-TZ and B-CZ/B-TZ units, groundwater flow in the C-TZ is generally to the southwest across the area.

For the off-site area northeast of the Site, DNAPL has been detected in the wells (i.e., MW-25C, MW-44C, MW-45C, and MW-46C) that fall within the C-TZ groundwater PCLE Zone (Attachment 1A, Figure 5A-7). Similar to the B-CZ/B-TZ, the PCLE Zone in the C-TZ is closely tied to where NAPL was observed. This suggests that there is not a high rate of dissolved constituent migration beyond the DNAPL areas. This is supported with the C-TZ groundwater analytical data that indicate the distribution of COCs dissolved in Site groundwater is relatively stable in the source areas, with the exception of MW-18C. The Mann-Kendall trend analysis for MW-18C groundwater data from 2010 through 2014 indicate increasing trends of 2-methylnaphthalene, dibenzofuran, and naphthalene. Well MW-18C is upgradient of MW-23C, which has higher concentrations of these COCs relative to MW-18C and also has DNAPL present in the well. MW-19C dibenzofuran concentrations from 2010 to 2014 indicate a Mann-Kendall probably increasing trend; however, concentrations in MW-19C (0.000554 mg/L) are well below the cPCL (0.29 mg/L (on-site)).

Along the edges of the PCLE Zone, concentration vs time graphs presented in Attachment 1B (1B-31 through 1B-40) indicate that groundwater concentrations are remaining relatively stable, which is confirmed with the Mann-Kendall statistical analysis included in Attachment 2E, except for MW-68C. As shown on Attachment 1A-Figure 5B-22, the groundwater PCLE Zone for the C-TZ has remained relatively stable over the past four years, with slight changes along the northeast and cross gradient side during the July 2012 and July/August 2014 events because of benzene cPCL exceedances in MW-68C. Benzene and naphthalene concentrations have been sporadic in MW-68C, where benzene concentrations exceeded the cPCL in January and July 2012, decreased below the cPCL in January 2013, then exceeded the cPCL in July/August 2014, and then decreased below the cPCL during the resampling event in September 2014 (discussed in Attachment 1A). For the purposes of this RAP, the PMZ will include MW-68C to account for the occasional benzene PCLE at that well. Newly installed well MW-76C (installed in May 2014) had a detection of pentachlorophenol (0.00272 mg/L) above the cPCL (0.002 mg/L) during the July/August 2014 sampling event. The well was resampled in September 2014, and pentachlorophenol concentrations were not detected (SDL < cPCL), but benzo(a)pyrene concentrations were detected at 0.000278 mg/L, just above the cPCL of 0.0002 mg/L. Benzo(a)pyrene concentrations were less than the cPCL during the initial sampling event. However, based on conversations with the TCEQ regarding the PMZ for the C-TZ, the On-Site PMZ (Main) in the C-TZ will not include this well, but rather will be extended to a proposed well (PMW-85C) upgradient of MW-76C. MW-76C will be included as a Corrective Action Observation Well, along with another C-TZ monitoring well downgradient of MW-76C (Attachment 2D-3).

Proposed point of exposure wells MW-15C, MW-28C, MW-47C, MW-48C, and MW-54C show either predominantly no detections of the COCs or relatively stable COC concentrations well below the RALs (Attachment 1B-26 through 1B-30). Mann-Kendall trend analysis shows an increasing concentration for dibenzofuran from 2010 to 2014 in MW-54C (Attachment 2E); however, concentrations have been decreasing since July 2013 (Attachment 1B-39). With groundwater data less than cPCLs in the wells (MW-19C and MW-54C) in close proximity of the wells with DNAPL, this supports the limited dissolved COC migration in the area. Therefore, it is not anticipated that the C-TZ groundwater PCLE zone will migrate beyond the proposed C-TZ on-site and off-site PMZ boundary.

For the C-TZ groundwater PCLE Zone, AALs were established for sampling points leading from MW-23C (contains DNAPL) to MW-76C (Attachment 2D-3) in order to ensure groundwater COC concentrations do not exceed the cPCLs at the POE (at the proposed well PMW-85C). Once PMW-85C

Plume Management Zone	RAP Worksheet 2.1 Page 18 of 19	
	Associated Information: Attachments 2D, 2E	ID No.: 31547 Report Date: December 7, 2105 – Rev 1

is installed, the well will be evaluated as the downgradient alternate POE well for the C-TZ. Details on AAL development are provided in Attachment 2E. POE wells for the C-TZ PMZ are also shown on Attachment 2D-3. With the low detections of benzene in MW-68C, one additional C-TZ well (PMW-83C) is proposed to be installed to serve as a POE well and monitor the PMZ cross gradient to the north of the Site and MW-68C (Attachment 2D-3). Details of the well installation are provided in Attachment 2B.

Describe the methods used to determine that there are no artificial penetrations which can allow COCs to migrate from the groundwater PCLE zone to currently unaffected groundwater-bearing units. Include supporting documentation in Attachment 2E.

An on-site field survey and water-well data search was conducted, indicating no potential artificial penetrations that would act as a conduit for migration of shallow groundwater into the underlying groundwater formation.

A discussion on underground utilities for A-TZ and possible communication with the C-TZ was provided under the A-TZ summary. Given the depths of the fiber optic line (reportedly as deep as 45 feet bgs) to just above the C-TZ unit, monitoring well MW-19C will continue to be monitored as a Corrective Action Observation Well to evaluate if the directional bored fiber optic lines are creating a preferential pathway for COCs to migrate to the deep GWBUs.

List the attenuation action level determined for each attenuation monitoring point. Illustrate the proposed attenuation monitoring points and the groundwater PCLE zone on the map in Attachment 2D. Include all calculations and other methods of determining the attenuation action levels in Attachment 2E.

COC	Attenuation Monitoring Point (well number)	Attenuation Action Level (mg/L)	Attenuation Action Level limited by ^{Air} GW _{Inh-v} or existing COC concentration? Y/N
Benzene	MW-23C*	0.131	N
	MW-17	0.093	N

Note: * - Monitoring well MW-23C is within the proposed soil cap area and will be plugged and abandoned. Well MW-17C will be considered a near-source AMP for the C-TZ.

** - Proposed well PMW-85C will be evaluated as the downgradient alternate POE well following installation, replacing MW-76C as the downgradient POE well.

*** - ^{Air}GW_{Inh-v} PCL for naphthalene not applicable since solubility for naphthalene (31.4 mg/L) is less than ^{Air}GW_{Inh-v}. In addition, the C-TZ GWBU underlies other GWBUs, where upward vapor migration is not possible.

Attenuation Action Levels were not developed for other COCs since the primary COCs listed above define the PCLE Zone.

The proposed PMZ and AMPs for the C-TZ are shown on Attachment 2D-3.

ATTACHMENT 2E
ATTENUATION ACTION LEVELS DETERMINATION

ATTACHMENT 2E ATTENUATION ACTION LEVELS DETERMINATION

Introduction

As described in this RAP, benzene, 2,4-dimethylphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene are the most prominent chemicals of concern (COCs) where the critical Protective Concentration Levels (cPCL) exceedances for these COCs define the PCL Exceedance (PCLE) Zone in each of the groundwater-bearing units (GWBU). Therefore, the attenuation action levels (AALs) developed for these five COCs.

TCEQ requirements related to the development of attenuation monitoring points (AMPs) and AALs are specified in §350.33(f)(4)(D). PMZ components are described in sections of three guidance documents, TRRP-28 - *Application of Remedy Standards A and B* (TCEQ, 2001a), TRRP-29 - *Soil and Groundwater Response Objectives* (TCEQ, 2001b), and TRRP-33 - *Monitored Natural Attenuation Demonstrations* (TCEQ, 2001c). These regulations and guidance documents were used as the basis for establishing AMPs and AALs, as described below.

Attenuation Monitoring Point Selection

TRRP requirements in §350.33(f)(4)(D) specify that: *“The person shall establish groundwater attenuation monitoring points beginning at an appropriate hydraulically upgradient location within the groundwater PCLE zone and continuing down the approximate central flow path of the COCs to the downgradient extent of the PMZ.”* As discussed in Attachment 1A of the RAP, potentiometric surface maps from the July 2014 sampling event for each of the four transmissive zones, A-TZ, B-TZ, C-TZ, and D-TZ (Attachment 1A Figures 5A-1 through and 5A-4, respectively) were prepared to evaluate the groundwater flow direction in each GWBU and to develop AMPs. Below is a discussion for the GWBUs where AALs are proposed:

- A-TZ - Groundwater in the A-TZ generally flows from west to east across the Site at a gradient ranging from approximately 0.0009 ft/ft to 0.011 ft/ft (approximate average of 0.006 ft/ft), with a groundwater divide on the east side of the Site just west of the Lockwood Road Bridge (Figure 5A-1).
- B-TZ/B-CZ - Groundwater in the B-TZ/B-CZ generally flows from west to east-northeast across the Site at gradients ranging from 0.005 ft/ft to 0.011 ft/ft, with an average of approximately 0.008 ft/ft (Figure 5A-2). As shown on Figure 5A-2, there is a piezometric high near the west perimeter of the Site, similar to the A-TZ. The highest groundwater elevation in the B-TZ in July 2014 was 43.15 feet HVD (MW-42B), and lowest elevation in the B-TZ wells was 37.22 feet HVD (MW-68B). The highest groundwater elevation in the B-CZ in July 2014 was 40.46 feet HVD (MW-36B), and the lowest elevation in the B-CZ wells was 32.71 feet HVD (MW-67B).
- C-TZ - The groundwater flow direction in the C-TZ is from northeast to southwest across the Site (Figure 5A-3) at a gradient about 0.001 ft/ft.

Also provided in Attachment 1A, individual COC concentration maps for the most common groundwater COCs at the Site (benzene, 2,4-dimethylphenol, 2-methylnaphthalene, dibenzofuran,

and naphthalene) were prepared for the three zones at the Site using the July/August 2014 groundwater data:

- A-TZ - Figures 5B-5 through 5B-9,
- B-CZ/B-TZ - Figures 5B-10 through 5B-14, and
- C-TZ - Figures 5B-15 through 5B-19.

Although these maps represent concentrations in samples collected in July/August 2014, the COC distributions are similar to those observed during previous monitoring periods.

For establishing AMPs, the lateral and vertical distribution of creosote dense non-aqueous phase liquid (DNAPL) leads to a larger “source” area. The PCLE Zones in each of the GWBUs are closely tied to where DNAPL was observed either in soil borings or in the individual monitoring wells. Groundwater analytical data suggest that there is not a high rate of dissolved constituent migration beyond the DNAPL areas. This is supported with groundwater analytical data from each GWBU that indicate the distribution of COCs dissolved in Site groundwater is relatively stable in the source areas. Therefore, AMPs were selected based on the distribution of COCs and presence of DNAPL in the areas.

The groundwater flow conditions and COC distribution in the A-TZ groundwater lead to establishing AMPs near the northeast portion of the plume near the sanitary sewer line (see RAP Worksheet 2.1 for details). For the B-CZ groundwater PCLE Zone on the northeast side of the Site, AMPs leading from MW-70B (off-site, and contains DNAPL) to MW-67B in order to ensure groundwater COC concentrations do not exceed the cPCLs at the point of exposure (MW-67B). For the C-TZ groundwater PCLE Zone, AMPs were selected from MW-23C (contains DNAPL, toward the upgradient portion of the Site) to MW-76C in order to ensure groundwater COC concentrations do not exceed the cPCLs at the POE (just beyond MW-76C, on-site).

Based on the groundwater flow paths and COC distributions, the following AMPs were selected for each GWBU:

- A-TZ AMPs: MW-18A, MW-25A (also alternate point of exposure (POE) well), and MW-44A;
- B-CZ AMPs: MW-70B, MW33BR, MW-63B, and MW-67B (also alternate POE well);
- C-TZ AMPs: MW-17C, MW-23C, and proposed well PMW-85C .

The proposed AMPs for each GWBU are included in the proposed PMZ, as shown on Attachment 2D-1, 2D-2, and 2D-3 for the A-TZ, B-CZ, and C-TZ units, respectively. As described below, AALs were developed for each of these AMPs.

Attenuation Action Level Calculation

As specified in §350.33(f)(4)(D)(ii), AALs are calculated for each COC at each AMP in order for the critical groundwater PCLs to not be exceeded at the alternate POE wells. Since some natural attenuation of COCs have been observed at the Site (as indicated by the stable/declining concentration trends discussed in this attachment) and future natural attenuation of these COCs is anticipated, proposed AALs were developed based on the procedures described in Section 3.2.1 of TRRP-33. Specifically, the “Method One” approach (a graphical technique based on empirical data from previous monitoring events) provided in that guidance document was used. This approach involves plotting COC concentrations against distance from the COC source to the

groundwater POE using existing monitoring data. A first-order curve is then fitted from a point near the source area (after accounting for natural variability) to the POE. The concentrations represented by this line at the identified AMPs are calculated as AALs. As noted in TRRP-33: “The data used to develop the curves should be selected so that the method accounts for routine variations in the data due to seasonal effects or sampling variability, such as by: 1) using the upper range of historical data to construct the AAL first order line; or 2) accounting for some level of exceedences; or 3) using a moving average over the long-term monitoring data in each well; or 4) some other method.” As illustrated in the example in this guidance, the natural logarithm of the concentration data are typically plotted on the y-axis to allow the first order decay curve to be plotted as a straight line.

In a typical evaluation, as described in TRRP-33, AALs are then selected from the AAL line to correspond to the distance that the AMP is located from the source (or in regards to the HWPW where DNAPL is present). The natural logarithm (Ln) of the y-coordinate at each of these points is then calculated to establish the AAL at each AMP. The calculated AALs for each GWBU and each primary COC (benzene, 2,4-dimethylphenol, 2-methylnaphthalene, dibenzofuran, and naphthalene) are shown on the following:

- A-TZ – Attachments 2E-1 thorough 2E-5;
- B-CZ – Attachments 2E-6 thorough 2E-10; and
- C-TZ – Attachments 2E-11 thorough 2E-15.

The calculated AALs are summarized below.

GWBU	AMP	Benzene (mg/L)	2,4-Dimethylphenol (mg/L)	2-Methylnaphthalene (mg/L)	Dibenzofuran (mg/L)	Naphthalene (mg/L)
A-TZ	MW-18A	1.5	24	1.5	0.52	26.16
A-TZ	MW-44A	0.0132	1.25	0.189	0.146	1.42

Technical Impracticability Associated Information: Attachment 2G	RAP Worksheet 2.3 Page 1 of 2	
	ID No.: 31547	Report Date: December 7, 2015 – Rev 1

Use this worksheet to justify the use of technical impracticability (TI) to modify the groundwater response objectives. Also complete Worksheet 2.2 to propose a plume management zone for the TI Zone. Include a map of the groundwater PCLE zone and area of technical impracticability in Attachment 2G. Include in the attachment any other documentation needed to make the justification. If technical impracticability is not proposed as part of the response action, do not submit this worksheet.

Describe the groundwater PCLE zone and demonstrate in accordance with *Guidance for Evaluating the Technical Impracticability of Ground-Water Restoration* (EPA OSWER Directive 9234.2-25), unless otherwise approved by TCEQ, why it is technically impractical to reduce the COC concentrations to the critical PCLs, taking into account all currently available remediation technologies, and hydrogeologic and chemical-specific factors. Identify the specific COCs and list the PCLs that cannot be achieved.

As discussed in the previous APARs and in the Worksheet 2.1, the shallow GWBUs have been contaminated with creosote-related DNAPL and associated dissolved COCs. Creosote DNAPL has been detected in the GWBUs as noted in soil borings and monitoring wells across the Site and in areas off site. PCLE Zones in each of the GWBUs is closely tied to where NAPL was observed in either soil borings or accumulated in monitoring wells. This suggests that there is not a high rate of dissolved constituent migration beyond the DNAPL areas. MNA of the COCs in groundwater appears to be limiting the migration of the groundwater PCLE Zones beyond where DNAPL has been noted; however, restoration of the groundwater to cPCLs in a reasonable timeframe may not be practicable per 30 TAC§350.33(f)(3).

According to U.S. Environmental Protection Agency (EPA) “Guidance for Evaluating the Technical Impracticability of Ground-Water Restoration” (Office of Solid Waste and Emergency Response Directive 9234.2-25 (EPA, 1993), the goal of restoring contaminated groundwater within a reasonable time frame can be modified after an evaluation of technical impracticability. The EPA’s technical impracticability guidance cites the following categories that can lead to a finding of technical impracticability:

1. Hydrogeologic factors
2. Contaminant factors
3. Remediation technology factors

Hydrogeological factors related to the Site include a complex lithology of sands, silts, and clays related to fluvial-deltaic depositional systems found in the Beaumont Formation. In regards to the contaminant at the Site, creosote is characterized as:

- a wood preservative that served as a fungicide, insecticide, miticide, and sporicide (EPA Website: Preliminary Risk Assessment for Creosote, EPA, 2007).
- a complex mixture of polycyclic aromatic hydrocarbons (PAHs), heterocyclic compounds, phenolic compounds, and a small fraction of benzene, toluene, ethylbenzene, and xylenes (BTEX) (Kiilerich, 1996); and
- highly insoluble and hydrophobic.

As a result, creosote DNAPL does not readily attenuate through biological decay or dissolution into the groundwater, and may persist in “pools” in the GWBUs and within the aquifer matrix indefinitely. Even with more aggressive responses such as thermally enhanced treatment that has been tried at similar creosote sites, groundwater response alternatives will not effectively treat groundwater to cPCLs within a reasonable timeframe. Therefore, restoration of the GWBUs below cPCLs is technically impracticable where creosote DNAPL exists because it is a continuing, long-term source of groundwater contamination.

Technical Impracticability Associated Information: Attachment 2G	RAP Worksheet 2.3 Page 2 of 2	
	ID No.: 31547	Report Date: December 7, 2015 – Rev 1

Details of the TI demonstration and associated maps are provided in Attachment 2G. Attachment 2G-Figure 1 summarizes the factors affecting groundwater restoration potential related to the Site. Attachment 2G Figure 2 shows the proposed TI Zone for the Site. Attachment 2G-Figure 2 and 3 provides a conceptual site model, illustrating the relationship between hydrogeology, surface and subsurface features, and the generalized extent of contamination.

Are there groundwater COCs in excess of the critical PCLs beyond the TI Zone? Yes No
 If yes, make sure removal/decontamination actions are documented in Worksheet 1.0.

Will actions be required or already completed to prevent COC migration outside the area of technical impracticability and/or outside the existing boundary of the groundwater PCLE zone?
 Yes No

The primary response action for the groundwater PCLE Zones outside of the proposed TI Zones is through Remedy Standard B using the PMZ and decontamination through MNA, as discussed in Worksheet 2.1.

If yes, make sure removal/decontamination actions are documented in Worksheet 1.0.

1.0 INTRODUCTION

The Union Pacific Railroad (UPRR) former Houston Wood Preserving Works Facility (hereafter “HWPW” or “the Site”) is a former wood treating site located in Houston, Texas. The Site consists of unoccupied industrial land and also includes the Englewood Intermodal Yard, which is to the south of the former HWPW facilities. The Site was first developed for creosoting operations in 1899, and operated various creosoting operations until 1984 when operations ceased. The facility was dismantled in the early 1990s. Details of the history and previous operations at the Site have been discussed in length in the previously submitted Affected Property Assessment Report (APAR) (ERM, 2000) and Revised APAR (ERM, 2004), as well as the RCRA Facility Assessment (RFA) Report (PRC, 1993).

As discussed in the previous APARs and in the Response Action Plan (RAP) that this attachment is part of, the shallow groundwater bearing units (GWBUs) at the Site have been contaminated with creosote-related dense non-aqueous phase liquids (DNAPL) and associated dissolved chemicals of concern (COCs). The sources of DNAPL are likely from spills and drippings at the Site over the 80+ years of operations, with most of the releases likely occurring prior to 1984 when the facility ceased operations. The DNAPL sources were removed over 20 years ago when the wood treating facility was dismantled.

Creosote DNAPL has been observed in the GBWUs as noted in soil borings and monitoring wells across the Site and in areas off site. As a result, the following shallow GBWUs are impacted with COC concentrations greater than Texas Risk Reduction Program (TRRP) critical Protective Concentration Levels (cPCLs) on and off site:

- A-Transmissive Zone (A-TZ);
- B-Cohesive Zone (B-CZ) and B-Transmissive Zone (B-TZ);
- C-Transmissive Zone (C-TZ).

Monitored natural attenuation (MNA) of the COCs in groundwater appears to be limiting the migration of the groundwater PCL Exceedance (PCLE) Zones; however, restoration of the groundwater within the PCLE Zones to cPCLs in a reasonable timeframe may not be practicable due to the presence of creosote DNAPL.

According to U.S. Environmental Protection Agency (EPA) “Guidance for Evaluating the Technical Impracticability of Ground-Water Restoration” (Office of Solid Waste and Emergency Response

Directive 9234.2-25 (EPA, 1993), the goal of restoring contaminated groundwater within a reasonable time frame can be modified after an evaluation of technical impracticability. The EPA's technical impracticability guidance cites the following categories that can lead to a finding of technical impracticability:

1. Hydrogeologic factors
2. Contaminant factors
3. Remediation technology factors

Hydrogeological factors related to the Site include a complex lithology of sands, silts, and clays related to fluvial-deltaic depositional systems found in the Beaumont Formation. In regards to the contaminant at the Site, creosote was used as a wood preservative that served as a fungicide, insecticide, miticide, and sporicide (EPA Website: Preliminary Risk Assessment for Creosote, EPA, 2007). Creosote is a complex mixture of polycyclic aromatic hydrocarbons (PAHs), heterocyclic compounds, phenolic compounds, and a small fraction of benzene, toluene, ethylbenzene, and xylenes (BTEX) (Kiilerich, 1996). Creosote is highly insoluble and hydrophobic. As a result, creosote DNAPL may persist in "pools" in the GWBUs indefinitely. Even with more aggressive responses such as thermally enhanced treatment that has been tried at similar creosote sites, groundwater response alternatives will not effectively treat groundwater to cPCLs within a reasonable timeframe. Therefore, restoration of the GWBUs below cPCLs is technically impracticable where creosote DNAPL exists because it is a continuing, long-term source of groundwater contamination.

This document was prepared to serve as a "front-end" Technical Impracticability (TI) Demonstration for the Site in accordance with 30 TAC §350.33(f)(3) and applicable TCEQ guidance to address the PCLE Zones related to creosote DNAPL. Details of the cPCLs requested to be waived (Section 2.0), spatial area for the TI (Section 3.0), conceptual site model including site geology, hydrogeology, DNAPL distribution, and potential receptors (Section 4.0), and restoration potential (Section 5.0), are discussed in the following sections. In addition, an evaluation of similar creosote sites in Texas with TI waivers is provided in Section 6.0. Attachment 2G-Figure 1 summarizes the factors affecting groundwater restoration potential related to the Site. Attachment 2G Figure 2 shows the proposed TI Zone for the Site. Attachment 2G-Figure 2 and 3 provides a conceptual site model, illustrating the relationship between hydrogeology, surface and subsurface features, and the generalized extent of contamination.

2.0 SITE GROUNDWATER CPCLS

The following table lists the PCLs identified for the Site in the APAR and RAP. Since the groundwater PCLE Zones extend on-site and off-site, commercial/industrial (C/I) PCLs and residential assessment levels (RALs) are used respectively depending on the location of the PCLE Zone.

Parameter	On-Site C/I PCLs (mg/L)	Off-Site RALs (mg/L)
2,4-Dimethylphenol	1.5	0.49
2-Methylnaphthalene	0.29	0.098
Acenaphthene	4.4	1.5
Benzo(a)anthracene	0.0028	0.0013
Benzene	0.005	0.005
Benzo(a)pyrene	0.0002	0.0002
bis(2-ethylhexyl)phthalate	0.006	0.006
Chrysene	0.28	0.13
Dibenzofuran	0.29	0.098
Fluoranthene	2.9	0.98
Fluorene	2.9	0.98
Naphthalene	1.5	0.49
Pentachlorophenol	0.001	0.001
Phenanthrene	2.2	0.73
Pyrene	2.2	0.73
Toluene	1	1

Based on the available information, all of the COCs listed above originated from the historical creosoting operations at the Site.

3.0 SPATIAL AREA FOR TI ZONE

As detailed in the EPA Guidance, the TI evaluation should specify the horizontal and vertical extent of the area for which the TI determination is sought. The location and extent of the groundwater PCLE zones (see Attachment 1A of RAP) were determined by COCs present in groundwater at concentrations that exceed the cPCL (C/I or RAL) using the most recent groundwater data. Groundwater PCLE Zones were mapped for the three upper GWBUs: A-TZ, B-CZ/B-TZ, and C-TZ based on the July/August 2014 groundwater data (Attachment 1A, Figures 5B-4, 5B-5, and 5B-6, respectively).

As detailed in the RAP (Worksheet 2.1), the PCLE Zones in the GWBUs appear to be tied closely to where DNAPL has been noted in soil borings and/or accumulated in monitoring wells. Taking in account the three GWBU PCLE Zones, the extent of the dissolved phase contamination extends about 750 feet north of the Site (B-CZ PCLE Zone) into the residential off-site properties (Attachment 1A, Figures 5B-5). DNAPL was noted in the boring log for well MW-63B, located approximately 500 feet off-site to the north. Also, on the west side of the Site, DNAPL has been observed in wells MW-12B and MW-41B, but the PCLE Zone is delineated within 100 feet of these wells. This same situation has been noted for the A-TZ and C-TZ where DNAPL has been observed in wells and soils borings within and at the edges of the PCLE Zone (i.e., MW-32AR for the A-TZ and MW-17C in the C-TZ (Attachment 1A, Figures 5B-4 and 5B-6, respectively)).

However, the spatial extent of the proposed TI Zone will include areas where DNAPL was either noted in the soil borings or detected in the monitoring wells, and extend vertically to the base of the C-TZ located approximately 65 to 70 feet below ground surface. The TI Zone will be a smaller area than the proposed overall PMZ. Since there are multiple off-site properties to the north and east, the proposed TI Zone will follow property boundaries instead of lines cutting across the properties (Attachment 2G, Figure 2).

4.0 CONCEPTUAL SITE MODEL

4.1 Hydrogeologic Considerations - Site-Specific Geology/Hydrogeology

The geology at the Site consists of interbedded clays, silts, and sands representative of fluvial-deltaic deposits of the Beaumont Formation. The site-specific geology and hydrogeology has been described in detail in the previous APAR (ERM, 2000), Revised APAR, (ERM, 2004), APAR Addendum (PBW, 2009) and Updated APAR Addendum (PBW, 2010). The Site stratigraphy from ground surface to a depth of about 135 feet below ground surface is grouped into nine distinct units with transmissive GWBUs separated by cohesive zones (with the GWBUs identified):

- (1) Surface fill material (Fill);
- (2) A-Cohesive Zone (A-CZ);
- (3) A-Transmissive Zone (A-TZ) (GWBU);
- (4) B-Cohesive Zone (B-CZ) (interbedded intervals);
- (5) B-Transmissive Zone (B-TZ) (GWBU);
- (6) C-Cohesive Zone (C-CZ);
- (7) C-Transmissive Zone (C-TZ) (GWBU);
- (8) D-Cohesive Zone (D-CZ); and
- (9) D-Transmissive Zone (GWBU).

Cross sections showing the general relationship of the zones are provided on Attachment 2G Figures 3 and 4. The lithology consists of a complex group of clays, silts and sand layers. As an example, the B-CZ is comprised of clay, silty clay, and sandy clay. The B-TZ, which underlies the B-CZ, grades laterally from west to east into a portion of the B-CZ that contains interbedded, thin seams of silty sand, thin carbonate clayey gravel and nodule seams (~0.1 feet thick). This interval of interbedded carbonate nodules within the B-CZ clay is considered to be a distinct saturated unit based on its hydrologic properties and lithology. Very small amounts of water are observed in the wells completed across this interbedded zone, and numerous soil borings drilled through this interval have noted DNAPL in the soil borings.

General groundwater flow within the GWBU's have been evaluated based on historical water level measurements collected from the monitoring well network installed across the Site. Groundwater in each transmissive zone appears to be under confined conditions. Potentiometric maps for the most recent groundwater monitoring event for the A-TZ, B-CZ/B-TZ, C-TZ, and D-TZ are provided in Attachment 1A of the RAP. Historical groundwater levels measurements collected at the Site are provided in Table 5B in Appendix 2 of the RAP.

Hydraulic properties of the GWBUs through aquifer testing are detailed in the previous APARs. In 2012, additional aquifer tests were conducted on B-CZ wells to evaluate the groundwater classification of the interbedded carbonate seams within the B-CZ. Details of the aquifer testing are provided in RAP Attachment 1A. The additional assessment of the B-CZ was conducted since numerous wells screened across the interbedded carbonate seams contain creosote DNAPL. Based on the aquifer testing conducted on wells completed in the B-CZ (11 wells), the calculated hydraulic conductivities ranged from 8.0×10^{-9} cm/sec to 1.1×10^{-6} cm/sec, with a geometric mean of 1.1×10^{-7} cm/sec (see RAP Appendix 3) indicating very low hydraulic conductivity for the unit, and low likelihood of DNAPL recovery from the unit.

4.2 Contaminant Considerations

The Site was used for creosoting operations for about 80 years and ceased operation in 1984. Various releases of creosote occurred during this period. Creosote is hydrophobic, highly insoluble, and consists of a complex mixture of compounds, including PAHs and trace levels of BTEX. Only a few of the components of the creosote are soluble (i.e. aqueous concentration in equilibrium with creosote) including dibenzofuran (1.6 mg/L), naphthalene (12.4 mg/L), and phenol (1,388 mg/L) (King, et al, 1994). This overall low solubility for creosote results in limited groundwater COC concentration plumes that do not extend great distances from the source material. Studies have shown that the dissolved COC plumes from creosote sources tend to have concentrations three to 50 times lower about 150 feet downgradient of the source compared to source concentrations (Kiilerich, 1996). This relationship is observed at the Site with the limited size of the groundwater PLCE Zones relative to the extent of DNAPL (Attachment 1A – Figures 5B-1 to 5B-3) and age of the plumes likely anywhere from 30 to >100 years old.

Therefore, the groundwater PLCE Zones are driven by the presence of creosote in the GWBUs. During the various site investigations, creosote DNAPL has been noted in soil borings and monitoring wells completed in the A-TZ, B-CZ/B-TZ, and C-TZ. The cumulative areal extent of DNAPL noted in the boring logs is about 50 acres. Creosote recovered from monitoring wells at the Site is described as a thick, viscous liquid, with viscosity testing ranging from 8.53 centipoises (sample from MW-32A (DNAPL from the B-CZ zone)) to 192 centipoises (MW-12B) at 70°F (PBW, 2009). Details of the occurrence and observations of DNAPL in each GWBU are provided in Attachment 1A of the RAP and are summarized below.

DNAPL in the A-TZ

During installation of monitoring wells in the A-TZ, DNAPL (free-phase or sheen) was observed in soil borings within the A-TZ GWBU in 12 wells generally located in the northeast portion of the Site (near SWMUs 4, 5, and 8, and off-site near the northern perimeter of the Site) and extending into the Englewood Intermodal Yard (Attachment 1A, Figure 5A-5). Of these 12 wells, monitoring wells MW-57A and MW-78A had measureable in-well DNAPL thicknesses of approximately 0.81 feet and 1.38 feet, respectively, during the July/August 2014 sampling event. However, evidence of DNAPL within the A-TZ extends out further than the area represented by these two wells, as shown in Attachment 1A, Figure 5A-5). The other 10 wells where DNAPL was noted in the boring logs have not had DNAPL observed in the wells.

As an example, monitoring well TW-56A (intended to be a test well) was installed in 2009 within one of the significant source areas at the Site, SWMU 8 – AST Area. The field geologist observed the lower portion of the A-TZ sand as being “*saturated with NAPL from 29.5 to 30.6’.*” Photographs of this interval of the A-TZ show the saturated portion of the sand (see Photograph 1 within this attachment). However, through July 2014, no DNAPL has been observed in TW-56A. This phenomenon has been observed at numerous wells at the Site (MW-30A, MW-31A, MW-52A, MW-55A, MW-79A) where significant NAPL was noted in the boring log when the wells were installed, but no NAPL has been observed in the wells. This indicates that areas of the A-TZ may have residual saturation of DNAPL in the sand matrix that is not mobile, especially given the high viscosity of the DNAPL material. Even though there is little DNAPL migration, the NAPL continues to serve as a source of dissolved-phase COCs into the A-TZ.

In addition to the measured DNAPL thicknesses in the monitoring wells completed in the A-TZ, Attachment 1A Figure 5A-5 presents contours of rapid optical screening tool (ROST) readings from cone penetrometer test (CPT)/ROST borings that encountered the A-TZ. The majority of the elevated ROST readings (i.e., >25 % RE) in the A-TZ are located in and around the Recent Process Area, Original Process Area, and the AST Area (SWMUs 4, 5, and 8, respectively). The elevated ROST readings are generally consistent with intervals where NAPL was visually observed in soil borings for A-TZ wells, except for in the Englewood Intermodal Yard area. NAPL was noted on the boring logs for A-TZ wells MW-78A and MW-79A installed in the Englewood Intermodal Yard. However, there were no significant

ROST readings (i.e., >25% RE) in this area of the Site. This may indicate the NAPL may be more weathered in this area of the Site.

The groundwater PCLE Zone for the A-TZ generally matches the areas where DNAPL was observed in monitoring well borings logs. This is consistent with similar creosote sites where the dissolved COC fraction concentrations significantly decrease within 200 feet of the source material.

DNAPL in the B-CZ/B-TZ

DNAPL has been detected in the B-TZ along the western boundary of the Site at MW-12B and MW-41B (Attachment 1A, Figure 5A-6). During the July 2014 monitoring event, DNAPL present in the B-TZ on the west side of the Site had a maximum in-well thickness of 6.95 feet observed at MW-41B, with MW-12B having a measured thickness of 0.82 feet. Both of these wells are included in the DNAPL recovery pilot test and are pumped monthly since the test began in February 2013. DNAPL has not been detected in nearby monitoring wells MW-38B, MW-39B, MW-40B, TW-41B (located approximately 50 feet from MW-41B), and P-11, which indicates sufficient horizontal delineation of the DNAPL in the B-TZ. In addition, groundwater COC concentrations are less than cPCLs in the nearby wells within 100 feet of the DNAPL.

For the B-CZ wells, DNAPL was detected in three of the wells completed in the interbedded carbonate nodule seam interval, with two wells (MW-32B and MW-70B) located off site to the north of the Recent Process Area and one well in the Englewood Intermodal Yard (MW-75B). The in-well DNAPL thicknesses were measured at 2.11 feet in MW-32B, 0.94 feet in MW-70B, and 1.44 feet in MW-75B during the July 2014 gauging event.

Previously, DNAPL was noted in monitoring well MW-33B located north of the Site. Approximately 7.24 feet of DNAPL (in-well thickness) was observed at MW-33B in January 2010 (PBW, 2010). During the July 2010 monitoring event, an obstruction was encountered in the well that prevented access to the bottom of the well to gauge the DNAPL. The well was plugged and abandoned, and a replacement well MW-33BR was installed within about 10 feet of MW-33B in December 2011 (boring log provided in RAP Appendix 2). The boring log for MW-33BR noted traces of NAPL in fractures in the B-CZ. However, since the installation of MW-33BR, no DNAPL has been observed in the well.

ROST readings greater than 25% RE from CPT/ROST borings that encountered the B-TZ or B-CZ are also posted on Attachment 1A, Figure 5A-6, showing the overall distribution of ROST responses in the unit. The majority of the elevated ROST readings in the B-CZ/B-TZ are in the vicinity of SWMUs 4 and 5. However, elevated ROST readings were observed in the B-CZ north of the Site at CPT/ROST boring CPT-43R-08, near MW-70B. The ROST readings in this area are consistent with the observations of NAPL in monitoring well soil borings in the B-CZ (i.e., MW-70B). Elevated ROST readings were also noted in the Englewood Intermodal Yard area just slightly above the 25% RE (CPT-14-13). Monitoring wells MW-74B (installed within an area noted with >25% RE ROST readings) and MW-75B were installed in December 2011 in the Englewood Intermodal Yard to evaluate the presence of DNAPL in the B-CZ. NAPL was noted in the boring log in the B-CZ for both wells. However, no DNAPL has been detected in MW-74B during the gauging events. In contrast, no significant ROST readings were noted for CPT/ROST borings CPT-07-13 or CPT-10-13 (Figure 5A-6), but DNAPL has been observed in monitoring well MW-75B located in the immediate vicinity of CPT-07-13. As with the A-TZ, the NAPL in this area may be more weathered and less likely to be detected with the ROST tool.

Similar to the A-TZ, the groundwater PCLE Zone extends just beyond the areas where DNAPL was noted in the boring logs. As an example, the line of wells from the Site to the north off-site (MW-57B, MW-70B, MW-33BR, and MW-63B) all had NAPL noted in the boring logs within the B-CZ interbedded zone where the carbonate nodules were observed. COC concentrations in these wells are greater than their respective cPCLs. To the north of MW-63B at well MW-67B, COC concentrations are less than cPCLs and less than sample detection limits (SDLs) (Attachment 1A, Figure 5B-2).

DNAPL in C-TZ

During the July 2014 gauging event, DNAPL was present in the C-TZ wells extending from the northeast side of the Site at MW-23C to approximately 150 feet off site to the northeast near MW-44C, MW-45C, and MW-46C (Attachment 1A, Figure 5A-7). In-well DNAPL thicknesses in these wells were measured at 1.49 feet in MW-44C, 0.69 feet in MW-45C, 1.51 feet in MW-46C, and 2.14 feet in MW-23C.

As with the other transmissive zone NAPL figures, ROST readings from CPT/ROST borings that encountered the C-TZ unit were contoured and presented on Attachment 1A, Figure 5A-7 with the measured in-well DNAPL thicknesses for the C-TZ unit. Of the 100 CPT/ROST borings conducted at the

Site, only 13 CPT/ROST borings were advanced to the top of the C-TZ. The elevated ROST responses were relatively lower than the other GWBUs, and centered near SWMU 5 (Original Process Area).

4.3 Receptors

As discussed in the RAP, a Plume Management Zone (PMZ) and TI are proposed as a response action for the groundwater PCLE zones to ensure that COCs will not pose a potential hazard to human health or the environment as long as the PMZ attenuation action levels (AALs) are not exceeded at the respective attenuation monitoring points (AMPs) and COC concentrations less than cPCLs at the proposed Alternate POE wells. The PMZ/TI is appropriate for the PCLE zones based on a relatively low groundwater velocity, overall stable/declining COC concentrations, the proposed institutional controls (deed recordation and restrictive covenants) on use of groundwater within the PCLE Zone, and the absence of any existing water supply wells within ½-mile of the Site. In addition, there are no surface water bodies at the Site or near the proposed PMZ; therefore, there is no potential for contaminating surface waters that would be hydraulically connected to groundwater.

The City of Houston provides municipal water services for all properties within the Affected Property, so there is no human health complete pathway associated with the GWBUs. The Site is also within the jurisdiction of the Harris-Galveston Subsidence District (HGSD), which restricts groundwater use in the area and requires a permit application prior to drilling a groundwater well. There are permitting exemptions for small diameter wells, but only in areas that do not have an alternative water supply. The HGSD rules are not a complete prohibition on the use of groundwater in the area, but rather the fees associated with the rules are “intended to operate as an economic disincentive to groundwater withdrawal” (HGSD, 2013).

5.0 EVALUATION OF RESTORATION POTENTIAL

One of the major aspects of the TI demonstration in the EPA guidance is to evaluate the restoration potential through source control measures, remedial action performance, restoration timeframe analysis, applicable technologies, and cost estimate. With this demonstration considered a “front-end” TI demonstration, extensive site-specific remedial actions to address the groundwater PCLE Zones have not

been conducted. However, extensive site investigations have been conducted to understand the hydrogeologic and contaminant fate and transport at the Site, with emphasis on understanding the nature and extent of DNAPL at the Site.

5.1 Source Control

As previously discussed, the operations at the former HWPW ceased in 1984 and the facilities were dismantled and removed from the Site in the early 1990s. Therefore, there have been no new releases from creosote sources at the Site in the last 20 to 30 years. The DNAPL that has migrated to the GWBUs continues to act as a source material for dissolved-phase COCs in the groundwater. Evidence of the DNAPL migration extends across a majority of the area where the groundwater PCLE Zones have been identified.

Two major aspects, which are functions of the physical property of creosote and hydrogeologic complexity, greatly hinder recoverability of the DNAPL source from the subsurface. These include the following:

1. Residual saturation in the GWBU matrix and confining clays: As discussed in Section 4.0, a majority of monitoring wells where DNAPL was noted in the boring logs do not have measureable, or recoverable, DNAPL present in the wells. This indicates that in many areas within the Affected Property the creosote resides in the GWBUs as residual saturation and no longer flows under natural conditions; and
2. Creosote DNAPL in the low permeable clays: DNAPL noted in the boring logs for the B-CZ wells was typically observed within the B-CZ interbedded zone where the carbonate gravel seams were located. The hydraulic conductivities discussed in Section 2.0 for these B-CZ wells screened across the carbonate seams had a geometric mean of 1.1×10^{-7} cm/sec. Therefore, the ability to move fluids through the B-CZ is not practicable.

As an example of the difficulty of recovering DNAPL at the Site, wells MW-12B and MW-41B on the west side of the Site have had DNAPL in-well thicknesses as thick as 15 feet (MW-12B) and 22.8 feet (MW-41B). In 2009, monitoring well (test well) TW-41B was installed about 40 feet north of MW-41B between MW-41B and MW-12B to serve as a possible DNAPL recovery well given the relatively thick

DNAPL noted in the two nearby wells. The well was constructed to the same general elevations and screen interval as MW-41B (Attachment 1A, Figure 4C-3). However, no DNAPL has been detected in TW-41B, and groundwater samples from the well have been less than RALs.

At monitoring wells where DNAPL does flow into the wells, UPRR is conducting a DNAPL recoverability pilot study (discussed below). At these wells, DNAPL recovery will be evaluated for long-term source control of the creosote DNAPL in the three GWBUs.

To address the NAPL source control within the TI Zone for each of the GWBUs, the NAPL response action objectives and endpoints using TCEQ Guidance TRRP-32 (Risk-Based NAPL Management) will be addressed through control via TI based on the occurrence of DNAPL in wells at the Site. The control endpoint will be to control the source (i.e., soluble NAPL fraction) sufficient to create stable or shrinking PCLE zones. Methods to control the creosote DNAPL will include recovery (recover readily recoverable creosote DNAPL from wells with DNAPL present) at the NAPL source zone so that the dissolved-phase groundwater PCLE zone is stable (or shrinking) and the PCLE performance objectives for the TI-based PMZ can be met.

As previously discussed, the creosote DNAPL does not create large, extensive dissolved-phase plumes outside of where the creosote is found to be present in the subsurface. Studies have shown that the dissolved COC plumes from creosote sources tend to have concentrations three to 50 times lower about 150 feet downgradient of the source compared to source concentrations (Kiilerich, 1996). This is supported at the Site by the limited migration distance of the dissolved-phase plume from the source areas, indicating a primary line of evidence (PLOE) that natural attenuation is occurring to control the PCLE Zone. Furthermore, as detailed in RAP Worksheet 2.1, groundwater analytical data from the three upper GWBUs indicate the distribution of COCs dissolved in Site groundwater is relatively stable in the source areas, with a few exceptions (i.e., a few increasing trends but less than historical high concentrations). Therefore, as long as the DNAPL does not migrate outside of the TI Area, which will be controlled through recovery, groundwater concentrations will achieve critical PCLs at the alternate point of exposure (APOE) wells within the PMZ through decontamination techniques (i.e., natural attenuation) satisfying 30 TAC§350.33(f)(3)(B) and (C).

The proposed response action to address the surface soils is through a soil cap over approximately 13 acres including most of the potential source areas (i.e., SWMU 4, 5, and 8). Even though the soil cap will not be designed for hydraulic control (designed to protect human health exposure to surface soils), the construction of the soil cap will include a vapor barrier and will be slightly sloped and vegetated. Both of these design elements will likely limit infiltration through the former source areas and limit further migration from the vadose zone to the upper GWBUs.

5.2 Remedial Action Performance

PBW initiated a 24-month pilot study in February 2013 through January 2015 to evaluate DNAPL recovery by conducting tests on selected wells where DNAPL had been observed. Details of the scope of work for the pilot test were submitted to the TCEQ in a letter dated February 5, 2013 (PBW, 2013). A copy of the scope of work is provided in RAP Appendix 3.

Conclusions from the DNAPL recovery pilot test indicated the following:

- Once per month DNAPL recovery activities are resulting in an overall stable DNAPL thickness trend in the wells tested.
- The current monthly recovery frequency appears to be effective with total DNAPL volume recovered becoming stable in the wells over time.

As part of the corrective action for the Site, UPRR plans to continue the monthly DNAPL recovery efforts, and will submit the annual reports of recovery efforts to the TCEQ as part of the post-response action care reporting. More aggressive DNAPL recovery efforts are not recommended for the Site given the effectiveness of the monthly recovery activities.

5.3 Restoration Timeframe Analysis

The presence of NAPL across the Site within the GWBUs is the key factor in evaluating the timeframe to achieve the Site remedial goals. Creosote NAPL is present as both a residual phase adsorbed onto the soil and GWBU matrix and as free-phase within the GWBUs. DNAPL removal through the use of groundwater extraction wells is limited by the characteristics of the complex hydrogeology and the

physical properties of the creosote in the GWBUs. Creosote is a highly insoluble DNAPL that readily adsorbs onto the soil matrix. Groundwater tends to flow around these areas saturated with DNAPL because creosote is highly hydrophobic, and as a result only a small fraction of the total contained PAH mass is actually exposed to the groundwater.

As part of the evaluation of restoration timeframes, PBW reviewed groundwater models prepared for similar creosote sites, as well as developing a groundwater model specific to the HWPW site to evaluate the fate and transport of significant COCs associated with creosote DNAPL. One similar site is the North Cavalcade Superfund Site in Houston, Texas (as discussed in Section 6.0), which is located approximately 2 miles northwest of the UPRR HWPW site. As detailed in the document titled “*Subsurface Contaminant Transport Modeling for the North Cavalcade Superfund Site, Houston, Texas*” (Idaho National Laboratory, 2006), a groundwater modeling study was conducted for the North Cavalcade site to evaluate transport of the more soluble constituents found in creosote within the shallow groundwater. The groundwater model focused on benzene and naphthalene found in the creosote and in the dissolved-phase within the groundwater near the creosote. The modeling study evaluated two scenarios: 1) a no-action scenario; and 2) a scenario where reductions in the source area were modeled. The results of the modeling study indicated that the resulting naphthalene concentrations were “still above the health advisory level after 100 years” (Idaho National Laboratory, 2006).

PBW developed a similar groundwater model to evaluate the possible fate and transport of naphthalene from the creosote DNAPL present in the C-TZ unit. The C-TZ unit was selected based on the occurrence of creosote DNAPL in the unit, extensive groundwater data available for the unit, and relatively consistent groundwater flow direction and gradient. As with the North Cavalcade site, naphthalene is a significant COC associated with the creosote DNAPL at the Site. The computer program Visual MODFLOW version 4.6 (including the fate-and-transport module MT3DMS) was used to simulate naphthalene concentrations typically found in creosote mixtures, and the model results compared to groundwater concentrations found at the HWPW site in C-TZ wells with either creosote DNAPL or near known areas of creosote. Groundwater model assumptions and results are provided in Appendix A.

The objectives of the groundwater model were to:

- Prepare a groundwater flow simulation of the C-TZ that represents the general groundwater flow conditions and naphthalene concentrations currently found in the GWBU;

- Evaluate the potential migration and decrease of naphthalene concentrations in the C-TZ over time with source reduction by decreasing naphthalene concentrations at the areas where DNAPL is currently located (source areas). Naphthalene concentrations in the DNAPL source areas where DNAPL is currently found or suspected to be present were assumed to optimistically reduce by half every five years, with concentrations reduced below PCLs within 30 years (Year 2045); and
- Evaluate the potential downgradient migration of naphthalene concentrations in the C-TZ over time with a constant concentration of naphthalene in the source areas (as a result of a constant source of creosote DNAPL in the C-TZ where currently found) to compare to the previous scenario.

Given the widespread presence of DNAPL in the C-TZ at the Site, the assumption that naphthalene concentrations (sourced from the DNAPL) can be reduced to below PCLs within 30 years using a presumptive remedy (pump and treat) is optimistic and likely unrealistic based on remedial efforts at similar sites (see Section 6).

The groundwater modeling study (Appendix A) indicated the following based on the scenarios evaluated:

1. Under the modeled current conditions, the naphthalene plume in the C-TZ appears to have reached equilibrium based on the minimal dissolved phase migration from the source areas. Using the model with constant DNAPL source throughout the modeled period, there was little lateral migration of the naphthalene plume in the future (i.e., 100 years from present, in Year 2115, the downgradient edge of the naphthalene plume migrated approximately 250 feet from the current modeled edge).
2. The modeled results of naphthalene fate and transport using source reduction showed elevated naphthalene concentrations greater than 8 mg/L downgradient of the DNAPL source areas after 30 years (Year 2045), with concentrations greater than 3 mg/L (above the Residential PCL of 0.49 mg/L) after 100 years (Year 2115). It was not until the Year 2265 (250 years from present) that naphthalene concentrations decreased to below the Residential PCL.
3. The constant source and reduced source modeled naphthalene plumes showed similar downgradient plume geometries after 100 years with a slightly lower overall naphthalene concentration in the plume with the reduced source compared to the constant source (i.e., 3 mg/L compared to 10 mg/L).

The overarching conclusion of the groundwater model is that the reduction of naphthalene concentrations in the C-TZ groundwater to TRRP PCLs will not be met in a reasonable timeframe, and likely not within 250 years even with some source removal. It is important to note that the model does not take into account any back diffusion that could occur from the GWBU or surrounding clays even if the DNAPL could be removed. There will be significant amounts of contaminant mass that have diffused into low permeability zones, in particular the clays between the B-CZ/B-TZ and C-TZ. Back diffusion of contaminant mass from these zones may sustain dissolved-phase plumes for significant periods of time, even after DNAPL has been removed. As previously stated, complete removal of DNAPL from the GWBUs within a reasonable timeframe is not practicable; therefore, the more soluble COCs, such as naphthalene, will continue to partition into the groundwater and exceed the applicable PCLs.

With DNAPL present within the GWBUs, efficiency of any recovery system installed at the Site will be limited by the physical properties of the creosote as well as the slow rate of desorption of the creosote from the soil and GWBUs as a result of the low solubilities of the COCs in the DNAPL. Using a presumptive remedy such as traditional groundwater pumping and recovery system, large quantities of water would need to be pumped to remove a small fraction of the contaminants. Unless both the free-phase and residual DNAPL are completely removed from the soil and GWBUs material (as deep as approximately 68 feet in C-TZ), a groundwater extraction remedy will not be able to attain the remedial goals within the PCLE Zones in a reasonable time frame, as supported by the modeling results.

5.4 Alternative Cleanup Technologies

Aggressive cleanup technologies attempted at other creosote sites include thermal remediation or source area in-situ stabilization. Thermal remediation using steam enhanced extraction (SEE) has been used as an alternative cleanup technology for creosote DNAPL. Through heating of the GWBU and DNAPL, SEE has been shown to reduce the residual soil saturation and enhance the mobility of the creosote for recovery by conventional groundwater extraction wells. The variables that affect the success of SEE include the hydrogeology of the site and extent of NAPL to be treated. Subsurface conditions such as permeability, heterogeneities, water saturation, and depth to contamination greatly affect the effectiveness of SEE. The target GWBUs must have adequate permeability (i.e., 10^{-3} cm/sec) in order to conduct the

steam to heat the NAPL. GWBUs with low hydraulic conductivities would limit the radius of influence for the SEE system. The horizontal and vertical extent of the residual and free-phase DNAPL contamination is another major variable for evaluating SEE to address the creosote DNAPL. As previously discussed, the footprint of where DNAPL in each of the three GWBUs where DNAPL has been encountered extends over 50 acres and down to depths near 70 feet bgs. Based on a review of sites where SEE was used, the widespread contamination and multiple GWBUs at the Site would require numerous injection and extraction points to address the lower permeability sediments as well as prevent downward migration of the mobilized NAPL beyond the C-TZ.

Another limiting factor in applying the technology to this Site is the high capital cost involved for the installation of the systems. A review of available reports and studies on thermal remediation has shown that a limited number of sites have used SEE to address creosote impacted GWBUs. One site where SEE was applied was at the Visalia Pole Yard Superfund Site in California where creosote is a major contaminant at the site (US DOD, 2006). The SEE study was conducted at the Visalia site in 1997 through 2000 over a 1.75 acre area. Steam injection wells were installed at about 14 wells per acre and spaced about 57 feet apart. The cost estimates from the Visalia site indicated a unit cost of \$197 per cubic yard of soil treated with an approximate total project cost of \$21.5 million for the 1.75 acre area (US DOD, 2006). Applying the approximately \$12 million per acre cost, the preliminary costs for the Site would be approximately \$500 to \$600 million to treat the 50 acre area.

Another alternative evaluated included in-situ solidification and stabilization (ISS/S). At similar sites, this approach has been used to “solidify” the DNAPL-impacted GWBU through binding the contaminated media with a reagent and thereby changing its physical properties (decreasing permeability and encapsulating the contaminants in a solid material). ISS/S usually consists of mixing a binding agent using large diameter augers to significantly reduce the hydraulic conductivity of the GWBU and bind the DNAPL contaminants to reduce their leachability. A similar approach is in-situ geochemical stabilization (ISGS) that consists of mixing a chemical reagent (i.e. permanganate-based reagent) to accelerate degradation of the DNAPL into the targeted area either through jet grouting or deep soil mixing using large diameter augers.

Both ISS/S and ISGS technologies were evaluated for a similar creosote site, the Cabot Carbon/Koppers Superfund Site in Gainesville, Florida (EPA, 20011a), to address creosote DNAPL in multiple GWBUs.

The Record of Decision (ROD) for the site detailed the ISS/S approach as a means to treat impacted soil from the ground surface to a middle aquifer (Upper Hawthorn Aquifer) approximately 65 feet bgs across 5.5 acres through deep soil mixing with a binding agent (cement/additives) (EPA, 2009). This depth is similar to the base of the C-TZ at the HWPW Site. The evaluation of the approach indicated that the remedy would take about 3 years to implement, with several more years to meet the groundwater protection standard at the site after implementing the remedy. The estimated capital costs for implementing the ISS/S listed in the ROD was \$75.2 million (EPA, 2011a), which is approximately \$13.7 million per acre treated. Applying this estimate per acre to just the C-TZ where the DNAPL footprint is approximately 2.5 acres, the costs would be roughly \$34.3 million, with costs to treat the DNAPL in the B-CZ/B-TZ approaching \$400 to \$500 million (assuming the costs would be approximately 40% less with the shallower target zone compared to the C-TZ).

Since the shallow GWBUs are not used for water supply, and the area is provided water by the City of Houston, remediation of the shallow GWBUs is cost prohibitive. The cost for an alternative cleanup technology such as SEE or ISS/S is impracticable given the limited future beneficial use. In addition, implementation of these approaches would not be feasible in a residential area with numerous houses and city streets and utilities given the required well spacing or deep soil mixing borings needed to implement these remedies.

6.0 SIMILAR TI WAIVER SITES

PBW reviewed similar wood preserving sites where TI waivers have been granted for groundwater impacted with creosote. In EPA Region 6 alone, the following EPA Superfund sites that conducted wood preserving activities have been granted TI waivers (US EPA, 2012):

- Popile, Inc., El Dorado, Arkansas;
- Midland Products, Yell Co, Arkansas;
- Garland Creosoting, Longview, Texas;
- Hart Creosoting, Jasper, Texas;
- Jasper Creosoting, Jasper, Texas; and
- North Cavalcade, Houston, Texas.

A summary of the waivers are provided on Table 2G-1 of this attachment and the Texas sites that are listed are discussed below. In each case, the rationale for the TIs were that the waiver was necessary because the presence of PAHs in the dissolved phase groundwater plume and free-phase and residual DNAPL in the GWBUs make it technically impracticable to restore groundwater within a reasonable timeframe.

Garland Creosoting, Longview, Texas

The Garland Creosoting Superfund Site (CERCLIS ID TXD007330053) is located on 12 acres of land in Longview, Gregg County, Texas. Garland Creosoting began manufacturing creosote-treated wood products in 1960 and continued operations until declaring bankruptcy in February 1997. Creosote-contaminated groundwater was found during the investigation phase of the project. Creosote DNAPL was discovered in six of 16 monitoring wells during the investigation with DNAPL thickness ranging between 2 and 15 inches, and encompasses an area of about 1 acre (US EPA, 2006a). The TI waiver was detailed in the EPA Record of Decision (ROD) dated September 2006. Below are the key aspects of the TI waiver (US EPA, 2012).

- TI Decision: ARARs waived are MCLs for PCP and benzo(a)pyrene.
- Rationale: Based on monitoring data, DNAPL was found from 2 to 15 inches in thickness over 1 acre. However, assuming the DNAPL is 6 inches thick and the aquifer has an effective porosity of 25 percent, more than 35,700 gallons of DNAPL are present. DNAPL may not be adequately delineated and its movement in the subsurface is difficult to predict. Previous non-time critical removal actions included soil removal and interceptor trenches that collect and treat water and NAPL before it migrates off-site; these trenches continue to operate. It is believed the trenches will be required to operate indefinitely to contain the groundwater contamination.
- Conditions: NAPL (suspected or observed) – DNAPL is present.
- COCs – PCP and benzo(a)pyrene
- Concentration – Maximum concentrations in 2002 were 16.4 µg/L for pentachlorophenol and 10.8 µg/L for benzo(a)pyrene.
- Geology – Silt and fine-grained sand unit overlain and underlain by clay unit.
- TI Zone – The TI Zone encompasses the entire site and areas that are captured by the existing trenches. Vertically, the zone extends through the shallow water-bearing zone down to the clay layer.
- Evaluation: Remedial Timeframe Estimate (years) – Exceeds reasonable timeframe estimate for site conditions.
- Remedial Action Alternatives – Selected remedy consists of continued operation of the interceptor trench, installation of additional groundwater recovery wells, MNA, and ICs to restrict future use of the groundwater.

Hart Creosoting, Jasper, Texas

The Hart Creosoting Company (HCC) Site (CERCLIS ID TXD050299577) is a former wood treating facility located near Jasper, Texas. The HCC Site is approximately 23.4-acres in size located 1 mile south of downtown Jasper and lies predominantly within a wooded area with light industrial, commercial, and residential land use. Wood treatment operations using creosote began in 1958 and ended in May 1993. The major features of the Site are: the former process area, the waste water treatment areas, a temporary waste cell, and non-process areas. The Site is underlain by alluvium composed of varying proportions of clay, silt, and sand size material extending to depths up to 220 feet. The subsurface geology was grouped into three low-permeability and three permeable zones, with the low-permeability zones comprised primarily of silt to clay size material and the permeable units comprised primarily of sand sized material. The estimated area where free phase and residual NAPL may occur is 2 acres (US EPA, 2006b). The TI waiver was detailed in the EPA ROD dated September 2006. Below are the key aspects of the TI waiver (US EPA, 2012).

- TI Decision: MCLs are being waived for all contaminants; the prominent one is naphthalene (MCL=100 µg/L). Groundwater PRGs will also not be achieved. See Table 3 of the 2006 ROD for all PRGs.
- Rationale: A TI waiver is necessary because the presence of PAHs in the dissolved phase groundwater plume and free-phase and residual DNAPL in multi-lithology zones make it technically impracticable to restore groundwater within a reasonable timeframe.
- Conditions: NAPL (suspected or observed) – Free-phase and residual DNAPL has been observed.
- COCs – 12 PAHs, 4 SVOCs, and benzene
- Concentration – Naphthalene was detected between 0.11 and 15.2 mg/L in 1986.
- Geology – Multi-lithology zones
- TI Zone – TI Zone includes all portions of on-site groundwater where naphthalene exceeds the PRG and extends from 10 to 200 feet bgs (groundwater zones P-2 and P-4); however the lateral extent of the TI zone is undefined in the references reviewed.
- Evaluation: Remedial Timeframe Estimate (years) – Exceeds reasonable timeframe estimate for site conditions.
- Remedial Action Alternatives – The selected remedy includes a NAPL recovery system, treatment of surface water, excavation and on-site landfilling for site soils and sediments, a TI waiver, MNA, and ICs (land and groundwater use restrictions).

Jasper Creosoting, Jasper, Texas

The Jasper Creosoting Company (CERCLIS ID TXD008096240) operated a wood treating facility on an 11 acre site located near Jasper, Texas. From 1946 until 1992, the facility discharged wastewater from the wood treatment process directly into an off-site drainage ditch, contaminating the soil, sediment, and groundwater with semi-volatile organic compounds (SVOCs), polynuclear aromatic hydrocarbons (PAHs), pentachlorophenol (PCP) and dioxins/furans.(US EPA, 2014) Free phase NAPL was observed at

two monitoring wells during the RI sampling event. The TI waiver was granted as detailed in the ROD dated September 2006 (US EPA, 2006c). Below are the key aspects of the TI waiver (US EPA, 2012).

- TI Decision: Maximum Contaminant Levels (MCLs) are being waived for all contaminants; the prominent one is naphthalene (MCL=100µg/L). Groundwater PRGs will also not be achieved. See Table 3 of 2006 ROD for all PRGs.
- Rationale: A TI waiver is necessary because the presence of PAHs in the dissolved phase groundwater plume and free-phase and residual DNAPL in multi-lithology zones make it technically impracticable to restore groundwater within a reasonable timeframe.
- Conditions: NAPL (suspected or observed) – Free-phase and residual DNAPL has been observed.
- COCs – PAHs
- Concentration – Maximum concentrations were 307,000 µg/L for total PAH and 105,000 µg/L for naphthalene in 2004.
- Geology – Multi-lithology zones
- TI Zone – TI Zone covers 12 acres and includes all portions of on-site and off-site groundwater where site COCs are above PRGs. Vertically, the zone includes groundwater zones P1 and P3 and extends to 150 feet bgs on-site and to 130 feet off site.
- Evaluation: Remedial Timeframe Estimate (years) – Exceeds reasonable timeframe estimate for site conditions.
- Remedial Action Alternatives – The selected remedy includes a NAPL recovery system, excavation and on-site landfilling for site soils, MNA for sediments and groundwater, a TI waiver, ICs, and P&T for containment (if necessary).

North Cavalcade, Houston, Texas

The North Cavalcade Street Superfund Site (CERCLIS ID TXD 980873343) is a 21-acre property and former wood treating site located in Houston, Harris County, Texas, about one mile southwest of the intersection of Loop 610 and U.S. Highway 59 (approximately 2 miles northwest of the UPRR Former HWPW). The Site is located within a commercial/industrial corridor, just north of the downtown Houston, with residential areas to the west (200 feet downgradient) and to the northeast. The wood treating facility was established in 1946 and continued in operation until 1961. The groundwater contaminant source areas are located on the southern 10-acre portion of the property. The two source areas include the former operation area and waste pits. The groundwater contamination in the lower interbedded dissolved phase plume extends offsite, with the groundwater contamination in the shallow sand is limited to onsite. Areas of residual DNAPL and isolated free-phase DNAPL have been encountered at the site. Natural attenuation of the groundwater contaminants and the lithologic characteristics of both shallow and interbedded water bearing zones limit expansion of the plume and provide containment of the dissolved contaminant plume. To address the DNAPL and associated COC

groundwater plume, the Technical Impracticability of Ground Water Restoration technical memorandum was prepared for the EPA dated July 6, 2011 (CH2MHill, 2011). The EPA concluded that it is technically impracticable to restore all parts of the dissolved phase groundwater because of the intermittent occurrence of residual and free-phase DNAPL in the shallow sand and interbedded unit water-bearing zones. In particular, the contaminant plume in the interbedded unit will not be responsive to existing treatment technologies (US EPA, 2011b). Below are the key aspects of the TI waiver (US EPA, 2012).

- **TI Decision:** ARARs waived are MCLs for benzene (5 µg/L) and benzo(a)pyrene (0.2 µg/L), and a state promulgated standard for naphthalene (1,500 µg/L onsite and 490 µg/L offsite) in the shallow sand and interbedded units.
- **Rationale:** Dissolved phase contamination exceeding these cleanup levels is limited to within 2 blocks west of the site despite wood treating operations ceasing at the site over 50 years ago. P&T was conducted for the shallow aquifer and removed an estimated 8,000 pounds of creosote from the shallow sand. Later investigation verified that contamination was also present in the underlying interbedded unit, a much siltier zone that was not conducive to the P&T remedy.

TI of groundwater restoration is supported by the following: (1) the remaining residual and free-phase DNAPL, although limited in extent, will continue to act as a source for site-related contaminants in groundwater, essentially outpacing the natural degradation of these contaminants in the areas where DNAPL appears. In this case, natural attenuation serves as a process for plume stability and containment, rather than restoration; (2) the heterogeneity and lithologic complexity of the interbedded unit limits the effectiveness of treatment technologies for source material and contaminated groundwater. While the predominant clay and silt limit migration of contamination, material bound in the matrix will continue to serve as an active source of contamination through dissolution. However, it cannot be removed or treated effectively or sufficiently to eventually achieve cleanup levels throughout the contaminated area; (3) the occurrence of DNAPL accumulation is limited to 4 wells out of the 65-well network associated with the source areas. DNAPL accumulation will continue to be measured and recovered when observed; and (4) source treatment has already been implemented using P&T and in situ source stabilization (ISS). P&T was found to be ineffective for the interbedded unit where the majority of contamination is observed, and expansion of the implemented ISS remedy or application of other remedies is limited by site features (active commercial businesses onsite, active rail lines, and future above-ground construction extending a highway).

- **Conditions:** NAPL (suspected or observed) – Free-phase and residual DNAPL are present.
- **COCs** – Benzene, benzo(a)pyrene and naphthalene
- **Concentration** – Maximum concentrations in 2010 exceed 10,000 µg/L for naphthalene and 500 µg/L for benzene. Plume maps are provided in the Technical Memorandum.
- **Geology** – The site is underlain by two water-bearing zones (shallow sand and interbedded unit) located above a thick regional clay layer (approximately 100 feet thick), which serves as a barrier to downward groundwater flow. The shallow sand is mostly poorly graded sand or silt sand. The interbedded unit is comprised of various clays, silts, and sands.
- **TI Zone** –The TI zone applies to both the shallow sand and interbedded units. The TI zone covers approximately 16 acres and is defined by the extent of the naphthalene plume in the interbedded unit.

- Evaluation: Remedial Timeframe Estimate (years) – Not provided in documents reviewed.
- Remedial Action Alternatives – The 2011 ROD Amendment selected containment of the shallow sand and interbedded unit dissolved phase plumes, as restoration throughout the impacted groundwater would not be achievable in the presence of DNAPL. The decision established a 16-acre TI Zone, wherein cleanup levels would be waived for benzene, benzo(a)pyrene, and naphthalene. ICs will be established to restrict the installation of groundwater wells within this zone to prevent exposure to contaminants.

The rationale for the TIs previously listed were that the waiver was necessary because the presence of PAHs in the dissolved phase groundwater plume and free-phase and residual DNAPL in the GWBUs make it technically impracticable to restore groundwater within a reasonable timeframe. Each one of the sites has similar geologic settings as the Former HWPW Site, with intervals of sand, silts, and clays. Of particular note is the geology at North Cavalcade, which is approximately two miles northeast of the Site. The description and general elevation of the shallow sand interval at the North Cavalcade site closely matches the A-TZ at the Site, and the interbedded unit may also match the intervals noted in the B-CZ at the Site.

Creosote is the common contaminant at each of these sites where TI waivers were granted. Restoration of the GWBU is not practicable while creosote DNAPL persists in the subsurface because it is a continuing source of groundwater contamination. Creosote DNAPL is also difficult to remove because the thick, oily liquids have an affinity for the soil matrix leaving residual DNAPL that may persist in the GWBU matrix for long periods of time after treatment. Therefore, attempts to reduce the DNAPL in the GWBUs may reduce the overall volume of contamination in the groundwater, the success of removing all of the DNAPL to the point where groundwater will be restored to cPCLs within a reasonable timeframe is not likely.

APPENDIX A – GROUNDWATER FLOW AND TRANSPORT MODEL

Computer Simulations of COC Fate and Transport

The computer program Visual MODFLOW version 4.6 (including the fate-and-transport module MT3DMS) was used to evaluate potential migration of components of creosote in the C-TZ groundwater bearing unit (GWBU) over time. The intent of the modeling study was to simulate current conditions and predictive simulations to evaluate potential migration of the creosote-impacted groundwater plume. The MODFLOW computer program is one of the most widely accepted codes for the three-dimensional simulation of fluid and solute transport. The program was also selected over more simplistic analytical models, such as Domenico's Model or BIOSCREEN, because it allows more flexibility in simulating the Site history and fate-and-transport processes.

Groundwater models are mathematical simplifications of complex hydrogeological systems. Such models are useful in identifying the most important components of flow systems and simulating the transport process. For this task, computer simulations were conducted to predict the extent of naphthalene migration for an arbitrary period of 100 years into the future from the areas where creosote dense non-aqueous phase liquids (DNAPL) has been detected or observed in the C-TZ. The following sections briefly describe the procedures, rationale, and results related to the transport model simulations. In general, the following steps were conducted:

- Developed a conceptual flow model of groundwater and contaminant transport for the C-TZ;
- Created the MODFLOW numerical flow model using site-specific information on the lithology, groundwater flow conditions, and contaminant distribution;
- Calibrated the flow model using Site data from the C-TZ and adjusting the constant head boundaries to approximate simulated conditions to observed conditions;
- Developed the transport model using the MT3DMS module within MODFLOW using site specific data (i.e. areas where DNAPL has been observed) with estimated source concentrations for naphthalene, as well as using partitioning coefficients and first-order decay rates for the C-TZ based on literature review and similar sites;
- Ran the transport simulation under two scenarios:
 - Modeled potential source reduction by decreasing naphthalene concentrations at the areas where DNAPL is currently located (source areas). The reduction of naphthalene concentrations in the DNAPL source areas was assumed to optimistically reduce by half every five years, with concentrations reduced below the PCL within 30 years (Year 2045)) within the areas where DNAPL is currently found or suspected to be present; and
 - Modeled a constant concentration of naphthalene in the source areas (assumes a constant source of creosote DNAPL in the C-TZ where currently found) to compare to the previous scenario.

- Conducted a sensitivity analysis.

Boundary Conditions and Grid Dimensions

A single layer, three-dimensional flow model was developed for the simulations. The model consists of 100 rows and 100 columns with the model domain 4,200 feet by 3,400 feet encompassing the Site. The model was developed at a sufficiently small nodal spacing to minimize the potential affects of numerical errors resulting from “numerical dispersion”. The columns are evenly spaced at a constant width of 42 feet per column. The rows are arbitrarily set at a constant width of 34 feet. The layer thickness (i.e., the thickness of the C-TZ) was developed based on boring logs and cone-penetrometer testing (CPT) borings that extended through the C-TZ into the underlying clay unit. The average thickness of the C-TZ is approximately 9.6 feet, with the base of the C-TZ ranging in elevation from –26.7 feet mean sea level (MSL) to -21.4 feet MSL. Details of the hydrogeology of the Site were provided in the Affected Property Assess Reports (APARs). Constant head boundaries for the C-TZ were established on the north and east boundary of the model domain ranging in groundwater elevation from 29 to 30 feet MSL, with a constant head boundary in the southwestern portion of the model at 25 feet MSL (Figure 1). Groundwater potentiometric elevations from the July 2014 groundwater gauging event were used to establish the initial heads within the C-TZ.

Input Parameters and Calibration

Model calibration consisted of varying the key input parameters, within a reasonable range, until simulated water elevations and historical COC concentrations matched those observed at the Site. Experience and previous studies (Freyberg, 1988) have shown that models that are rigidly calibrated can lead to less accurate results than models that are reasonably calibrated using realistic input values. Since the model was developed for the C-TZ, no recharge was included in the model. The hydraulic conductivity for the silty sand layer was assumed to be 1×10^{-3} cm/sec. Using the groundwater potentiometric surface gradient with the hydraulic conductivity, the Darcy velocity was calculated to be around 7 to 9 feet per year.

For developing the target creosote DNAPL constituent to model in the C-TZ, the more soluble fractions were evaluated. Creosote is hydrophobic, highly insoluble, and consists of a complex mixture of compounds, including polycyclic aromatic hydrocarbons (PAHs) and trace levels of volatile organics (i.e.,

benzene and toluene). Only a few of the components of the creosote are soluble (i.e. aqueous concentration in equilibrium with creosote) including dibenzofuran, naphthalene, and phenol (King, et al, 1994). Since naphthalene is commonly found in the Site groundwater in the upper three GWBUs, naphthalene was selected for the transport model. The solubility of liquid naphthalene is 111 mg/L (CICAD 62, 2004). With creosote typically containing 11% naphthalene (Cohen, 1993), the mole fraction of naphthalene in creosote indicates an effective solubility of 16 to 18 mg/L and effective solubility range of 14 to 19 mg/L (CICAD 62, 2004). Therefore, for the areas where DNAPL has been observed in the C-TZ, a maximum naphthalene concentration of 19 mg/L was used in the transport model.

The objective of model calibration was to match model-predicted concentrations with naphthalene concentrations observed in Site monitoring wells. The calibration process consisted of numerous iterations in which key input parameters such as distribution coefficients and first-order decay rates were varied. A set of conservative assumptions were developed and included:

1. Creosote DNAPL entered the C-TZ in 1960. This assumes that spills of creosote began in the 1950s (after the start of the Recent Process Area (began operations in 1952)) and after 8 years migrated to the C-TZ.
2. The current hydraulic gradient and naphthalene concentrations observed across the Site in the C-TZ is similar to recent historical Site conditions; and
3. Cells in the model were assigned the maximum naphthalene concentration matching generally where DNAPL has been observed or interpreted to potentially be present. Naphthalene concentrations were then modeled under two scenarios:
 - a. As a constant source concentration throughout the entire simulation period (+155 years); and
 - b. Naphthalene concentration in the source areas reduced by half every 5 years until the concentrations in the source areas were below the PCL (at 30 years).

A reasonable match was achieved between simulated and observed naphthalene concentrations for the C-TZ model using realistic input parameters (Figure 2). The adsorption coefficient (K_d) and first-order decay rate used in the simulation was based on partition coefficients developed at the nearby North Cavalcade Superfund Site (Idaho National Laboratory, 2006). Table 1 shows the physical parameters used in the calibrated model. Table 2 shows chemical and other variables used in the “best-fit” transient fate-and-transport simulations.

Modeling Procedures and Results

Steady state groundwater flow conditions were first established using the boundary conditions shown on Figure 1, resulting in a hydraulic gradient that is similar to that observed during the July 2014 monitoring event. The simulated head data was compared to the observed head data for the C-TZ in July 2014. Of the 20 wells used for calibration, 4 of the wells were removed from the calculated versus observed head evaluation because of lower than normal elevations in those wells. With the other 16 wells, the correlation coefficient was 0.895 between calculated and simulated heads (Figure 3).

Using the best-fit input parameters described in the previous section, the model was then run in transient mode for a period of 55 years to simulate the migration of naphthalene between 1960 and 2014. A predictive transient run was then run for a period of 100 years (i.e., 2015 –2115), with one model run to year 2265 (250 years from present).

The results of the transient model indicated the following based on the scenarios evaluated:

- Under the modeled current conditions, the naphthalene plume in the C-TZ appears to have reached equilibrium based on the minimal dissolved migration from the source areas (Figure 4). Using the model with constant DNAPL source throughout the modeled period, there was little lateral migration of the naphthalene plume in the future (i.e., 100 years from present in Year 2115 the downgradient edge of the naphthalene plume migrated approximately 250 feet southwest of the current modeled edge) (Figure 5).
- The modeled results of the naphthalene using source reduction showed elevated naphthalene concentrations greater than 8 mg/L downgradient of the DNAPL source areas after 30 years (Year 2045) (Figure 6), with concentrations greater than 3 mg/L (above the Residential PCL of 0.49 mg/L) after 100 years (Year 2115) (Figure 7). It was not until the Year 2265 (250 years from present) that naphthalene concentrations decreased to below the Residential PCL.
- Comparing the constant source and reduced source modeled naphthalene plumes showed similar downgradient plume geometries after 100 years with a slightly lower overall naphthalene concentration in the plume with the reduced source compared to the constant source (i.e., 3 mg/L on Figure 7 compared to 10 mg/L on Figure 5).

Sensitivity Analyses

A sensitivity analysis was conducted to evaluate the sensitivity of the model results when changing key input parameters one at a time. The sensitivity analysis was run on the time period 1953-2014 so results

*Appendix A – Groundwater Flow and Transport Model
UPRR Houston Wood Preserving Works, Houston, Texas*

could be compared to currently observed PCLE zone conditions. The model is most sensitive to changes in Kd values. Raising or lowering Kd values by an order of magnitude leads to an unreasonable PCLE zone shape. The model is also sensitive to first-order decay rate changes.

	ID No.: SWR ID 31547	Report Date: November 21, 2014

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. **Union Pacific (on-site Deed Notice) and 88 properties (including City of Houston right of way) (Restrictive Covenants) falling within the PMZ**

Repeat this worksheet for each different property for which an institutional control will be used. (*See Appendix 5 for full list of Worksheet 2.4 for each off-site property, map of properties, and summary table)

Institutional Control	Type of Institutional Control ¹				Property Ownership		Anticipated Filing Date ²
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))	X				X		Within 120 days of RAP approval
Document use of physical or institutional control under Remedy Standard B §350.31(g))	X	X*			X	X*	Within 120 days of RAP approval (off-site IC)
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(l))	X	X*			X	X*	Within 120 days of RAP approval (off-site PMZ)
Document the demonstration of technical impracticability (§350.33(f)(3)(F))	X	X*			X	X*	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

¹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

² Specify date or amount of time after RAP approval.

Performance Measures and Potential Problems	RAP Worksheet 3.0 Page 1 of 3	
	ID No.: 31547	Report Date: December 7, 2015 – Rev 1

Performance Measures

List and describe the performance measures for each environmental medium containing a PCLE zone that will be used to determine if reasonable progress is being made by the response action in a timely manner. Use these measures to document effectiveness of the response action in the RAER.

Surface/Subsurface Soils

For the impacted soils within the PCLE Zone to be excavated and relocated within the Area of Contamination, the effectiveness of the response action will be demonstrated by confirmation sampling from the excavation that indicates COC concentrations in remaining soils are below critical PCLs (commercial/industrial ^{Tot}Soil_{Comb} PCLs). During excavation activities, measures will be conducted to ensure migration of impacted soils do not leave the Area of Contamination (Soil Affected Property). These measures will include silt fencing, dust monitoring and control, and adequate storm water protection and management during the construction activities.

For the areas to be capped within the former HWPW (soil cap and asphalt roadway), performance measures will include routine cap and roadway inspections to ensure that these areas have not been eroded and thereby exposing soils with COC concentrations greater than cPCLs. Vegetation on the cap will be maintained, with the intent of cultivating vegetation attractive to pollinators. For the City of Houston ROW sidewalk and Englewood Intermodal Yard, performance measures will include routine inspections of the concrete sidewalk or pavement to ensure cracks have not developed in the pavement. Cracks will be repaired in the pavement. The railroad ballast area will be maintained as part of normal railroad operations in the area. These operations will include track and tie maintenance, as well as maintenance of the ballast material for the functions of the rail lines. Inspections of the ballast will assess if areas of exposed soil are present within the soil PCLE Zone.

A cap inspection and maintenance program will be conducted to maintain the integrity of the physical controls and to ensure that it continues to meet its performance objectives. See RAP Worksheet 3.2.

Groundwater

Groundwater monitoring will be performed in conjunction with the PMZ (Standard B) response action proposed for the groundwater PCLE zone. Confirmation that the downgradient extent of the PCLE Zone does not expand outside the boundaries of the on-site and off-site PMZs will be provided by comparing concentrations of these COCs to the AALs or exceedance of a cPCL at a POE well as specified in Worksheet 2.1. In the event that an AAL or a cPCL in an alternate POE well is exceeded in an initial monitoring sample, a second confirmation sample will be collected within 60 days from the monitoring well where the initial unverified exceedance was observed and analyzed for the specific COC that exceeded its AAL. If the COC concentration in the second sample is greater than the AAL, a confirmed AAL exceedance will be concluded and further action will be required, unless an alternate source demonstration can explain the detection. Possible further actions for the site following a confirmed AAL exceedance may include modifications to the monitoring frequency or monitoring locations (e.g., installation of additional monitoring locations), re-evaluation of concentration trends in existing monitoring wells, or re-evaluation of the AALs in the context of overall COC data trends (see Appendix 7 for Mann-Kendall Analysis). The TCEQ will be promptly notified of any verified exceedances. Further details of the Sampling and Analysis Plan are provided in Worksheet 3.1 and Appendix 6.

NAPL Recovery
 UPRR will continue monthly DNAPL recovery activities from the wells where DNAPL has been detected and recovered. The results from the 24-month DNAPL recovery pilot test completed in January 2015 (PBW, 2015) indicated the following:

- Once per month DNAPL recovery activities are resulting in an overall stable DNAPL thickness trend in the wells tested.
- The current monthly recovery frequency appears to be effective with total DNAPL volume recovered becoming stable in the wells over time.

Performance measures for DNAPL recovery will be no significant DNAPL thickness increase in the wells pumped (compared to pre-test levels), and no migration of DNAPL to wells that had no previous indication of DNAPL present (in-well observations as well as NAPL noted in the boring log in the GWBU). DNAPL recovery performance and effectiveness will be evaluated annually as part of the post-response action care reporting.

Potential Problems

Complete the table for the response action. When the response action consists of several components or multiple actions, complete one table for each major component or action.

Response Action Name/Designation: Soil Consolidation and Cap

List the potential problems that might be reasonably anticipated for the response action, describe the impact of each problem, and the response to the problem.

Description of the Potential Problem	Impact	Will this cause a response action failure?		Corrective Response
		Yes	No	
Storm events during excavation and relocating impacted soils at the Site	Potential surface water/run-off impact		X	Develop storm water management plan for excavation and relocation activities, including a Storm Water Pollution and Prevention plan (SWPPP) and contingencies for storm water containment, silt fencing, and diversions around excavation areas.
Migration of dust during soil relocation	Potential migration of impacted soils		X	Develop a dust monitoring and suppression program for the excavation activities

Performance Measures and Potential Problems	RAP Worksheet 3.0 Page 3 of 3	
	ID No.: 31547	Report Date: December 7, 2015 – Rev 1

General deterioration of the clay, asphalt, or concrete cover over time.	Exposure of COCs in capped soils, exposed to storm water, potentially windblown dust, worker exposure	X		UPRR will develop an inspection and maintenance program to identify and correct any deterioration of the vegetated clay cap for the HWPW area and repair or replace asphalt roadway, or concrete in the Englewood Intermodal Yard and City of Houston ROW. See RAP Worksheet 3.2.
--	---	---	--	---

Response Action Name/Designation: PMZ/TI Zone

List the potential problems that might be reasonably anticipated for the response action, describe the impact of each problem, and the response to the problem.

Description of the Potential Problem	Impact	Will this cause a response action failure?		Corrective Response
		Yes	No	
Exceedance of COC AAL at AMP or POE	Potential migration of groundwater PCLE Zone beyond on-site and off-site PMZ	X		Re-evaluate the groundwater concentrations to determine if the PCLE is migrating beyond the PCLE Zone. If migration confirmed, UPRR will evaluate response actions to prevent or mitigate the PCLE Zone outside of the on-site and off-site PMZs. The boundaries of the PMZs will also be evaluated.
DNAPL migration to wells that had no previous indication of DNAPL (in-well or soil boring observation)	Potential migration of NAPL/groundwater PCLE Zone beyond TI Zones	X		Re-evaluate DNAPL recovery options to prevent lateral or vertical migration.

List the monitoring and sampling of COC concentrations or other parameters that will be conducted during the response action. Illustrate the monitoring or sampling locations in Attachment 3A. If statistics or geostatistics will be used, provide details in Appendix 7. If monitoring or observation wells will be constructed for the response action, provide well construction details in Attachment 2B if not previously provided.

Monitored Media	COC ¹	Other parameter (specify)	Sampling Method ²	Sampling points or locations ³	Depth/Height ⁴ (ft.)	Analytical or Field Screening Method	Sampling or Monitoring Frequency ⁵
Surface Soil	<u>Site Specific SVOCs:</u> Benzo(a)anthracene Benzo(a)pyrene Dibenzofuran 1,2-Diphenylhydrazine 2,4-Dinitrotoluene Fluoranthene Phenanthrene		Bulk sampling	PCLE zone excavation; and perimeter of proposed soil cap area to confirm soil PCLE zone for cap	Sidewalls and base of excavation; and near the soil cap from 0-5 feet bgs.	US EPA 8260	One time
Subsurface Soil	None						
Groundwater	Site-Specific VOCs		Same as APAR (low-flow sampling)	See Attachment 3A for list of wells	Middle of screened interval of monitoring well	US EPA 8260	Semi-Annual
	Site-Specific SVOCs		Same as APAR (low-flow sampling)	See Attachment 3A for list of wells	Middle of screened interval of monitoring well	US EPA 8270	Semi-Annual
	Arsenic, lead		Same as APAR (low-flow sampling)	See Attachment 3A for list of wells	Middle of screened interval of monitoring well	US EPA 6010/6020	One-time to evaluate metals in groundwater.

Explain the reasons for the above-listed monitoring and sampling plan.

The monitoring and sampling plan for the groundwater PCLE zone was developed in accordance with PMZ monitoring procedures provided in §350.33(f)(4)(D). As specified therein, AMPs were established at a hydraulically upgradient location within the PCLE zone for each unit (A-TZ,

¹ Specify the COCs to be monitored in this media. List either type of COC (such as VOCs, metals) if all the COCs of that type will be monitored the same way.
² Describe the sampling or monitoring methods and QC procedures in Appendix 1 unless the proposed sampling or monitoring procedure is the same as the sampling or monitoring procedure described in the APAR.
³ Specify the sampling or monitoring point, such as the specific monitor well or general sampling or monitoring location.
⁴ Specify the depth or height of the sampling or monitoring points.
⁵ Specify the frequency at which this monitoring or sampling will occur.

Monitoring and Sampling Associated Information: Attachment 3A	RAP Worksheet 3.1 Page 2 of 2	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 – Rev 1

B-CZ/B-TZ, and C-TZ) and at locations continuing down the approximate central flow path to the downgradient extent of the on-site and off-site PMZ. These are the AMPs for which AALs were developed as detailed in Attachment 2E. Selected monitoring wells (i.e., corrective action observation wells) not located along the approximate central flow path will continue to be monitored to evaluate potential migration of the PCLE Zone at the upgradient, cross-gradient, and downgradient POEs. The four D-TZ monitoring wells will also be sampled to evaluate the potential for vertical migration of COCs to the underlying water-bearing zone. Semi-annual monitoring of the wells is proposed based on the stability of the PCLE zone and absence of potential receptors in the area. With the main source area proposed to be capped, most of the monitoring wells within the capped area will be plugged and abandoned. Selected monitoring wells will be modified (surface completion) following the cap construction (MW-19C and MW-23C).

Additional POE wells are proposed to be installed in the B-CZ/B-TZ off-site (two wells (PMW-83B and PMW-84B) and in the C-TZ off-site (one well (PMW-85C)). Details of the well construction are provided in Attachment 2B.

Operation and Maintenance	RAP Worksheet 3.2 Page 1 of 1	
	ID No.: SWR ID 31547	Report Date: November 21, 2014

Use this worksheet to describe the operation and maintenance (O&M) activities for each response action. In situations where the response action consists of more than one major component, for clarity one worksheet can be completed for each major component.

Response Action Name/Designation: Remedy Std. B – Clay/Concrete Cap, Asphalt Roadway and PMZs/Tis

List all portions of the response action to which this information applies.

Describe the O&M and inspection activities that will be required to operate and maintain response action components.

An inspection and maintenance program will be implemented for the clay cap and associated features of the clay cap within the former HWPW area, asphalt roadway within the former HWPW area, for the concrete sidewalk off-site along the City of Houston ROW immediately north of the Site, and the concrete pavement area within the Englewood Intermodal Yard. Inspections of the railroad ballast area between the former HWPW and Englewood Intermodal Yard will also be conducted to evaluate issues with the ballast continuing to serve as a physical barrier. Groundwater monitoring will be conducted within the PCLE zone, PMZ and adjacent areas. Regular sampling of the wells will occur on a semi-annual and annual basis depending on the wells. At that time the monitoring wells will be inspected for signs of damage, including well pads, casing, locks, and, protective covers. The total depth of wells will be measured annually.

The inspection and maintenance program for the capped areas is described on RAP Worksheet 5.0.

The groundwater monitoring program is provided on RAP Worksheet 3.1.

List and discuss the key operating parameters for a properly functioning response action. Address how changes in these parameters will result in operating changes, providing sufficient detail to explain how the operator will know the component is functioning properly.

Not applicable.

List the routine tasks required to operate the response action.

Not applicable.

List the routine tasks required to maintain the response action, including scheduled inspections, maintenance, and component replacement.

Routine tasks to be performed as part of the proposed response actions include the following:

1. Quarterly soil cap (HWPW), asphalt roadway, concrete sidewalk and cap, and railroad ballast inspections;
2. Semi-annual groundwater sampling and analysis, evaluation of monitoring data, and monitoring well inspection and repair (if needed).
3. Monthly DNAPL recovery from selected wells (frequency to be evaluated annual for effectiveness).

Confirmation Sampling Plan

Associated Information: Attachment 4A

RAP Worksheet 4.0 Page 1 of 2

ID No.: SWR ID
31547

Report Date: December 7,
2015

List the COCs and other parameters that will be sampled to confirm completion of the response action. Illustrate the monitoring or sampling locations in Attachment 4A. If monitoring or observation wells will be constructed for the response action, provide well construction details in Attachment 2B if not previously provided. If needed, describe the sample collection and handling methods, if not previously provided, in Appendix 6.

Media	COC ¹	Other parameter (specify)	Sampling Method	Sampling points ²	Depth/height (ft.)	Analytical Method	Sampling Frequency
Surface Soil	<u>Site Specific SVOCs:</u> Benzo(a)anthracene Benzo(a)pyrene Dibenzofuran 1,2-Diphenylhydrazine 2,4-Dinitrotoluene Fluoranthene Phenanthrene		Bulk sampling	PCLE zone excavation within AOC	Sidewalls of excavation	US EPA 8260	One time

Post-Response Action Care Associated Information: Attachments 5A-5C	RAP Worksheet 5.0 Page 1 of 4	
	ID No.: 31547	Report date: December 7, 2105

Complete this worksheet only if Remedy Standard B will be used.

What is the proposed initial post-response action care period? (default 30 yr.) 30 years

If the proposed initial post-response action care period is less than 30 years, provide a technical justification in accordance with §350.33(h).

Soil Response Action

The initial post-response action care period for the clay cap (HWPW), asphalt roadway (HWPW), concrete sidewalk (off-site City of Houston ROW), concrete pavement (Englewood Intermodal Yard), and railroad ballast area is 30 years. Inspections and maintenance of the caps will be performed for an initial period of 30 years.

Groundwater Response Action

The post-response action care period for groundwater monitoring will be 30 years. However, if groundwater concentrations decrease to levels below cPCLs, or groundwater COC trends confirm stable or decreasing concentrations, a shorter post-response action care period may be proposed.

What is the foreseeable land use during the post-response action care period? Commercial/Industrial and Residential (off-site properties)

Describe how the future use of the property will not compromise the integrity of the physical controls, will not interfere with the function of the monitoring systems, will not pose a threat to human health or the environment, and will be in accordance with any institutional controls.

For the four soil response areas within the Site, the former HWPW area is inactive and UPRR will restrict access to the HWPW soil capped area to those performing inspections, monitoring or maintenance. Access to the HWPW area is limited by fencing. The asphalt roadway is intended to only be used by UPRR employees and contractors for the servicing of rail and signal communications in the area. Signs will be posted stating that digging is prohibited on the capped area and asphalt roadway.

For the concrete cap area within the Englewood Intermodal Yard, this area will continue to be used for the commercial/industrial intermodal operations. The Englewood Intermodal Yard is secured by fencing and security guards that limit access to the area to UPRR employees, contractors, and vendors to the yard. The concrete pavement that makes up the cap was designed for its current use (i.e., allow loading, unloading, transportation, and storage of container boxes). The railroad ballast area will continue to be used for railroad operations and will be maintained for those operations. UPRR Engineering Standards for Roadbase Section for Wood Tie Track Construction (UPRR, 2006) indicates that the recommended minimum ballast thickness is 15 inches, which will serve as the protective barrier for on-site workers from exposure to surface soils.

For the proposed concrete sidewalk within the City of Houston ROW to address the surface soil PCL zone, the concrete cap will protect the occasional trespasser that may walk along the sidewalk. The addition of the sidewalk in the area provides additional benefit of allowing all access to mass-transportation bus stop. Signs will be posted stating that digging is prohibited within the concrete capped area.

Institutional controls will be placed on all properties within the groundwater PLCE Zones to prohibit installation of groundwater wells and use of the shallow groundwater. This extends from the UPRR

property (will be deed recorded commercial/industrial use only) to the off-site residential and City of Houston right of ways (ROWS) (Attachment 5A). The future use of the off-site properties will not affect the proposed response.

Briefly describe the proposed post-response action care activities. Describe the type of monitoring and/or inspections to be performed. Discuss the rationale for not including COC(s) analyzed during the response action, monitoring or sampling point location, frequency of monitoring and/or inspections, and the duration of the monitoring program.

The cap inspection and maintenance program will be developed to ensure the integrity of the cap and vegetative cover. The maintenance program will consist of the following:

I. Soil Cap Area - HWPW

VISUAL INSPECTIONS

Inspections will be performed on a quarterly basis and after all major storms. The inspections will focus on the following major issues:

- 1) Erosion of the cap (gullies, rills, or other erosional features on the cap surface or in drainages)
- 2) Sideslope sloughing (slippage)
- 3) Settling/subsidence
- 4) Vegetation deterioration
- 5) Damage from animals (i.e., rodents)
- 6) Groundwater monitoring equipment (wells) (semi-annual basis)

Locations where deficiencies are found shall be marked and repaired as soon as practicable.

MAINTAINING THE COVER AND VEGETATION

The cover and vegetation will be maintained by:

- 1) Preventing ponding
- 2) Maintaining design slopes and grades
- 3) Fertilizing, as necessary
- 4) Mowing, as necessary
- 5) Replanting, as necessary
- 6) Controlling animals (rodents, hogs) and insects

Routine repairs of the cover and maintenance of the slopes and grades will be performed to prevent ponding and drainage problems. Vegetation may require periodic application of fertilizer, mulch or seed. Vegetation will target pollinator seed mixes to attract pollinator species. Mowing will be performed as needed but less frequently than a grass covered cap and only periodically to promote the growth of desired vegetation and to block the growth of trees or shrubs which could penetrate the cover soil with their roots.

EROSION CONTROL

Maintenance of the drainage and diversion portions of the cap will be performed. Erosion of soil by water and/or wind will be repaired as soon as practicable.

II. Asphalt Roadway Area – HWPW

VISUAL INSPECTIONS

Inspections will be performed on a quarterly basis. The inspections will focus on the following major issues:

- 1) Erosion of the asphalt roadway (potholes, exposed soils)
- 2) Settling/subsidence
- 3) Cracks in asphalt roadway

Locations where deficiencies are found shall be marked and repaired as soon as practicable.

MAINTAINING THE ASPHALT ROADWAY

The asphalt cover will be maintained by:

- 1) Crack repair/sealing;
- 2) Pothole patching; and
- 3) Controlling vegetation.

III. Concrete Sidewalk – City Of Houston ROW along Liberty Road (Off-Site), and Concrete Pavement – Englewood Intermodal Yard (On-Site)

VISUAL INSPECTIONS

Inspections will be performed on a quarterly basis. The inspections will focus on the following major issues:

- 1) Step separation in the concrete;
- 2) Settling/subsidence;
- 3) Cracks in the concrete; and
- 4) Openings in the sidewalk.

Locations where deficiencies are found shall be marked and repaired as soon as practicable.

MAINTAINING THE CONCRETE SIDEWALK/PAVEMENT

The concrete sidewalk will be maintained by:

- 1) Crack repair/sealing;
- 2) Replacing panels as needed; and
- 3) Controlling vegetation growing through cracks/along edges of sidewalk.

IV. Railroad Ballast Area – (HWPW/Englewood Intermodal Yard)

VISUAL INSPECTIONS

Inspections will be performed on a quarterly basis. The inspections will focus on the following major issues:

- 1) Ballast removed with exposed soil.

Locations where deficiencies are found shall be marked and repaired as soon as practicable.

MAINTAINING THE RAILROAD BALLAST

The railroad ballast will be maintained by:

- 1) Adding railroad ballast where areas of soil are exposed;
- 2) Controlling vegetation.

The ballast areas will be maintained in accordance with UPRR Engineering Standards for Roadbase Section for Wood Tie Track Construction (UPRR, 2006).

GROUNDWATER MONITORING

Groundwater monitoring will be conducted per the Groundwater Monitoring Plan described on RAP Worksheet 3.1. Sample data from the AMPs will be compared to the AALs, as well as data from the POE

Post-Response Action Care	RAP Worksheet 5.0 Page 4 of 4	
	Associated Information: Attachments 5A-5C	ID No.: 31547 Report date: December 7, 2105

wells compared to the applicable cPCLs. The results of groundwater monitoring will be submitted annually in the PRACR. Groundwater monitoring will be performed as described in Worksheets 2.1, 3.0, and 4.0.

Will PRAC sampling procedures be the same as those as previously documented for monitoring and/ or confirmation sampling? _____ Yes No
 If no, provide in Appendix 6 a description of the monitoring or sampling collection procedures to be conducted during the post-response action care period.

Cost Estimate

Complete this portion of the form only if a physical control is proposed (installed hydraulic control system, slurry wall, cap, etc.). Provide in Attachment 5B a detailed cost estimate for a third party to operate and maintain the physical control during the PRAC period, based on current dollar amount.

Specify the physical control to which this information applies HWPW Vegetated Clay Cap, Asphalt Roadway, City of Houston ROW Sidewalk, Englewood Intermodal Yard Concrete Pavement, and Railroad Ballast (shown on Attachment 5A)

Complete this worksheet for each physical control that will be used as part of the response action.

What is the total estimated annual cost of O&M for the PRAC period? \$42,000/year

What is the total estimated cost for a third party to perform PRAC activities? \$1,260,000 (30-yrs)

Identify the type of financial assurance mechanism to be used, and the contact person managing fiduciary responsibility, if known.

UPRR will submit an appropriate financial assurance mechanism to TCEQ within 90 days of RAP approval.

Does the person meet the criteria and definition of a small business? (see §350.33(n)) ___ Yes No
 If yes and the person desires to pursue the reduced amount of financial assurance, provide a legally binding affidavit as Attachment 5C. Include in the affidavit the information requested in 30 TAC §350.33(l), (m), and (n). An example affidavit is attached in the instructions.

Implementation Schedule	RAP Worksheet 6.0 Page 1 of 2	
	ID No.: SWR ID 31547	Report Date: December 7, 2015 – Rev 1

Document the proposed schedule for implementing the response action. Include all major response action activities through the life of the project, including all removal, decontamination, and control actions, component installations, O&M, monitoring, and post-response action care activities.

Implementation of Response Action (specify component or action)	Start	Finish	Duration
Filing of deed recordation for UPRR-owned properties requiring commercial/industrial land use and prohibiting groundwater use. Deed recordation will also restrict excavation activities over capped areas.	Upon RAP approval	Within 120 days from RAP approval	120 days
Filing of restrictive covenants prohibiting groundwater use for off-site PMZ (if not all of the properties have ICs filed within 120 days of date RAP approved, UPRR will request an extension to the due date to complete the necessary off-site ICs). Filing of deed recordation for City of Houston ROW for prohibiting groundwater use and restriction of excavation where concrete sidewalk will be installed.	Upon RAP approval	Within 120 days from RAP approval	120 days
Plugging of monitoring wells within the capped area, installation of additional monitoring wells at the POEs	Within 60 days of RAP approval	Within 120 days of RAP approval	60 Days
Excavation of Surface Soil PCLE Zone, relocation under the AOC Policy, and construction of the soil cap, asphalt roadway, and concrete sidewalk	Within 60 days of RAP approval	Within 150 days of RAP approval	90 Days
Former Surface Impoundment (SWMU 1) Post-Response Action Care Soil Evaluation for Closure	Within 60 days of RAP approval	Within 150 days of RAP approval	90 Days
Semi-Annual groundwater monitoring (submitted to TCEQ under the Annual Groundwater Monitoring Report)	Ongoing	Uncertain-subject to monitoring results	Uncertain – subject to monitoring results
Monthly DNAPL Recovery Activities (with annual evaluation of effectiveness), reporting with the Post-Response Action Care Reports as an attachment to the Annual Groundwater Monitoring Report	Ongoing	Uncertain – to be evaluated annually	Uncertain – to be evaluated annually
Physical Barrier (Cap/Sidewalk/Pavement/Ballast) Inspection and Maintenance	Soil Cap – 180 days following construction; on-going for concrete cap	30 years	30 yr O&M
Annual Groundwater Corrective Action Monitoring Report, documenting all remediation and post-response action activities at the Site including the Post-Response Action Care Reports (PRACR)	See the following Submittal table	See the following Submittal table	See the following Submittal table

Re: DNAPL Recovery Pilot Test – 24-Month Report (February 2013 – January 2015)
Union Pacific Railroad Houston Wood Preserving Works Facility
4910 Liberty Road Facility, Houston, Texas
Post-Closure Care Permit No. HW-50343; Industrial SWR No. 31547

Dear Ms. Hatfield:

Pastor, Behling & Wheeler, LLC (PBW), on behalf of Union Pacific Railroad Company, is providing this summary report for the 24-month dense non-aqueous phase liquid (DNAPL) recovery pilot test conducted at the Houston Wood Preserving Works Facility (the Site). As detailed in the PBW letter dated February 5, 2013, PBW proposed to conduct a 24-month DNAPL recovery pilot test at the Site consisting of monthly manual DNAPL recovery. This letter discusses the DNAPL recovery pilot test activities and results for the 24 month study that was conducted from February 2013 through January 2015.

The following monitoring wells were selected to be included in the DNAPL recovery test based on the amount of DNAPL historically observed in the wells:

Well Name	Zone	Min. DNAPL Thickness (ft.)	Max DNAPL Thickness (ft.)
MW-57A	A-TZ	4.11	4.25
MW-78A*	A-TZ	1.38	6.23
MW-12B	B-TZ	0.41	5.70
MW-32B	B-CZ	5.77	6.13
MW-33BR	B-CZ	0.30	0.30
MW-41B	B-TZ	5.06	24.14
MW-57B	B-CZ	0.44	0.50
MW-70B	B-CZ	1.44	1.53
MW-75B	B-CZ	1.84	1.90
MW-23C	C-TZ	1.13	2.30
MW-34C	C-TZ	7.24	7.60
MW-44C	C-TZ	0.75	7.10
MW-45C	C-TZ	0.39	1.50
MW-46C	C-TZ	0.10	1.25

Notes:

Average depth to water values, minimum and maximum DNAPL thicknesses based on data collected between January 2011 and December 2012, *except MW-78A which was installed in 2014 and added to the pilot test in November 2014.

Figure 1 shows the location of the wells used in the pilot study. Monitoring well MW-23C and MW-78A were added to the study in November 2014.

The pilot test procedures consisted of measuring the depth to groundwater surface, the depth to the groundwater/DNAPL interface, and the total depth of the well relative to the top of well casing prior to DNAPL recovery. Using a peristaltic pump, DNAPL was pumped from the bottom of the well until groundwater returned in the pump discharge. The volume of recovered DNAPL was estimated from each well based on the volume pumped, and the well was gauged to measure the total depth of the well and depth to residual DNAPL following pumping. Recovered DNAPL was temporarily stored at the Containment Storage Area. The most recent waste manifests for the recovered DNAPL and groundwater are provided in Attachment A.

A summary of the DNAPL recovery measurements for the 24-month period from February 2013 through January 2015 is provided on Table 1. A graph of DNAPL thicknesses prior to each monthly recovery efforts over time is presented on Figure 2. Observations from the recovery testing over the testing period, with emphasis on the last six months of the pilot test, are provided below:

- A-TZ Wells: Initially, MW-57A was the only well completed in the A-TZ Unit that contained DNAPL. For MW-57A, DNAPL thickness decreased from 4.78 feet in February 2013 to less than 1 foot thick from October 2013 through January 2015. DNAPL thicknesses have steadily decreased over the last six months from 0.86 feet to 0.39 feet. Following installation of MW-78A in May 2014 in the Englewood Intermodal Yard and detection of DNAPL in the well, MW-78A was incorporated into the pilot test starting in early November 2014. DNAPL thickness in MW-78A started out at 6.23 feet (early November 2014), and has steadily decreased to 4.06 feet (January 2015).
- B-TZ/B-CZ Wells: At the beginning of the pilot test, monitoring wells with the thickest DNAPL measurements included MW-12B and MW-41B on the west side of the Site (Figure 1). DNAPL thicknesses increased following the February 2013 recovery event in MW-12B (May 2013) and in MW-41B (June 2013). However, DNAPL thickness in well MW-12B gradually decreased from 8.18 feet in May 2013 to less than 1 foot thick in January 2014. Over the last six months, the DNAPL thickness in MW-12B has been stable at around 0.6 to 0.8 feet thick with a slight increase to about 1.09 feet in December 2014, and decreased back to 0.84 feet in January 2015. DNAPL thickness in MW-41B decreased from the August 2013 event (measured at 10.26 feet) to about 5.5 feet thick in December 2013, but increased in April 2014 to 7.6 feet. Over the past six months, DNAPL thickness in MW-41B has slightly decreased from 6.68 feet to 5.65 feet thick from October 2014 to January 2015 (Figure 2).

Monitoring well MW-32B had a DNAPL thickness of 6.23 feet at the beginning of the pilot test. During the first 12 months, DNAPL thicknesses in the well generally decreased to less than two-feet thick by September 2013, and has appears to be decreasing over the last six months to a recent low of one foot thick in January 2015.

Of the all of the wells tested as part of the pilot test, well MW-33BR did not have any measureable DNAPL. No additional DNAPL measurements were collected from this well after October 2014.

DNAPL thickness in well MW-57B decreased from 1.28 feet thick in July 2013 to less than measureable (DNAPL noted on end of probe) thickness in January 2014 through early October 2014. No additional DNAPL measurements were collected from this well after October 2014.

Wells MW-70B and MW-75B had measureable DNAPL at 1.61 feet and 3.1 feet, respectively, at the beginning of the pilot test. During the first 12 months, DNAPL thicknesses in these wells generally decreased to less than one-foot thick, then increased to just over one foot thick in these two wells in early October 2014. Since then, DNAPL thickness in MW-70B and MW-75B have decreased to less than one-foot thick.

- C-TZ Wells: Similar to the other wells tested, DNAPL thicknesses in the C-TZ wells MW-44C, MW-45C, and MW-46C significantly decreased over the first two months of testing, with some sporadic increases from May through August 2013 (Figure 2). From December 2013 through early October 2014, C-TZ wells MW-44C, MW-45C, and MW-46C showed increasing DNAPL thicknesses with the largest increase at MW-44C increasing about 1.57 feet. However, DNAPL thickness in these three C-TZ wells appears to be stable over the past six months. Well MW-34C was gauged in October 2013, and no DNAPL was measured in the well. Since a street lane closure permit through the City of Houston is required for this well for the testing and no DNAPL was measured during the October 2013 event, this well was removed from the list of wells tested and was plugged and abandoned. In May 2014, replacement well MW-34CR was installed and is now gauged as part of the pilot test program. No DNAPL has been detected in the well.

Monitoring well MW-23C was added to the pilot test program in early November 2014. The initial DNAPL thickness in the well in November 2014 was 2.09 feet. Since then, the DNAPL thickness has steadily decreased to 1.76 feet in the well.

- An estimated 154 gallons of creosote DNAPL have been recovered during the 24-month period, with monthly DNAPL recovery volumes slightly decreasing over the past six months to around 5 gallons per month (Figure 2). Approximately 50% of the DNAPL recovered is from wells MW-12B and MW-41B.
- Using the last six months of DNAPL thickness data, a Mann-Kendall trend analysis was conducted to statistically evaluate DNAPL thickness trends in the wells tested. A summary table of the trend analysis is provided on Table 2. Trends were not evaluated for MW-33BR, MW57B, or MW-34C because no measureable DNAPL had been detected in the last six months. The Mann-Kendall trend analysis indicated that 10 of the 11 wells had stable, probably decreasing, or decreasing trends in the DNAPL thickness measured in the wells each month. Only well MW-46C had no trend.

The results from the DNAPL recovery pilot test indicate the following:

- Once per month DNAPL recovery activities are resulting in an overall stable DNAPL thickness trend in the wells tested.
- The current monthly recovery frequency appears to be effective with total DNAPL volume recovered becoming stable in the wells over time. More frequent DNAPL recovery would not likely be effective at the Site.

Even though the pilot test has concluded, UPRR plans to continue the monthly DNAPL recovery efforts, and will submit the next status report following the June 2015 recovery event.

Re: Request for Review of Area of Contamination (AOC) Revision
Houston Wood Preserving Works Facility
4910 Liberty Road Facility, Houston, Texas
Post-Closure Care Permit No. HW-50343; Industrial SWR No. 31547

Dear Ms. Hatfield:

Pastor, Behling & Wheeler, LLC (PBW), on behalf of Union Pacific Railroad Company (UPRR), is pleased to submit the following information regarding the proposed revision to the Area of Contamination (AOC) approach for the UPRR Houston Wood Preserving Works site (the Site) in Houston, Texas. PBW prepared the initial AOC request to the Texas Commission on Environmental Quality (TCEQ) in a letter dated November 20, 2014, which was approved by the TCEQ in a letter dated February 19, 2015. Since the approval, additional soil data were collected in April and August 2015 that have modified the surface soil Affected Property and Protective Concentration Level (PCL) Exceedance (PCLE) Zones (Figure 1). For the purposes of this AOC, the area of contamination is defined at the Site by the Soil Affected Property and PCLE Zones (Figure 1).

As discussed in the November 20, 2014 letter, UPRR is proposing to use the AOC policy for surface soils with critical PCL (cPCL) exceedances in portions of the former Southern Drainage Ditch (SDD) (SWMU 2), Inactive Wastewater Lagoon (Area of Concern 6), and areas north of the Aboveground Storage Tank (AST) Area (SWMU 8) (Figure 1). Through additional soil sampling in 2015, some of the proposed excavation areas previously identified were reduced in size and two additional areas will be excavated, one east of AOC4 and another area north of SWMU 5 (Figure 1). Most of the soils within the former SDD SWMU 2 will now be capped with an asphalt road (details to be provided in the revised Response Action Plan (RAP)). Surface soils with cPCL exceedances in these other areas will be consolidated within the AOC around SWMUs 4, 5, and 8. Soils removed from the proposed excavation areas will be conducted under Remedy Standard A. The removal action is designed to remove surface soils containing chemicals of concern (COCs) at concentrations exceeding cPCLs. The soils will be excavated to the vertical extent of the PCLE zone, estimated to be a maximum of approximately 3 feet deep (no greater than 5 feet deep). Soils will be placed within the AOC near SWMU 4, 5 and 8 and covered with an engineered soil cap (Figure 1). Verification sampling will be performed at the excavation areas following

Ms. Maureen Hatfield, TCEQ PM
UPRR Houston Wood Preserving Works, Houston Texas (SWR 31547)
October 7, 2015
Page 2 of 2

excavation of soils to ensure that the affected soils containing COCs at concentrations in excess of the applicable cPCLs have been removed.

Based on the current areas delineated, the estimated volume of soil to be consolidated is approximately 9,800 cubic yards (7,800 cubic yards in-situ, plus 25 percent contingency volume).

During consolidation activities, Site workers will have proper Occupational Safety and Health Administration (OSHA) training and will operate under a site-specific health and safety plan (HASP). The impacted soils will be consolidated within the surface soil Affected Property. Any equipment and tooling that comes in contact with impacted soils will be decontaminated and managed within the AOC. Storm water protection (i.e., Storm Water Pollution Prevention Plan (SWPPP), silt fencing) and fugitive dust monitoring for site-related COCs will be conducted during remediation activities to ensure the activities will not result in additional exposure conditions. Upon completion of verification sampling, the excavation area will be restored by backfilling with clean fill and/or grading.

A closure report will be submitted with the overall Response Action Completion Report (RACR) following completion of the proposed response actions detailed in the Response Action Plan (RAP) that was submitted to the TCEQ in December 2014. Details on the post-closure care of the proposed soil cap and associated financial assurance are provided in the RAP.

The estimated schedule for the proposed activities regarding soil consolidation within the AOC consists of the following:

- HWPW Area Surface Soil Response Action (soil consolidation and cap construction) – Begin within 60 days of approval of this revised AOC request with an anticipated 180 days for completion;
- RACR – Within 60 days of completion of response actions.

The February 19, 2015 TCEQ letter stated that the “excavation, management, and disposition of all waste shall be completed no later than December 15, 2015”, and “authorization for the AOC will terminate on December 15, 2015.” With the additional soil sampling and revision to the RAP to include an area of an asphalt road as part of the response action for soils, UPRR respectfully requests to extend the expiration date of the AOC to February 15, 2016.

If you have any questions or need additional information, please feel free to call me at (512) 671-3434 or Mr. Geoffrey Reeder of UPRR at (281) 350-7197.

Sincerely,

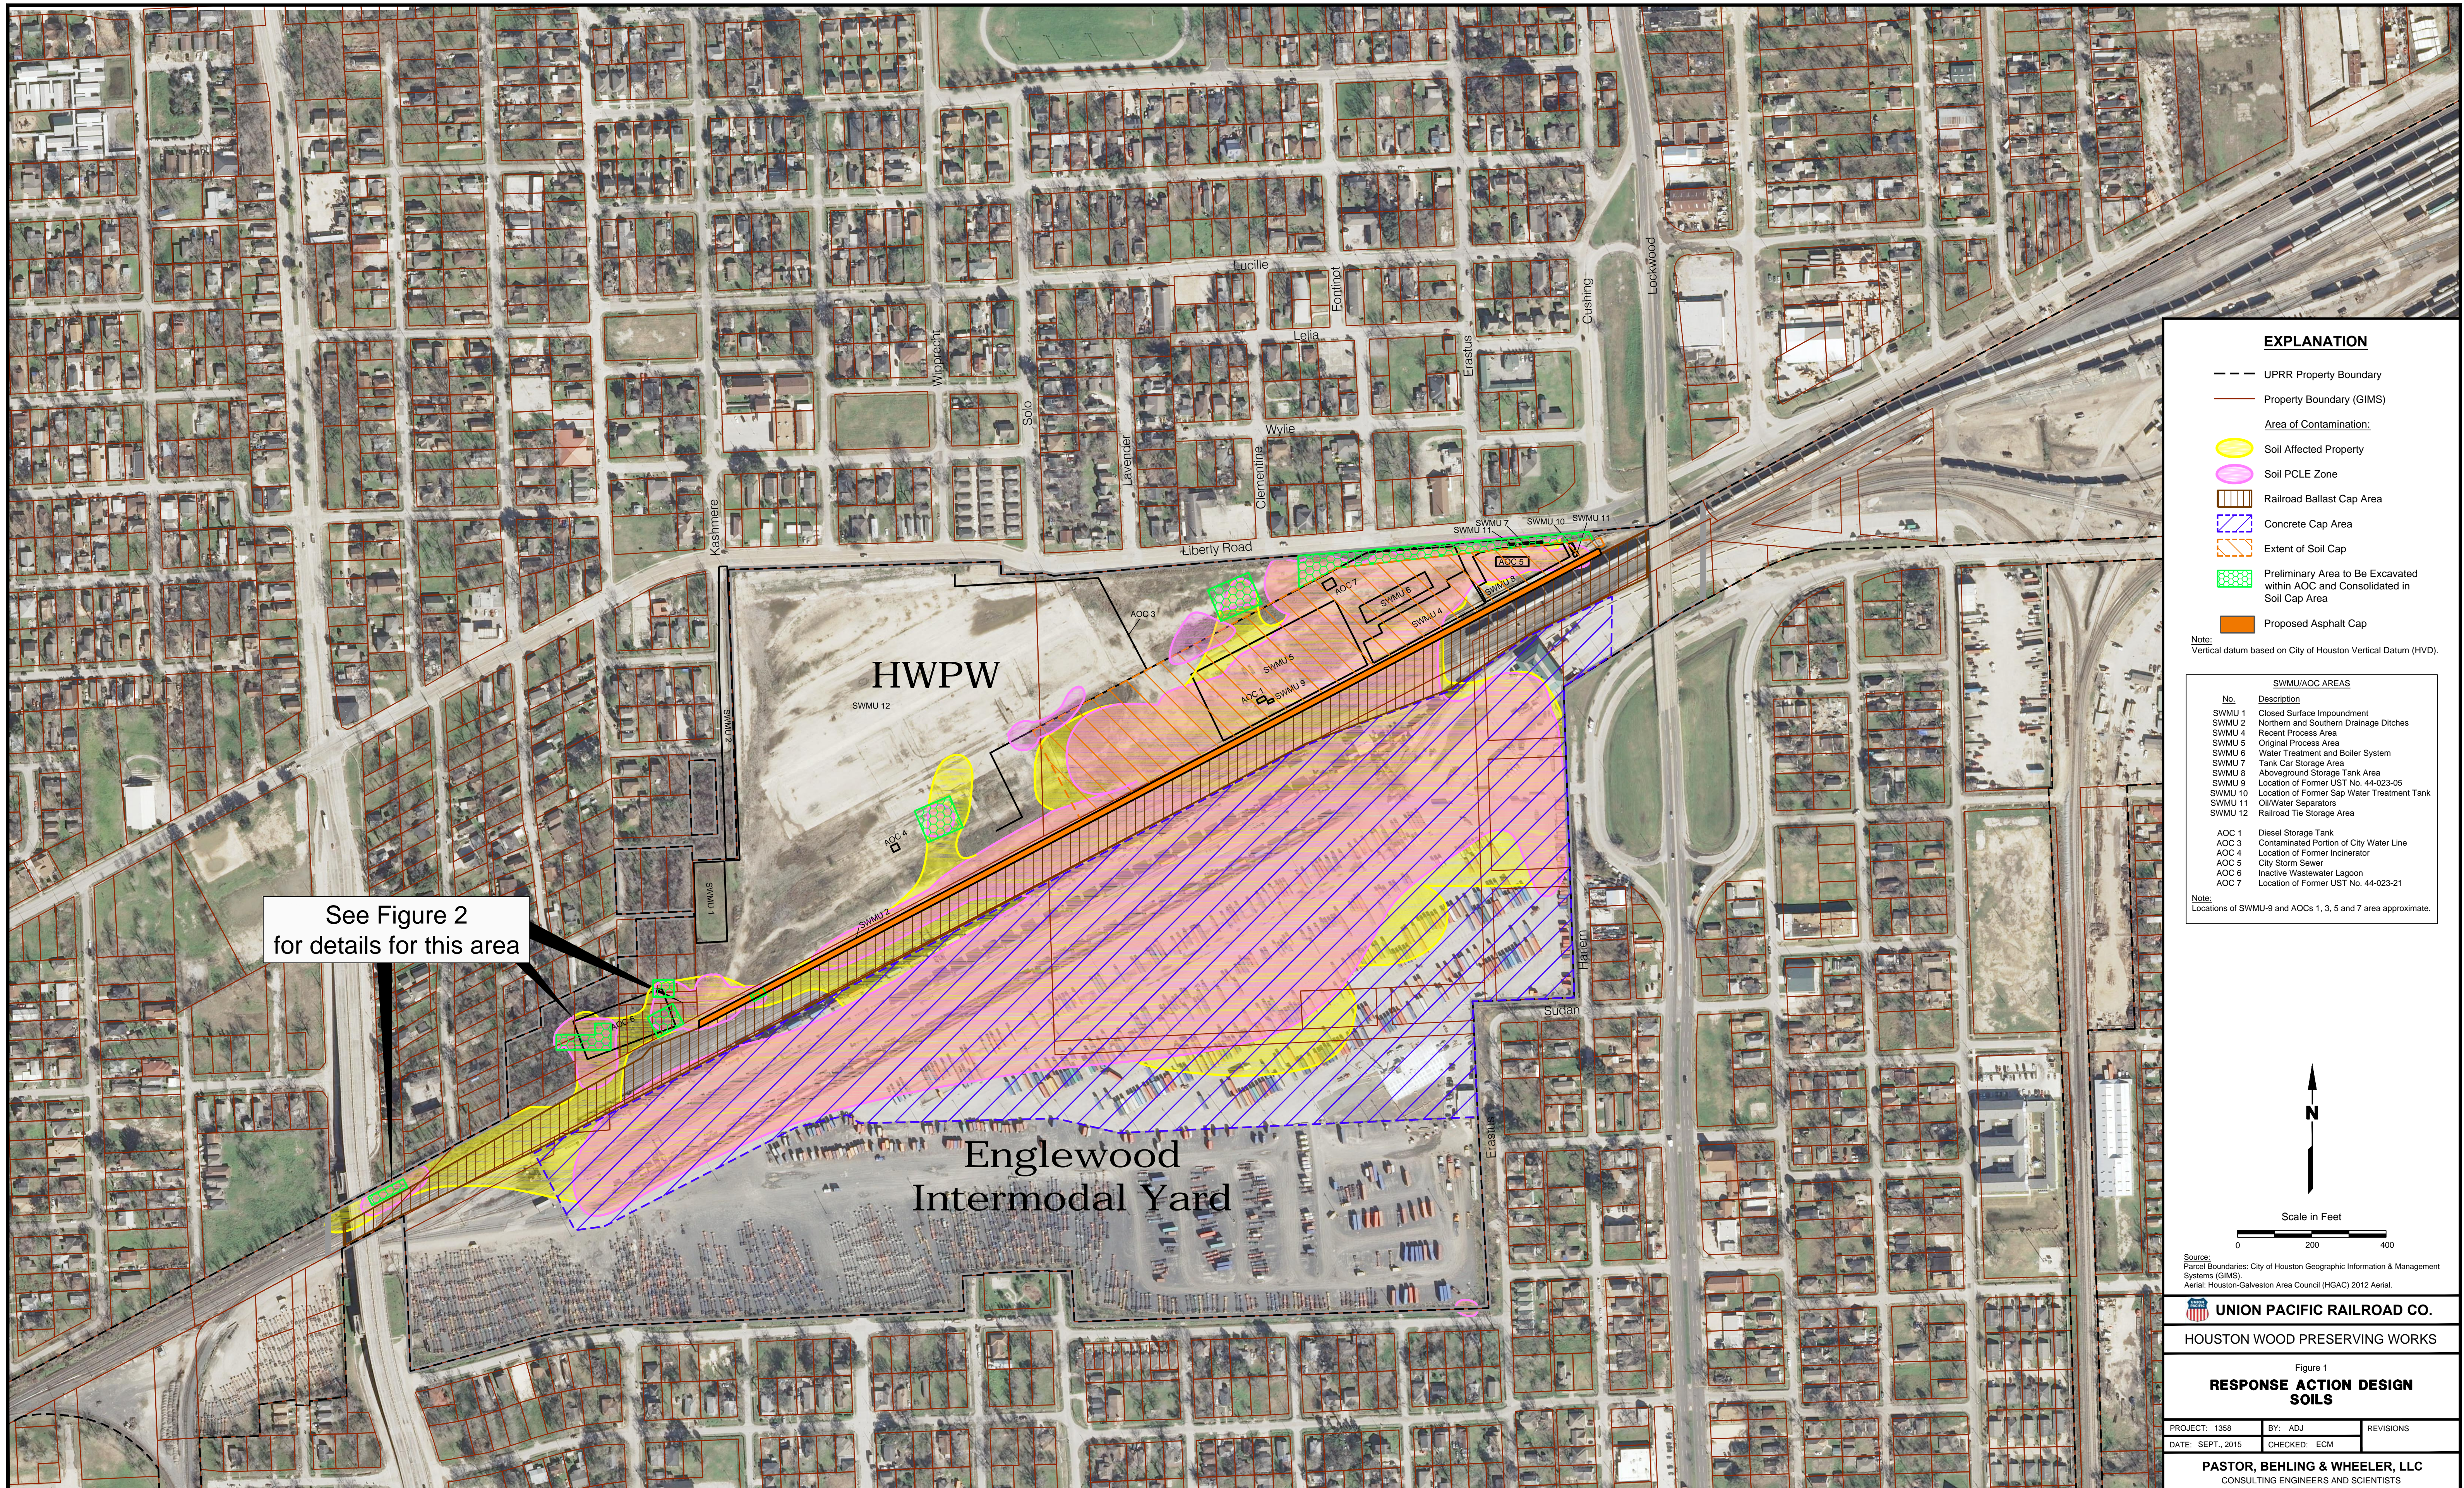

PASTOR, BEHLING & WHEELER, LLC

Eric C. Matzner, P.G.
Associate Hydrogeologist

TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

November 5, 2015

Mr. Geoffrey Reeder, P.G.
Manager Environmental Site Remediation Safety
Union Pacific Railroad
24125 Aldine Westfield Road
Spring, TX 77373

Re: Application Amendment
Request to Revise the Area of Contamination, dated October 7, 2015
Union Pacific Railroad Houston Wood Preserving Works Facility, 4910 Liberty Rd.,
Houston, Harris County, TX,
TCEQ SWR No. 31547;
TCEQ Permit/Compliance Plan No. 50343;
EPA ID No. TXD000820266
Customer No. CN600131098; Regulated Entity No. RN100674613

Dear Mr. Reeder:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the above referenced application submitted by Union Pacific Railroad (UPRR) to amend the established Area of Contamination (AOC) near Solid Waste Management Units (SWMUs) 4, 5 and 8 at the Houston Wood Preserving Works facility. The AOC was conditionally approved by the TCEQ on February 19, 2015. The conditional approval allows UPRR to remediate any affected soils which may contain hazardous waste and consolidate affected soils into a single area or engineered unit within the AOC. The areas of affected soils exceeding critical PCLs in SWMU 2, areas north of SWMU 8, and Area of Concern 6, are to be excavated to meet TRRP Remedy Standard A.

In the application, UPRR is proposing to change the existing AOC footprint based on the August 2015 sampling by reducing the critical PCL zone at SWMUs 2 and 8, and Area of Concern 6. UPRR will include two additional areas to be excavated, one east of Area of Concern 4, and another area north of SWMU 5 (as shown in the enclosed Figures 1 & 2). In addition, UPRR is requesting to extend the AOC termination date from December 15, 2015 to February 15, 2016 in order to include the additional excavation areas, soil sampling and complete the proposed response actions within the AOC. Based on our review of the above referenced document, the TCEQ conditionally approves UPRR's amendment to the existing February 19, 2015 AOC, as defined under Resource Conservation and Recovery Act (RCRA) guidance to incorporate the above proposed changes.

Conditions of Approval

- The amended boundary of UPRRs' proposed AOC is designated in the enclosed maps (Figures 1 & 2).
- UPRR must establish access controls to ensure worker safety protection with regard to constituents of concern (COC) exposure in the AOC. Only authorized personnel having proper Occupational Safety and Health Administration (OSHA) and site-specific training will be allowed access into the AOC.
- Corrective action activities will occur at the following Solid Waste Management Units (SWMUs) within the AOC:
 - Southern Drainage Ditch (SDD) SWMU 2
 - Inactive Wastewater Lagoon (Area of Concern 6)
 - Areas north of Aboveground Storage Tank (AST) SWMU 8
 - Two additional areas east of area of concern 4, and another area north of SWMU 5An estimated 9,800 cubic yards of affected soils will be removed from the above referenced units/areas, and UPRR will collect verification samples from each of the units/areas to document Remedy Standard A critical protective concentration levels (PCLs) are met. Excavated areas will be backfilled with clean fill and graded.
- UPRR will consolidate the excavated soils within the AOC around SWMUs 4, 5, and 8 and the affected soils will be covered with an engineered soil cap as detailed in Response Action Plan (RAP) that was submitted with the Permit Renewal application in December 2014 to include the proposed soil cap design, proposed post closure care and associated financial assurance.
- Within 60 days of approval of the revised AOC, UPRR shall implement the soil response actions and cap construction, with an anticipated completion date of 180 days.
- Within 60 days of completion of response actions, UPRR will submit a Response Action Completion Report documenting remediation activities.
- UPRR will implement storm water run-on and run-off control measures, including construction of temporary berms and covering of stockpiles using plastic sheeting as needed to manage contact water issues. Excavation and management of the soils within the AOC will not trigger the Land Disposal Restrictions provisions of RCRA. The excavation, management and disposition of all waste shall be completed no later than February 15, 2016.
- UPRR must comply with all other substantive requirements of RCRA with in the proposed AOC.
- UPRR shall ensure adequate dust monitoring and suppression at all times during demolition and removal of any existing concrete slab, inactive subsurface utilities and/or affected soils; and, during construction of a new warehouse facility within the AOC. Dust suppression activities may include the use of controlled water misting or soil/concrete wetting to control generation and dispersal of dust.

Mr. Geoffrey Reeder,
Page 3
November 5, 2015
TCEQ SWR No. 31547

- UPRR will be required to maintain the ongoing corrective action system during the AOC in accordance with the above referenced Permit/Compliance Plan.
- UPRR must maintain efforts to provide adequate storm water protection at all times. Please note that the proposed demolition and remediation activities may not be covered by any existing industrial storm water authorization for the operating facility or the TCEQ's construction general permit. Please contact the TCEQ's Water Quality Division for additional information regarding activities authorized via any existing or planned permits.
- UPRR will be required to provide TCEQ with semi-annual updates concerning the progress of the remediation and conditions of the AOC. The submittal of the semi-annual report shall begin the first January or June after the AOC approval date.
- Authorization for the AOC will terminate on February 15, 2016, thereafter any excavation transfer, treatment, storage, and disposal of waste shall comply with the existing rules and regulations.

This authorization directs UPRR to begin the implementation of the conditionally approved plan and AOC. Noncompliance with the conditions of this AOC may result in revocation of this AOC option in favor of options under the Industrial and Hazardous Waste Permits Program. The facility name, location and identification numbers(s) in the TCEQ reference line above should be included in all future reports submitted to the Remediation Division at the letterhead address using Mail Code MC-127. An additional copy should be submitted to the TCEQ Region Office. Questions concerning this letter should be directed to me at (512) 239-2034 or maureen.hatfield@tceq.texas.gov. Thank you for your cooperation in this matter.

Sincerely,

Maureen Hatfield, P.G., Project Manager

PROPOSED INSTITUTIONAL CONTROLS

DEED NOTICE

STATE OF TEXAS §
COUNTY OF § KNOW ALL MEN BY THESE PRESENTS THAT:
HARRIS §

This Notice is filed to provide information concerning certain environmental conditions and/or use restrictions pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described as follows:

(Exhibit A, the legal description of the entire recorded tract of land held by UPRR including the former HWPW Area, Englewood Intermodal Yard, and railroad ballast area)

Portions of the soil and groundwater underlying the Property contain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP. The portion considered to be Affected Property is described as follows:

(The Affected Property is more particularly described by metes and bounds on Exhibit A, attached hereto and incorporated herein by reference, and depicted on the map portion of Exhibit A.)

As detailed in the Response Action Plan (RAP) (PBW, 2014), target COCs in soil and groundwater media were detected within the Affected Property and Protective Concentration Level (PCL) Exceedance (PCLE) Zone in surface and subsurface soils.

PCLE Zones

Soils

Comparing the surface and subsurface soil analytical data to the appropriate critical PCLs, concentrations of 15 COCs exceeded their respective critical PCLs (cPCLs):

<u>Surface Soils</u>	<u>cPCL</u> <u>(mg/kg)</u>	<u>Subsurface Soils</u>	<u>cPCL</u> <u>(mg/kg)</u>
<ul style="list-style-type: none">• 1,2-Diphenylhydrazine• 2,4-Dinitrotoluene• 2-Methylnaphthalene• Benzene• Benzo(a)anthracene• Benzo(a)pyrene• Dibenzofuran• Naphthalene• Pentachlorophenol• Arsenic	<ul style="list-style-type: none">• 0.23• 0.049• 378• 0.10• 23• 2.36• 743• 189• 0.12• 200	<ul style="list-style-type: none">• 2-Methylnaphthalene• Benzene• Naphthalene• Pentachlorophenol	<ul style="list-style-type: none">• 378• 0.105• 192• 0.12

<u>Surface Soils</u>	<u>cPCL (mg/kg)</u>	<u>Subsurface Soils</u>	<u>cPCL (mg/kg)</u>
• Lead	• 275		

Groundwater

Based on the maximum groundwater analytical data detailed in the RAP, concentrations of the following 23 target COCs exceeded their critical PCLs (cPCLs):

<u>VOCs</u>	<u>cPCL (mg/L)</u>	<u>SVOCs</u>	<u>cPCL (mg/L)</u>
• Benzene	• 0.005	• 2,4-Dimethylphenol	• 1.5
• Ethylbenzene	• 0.70	• 2,6-Dinitrotoluene	• 0.0013
• Methylene Chloride	• 0.005	• 2-Methylnaphthalene	• 0.29
• Toluene	• 1	• Acenaphthene*	• 4.4
• Vinyl Chloride	• 0.002	• Anthracene *	• 7.3
		• Benzo(a)anthracene	• 0.0028
		• Benzo(a)pyrene	• 0.0002
		• Bis(2-chloroethoxy)methane *	• 0.006
		• Chlorobenzene	•
		• Chrysene *	• 0.28
		• Dibenzofuran	• 0.29
		• Fluoranthene *	• 2.9
		• Fluorene *	• 2.9
		• Naphthalene	• 1.5
		• Pentachlorophenol	• 0.001
		• Phenanthrene *	• 2.2
		• Phenol	• 7.3
		• Pyrene *	• 2.2

* - COC only detected in wells with DNAPL present

Creosote DNAPL has been detected in the groundwater bearing units A-TZ, B-CZ, B-TZ, and C-TZ as noted in soil borings and monitoring wells.

This Notice is required for the following reasons:

Commercial/Industrial Land Use

The Affected Property currently meets TRRP standards for commercial/industrial land use, as the property may not be protective for residential use. If any person desires in the future to use the Property for residential purposes, the TCEQ must be notified at least 60 days in advance of such use and additional response actions may be necessary before the Property may be used for residential purposes. Persons contemplating a change in land use for the Property are encouraged to review the definitions for commercial/industrial and residential land use contained

in TRRP as the definition of residential land use is broad.

Use of Physical Control on Soil

The Affected Property is subject to the TRRP requirements for properties containing concentrations of chemicals of concern in soil and is subject to the requirements in 30 TAC §350.33(e)(2) to prevent exposure to soils that contain a chemical of concern in excess of the protective concentration level. The attached Exhibit B describes and provides the location and metes and bounds of the physical control and extent of the soil that exceeds the TCEQ-approved protective concentration levels for certain chemicals of concern. Physical controls include the following:

- Former HWPW area:
 - Soil Cap Area: To protect on-site commercial/industrial receptors, a vapor barrier with geotextile fabric, and an engineered soil cap (12-in clayey soil, 6-in topsoil) will be constructed to cover the consolidated soil and surface soil PCLE Zone on the former HWPW area. The soil cap will be vegetated (with a pollinator /grass mix to attract pollinators in the area) and sloped to minimize infiltration over the surface/subsurface soil PCLE Zone. The vegetated cap will be maintained under the post-response action care.
 - Asphalt Roadway: For the South Drainage Ditch (SDD) (SWMU 2) along the southern boundary of the HWPW, an asphalt roadway will be constructed to protect on-site commercial/industrial receptors in this area. Construction of the asphalt road will consist of grading the existing road material, compacting and stabilizing the existing road material, and applying a hot mix asphalt cover. The asphalt road will be maintained under the post-response action care.
- Englewood Intermodal Yard area: The surface and subsurface soil PCLE zone in the Intermodal Yard area is currently covered with a physical barrier (concrete pavement), preventing contact with impacted soils for on-site workers. As part of the post-response action care, the concrete pavement in the area of the surface soil PCLE Zone will be routinely inspected to ensure on-site worker protection.
- UPRR Main Lines Ballast Area: The area between the former HWPW area and the Englewood Intermodal Yard (approximately 100 feet width) is covered with railroad ballast, ties, and rail. The existing railroad ballast in this area will be used as an engineering control for preventing on-site worker exposure to impacted surface soils in this area. The railroad ballast area will be maintained as part of normal railroad operations. The track is owned and controlled by UPRR. In the event construction activities are necessary within the railroad ballast area, a health and safety plan will be implemented to ensure worker protection from COCs in the surface soils and a soil management plan will be developed if soils are excavated as part of the construction activities.

The attached Exhibit C also describes the required maintenance and monitoring required for the physical control. This program must be implemented unless and until TCEQ approves any

modification. This deed notice must not be removed or modified without prior approval from TCEQ.

Plume Management Zone

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone (PMZ). A PMZ is defined as an area of groundwater containing concentrations of COCs exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). The undersigned has established a PMZ so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit B provides the location and extent of the PMZ. The Response Action Plan (RAP) submitted for the Site describes the maintenance and monitoring required. The maintenance and monitoring is required until TCEQ approves some modification to those requirements. Exposure to groundwater within the PMZ for any purpose is not advised until such time that all of the chemicals of concern no longer exceed their respective PCLs. This deed notice must not be removed or modified without prior approval from TCEQ.

Non-Aqueous Phase Liquid

The Affected Property is subject to the TRRP requirements for the management of mobile NAPL. The attached Exhibit B provides the location and extent of the NAPL present at the Property. Drilling, excavation, and groundwater pumping within or into the NAPL zone is prohibited unless proper safeguards are taken to protect human health and safety from any hazards associated with the NAPL. Any NAPL removed during any future subsurface activity must be properly handled and managed in accordance with all applicable state and federal rules and regulations. This deed notice must not be removed or modified without prior approval from TCEQ.

As of the date of this notice, the record owner of fee title to the Property is Union Pacific Railroad, with an address of 1400 Douglas Street, Omaha, Nebraska 68179.

For additional information, contact:

TCEQ
Central Records

This Notice may be rendered of no further force or effect only by a superseding deed notice executed by the TCEQ or its successor agencies and filed in the same Real Property Records as those in which this Notice is filed.

EXECUTED this _____ day of _____, 20____.

Union Pacific Railroad [OWNER & RESPONDER]

By: _____

Name: Mr. Tony Love
Title: Assistant Vice President of Real Estate
Union Pacific Railroad Company, a Delaware Corporation

STATE OF NEBRASKA §
DOUGLAS COUNTY §

BEFORE ME, on this the _____ day of _____, Mr. Tony Love, Assistant Vice President of Real Estate, a representative of Union Pacific Railroad Company, a Delaware Corporation, known to me to be the person whose name is subscribed to the foregoing instrument, and he acknowledged to me that he executed the same for the purposes and consideration therein expressed.

GIVEN UNDER MY HAND AND SEAL OF OFFICE, this ___ day of _____, 20____.

Notary Public in and for the State of Nebraska

County of _____

My Commission Expires: _____

EXHIBIT "A"
LEGAL DESCRIPTION OF AFFECTED PROPERTY

(to be surveyed following approval of Response Action Plan (RAP))

EXHIBIT "B"
***LEGAL DESCRIPTION OF USE OF PHYSICAL CONTROL ON SOIL, EXTENT OF PMZ
AND NAPL AREAS***

(to be surveyed following approval of Response Action Plan (RAP))

EXHIBIT "C"

***MAINTENANCE AND MONITORING OF THE PHYSICAL CONTROLS FOR
SURFACE/SUBSURFACE SOIL***

EXHIBIT “C”

MAINTENANCE AND MONITORING OF THE PHYSICAL CONTROLS FOR SURFACE/SUBSURFACE SOIL

The cap inspection and maintenance program will be developed to ensure the integrity of the cap and vegetative cover. The maintenance program will consist of the following:

I. Soil Cap Area - HWPW

VISUAL INSPECTIONS

Inspections will be performed on a quarterly basis and after all major storms. The inspections will focus on the following major issues:

- 1) Erosion of the cap (gullies, rills, or other erosional features on the cap surface or in drainages)
- 2) Sideslope sloughing (slippage)
- 3) Settling/subsidence
- 4) Vegetation deterioration
- 5) Damage from animals (i.e., rodents)
- 6) Groundwater monitoring equipment (wells) (semi-annual basis)

Locations where deficiencies are found shall be marked and repaired as soon as practicable.

MAINTAINING THE COVER AND VEGETATION

The cover and vegetation will be maintained by:

- 1) Preventing ponding
- 2) Maintaining design slopes and grades
- 3) Fertilizing, as necessary
- 4) Mowing, as necessary
- 5) Replanting, as necessary
- 6) Controlling animals (rodents, hogs) and insects

Routine repairs of the cover and maintenance of the slopes and grades will be performed to prevent ponding and drainage problems. Vegetation may require periodic application of fertilizer, mulch or seed. Vegetation will target pollinator seed mixes to attract pollinator species. Mowing will be performed as needed but less frequently than a grass covered cap and only periodically to promote the growth of desired vegetation and to block the growth of trees or shrubs which could penetrate the cover soil with their roots.

EROSION CONTROL

Maintenance of the drainage and diversion portions of the cap will be performed. Erosion of soil by water and/or wind will be repaired as soon as practicable.

II. Asphalt Roadway Area – HWPW

VISUAL INSPECTIONS

Inspections will be performed on a quarterly basis. The inspections will focus on the following major issues:

- 1) Erosion of the asphalt roadway (potholes, exposed soils)
- 2) Settling/subsidence

- 3) Cracks in asphalt roadway

Locations where deficiencies are found shall be marked and repaired as soon as practicable.

MAINTAINING THE ASPHALT ROADWAY

The asphalt cover will be maintained by:

- 1) Crack repair/sealing;
- 2) Pothole patching; and
- 3) Controlling vegetation.

III. Concrete Pavement – Englewood Intermodal Yard (On-Site)

VISUAL INSPECTIONS

Inspections will be performed on a quarterly basis. The inspections will focus on the following major issues:

- 1) Step separation in the concrete;
- 2) Settling/subsidence;
- 3) Cracks in the concrete; and
- 4) Openings in the pavement.

Locations where deficiencies are found shall be marked and repaired as soon as practicable.

MAINTAINING THE CONCRETE SIDEWALK/PAVEMENT

The concrete pavement will be maintained by:

- 1) Crack repair/sealing;
- 2) Replacing panels as needed; and
- 3) Controlling vegetation growing through cracks/along edges of sidewalk.

IV. Railroad Ballast Area – (HWPW/Englewood Intermodal Yard)

VISUAL INSPECTIONS

Inspections will be performed on a quarterly basis. The inspections will focus on the following major issues:

- 1) Ballast removed with exposed soil.

Locations where deficiencies are found shall be marked and repaired as soon as practicable.

MAINTAINING THE RAILROAD BALLAST

The railroad ballast will be maintained by:

- 1) Adding railroad ballast where areas of soil are exposed;
- 2) Controlling vegetation.

The ballast areas will be maintained in accordance with UPRR Engineering Standards for Roadbase Section for Wood Tie Track Construction (UPRR, 2006).

GROUNDWATER MONITORING

Groundwater monitoring will be conducted per the Groundwater Monitoring Plan described on RAP Worksheet 3.1. Sample data from the AMPs will be compared to the AALs, as well as data from the POE wells compared to the applicable cPCLs. The results of groundwater monitoring will be submitted annually in the PRACR.

RESTRICTIVE COVENANT

STATE OF TEXAS §
 § KNOW ALL MEN BY THESE PRESENTS THAT:
COUNTY OF HARRIS §

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

(The legal description of the entire recorded tract of land held by the owner executing this restrictive covenant, will be inserted here, with Exhibit 1 showing a map of the property. An example would be:

Lot Ten (10), in Block Five (5), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas. Map ID 12, Tax ID# 014-143-000-0010)

Portions of the groundwater underlying the Property contain certain identified chemicals of concern (COCs) causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP. The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is _____ (Owner) with an address of _____. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place

the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 3 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.
2. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

RESTRICTIVE COVENANT

STATE OF TEXAS §
 § KNOW ALL MEN BY THESE PRESENTS THAT:
 COUNTY OF HARRIS §

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

(The legal description of the entire recorded tract of land held by the owner executing this restrictive covenant, will be inserted here, with Exhibit A showing a map of the property. An example would be:

The following Municipal City of Houston Right-of-Way (ROW) by city block and street within the following Subdivisions and shown on Exhibit A:

<i>3300-3320</i>	<i>E. Lockwood</i>	<i>Kashmere Gardens Annex</i>

Portions of the groundwater underlying the Property contain certain identified chemicals of concern (COCs) causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP. The portion considered to be Affected Property is described on Exhibit B, which is part of the plume management zone shown in Exhibit C attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

Plume Management Zone

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit C provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

Use of Physical Control on Soil

The Affected Property is subject to the TRRP requirements for properties containing concentrations of chemicals of concern in soil and is subject to the requirements in 30 TAC §350.33(e)(2) to prevent exposure to soils that contain a chemical of concern in excess of the protective concentration level. The attached Exhibit D describes and provides the location of the physical control and extent of the soil that exceeds the TCEQ-approved protective concentration levels for certain chemicals of concern. The attached Exhibit D also provides the reason the physical control must remain in place, and describes the required maintenance and monitoring required for the physical control. This program must be implemented unless and until TCEQ approves any modification.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is City of Houston (Owner) with an address of _____. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place

the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit C is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.
2. The removal or modification of the physical control on the Affected Property is prohibited without prior approval from TCEQ and the physical control must be maintained and monitored as described in Exhibit D. Removal or modification of this restrictive covenant is prohibited without prior approval of TCEQ.
3. These restrictions shall be a covenant running with the land.

MAINTENANCE AND MONITORING

An inspection and maintenance program will be implemented for the concrete sidewalk along the south side of Liberty Road ((5100 - 5300 Block) as shown on Exhibit D). Inspections will be performed on a semi-annual basis. The inspections will focus on evaluating the sidewalk for cracks or damage. If cracks are identified that allow exposure to the underlying soils, the cracks will be repaired and sealed. Semi-annual inspections will be documented in the annual reporting to the TCEQ.

DATE: December 22, 2015

RE: Union Pacific Railroad – Houston Wood Preserving Works, TCEQ SWR No. 31547/IHW Permit/Compliance Plan No. 50343 - Summary of Good-Faith efforts to identify and locate property owners regarding in connection with restrictive covenant

The Environmental team at Union Pacific has been working to obtain consent from landowners located in the area of affected groundwater to place restrictive covenants on their properties since August 2014, with the beginning developments of the Plume Management Zone (PMZ). Prior to contacting landowners, Title Reports were prepared by Texas American Title Company from the real property records for the properties in the area of the PMZ. In late August 2014, on behalf of Union Pacific, outside counsel for Union Pacific (now “Baker Wotring”) sent letters by regular and certified mail to landowners identified as having property in the PMZ. The letter complied with the requirements of 30 T.A.C. § 350.111(c) and included a copy of the restrictive covenant. Baker Wotring then contacted Ministers and Pastors that have churches and congregations in the affected neighborhood to arrange a community meeting. Baker Wotring contracted with local residents to distribute flyers throughout the affected area informing the property owners of a meeting to discuss the effect of contaminants found on their property. The informational flyers were placed on every piece of property located within the PMZ.

The community meeting took place at the Greater True Vine Baptist Church on September 11, 2014 and approximately 189 persons attended the meeting. The Environmental team of UP attorneys, staff and outside counsel (collectively the “Team”) explained to the residents that *none* of the properties in the area use the groundwater for drinking; rather, they are on city drinking water provided by the City of Houston. None of the City of Houston groundwater supply wells are in the area of the Site. In addition, no groundwater drinking wells have been identified in the area. The Team further explained that in order to ensure that the shallow groundwater is not used in the future, the Team was contacting the landowners in the area to request that they execute a restrictive covenant which would prohibit use of the shallow groundwater on their property. The residents were informed that the restrictive covenant would be filed in the property records as part of planned work at the site to institute a Plume Management Zone. The Team answered questions from the local residents well into the evening. Maps were displayed identifying the affected properties that Union Pacific was asking to be

subject to the restrictive covenants. Title documents which indicated the rightful owners were also provided.

The Team took names and addresses of the owners and made arrangements with each owner to meet them individually to explain the need for the restrictive covenant and to make sure each person claiming ownership had the proper documentation to execute the covenant. Since September 11, 2014, Team members have made visits to the community on over 150 occasions and spoken to over 200 people who have claimed ownership in properties within the PMZ. There has been no community opposition to placing the restrictive covenant on the deed records. To date approximately 72% of owners have notarized documents indicating their agreement with the deed recordation. Despite these efforts, there are still some properties for which ownership cannot be determined or where owners cannot be located.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 3 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 0 Wylie St, Houston, TX 77026 (Map ID 3, HCAD ID 014144000001)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁵				Property Ownership		Anticipated Filing Date ⁶
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁵ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁶ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot 1, In block 6 of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Vol.1 page 55 of the Map Records of Harris County, Texas.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Greater Mount Nebo Baptist Church (Owner) with an address of 3819 Harland Dr., Houston, Texas 77092. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

PROPERTY LEGAL DESCRIPTION AND TITLE INFORMATION

**Texas American Title Company
2000 Bering, Suite 1000
Houston, Texas 77057
713-988-9999**

Title Report

GF Number: 7910-13-0204
Date: January 12, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 7th day of January, 2013, we find the following:

Title Vested In:

Greater Mount Nebo Baptist Church (by Deed filed for record under Harris County Clerk's File No. 20080307645)

Property Description: (Map ID# 3) (Tax ID# 014-144-000-0001)

Lot One (1), in Block Six (6), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot 2, In block 6 of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Vol.1 page 55 of the Map Records of Harris County, Texas.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Greater Mount Nebo Baptist Church (Owner) with an address of 3819 Harland Dr., Houston, Texas 77092. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Property Description: (Map ID# 4) (Tax ID# 014-144-000-0002)

Lot Two (2), in Block Six (6), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Notice of Public Hearing filed October 26, 2004, under Harris County Clerk's File No. Y016929, pursuant of said notice an "Order of the Hearing Official of the Planning and Development Department of the City of Houston, Texas" dated November 1, 2004 and filed for record Harris County Clerk's File No.Y037121, it was determined that subject property be posted as a dangerous building and must be either repaired or demolished.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

¹⁰ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Three (3) in Block (6) six, of Finn Subdivision out of the Gagne Homestead a Subdivision, a subdivision In Harris County, Texas according to the Map or Plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Alberta Smith (Owner) with an address of 5010 Wylie, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ

Title Report

GF Number: 7910-13-0206

Date: January 12, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 7th day of January, 2013, we find the following:

Title Vested In:

Alberta Smith (by Deed filed for record under Harris County Clerk's File No. U845008)

Property Description: (Map ID# 5) (Tax ID# 014-144-000-0003)

Lot Three (3), in Block Six (6), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's File No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Wylie Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

- 2) Deed of Trust dated June 16, 1980, filed for record on September 4, 1980, under County Clerk's File No. G664135, in the office of the County Clerk of Harris County, Texas, executed by Alberta Smith, in favor of John Burns, as Trustee, securing the obligations as set out in that certain promissory note of even date therewith in the principal amount of \$10,000.00, payable to the order of John Burns, and subject to all terms, conditions and stipulations contained therein; including any additional indebtedness secured thereby.

- 3) Deed of Trust dated May 3, 2011, filed for record on May 19, 2011, under County Clerk's File No. 20110204413, in the office of the County Clerk of Harris County, Texas, executed by Alberta Smith, in favor of ABC Bonding Company, as Trustee, securing the obligations as set out in that certain promissory note of even date therewith in the principal amount of \$40,000.00, payable to the order of ABC Bonding Company, and subject to all terms, conditions and stipulations contained therein; including any additional indebtedness secured thereby.

Involuntary Liens:

- 1) Abstract of Judgment filed December 5, 2007, under Harris County Clerk's File No. 20070713375, styled K. D. Upadhyaya, vs. Alberta Smith, in the principal amount of \$2,690.00, plus cost, interest and attorney's fees.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 2906 Lavender St, Houston, TX 77026 (Map ID 6, HCAD ID 0402660100003)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ¹¹				Property Ownership		Anticipated Filing Date ¹²
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

¹¹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

¹² Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot 3, In block 1 (one), of Liberty Road Estates, an unrecorded subdivision of a 5-1/4th acre tract out of Lot 8, Second Tier from Buffalo Bayou out of the Harris and Wilson Two League Grant in Harris County, Texas and being the same land conveyed to John Grado and V. Billitti by Mary Alice Alexander, et vir, by Deed Dated September 14, 1894, recorded in Vol. 79 Page 242 of the Deed Records of Harris County, Texas..

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Jesse Beal and wife, Eloise Beal. (Owner) with an address of 2906 Lavender Street, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

PROPERTY LEGAL DESCRIPTION AND TITLE INFORMATION

Texas American Title Company
2000 Bering, Suite 1000
Houston, Texas 77057
713-988-9999

Title Report

GF Number: 7910-12-8479
Date: November 15, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 7th day of November, 2012, we find the following:

Title Vested In:

Jessie Beal and wife, Eloise Beal (by Warranty Deed filed for record under Volume 2344, Page 164 of the Deed Records of Harris County, Texas)

Property Description: (Map ID# 6) (Tax ID# 040-266-010-0003)

Lot Three (3), in Block One (1), of Liberty Road Estates, an unrecorded subdivision of a 5-1/40th acre tract out of Lot 8, Second Tier from Buffalo Bayou out of the Harris and Wilson Two League Grant in Harris County, Texas and being the same land conveyed to John Grado and V. Billitti by Mary Alice Alexander, et vir, by Deed Dated September 14, 1894, recorded in Vol. 79 Page 242 of the Deed Records of Harris County, Texas, and said Lot 3, Block 1, Liberty Road Estates being more particularly described by metes and bounds as follows:

BEGINNING at the North West corner of said 5-1/40th acre tract;

THENCE East 282 feet to a point in the North line of said 5-1/40th acre tract;

THENCE South 400 feet along the East line of Lavender Street for the North West corner tract to be conveyed;

THENCE East 106.3 feet along a line parallel to the North line of said and 5-1/40th acre tract for North East corner;

THENCE South 50 feet along the East line of said 5 and 5-1/40th acre tract for South East corner;

THENCE West 106.3 feet along a line parallel to the North line of 5-1/40th acre tract for South West corner;

THENCE North 50 feet along the East line of Lavender Street for North West corner and place of beginning.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

Those as set forth by instrument(s) filed for record under Volume 2344, Page 164 of the Deed Records of Harris County, Texas.

Exceptions:

- a) Building set-back line twenty (20) feet in width along the front property line(s), as set forth by instrument(s) recorded in Volume 2344, Page 164 of the Deed Records of Harris County, Texas.
- b) Building set-back line three (3) feet in width along the side property line(s), as set forth by instrument(s) recorded in Volume 2344, Page 164 of the Deed Records of Harris County, Texas.
- c) Utility easement five (5) feet in width along the rear property line(s) as set forth and defined by instrument(s) recorded in Volume 2344, Page 164 of the Deed Records of Harris County, Texas.
- d) Sidewalk easement six (6) feet in width along the front property lines(s) as set forth and defined by instrument(s) recorded in Volume 2344, Page 164 of the Deed Records of Harris County, Texas.
- e) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's file No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lavender Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

CITY CLERK
HARRIS COUNTY, TEXAS

NOTICE OF LIEN

By direction of the City Council of the City of Houston (in Harris County, Texas) notice is hereby given that such City Council, being the governing body of said City, did by ordinance passed and approved January 12, 1977, determine that it is necessary that the hereinafter designated portions of Lavender, Clementine and various other streets in the City of Houston, Texas, known as topping Project No. 303

be improved, and did order that the same be improved in accordance with certain plans and specifications in such ordinance referred to, and did order that a portion of the cost of such improvement be specially assessed as a lien upon property abutting upon said portion of said streets, all as provided by Article 1105-b, Revised Civil Statutes; and notice is hereby given as required by Article 1220-a, Revised Civil Statutes; that a portion of the cost of such improvement is to be and will be specially assessed as a lien upon property abutting thereon.

The respective portion of the street as contained in the attached lists are referred to as Topping Project No. 303.

Done and signed by me, the City Secretary of said City in its name, this 12th day of January, 1977, by direction of its City Council given and contained in the ordinance aforesaid.

STATE OF TEXAS I
 COUNTY OF HARRIS I

KNOW ALL MEN BY THESE PRESENTS

That the Clark Investment Company, a body corporate, duly incorporated and doing business under the laws of the State of Texas, in consideration of the sum of Ten Dollars (\$10.00) and other good and valuable considerations to it paid by Jessie Beal and wife Eloise Beal, has Granted, Sold and Conveyed and by these presents does Grant, Sell and Convey unto the said Jessie Beal and wife Eloise Beal of the County of Harris, State of Texas, all that certain tract or parcel of land known as Lot No. 3, Block No. 1, Liberty Road Estates, an unrecorded subdivision of a 5 and 1/40th acre tract out of Lot Eight (8), Second Tier from Buffalo Bayou out of the Harris and Wilson Two League Grant in Harris County, Texas and being the same land conveyed to John Crado and V. Elliott by Mary Alice Alexander, et vir, by Deed dated September 14, 1994, recorded in Volume 79 Page 242 of the Deed Records of Harris County, Texas, and said Lot 3, Block 1; Liberty Road Estates being more particularly described by metes and bounds as follows:

Beginning at the North west corner of said 5 and 1/40th acre tract; THENCE East 232 feet to a point in the North line of said 5 and 1/40th acre tract; THENCE South 400 feet along the East line of Lavender Street for the North west corner of tract to be conveyed; THENCE East 106.3 feet along a line parallel to the North line of said 5 and 1/40th acre tract for North east corner; THENCE South 50 feet along the East line of said 5 and 1/40th acre tract for South east corner; THENCE West 106.3 feet along a line parallel to the North line of said 5 and 1/40th acre tract for South west corner; THENCE North 50 feet along the East line of Lavender Street for North west corner and place of beginning.

It is agreed by the Grantees, their heirs and assigns, that all residence, outhouses or buildings of any other description are to be set back 20 feet from the front property line, and at least 3 feet from the property line on each side. The Grantee agrees and the Grantor excepts from this deed the following easements:

An easement right of 5 feet across the back end of the property herein conveyed for the use and benefit of any and all utility companies serving this area, and an easement of 6 feet across the front of said property for sidewalk purposes.

To Have and To Hold the above described premises, together with all and singular the rights and appurtenances thereto in anywise belonging unto the said Jessie Beal and wife Eloise Beal, their heirs and assigns, forever, and the said Clark Investment Company does hereby bind itself, its successors and assigns to Warrant and Forever Defend all and singular the said premises unto the said Jessie Beal and wife Eloise Beal, their heirs and

1105 1105
assigns, against every person whomsoever lawfully claiming or to claim the same or any part thereof.

In witness whereof the Clark Investment Company, afore-said has caused these presents to be signed by W. K. Chapman, its president, thereunto authorized by By-Laws of the said Clark Investment Company and its common seal to be hereunto affixed by James A. Clark, its secretary, this 28th day of September, 1951.

BY W. K. Chapman
President

Attest:

James A. Clark
Secretary

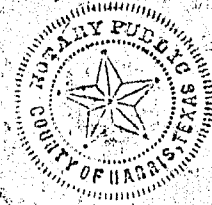

ACKNOWLEDGMENT

STATE OF TEXAS |
COUNTY OF HARRIS |

BEFORE ME, the undersigned authority, a Notary Public, in and for said County and State on this day personally appeared W. K. Chapman, president of Clark Investment Company, known to me to be the person and officer whose name is subscribed to the foregoing instrument and acknowledged to me that the same was the act of the said Clark Investment Company, a corporation and that he executed the same as the act of such corporation for the purposes and consideration therein expressed, and the capacity therein stated.

GIVEN UNDER MY HAND AND SEAL OF OFFICE THIS the 28th day of September, 1951.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

¹⁴ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot 1, in block 1 of Liberty Road Estates, an unrecorded subdivision out the Harris and Wilson Survey, Abstract No. 32, Harris County, Texas..

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Greater Mount Nebo Baptist Church (Owner) with an address of 3819 Harland Dr., Houston, Texas 77092. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-12-8487
Date: November 15, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 7th day of November, 2012, we find the following:

Title Vested In:

Clark Investment Company (by Warranty Deed filed for record under Volume 2015, Page 716 of the Deed Records of Harris County, Texas)

Property Description: (Map ID# 7) (Tax ID# 040-266-010-0001)

Lots One (1) and Two (2), in Block One (1), of Liberty Road Estates, a, unrecorded subdivision out of the Harris and Wilson Survey, Abstract No. 32 in Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's file No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lavender Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

- 1) We find reference to Cause No. 2009-46348, in the District Court of Harris County, Texas, styled Harris County, etal vs. Clark Investment Company, etal. It is assumed that said cause of action is for delinquent taxes due on subject property. Said suit includes a Final Judgment dated February 23, 2011 and an Order of Sale in Tax Suits dated October 10, 2011.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statue, in contract, or in tort.

GENERAL WARRANTY DEED

STATE OF TEXAS | 32781
 | KNOW ALL MEN BY THESE PRESENTS:
COUNTY OF HARRIS |

That we, W. K. CHAPMAN and CARL S. SMITH of the County of Harris, State of Texas, for and in consideration of the sum of Ten and No/100 Dollars (\$10.00) and other good and valuable considerations, to us in hand paid by CLARK INVESTMENT COMPANY, a corporation of the County of Harris, State of Texas, receipt of which is hereby acknowledged and confessed; And Grantee herein assumes the payment of the balance due under the provisions of one certain promissory note for the sum of Thirteen Thousand Dollars (\$13,000.00), dated June 11, 1947, payable to the order of Johanna Pancamo and Rose Pancamo, acting individually and as independent executrixes of the estates of Frank Pancamo, deceased, and Tony Pancamo, deceased, respectively, which note bears interest until maturity at the rate of six per cent (6%) per annum, payable monthly, all past due principal and interest, if any to bear interest at the rate of ten per cent (10%) per annum, containing the usual accelerating maturity and ten per cent (10%) attorney's fees clauses, said note being due and payable in installments as therein provided, said note being secured by a Deed of Trust dated June 11, 1947, executed by W.K. Chapman and Carl S. Smith to W. Noble Carl, Trustee, to which reference is here made;

have GRANTED, SOLD and CONVEYED, and by these presents do GRANT, SELL and CONVEY unto the said CLARK INVESTMENT COMPANY, the following described property, to-wit:

A tract of 5-1/40 acres out of the N.W. portion of the GAGNE TRACT, which is the middle portion of Lot Number Eight(8), Second Tier from Buffalo Bayou, out of the Harris-Wilson Two League Grant, in Harris County, Texas, and being the same land conveyed to John Grado and V. Billitti by Mary Alice Alexander, et vir, by Deed dated September 14, 1894, recorded in Volume 79, Page 242 of the Deed Records of Harris County, Texas; said tract of 5-1/40 acre tract subsequently subdivided and known as Liberty Road Estates, Block One (1) and Block Two (2);

With the exception of Lots No. Five(5), Six (6), Seven (7) and the South Forty (40) feet of Lot Eight (8), all in Block One (1), Liberty Road Estates; and Lots No. Eighteen (18), Nineteen (19) and the North Twelve (12) feet of Lot Twenty (20), all in Block Two (2) Liberty Road Estates, said Liberty Road Estates being a re-subdivision of the 5-1/40 acre tract above described.

THIS CONVEYANCE, is made subject to all and singular the restrictions, conditions and covenants, if any, applicable to and enforceable against the above described property.

TO HAVE AND TO HOLD the above described premises, together with all and singular, the rights and appurtenances thereto in anywise belonging unto the said CLARK INVESTMENT COMPANY, its successors and assigns forever. And we do hereby bind ourselves, our heirs, executors and administrators, to Warrant and Forever Defend, all and singular the said premises unto the said CLARK INVESTMENT COMPANY, its successors and assigns, against every person whomsoever, lawfully claiming or to claim the same or any part thereof.

WITNESS our hands this 16th day of December, 1949.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

¹⁵ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

¹⁶ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot 4, 5, 6, 7, and 8 In block 6 of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Vol.1 page 55 of the Map Records of Harris County, Texas.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Greater Mount Nebo Baptist Church (Owner) with an address of 3819 Harland Dr., Houston, Texas 77092. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

EXHIBIT 1

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

meet all requirements.

WARRANTY DEED WITH VENDOR'S LIEN

135-93-2188

THE STATE OF TEXAS
COUNTY OF HARRIS

KNOW ALL MEN BY THESE PRESENTS

That WE, Elmo S. Candelari and wife, Frances Lucy Candelari

of the County of Harris and State of Texas for and in
consideration of the sum of TEN AND NO/100 (\$10.00) -----
DOLLARS

and other valuable consideration to the undersigned paid by the grantee herein named, the receipt of which

is hereby acknowledged, and the further consideration of the execution and delivery of a
promissory note of even date herewith in the sum of \$24,000.00 payable
to the order of Elmo S. Candelari and wife, Frances Lucy Candelari,
bearing interest at 9-7/8ths percent per annum from date, executed by
the hereinafter named Trustees of the Greater Mount Nebo Baptist Church
and being due and payable in monthly installments of \$256.08 each,
including interest, the first of said monthly installments being due
and payable on or before the 5th day of SEPTEMBER, 1979, and the
remaining monthly installments being due and payable on or before the
same day of each and every month thereafter until the full amount of
principal and interest has been paid, and as such payments are made
they shall be applied first to the payment of all accrued interest to
date of payment, and the balance, if any, to be applied toward the
reduction of principal; said note containing the usual acceleration of
maturity, attorney's fees and past due interest clauses;

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

¹⁷ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

¹⁸ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot six (6) in Block (2) Of Finn Subdivision, A subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Martha Gilliam an address of 5119 Wylie, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ
Central Records
12100 Park 35 Circle,
Building E
Austin, Texas 78753

Mail: TCEQ - MC 199
P O Box 13087

Title Report

GF Number: 7910-12-9443
Date: December 21, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 16th day of December, 2012, we find the following:

Title Vested In:

Martha Gilliam (by Warranty Deed filed for record under Harris County Clerk's File Nos. E690955 being refiled under E855995 and by Muniment of Title under PW# 370718)

Property Description: (Map ID#9) (Tax ID# 014-140-000-0006)

A tract of land containing 3,010.00 square feet, more or less, out of Lot 6, Block 2 out of Finn Subdivision of Shares 2 and 3, a part of the Gagne Homestead, out of Harris and Wilson two league grant in Harris County Texas, said lot as recorded in Volume 1, Page 55 of the Harris County Map Records, Harris County, Texas, being more particularly described by metes and bounds as follows:

BEGINNING at a 1/2 inch iron rod found for the southwesterly corner of Lot 6 as described above and of the tract herein described, same point also being on the northerly right-of-way of Wylie Street (60-feet R.O.W.);

THENCE, with an internal angle of 90°00'00", a distance of 60.20 feet to a 1/2 inch iron rod set for the northwesterly corner of the tract herein described;

THENCE, with an internal angle of 90°00'00", a distance of 50.00 feet to a 1/2 inch iron rod set for the northeasterly corner of the tract herein described same point being on the westerly right-of-way of Fontinot Street (40-feet R.O.W.);

THENCE, with an internal angle of 90°00'00", a distance of 60.20 feet to a 1/2 inch iron rod set for the southeasterly corner of the tract herein described;

THENCE, with an internal angle of 90°00'00", a distance of 50.00 feet to the POINT OF BEGINNING and containing 3,010.00 square feet of land, more or less.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 10 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 2820 Clementine St, Houston, TX 77026 (Map ID 10, HCAD ID 014143000001)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ¹⁹				Property Ownership		Anticipated Filing Date ²⁰
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

¹⁹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

²⁰ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot one (1), Two (2) and Three (3) in Block Fivet (5), Of Finn Subdivision, A subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Beatrice Benson, as heir and devisee of the Estate of Tillie Potts Benson with an address of 1003 Saddle Rock, Texas 77088. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ

Title Report

GF Number: 7910-13-0129

Date: January 7, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 27th day of December, 2012, we find the following:

Title Vested In:

Tillie Potts Benson (by Deed filed for record under Volume 1821, Page 313 of the Deed Records of Harris County, Texas and by the Estate of Alex Potts - Probate #48382)

Property Description: (Map ID# 10) (Tax ID# 014-143-000-0001)

Lots One (1), Two (2) and Three (3), in Block Five (5), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's File No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Wylie Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

- 2) By City of Houston, Code of Ordinances, a Notice of Public Hearing was filed under Harris County Clerk's File No. Y844718, it was determined there may be a necessity for a demolition lien against the herein described property. Further, pursuant to said ordinance, an "Order of the Hearing Official" dated November 3, 2005, recorded under Harris County Clerk's File No. Y883003.
- 3) Notice of involuntary lien in connection with demolition (city tax account No : 014-143-000-0001) filed on January 17, 2008 , under Harris County Clerk's File No. 20080027828, executed by the City of Houston, claiming a lien on the subject property, against Tillie Potts Benson, as owner, in the amount of \$1,220.00 , plus cost and interest.

Involuntary Liens:

- 1) We find reference to Cause No. 2012-47859, in the District Court of Harris County, Texas, styled Harris County, et al vs. Tillie Potts Benson. It is assumed that said cause of action is for delinquent taxes due on subject property.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

³¹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

³² Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Six (6) in Block Five (5), of Finn Subdivision out of Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Jorge D. Rivera (Owner) with an address of 5117 Liberty Road, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-13-0183

Date: January 11, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 7th day of January, 2013, we find the following:

Title Vested In:

Jorge D. Rivera (by Warranty Deed filed for record under Harris County Clerk's File No. 20070252540)

Property Description: (Map ID# 16) (Tax ID# 014-143-000-0006)

Lot Six (6), in Block Five (5), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on August 29, 1957, filed under Volume 2950, Page 38 of the Deed Records of Harris County, Texas, executed by the City of Houston, showing portions of Liberty Road, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

- 2) A Vendor's Lien was retained in Deed dated April 20, 2007, filed for record on April 26, 2007, under Harris County Clerk's File No. 20070252540, executed by Martin Halick, to Jorge D. Rivera, securing one certain promissory note of even date therewith in the principal amount of \$56,637.00, payable to the order of Crosby State Bank; said note and lien being additionally secured by Deed of Trust of even date therewith, in favor of Mark G. Mulloy, as Trustee, together with all terms, conditions and stipulations contained therein, including any additional indebtedness secured thereby, filed for record on April 26, 2007, under Harris County Clerk's File No. 20070252541.

Involuntary Liens:

- 1) Abstract of Judgment filed May 24, 2005, under Harris County Clerk's File No. Y490426, styled the State of Texas, vs. Jorge Rivera, in the principal amount of \$679.00, plus cost, interest and attorney's fees.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 23 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 5301 Liberty Rd, Houston, TX 77026 (Map ID 23, HCAD ID 014041000007)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁴⁵				Property Ownership		Anticipated Filing Date ⁴⁶
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁴⁵ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁴⁶ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lots Seven (7) in Block Nine (9), of Fairground Park Addition, subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, page 357 of the Deed Records of Harris County, Texas.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was 57so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Geneva Crump (Owner) with an address of 5301 Liberty Road, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-12-9064
Date: December 5, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 3rd day of December, 2012, we find the following:

Title Vested In:

Geneva Henry, a/k/a Geneva Crump (by Deed filed for record under Harris County Clerk's File No. C159988)

Property Description: (Map ID# 23) (Tax ID# 014-041-000-0007)

Lot Seven (7), in Block Nine (9), of Fairground Park, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 357 of the Deed Records of Harris County, Texas, SAVE AND EXCEPT the South 3 feet thereof as conveyed to Harris County by deed filed for record under Volume 959, Page 357 of the Deed Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Notice of Public Hearing filed December 12, 2011, under Harris County Clerk's File No. 20110517152, pursuant of said notice a "Building and Standards Commission Order" dated January 11, 2012 and filed for record January 13, 2012, under Harris County Clerk's file No. 20120018233, it was determined that subject property be posted as a dangerous building and must be either repaired or demolished. Pursuant thereto, the following: Notice of Intent to File Lien in connection with demolition, filed on August 28, 2012 , under Harris County Clerk's file No. 20120395123.

Involuntary Liens:

- 1) We find reference to Cause No. 2009-42807, in the District Court of Harris County, Texas, styled Houston ISD, etal vs. Geneva Henry, etal. It is assumed that said cause of action is for delinquent taxes due on subject property.
- 2) Abstract of Judgment filed May 12, 2009, under Harris County Clerk's File No. 20090200226, styled Reed Credit Union, vs. Geneva Crump, in the principal amount of \$4,012.00, plus cost, interest and attorney's fees.
- 3) Abstract of Judgment filed December 22, 2010, under Harris County Clerk's File No. 20100543048, styled Houston ISD, etal, vs. Geneva Henry, in the principal amount as set out therein, plus cost, interest and attorney's fees.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

9 Lena Cash To County of Harris
10 Deed

11 The State of Texas County of Harris Know all men by these presents:

12 That I, Lena Cash, a feme sole of the County of Harris, and State of Texas, for and in
13 consideration of the sum of one & no/100 (\$.00) dollars to me in hand paid by the County of
14 Harris, in the State of Texas, the receipt of which is hereby acknowledged, and the further
15 consideration of establishing and maintaining a public road over and across the land herein-
16 after described, Have remised, released, and quit-claimed, and by these

17 presents do remise, release and quit-claim, unto the said County of Harris, the right of way
18 3.0 feet in width, over and cross 150 sq.ft. of the Harris & Wilson survey of land, situated
19 in said County of Harris, and State of Texas, said right of way to cross said land as follows,
20 to-wit: Being a strip of land off of the south line of lot 7 block 9, Fairgrounds

21 Park Subdivision out of the Harris and Wilson Survey, being a part of the same land conveyed to
22 Lena Cash by Angelo Candelari as recorded in volume_ page_ Harris County deed records, and
23 being more particularly described as follows, to-wit: Beginning at the southwest
24 corner of the Lena Cash lot 7, block 9, Fairgrounds Park Subdivision; thence north following
25 west line of said lot, a distance of 3 feet; thence east parallel to south line of said lot to
26 the east line of said lot a distance of 50 feet; thence south along the east line of said lot 7
27 a distance of 3 feet; thence west following the south line of said lot a distance of 50 ft. to
28 place of beginning, containing 150 square feet. It is understood and agreed that

29 Harris County will replace culvert in front of the property. To have and to hold the aforesaid
30 right of way unto the said County of Harris to be used as a public road forever.

31 Witness my hand this 10th day of April 1934. Lena Cash

32 The State of Texas County of Harris Before me, the undersigned authority, in and for
33 Harris County, Texas on this day personally appeared Lena Cash, a feme sole known to me to
34 be the person whose name is subscribed to the foregoing instrument of writing, and acknowledged
35 to me that she executed the same for the purposes and considerations therein expressed.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 5118 Lelia St, Houston, TX 77026 (Map ID 28, HCAD ID 014140000004)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁵³				Property Ownership		Anticipated Filing Date ⁵⁴
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁵³ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁵⁴ Specify date or amount of time after RAP approval.

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-12-9441
Date: December 21, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 16th day of December, 2012, we find the following:

Title Vested In:

Greater True Vine Baptist Church (by Warranty Deed filed for record under Harris County Clerk's File No. N995654)

Property Description: (Map ID#28) (Tax ID# 014-140-000-0004)

Lots Four (4) and Five (5), in Block Two (2), of Subdivision of Shares 2 and 3 (Finn Subdivision) of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

⁵⁸ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS	§
	§
COUNTY OF HARRIS	§

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot 2, 3, 8 and 9 in Block 3 of Finn Subdivision of the Gagne Homestead, a subdivision in Harris Country, Texas according the map or plat thereof recorded in Vol.1, page 55 of the map records of Harris County, Texas.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Greater True Vine Missionary Baptist Church (Owner) with an address of 3010 Fontinot, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ

Title Report

GF Number: 7910-12-9447
Date: December 21, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 16th day of December, 2012, we find the following:

Title Vested In:

Greater True Vine Missionary Baptist Church (by Warranty Deed filed for record under Harris County Clerk's File No. 20070175846)

Property Description: (Map ID#30) (Tax ID# 014-141-000-0002)

Lots Two (2), Three (3), Eight (8) and Nine (9), in Block Three (3), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) By City of Houston, Code of Ordinances, a notice of public hearing was filed under Harris County Clerk's File No. S605168, it was determined there may be a necessity for a demolition lien against the herein described property. Further, pursuant to said ordinance, we find of record an "Order of the Building Official" recorded under Harris County Clerk's File No. S647776.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 33 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 5105 Wylie St, Houston, TX 77026 (Map ID 33, HCAD ID 014140000009)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁶³				Property Ownership		Anticipated Filing Date ⁶⁴
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁶³ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁶⁴ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Nine (9) in block two (2), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof.)

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Willie Potts, heir and devisee of Maryland Potts (Owner) with an address of 5107 Wylie Street, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-13-0506

Date: January 23, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

The Heirs and Devisees of the Estate of Maryland Potts, deceased (by Deeds filed for record under Volume 410, Page 518 and Volume 545, Page 368, both of the Deed Records of Harris County, Texas) (See notes)

Property Description: (Map ID# 33) (Tax ID# 041-140-000-0009)

Lots Nine (9) and Ten (10), in Block Two (2), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's file No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Wylie Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

Notes:

- We find no heirship/probate proceedings pertaining to the Estate of Maryland Potts, deceased filed of record in Harris County, Texas.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

CITY CLERK
HARRIS COUNTY, TEXAS

NOTICE OF LIEN

By direction of the City Council of the City of Houston (in Harris County, Texas) notice is hereby given that such City Council, being the governing body of said City, did by ordinance passed and approved January 12, 1977, determine that it is necessary that the hereinafter designated portions of Lavender, Clementine and various other streets in the City of Houston, Texas, known as topping Project No. 303

be improved, and did order that the same be improved in accordance with certain plans and specifications in such ordinance referred to, and did order that a portion of the cost of such improvement be specially assessed as a lien upon property abutting upon said portion of said streets, all as provided by Article 1105-b, Revised Civil Statutes; and notice is hereby given as required by Article 1220-a, Revised Civil Statutes; that a portion of the cost of such improvement is to be and will be specially assessed as a lien upon property abutting thereon.

The respective portion of the street as contained in the attached lists are referred to as Topping Project No. 303.

Done and signed by me, the City Secretary of said City in its name, this 12th day of January, 1977, by direction of its City Council given and contained in the ordinance aforesaid.

1 Dollars on the 3rd day of October 1928 with interest at the rate of seven per cent per annum payable
 2 annually on the 1st day of September, of each year, interest from date, it being understood, that
 3 the first interest payment due on October 3rd, 1919, will be only for eleven months. (2) To pay all
 4 taxes and assessments that may be levied, assessed, or become due upon the said premises, at least thirty
 5 days before any penalty will accrue thereon, if unpaid, and to exhibit the receipt therefor to the ven-
 6 dor. This covenant as to taxes shall mean those taxes accruing subsequent to the year 1920, the taxes
 7 for 1918, 1919 to be paid by the vendor. (3) To insure and keep insured in at least the sum of \$ _____
 8 against loss or damage by fire during the life of this agreement, the buildings now or hereafter
 9 erected upon the said premises, in companies satisfactory to the vendor, with loss, if any, payable to
 10 the vendor as his interest may appear, and to deposit the policy or policies with the vendor.
 11 THIRD: Provided, however, and this agreement is upon the expressed condition that, if default shall
 12 be made in the payment of the said several sums or any of them, or any part thereof, or the interest,
 13 or any part thereof, or in the performance or observance, or any of the covenants herein contained on
 14 the part of the purchaser, then the whole of the said principal sum, with accrued, interest thereon,
 15 shall at the election of the vendor become immediately due and payable, and the vendor shall have the
 16 right to terminate this agreement by giving to the purchaser ninety days written notice of such termina-
 17 tion; and in the event of such termination, all payments made by the purchaser herunto shall be re-
 18 tained by the vendor as liquidated damages for the breach of this agreement by the purchaser, and the
 19 vendor shall have the right to re enter and take possession of said premises with all the buildings and
 20 improvements then thereon, it being agreed that until such default, the purchaser shall have possession
 21 of the said premises on and after November 1st, 1918. FOURTH: All the covenants and agreements
 22 herein contained shall inure to the benefit of and bind the respective heirs, personal representatives,
 23 and assigns of the parties hereto. ----- Mrs. Rebecca Reynolds, E.H. Reynolds.

24 State of Texas: County of Harris: Before me, Elliott Cage a Notary Public, of the County of Harris,
 25 in the State of Texas, on this day personally appeared E.H. Reynolds and Rebecca Reynolds his wife, both
 26 known to me to be the persons whose names are subscribed to the foregoing instrument, and acknowledged
 27 to me that they each executed the same for the purposes and consideration therein expressed and the said
 28 Rebecca Reynolds wife of the said E.H. Reynolds having been examined by me privily and apart from her
 29 husband, and having the same fully explained to her, she the said Rebecca Reynolds acknowledged such
 30 instrument to be her act and deed, and declared that she had willingly signed the same for the purposes
 31 and consideration therein expressed, and that she did not wish to retract it.

32 Given under my hand and seal of office this 3rd day of October A.D., 1918.

of Harris County, Texas, for and in consideration of the sum of Five Hundred Dollars (\$500.00) to me in hand paid by Maryland Potts, of Harris County, Texas, the receipt of which is hereby acknowledged. Have granted, bargained, sold and conveyed, and do by these presents grant, bargain, sell and convey unto the said Maryland Potts, the following described lands, property and premises to-wit: Lot No. Nine (9) in Block No. Two (2) out of the Finn Subdivision of shares 2 and 3 a part of the Gagne Homestead, out of the Harris and Wilson Two League Grant, in Harris County, Texas, being the same property conveyed to me by E. A. Finn, by deed dated October 27th, 1917, and duly recorded in the Deed Records of Harris County, Texas, in Volume 396, page 106, and for a more particular description of the said property reference is here made to the said deed, its said record and the references therein contained. To have and to hold the above described lands, property and premises, together with all and singular the rights and appurtenances thereto in anywise belonging unto the said Maryland Potts, his heirs and assigns forever. And I do hereby bind myself, my heirs, executors and administrators to warrant and forever defend, all and singular, the said lands and premises unto the said Maryland Potts, his heirs and assigns, against every person whomsoever lawfully claiming or to claim the same or any part thereof. The grantee herein assumes the taxes and assessments, if any, against the said property for the years 1919-1920-1921-1922-1923.

In testimony whereof witness my hand at Houston, Texas, on this the 27th day of August, A.D. 1923.

B. Candelari, (Stamps can. 50¢)

The State of Texas. County of Harris. Before me, the undersigned Notary Public, in and for Harris County, Texas, on this day personally appeared B. Candelari, known to me to be the person whose name is subscribed to the foregoing instrument, and acknowledged to me that he executed the same for the purposes and considerations therein expressed.

Given under my hand and seal of office, at Houston, Texas, on this the 27th day of August, A.D. 1923.

W. J. Armstrong, Notary Public, in and for Harris County, Texas. (Seal).

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 34 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 2901 Clementine St, Houston, TX 77026 (Map ID 34, HCAD ID 0141390000005)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁶⁵				Property Ownership		Anticipated Filing Date ⁶⁶
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁶⁵ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁶⁶ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Five (5) in Block (1) one, of Finn Subdivision out of the Gagne Homestead a Subdivision, a subdivision In Harris County, Texas according to the Map or Plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Mary Bass Ross (Owner) with an address of 5010 Wylie, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-12-9247
Date: December 13, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 5th day of December, 2012, we find the following:

Title Vested In:

Mary Lee Bass, a/k/a Mary B. Ross, Lee Otis Jackson, Gilbert Eugene Jackson, Jr., Mary Alicia Carroll, Audrey Mae Sholars, Stella Louise Price, the Heirs and Devisees of the Estate of Johnny Lawrence Jackson, deceased and any unknown Heirs of the Estate of Gilbert Jackson, deceased, (by Warranty Deed filed for record under Harris County Clerk's File No. D262288 and Quitclaim Deeds filed for record under Harris County Clerk's File Nos. V630621 and V630622)

Property Description: (Map ID# 34) (Tax ID# 014-139-000-0005)

Lot Five (5), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) By City of Houston, Code of Ordinances, a notice of public hearing was filed under Harris County Clerk's File No. P925381, it was determined there may be a necessity for a demolition lien against the herein described property. Further, pursuant to said ordinance, title company finds of record an "Order of the Building Official" dated July 11, 1994, recorded under Harris County Clerk's File No. P971330.

Notes:

Title is vested as shown above by virtue of the following:

- Warranty Deed filed for record under Harris County Clerk's File No. D262288, executed by Maurice Krull to Lloyd Newman and Jane Newman.
- Subsequently, we find of record an Affidavit of Heirship regarding the estate of Lloyd Newman, deceased, filed for record under Harris County Clerk's File No. D781386, wherein Mary Jane Newman, a/k/a Jane Newman and Mary Lee Bass were purported to be the only heirs.
- We then find of record Affidavits of Heirship regarding the estate of Mary Jane Newman, a/k/a Jane Newman, deceased filed for record under Harris County Clerk's File Nos. V630623 and V630624, wherein the heirs are purported to be Mary B. Ross, a/k/a Mary Lee Bass and Gilbert Jackson, deceased. The heirs of Gilbert Jackson are therein stated as: Johnny Lawrence Jackson, deceased, "Mr. Unknown", Lee Otis Jackson, Gilbert Eugene Jackson, Jr., Gloria Jean Williams, Mary Alice Carroll, Audrey Mae Sholars, Stella Louise Price and Cynthia Diane Jean.
- We find of record a Quitclaim Deed filed for record under Harris County Clerk's File No. V630621, executed by Gloria Jean Williams to Mary B. Ross.
- We find of record a Quitclaim Deed filed for record under Harris County Clerk's File No. V630622, executed by Cynthia Diane Jean to Mary B. Ross.
- We find no probate of record as to the Estate of Johnny Lawrence Jackson, deceased.

Involuntary Liens:

- 1) Abstract of Judgment filed July 30, 2001, under Harris County Clerk's File No. V204500, styled USA, vs. Stella L. Price, in the principal amount of \$1,749.00, plus cost, interest and attorney's fees.
- 2) Notice of child support Lien filed March 25, 2003, under Harris County Clerk's File No. W526423, against Gilbert Jackson, in the principal amount of \$4,802.00, plus costs and interest.
- 3) Abstract of Judgment filed April 3, 2012, under Harris County Clerk's File No. 20120140334, styled Cach, LLC, vs. Lee Jackson, in the principal amount of \$3,582.00, plus cost, interest and attorney's fees.
- 4) The records reflect Bankruptcy proceedings filed in federal court on December 3, 2012 in Case No. 201238965 by Lee Jackson, S.S. No. xxx-xx-4712.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁶⁹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁷⁰ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Seven (7) in Block (1) one, of Finn Subdivision out of the Gagne Homestead, a subdivision In Harris County, Texas according to the Map or Plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Nancy Banda-Zuniga (Owner) with an address of 5006 Wylie, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-12-9249
Date: December 13, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 5th day of December, 2012, we find the following:

Title Vested In:

Andrew Jerry Johnson and Rebecca Johnson (by Warranty Deed filed for record under Volume 2581, Page 379 of the Deed Records of Harris County, Texas)

Property Description:

Lot Seven (7), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

- 1) Abstract of Judgment filed September 28, 2004, under Harris County Clerk's File No. X948892, styled Millennium Insurance Company, vs. Rebecca R. Johnson, in the principal amount of \$6,954.00, plus cost, interest and attorney's fees.
- 2) Notice of child support Lien filed November 24, 1998, under Harris County Clerk's File No. T400263, against Andrew Johnson, in the principal amount of \$16,555.00, plus costs and interest.
- 3) Notice of child support Lien filed December 12, 2002, under Harris County Clerk's File No. W283262, against Andrew Johnson, in the principal amount of \$20,716.00, plus costs and interest.
- 4) Notice of child support Lien filed November 20, 2007, under Harris County Clerk's File No. 20070691000, against Andrew Johnson, in the principal amount of \$33,184.00, plus costs and interest.
- 5) Notice of Federal Tax Lien filed February 22, 2011, under Harris County Clerk's File No. 20110072127, against Andrew Johnson, in the principal amount of \$63,618.00.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

⁷² Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Eight (8) in Block (1) one, of Finn Subdivision out of the Gagne Homestead a Subdivision, a subdivision In Harris County, Texas according to the Map or Plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Monico Banda (Owner) with an address of 5005 Wylie, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-12-9250
Date: December 13, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 5th day of December, 2012, we find the following:

Title Vested In:

Monico Duque Banda and Martha Zuniga Banda, husband and wife (by Warranty Deed filed for record under Harris County Clerk's File No. 20070330680)

Property Description: (Map ID# 37) (Tax ID# 014-139-000-0008)

Lot Eight (8), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Tract 6(six) in Block 1 (one), of the Liberty Road Estates, an addition in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Leisa Glenn and heir and devisee of Lucille Long (Owner) with an address of 2924 Lavender, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-13-0514

Date: January 23, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

Clark Investment Company (by Deeds filed for record under Volume 2034, Page 480 and Volume 2830, Page 252, both of the Deed Records of Harris County, Texas)

Property Description: (Map ID# 39) (Tax ID# 040-266-010-0022)

Tract Six-C (6C), in Block One (1), of Liberty Road Estates, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's file No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lelia Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

Notes:

- Harris County Appraisal District describes the subject property as Tract 6C, however we find no conveyance describing same. According to the Appraisal Map, the subject property is comprised of Lot 6, in Block 1 of Liberty Road Estates, unrecorded.
- Harris County Appraisal District reflects Lucille Long as the current tax payer, however we find no conveyance out of Clark Investment Company or into Lucille Long.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY: TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot 5, block 1 of Liberty Road Estates, an unrecorded subdivision out the Harris and Wilson Survey, Abstract No. 32, Harris County, Texas..

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Greater Mount Nebo Baptist Church (Owner) with an address of 3819 Harland Dr., Houston, Texas 77092. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-13-0480

Date: January 22, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

Greater Mt. Nebo Baptist Church (by Deed filed for record under Harris County Clerk's File No. 20110083443)

Property Description: (Map ID# 40) (Tax ID# 040-266-010-0005)

Lot Five (5), in Block One (1), of Liberty Road Estates, an unrecorded subdivision out of the Harris and Wilson Survey, Abstract No. 32, Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

Those as set forth by instrument(s) filed for record under Volume 1881, Page 268 of the Deed Records of Harris County, Texas.

Exceptions:

- a) Building set-back line 20 feet in width along the front property line(s), as set forth by instrument(s) recorded in Volume 1881, Page 268 of the Deed Records of Harris County, Texas.
- b) Building set-back line 3 feet in width along the side property line(s), as set forth by instrument(s) recorded in Volume 1881, Page 268 of the Deed Records of Harris County, Texas.
- c) Utility easement 5 feet in width along the rear property line, as reserved by instrument(s) filed for record under Volume 1881, Page 268 of the Deed Records of Harris County, Texas.
- d) Sidewalk easement 6.3 feet in width along the front property line, as reserved by instrument(s) filed for record under Volume 1881, Page 268 of the Deed Records of Harris County, Texas.

- e) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 41 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 5202 Lelia St, Houston, TX 77026 (Map ID 41, HCAD ID 014141000001)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁷⁹				Property Ownership		Anticipated Filing Date ⁸⁰
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁷⁹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁸⁰ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

§

§

COUNTY OF HARRIS

§

41

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot 1 in Block 3 of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris county, Texas according to the map or plat thereof, recorded in Vol 1 Page 55 of map records of Harris County, Texas.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Greater True Vine Missionary Baptist Church (Owner) with an address of 5010 Fontinot, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ
Central Records
12100 Park 35 Circle,
Building E
Austin, Texas 78753

Mail: TCEQ - MC 199
P O Box 13087

Title Report

GF Number: 7910-12-9446
Date: December 21, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 16th day of December, 2012, we find the following:

Title Vested In:

Greater True Vine Missionary Baptist Church (by Deed under Order of Sale in Tax Suits filed for record under Harris County Clerk's File No. 20100438179)

Property Description: (Map ID#41) (Tax ID# 014-141-000-0001)

Lot One (1), in Block Three (3), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

**EXHIBIT “3”
MAINTENANCE AND MONITORING**

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Six (6) in Block (9) one, of Fairground Park a Subdivision, a subdivision I n Harris County, Texas according to the Map or Plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Clara Scruggs (Owner) with an address of 5151 CR 181, Alvin, Texas 77511. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-12-9065

Date: December 5, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 3rd day of December, 2012, we find the following:

Title Vested In:

Margaret Roberts, Clara Scruggs, Leroy Mock and Charles Mock (by Warranty Deed filed for record under Harris County Clerk's File No. U754245)

Property Description: (Map ID# 42) (Tax ID# 014-041-000-0006)

Lot Six (6), in Block Nine (9), of Fairground Park, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 460 of the Deed Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

- 1) We find reference to Cause No. 2011-14300, in the District Court of Harris County, Texas, styled Harris County, etal vs. Margaret Roberts, Clara Scruggs, Leroy Mock and Charles Mock. It is assumed that said cause of action is for delinquent taxes due on subject property. Said suit includes a Final Judgment dated December 13, 2011.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

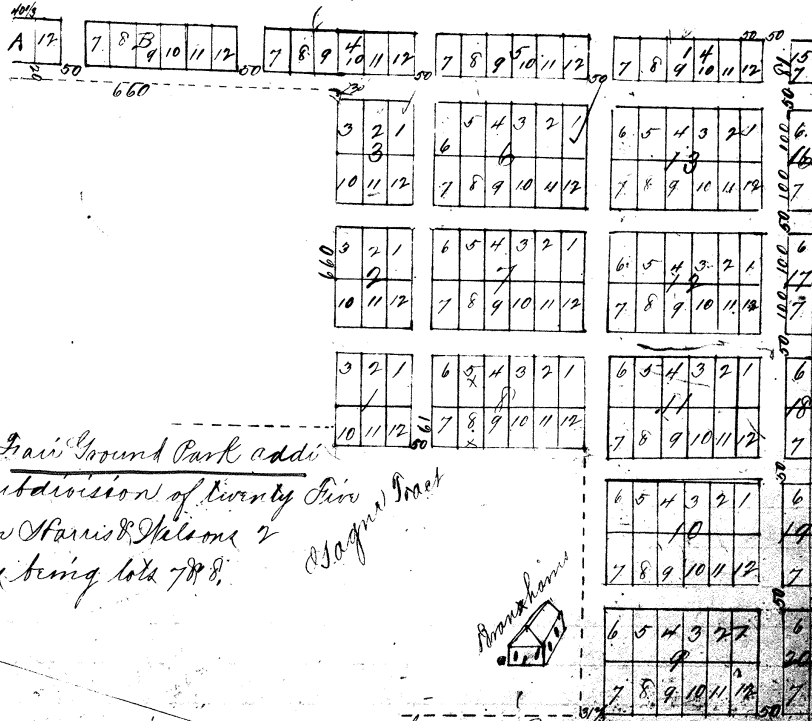

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statue, in contract, or in tort.

**EXHIBIT “3”
MAINTENANCE AND MONITORING**

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 43 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 5304 Wylie St, Houston, TX 77026 (Map ID 43, HCAD ID 014041000013)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁸³				Property Ownership		Anticipated Filing Date ⁸⁴
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁸³ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁸⁴ Specify date or amount of time after RAP approval.

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-12-9210
Date: December 5, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 3rd day of December, 2012, we find the following:

Title Vested In:

Irene Perez Juarez (by Warranty Deed filed for record under Harris County Clerk's File No. L292177)

Property Description: (Map ID# 43) (Tax ID# 014-041-000-0013)

The West One-half (W ½) of Lot Five (5), in Block Nine (9), of Fairground Park, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 461 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's File No. F029142, (Film Code No. 157-20-1662), executed by City of Houston, showing portions of Wylie Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

- 1) Abstract of Judgment filed November 24, 2009, under Harris County Clerk's File No. 20090534997, styled Freddy's Auto Sales, vs. Irene Juarez, in the principal amount of \$1,225.00, plus cost, interest and attorney's fees.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

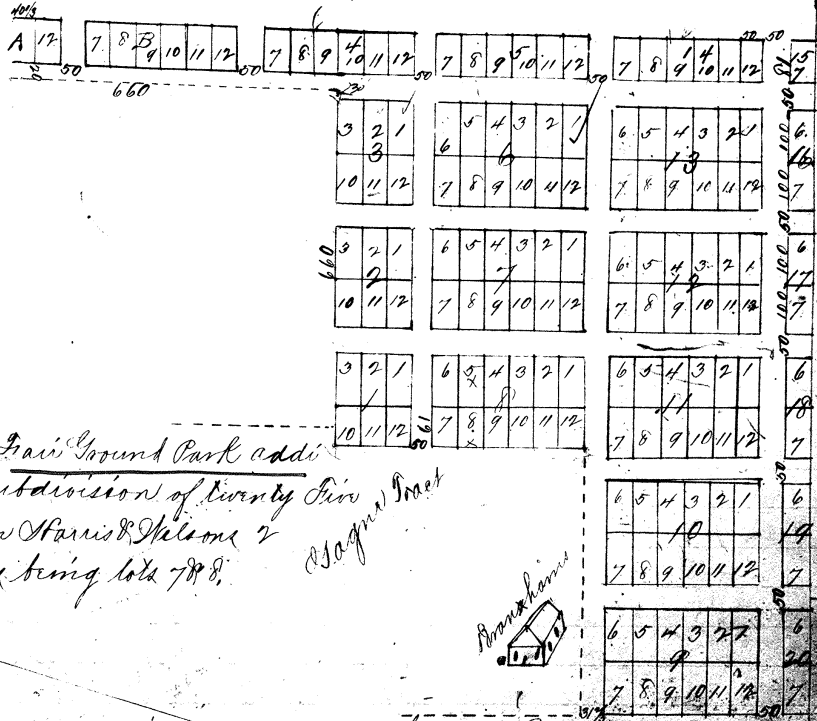

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 44 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 5304-1/2 Wylie St, Houston, TX 77026 (Map ID 44, HCAD ID 0140410000005)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁸⁵				Property Ownership		Anticipated Filing Date ⁸⁶
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁸⁵ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁸⁶ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

The East one half (E1/2) of Lot five Of Fairground Park Addition Subdivision, A subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Ernest I. Delgado heir and devisee of the estate of Susie Delgado with an address of 5304 ½ Wylie, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ
Central Records
12100 Park 35 Circle,
Building E
Austin, Texas 78753

Mail: TCEQ - MC 199
P O Box 13087
Austin, Texas 78711-3087

TCEQ Program and Identifier No.: TCEQ SWR No. 31547

This Restrictive Covenant may be rendered of no further force or effect only by a release executed by the TCEQ or its successor agencies and filed in the same Real Property Records as those in which this Restrictive Covenant is filed.

Title Report

GF Number: 7910-12-9211
Date: December 5, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 3rd day of December, 2012, we find the following:

Title Vested In:

Saturnino P. Delgado and wife, Susie Delgado (by Warranty Deed filed for record under Harris County Clerk's File No. C769798)

Property Description: (Map ID# 44) (Tax ID# 014-041-000-0005)

The East One-half (E ½) of Lot Five (5), in Block Nine (9), of Fairground Park, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 461 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's File No. F029142, (Film Code No. 157-20-1662), executed by City of Houston, showing portions of Wylie Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot One (1), Block One (1) of Fairground Park Addition, a subdivision in Harris County, Texas according to the map and plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Lenora Young, heir and devisee of the estate of Emma Byrd with an address of 4719 Dabney Street, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

GF Number: 7910-13-0209
Date: January 12, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 7th day of January, 2013, we find the following:

Title Vested In:

Lenora Young and Clifton Scott (by Deeds filed for record under Harris County Clerk's File Nos. X203010, X203011, X203013, X203015 and 20070661643)

Property Description: (Map ID# 45) (Tax ID# 014-033-000-0001)

Lot One (1), in Block One (1), of Fairground Park Addition, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 460 of the Deed Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on October 3, 1969, (topping project no. 212), filed under Harris County Clerk's File No. C994607, (Film Code No. 109-39-0842), executed by the City of Houston, showing portions of Fontenot Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 46 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 705 Lucille, Houston, TX 77026 (Map ID 46, HCAD ID 0140330000003)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁸⁹				Property Ownership		Anticipated Filing Date ⁹⁰
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁸⁹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁹⁰ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lots Three (3) and Ten (10), in Block One (1), of Fairground Park Addition, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, page 460 of the Deed Records of Harris County, Texas.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Joyce Marie Taylor (Owner) with an address of 2530 Skyview, Houston, Texas 77047. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-13-0269

Date: January 15, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 8th day of January, 2013, we find the following:

Title Vested In:

Joyce Marie Taylor (by Warranty Deed filed for record under Harris County Clerk's File No. 20120098168)

Property Description: (Map ID# 46) (Tax ID# 041-033-000-0003)

Lots Three (3) and Ten (10), in Block One (1), of Fairground Park Addition, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 460 of the Deed Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on October 3, 1969, (topping project no. 212), filed under Harris County Clerk's file No. C994607, (Film Code No. 109-39-0842), executed by the City of Houston, showing portions of Lucille Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

- 2) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's file No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lelia Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

⁹¹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁹² Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

The East eight feet of Lot Eight (8) and all of the adjoining lot Nine (9), in block Six (6), of Fairground Park Annex, a Subdivision, a subdivision In Harris County, Texas according to the Map or Plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Mary Elizabeth Johnson-Crowley-Alex (Owner) with an address of 3009 Erastus, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-13-0270
Date: January 15, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 8th day of January, 2013, we find the following:

Title Vested In:

Mary Elizabeth Crowley (by Deed filed for record under Volume 3790, Page 68 of the Deed Records and by Probate #80594, all of Harris County, Texas)

Property Description: (Map ID# 47) (Tax ID# 041-040-000-0002)

The South One-half (S ½) of Lots One (1) and Two (2), in Block Eight (8), of Fairground Park Addition, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 460 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 28, 1966, (topping project no. 150), filed under Harris County Clerk's file No. C239838, (Film Code No. 046-23-1376), executed by the City of Houston, showing portions of Erastus Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁹³ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁹⁴ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Three (3), in Block Eight (8), Of Fairground Park Addition Subdivision, A subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Yolanda C. Ruiz with an address of 5212 Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-13-0271
Date: January 15, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 8th day of January, 2013, we find the following:

Title Vested In:

Jose F. Ruiz and wife, Yolanda Ruiz (by Warranty Deed filed for record under Harris County Clerk's File No. T156666)

Property Description: (Map ID# 48) (Tax ID# 041-040-000-0003)

Lot Three (3), in Block Eight (8), of Fairground Park Addition, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 460 of the Deed Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

The County Clerk's Records of Harris County, Texas, reveal numerous Abstracts of Judgment and/or State and Federal Tax Liens against persons with names similar to Jose F. Ruiz, record owner. They are as follows: Those as filed for record under Harris County Clerk's File Nos. W238818, W392425, W491662, Z412451, 20100325780, 20070102504, 20080219234 and 20110529858.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Four (4), Block Eight (8), Of Fairground Park Addition, A subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Dorothy Hagan Randle, as heir and devisee of the Estate of Aaron Hagan with an address of 7410 Ave A, Beasley, Texas 77417. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-13-0272

Date: January 15, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 8th day of January, 2013, we find the following:

Title Vested In:

The Heirs and Devisees of the Estate of Aaron Hagan, deceased (by Deed filed for record under Volume 1344, Page 309 of the Deed Records of Harris County, Texas and by Affidavit of Heirship filed for record under Volume 3499, Page 92 of the Deed Records of Harris County Texas) (See notes)

Property Description: (Map ID# 49) (Tax ID# 041-040-000-0004)

Lot Four (4), in Block Eight (8), of Fairground Park Addition, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 460 of the Deed Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) We find reference to Cause No. 2012-39307, in the District Court of Harris County, Texas, styled Harris County, et al vs. Dorothy Mae Hagan, et al. It is assumed that said cause of action is for delinquent taxes due on subject property.

Involuntary Liens:

None of record.

Notes:

- The most recent Deed of record is dated December 22, 1944 and filed under Volume 1344, Page 309 of the Deed Records of Harris County, Texas which conveyed the subject property to Elizabeth Franklin.
- We subsequently find of record an Affidavit of Heirship pertaining to the Estate of Elizabeth Franklin Silas filed for record under Volume 3499, Page 92 of the Deed Records of Harris County, Texas, wherein Chaney Hagan and Aaron Hagan are designated as heirs.
- Chaney Hagan is deceased as reflected by Harris County Probate #65252 dated October 2, 1958. Title therein vested in surviving spouse, Aaron Hagan.
- We find no heirship proceedings of record regarding the Estate of Aaron Hagan, deceased.
- We then find of record a Deed of Trust executed by Hubert Randle and Dorothy Mae Randle as purported owners of the subject property, filed for record under Harris County Clerk's File No. B382310. However, we find no Deed of record into or out of Hubert Randle and Dorothy Mae Randle.
- The Harris County Appraisal District reflects Alfred B. and Freddie Randolph as taxpayers of the subject property. However, we find no Deed of record into or out of Alfred B. and Freddie Randolph.
- We do find of record an Application to Declare Heirship of Alfred B. Randolph under Cause #379062 of the Harris County Probate Records. However, said proceedings have not been finalized.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

CONTRACT RECORDS

20r

This CONTRACT made and entered into by and between Hubert Randle
and his wife Dorothy Mae Randle of Harris County, Texas, hereinafter called OWNERS,
and A - 1 Construction of Houston Texas, hereinafter called CONTRACTOR.

VOL 1367 PAGE 387

WITNESSETH: That Contractor, for the considerations herein stated, agrees and contracts with the Owners to furnish, and pay for, all labor and materials needed to construct in a good and workmanlike manner, the following improvements:

prepare for alum siding, caulk and seal, alum stripping, stone wainscot high, in front of house, alum screens, and 2 alum screen doors, upon the following described tract, lot or parcel of land belonging to Owners:

250
G

Lot 4 - Block 8 - of Fairgrounds Park Addition to the City of Houston, Harris County, Texas

B
m

In consideration of the foregoing, Owners promise and agree to pay Contractor, his heirs, representatives or assigns, the sum of Thirty one hundred sixty and 50/100 Dollars (\$ 3160.50)

payable as follows: \$ _____ cash upon the execution of this contract, and the balance of \$ 3160.50 shall be evidenced by a note for that amount to be executed and delivered upon the completion of the improvements above described. Said note shall be payable to the order of the Contractor, ~~XXXXXXXXXXXXXXXXXXXX~~, Houston, Texas, in 60 equal successive monthly installments of \$ 52.68 each, except the final installment, which shall be the balance then due on the note.

To secure the payment of said note, Owners hereby give, grant and convey to Contractor, his heirs, or assigns, an express mechanic's and materialman's lien as provided by the Constitution and Laws of the State of Texas, upon the hereinbefore described property. Said Owners, in addition, additionally secure and enforce the payment of said note and in consideration of the premises hereinbefore set forth, have granted, bargained and sold

and other hazards, the holder of said note may, at his option, declare the entire remaining unpaid balance of said note immediately due, and, if not immediately paid, then and in that event the Trustee or his successor is hereby authorized and empowered to sell said property in accordance with the Laws of The State of Texas. If the Owners or those holding under them shall remain in possession of said property after sale, however made, such Owners or those holding under them shall become the tenants at sufferance of the purchaser. In the event of the death or the failure of the Trustee herein to act, then the legal holder of said indebtedness may appoint in writing a substitute Trustee who shall succeed to all the rights and powers heretofore granted to the Trustee herein. Owners hereby acknowledge that this contract is being executed and delivered before any labor or materials for the erection and construction of said improvements have been furnished.

and by these presents do grant, bargain and sell unto _____

In the event any portion of the indebtedness evidenced by the above described note is not, for any reason, secured by this deed of trust on the above described property, it is expressly stipulated, provided and agreed that the full amount of all payments hereafter made upon said note shall be first applied to such unsecured portion of said indebtedness until the same has been fully paid.

G. B. Yeager as Trustee, and to his successors in this trust, all the hereinbefore described property and improvements. To have and to hold the said property unto the said Trustee or his successor forever upon the following terms and conditions: That if the Owners shall pay off and discharge said note according to its tenor and effect, then this conveyance shall become null and void and shall be released by the holder of the indebtedness; but should Owners default in the payment of said note or fail to pay, before they become delinquent, all taxes legally assessed against said property, or fail to keep said property fully insured against fire

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lots Four (4), Five (5) and Six (6) in Block (10), of Fairground Park, a subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is AMBE SAI LLC, a Texas limited liability company (Owner) with an address of 5301 Lelia, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) A Vendor's Lien was retained in Deed dated September 8, 2011, filed for record on September 14, 2011, under Harris County Clerk's File No. 20110387245, executed by Mukesha Patel and Mahendra Patel, a/k/a Mahendra Patidar, to Nitin Ghutadaria, securing one certain promissory note of even date therewith in the principal amount of \$500,000.00, payable to the order of Mukesha Patel and Mahendra Patel; said note and lien being additionally secured by Deed of Trust of even date therewith, in favor of Erwin Wilbanks, as Trustee, together with all terms, conditions and stipulations contained therein, including any additional indebtedness secured thereby, filed for record on September 14, 2011, under Harris County Clerk's File No. 20110387246.
- 2) Deed of Trust to Secure Assumption dated September 20, 2011, recorded September 29, 2011, in Harris County, Texas, under Clerk's File No. 20110409830, executed by AMBE SAI, LLC., to Robert M. Crain, Trustee, for the benefit of Nitin Ghutadaria, and additionally secured by Vendor's Lien in Deed dated September 20, 2011, recorded under Harris County Clerk's File No. 20110409829, from Nitin Ghutadaria to AMBE SAI, LLC.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

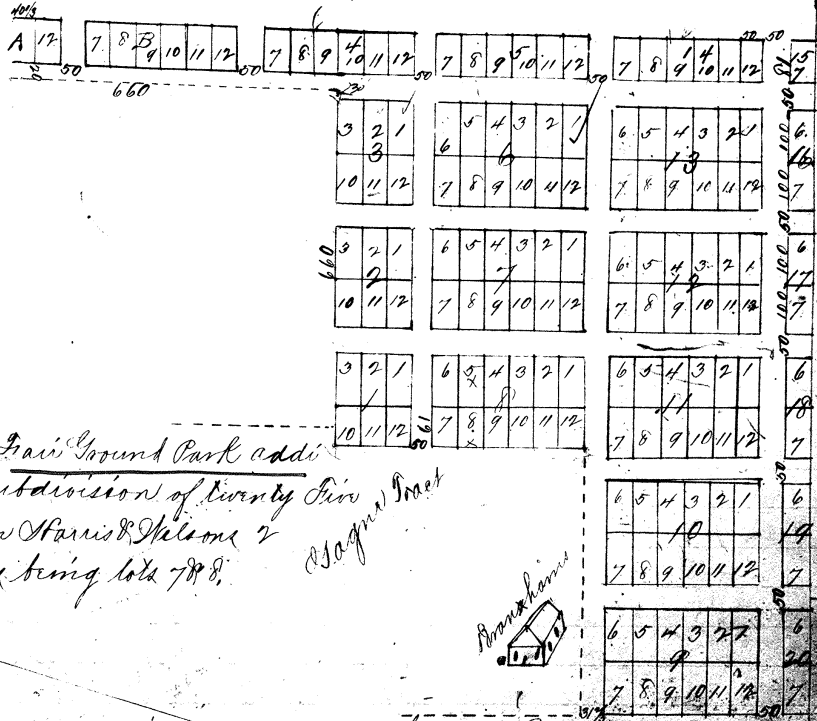

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

⁷ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁸ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Nine (9), in Block Ten (10), of Fairground Park, a subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Victor D. Ibarra and Carol Ibarra (Owner) with an address of 5305 Wylie, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ

Title Report

GF Number: 7910-12-9215
Date: December 5, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 3rd day of December, 2012, we find the following:

Title Vested In: (Map ID# 55) (Tax ID# 014-042-000-0009)

Victor Delgado Ibarra (by Warranty Deed filed for record under Volume 606, Page 297 and by the Estate of Faustino Ibarra, deceased as filed under Probate No. 222881 in Harris County, Texas)

Property Description:

Lot Nine (9), in Block Ten (10), of Fairground Park, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 81, Page 460 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's File No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Wylie Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

- 1) Abstract of Judgment filed March 1, 2002, under Harris County Clerk's File No. V630014, styled Dillard National Bank, vs. Victor Ibarra, in the principal amount of \$3,490.00, plus cost, interest and attorney's fees.
- 2) Notice of Federal Tax Lien filed June 21, 2007, under Harris County Clerk's File No. 20070377988, against Victor Ibarra, in the principal amount of \$14,108.00.
- 3) Notice of Federal Tax Lien filed July 21, 2007, under Harris County Clerk's File No. 20080378856, against Victor Ibarra, in the principal amount of \$6,357.00.
- 4) Notice of Federal Tax Lien filed February 23, 2009, under Harris County Clerk's File No. 20090073377, against Victor Ibarra, in the principal amount of \$34,017.00.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

¹² Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot One (1), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map and plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Mildred Holmes Wilder, heir and devisee of the estate of Emmitt Holmes (Owner) with an address of 5008 Lelia Street, Houston, Texas 770226. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-12-9230

Date: December 12, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 5th day of December, 2012, we find the following:

Title Vested In:

Emmitt Holmes (by Warranty Deed filed for record under Volume 2863, Page 484 of the Deed Records of Harris County, Texas)

Property Description: (Map ID# 57) (Tax ID# 014-139-000-0001)

Lot One (1), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Notice of Lien for work or improvements, filed January 23, 1979 by Health Officer, City of Houston, in the Office of the County Clerk of Harris County, Texas, under Clerk's File No. F939063, to secure the repayment of the sum of \$25.00 plus interest and costs, for cutting weeds, clearing and cleaning of the subject property.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Three (3), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map and plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Guadalupe Rivera Jr. (Owner) and devisee of the estate Johnnie Ellis with an address of 5014 Lelia, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

GF Number: 7910-12-9234

Date: December 12, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 5th day of December, 2012, we find the following:

Title Vested In:

Guadalupe Rivera, Jr. and Flor Estela Rivera (by Warranty Deed filed for record under Harris County Clerk's File No. 20110426670)

Property Description: (Map ID# 59) (Tax ID# 014-139-000-0003)

Lot Three (3), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

- 1) Abstract of Judgment filed December 24, 2008, under Harris County Clerk's File No. 20080612026, styled State Farm, vs. Flor Rivera, in the principal amount of \$4,479.00, plus cost, interest and attorney's fees.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 60 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 2421 Clementine, Houston, TX 77026 (Map ID 60, HCAD ID 0141390000004)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ¹⁷				Property Ownership		Anticipated Filing Date ¹⁸
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

¹⁷ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

¹⁸ Specify date or amount of time after RAP approval.

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-12-9239
Date: December 13, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 5th day of December, 2012, we find the following:

Title Vested In:

Rogelio Ruiz Pineda and Olivia Pineda, husband and wife (by Warranty Deed filed for record under Harris County Clerk's File No. M698759)

Property Description: (Map ID# 60) (Tax ID# 014-139-000-0004)

The North sixty feet (N 60') of Lot Four (4), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Order of the Building Official of the City of Houston dated January 30, 1990, filed for record under Harris County Clerk's File No(s). M555328, determining that the building(s) are posted as dangerous in accordance with Section 10-326 of the Code of Ordinances, and requiring the owner to take the corrective measures described therein; or the City will demolish said building(s) and place a lien for the expenses incurred.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

The South Forty feet (S 40') of Lot Four (4), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map and plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Guadalupe Rivera (Owner) and devisee of the estate Johnnie Ellis with an address of 3401 Erastus, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-12-9243
Date: December 13, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 5th day of December, 2012, we find the following:

Title Vested In:

Guadalupe Rivera and wife, Alicia Rivera (by Warranty Deed filed for record under Harris County Clerk's File No. R478026)

Property Description: (Map ID# 61) (Tax ID# 014-139-000-0009)

The South forty feet (S 40') of Lot Four (4), in Block One (1), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

- 1) Abstract of Judgment filed April 26, 2010, under Harris County Clerk's File No. 20100166073, styled Cach, LLC, vs. Alicia Rivera, in the principal amount of \$3,564.00, plus cost, interest and attorney's fees.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 63 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 5116 Lelia St, Houston, TX 77026 (Map ID 63, HCAD ID 014140000002)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ²³				Property Ownership		Anticipated Filing Date ²⁴
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

²³ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

²⁴ Specify date or amount of time after RAP approval.

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-12-9274
Date: December 15, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of December, 2012, we find the following:

Title Vested In:

Elizabeth Thomas (by Warranty Deed filed for record under Harris County Clerk's File No. E525502)

Property Description: (Map ID# 63) (Tax ID# 014-140-000-0002)

Lot Two (2), in Block Two (2), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's File No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lelia Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

- 1) Abstract of Judgment filed March 18, 2005, under Harris County Clerk's File No. Y334139, styled USA, vs. Elizabeth Thomas, in the principal amount of \$1,337.00, plus cost, interest and attorney's fees.
- 2) Abstract of Judgment filed January 18, 2006, under Harris County Clerk's File No. Z34499, styled CACV of Colorado, vs. Elizabeth Thomas, in the principal amount of \$2,156.00, plus cost, interest and attorney's fees.
- 3) Abstract of Judgment filed July 9, 2008, under Harris County Clerk's File No. 20080360210, styled Texas Dow Employees Credit Union, vs. Elizabeth Thomas, in the principal amount of \$21,784.00, plus cost, interest and attorney's fees.

NOTES:

- The Harris County Appraisal District indicate Carter Thomas as the current tax payer of the subject property, however we find no conveyance into Carter Thomas. There are numerous probates for persons with the name of Elizabeth Thomas, however we cannot determine which, if any, apply.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Title Report

GF Number: 7910-12-9275
Date: December 15, 2012

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of December, 2012, we find the following:

Title Vested In:

The Heirs and Devisees of the Estate of Francis Potts, deceased (by Warranty Deed filed for record under Volume 511, Page 583 of the Deed Records of Harris County, Texas)

Property Description: (Map ID#64) (Tax ID# 014-140-000-0003)

Lot Three (3), in Block Two (2), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's File No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lelia Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

NOTES:

- The Harris County Appraisal District indicate Avie Potts as the current tax payer of the subject property, however we find no conveyance into Avie Potts. It is assumed that Francis Potts is now deceased, however we find no heirship proceedings or probates of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

²⁹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

³⁰ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS	§
	§
COUNTY OF HARRIS	§

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Six (6), In Block Three (3), of Finn Sudvision oft of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Vol. 1 page 55 of the Map Records of Harris of Harris County, Texas..

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Leroy Mock (Owner) with an address of 5207 Jewel Street, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-13-0337
Date: January 16, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

Sterling Trust Company for the benefit of Charles Mock (by Warranty Deed filed for record under Harris County Clerk's File No. Z202630)

Property Description: (Map ID# 66) (Tax ID# 041-141-000-0006)

Lot Six (6), in Block Three (3), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

None of record.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 68 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 0 Lelia St, Houston, TX 77026 (Map ID 68, HCAD ID 0141410000011)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ³³				Property Ownership		Anticipated Filing Date ³⁴
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

³³ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

³⁴ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS §

§

COUNTY OF HARRIS §

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

The North on half (1/2) of lot 4, in block 3 of the, Finn Subdivision out of Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat record thereof Volume 1 page 55, of the map records of Harris County, Texas

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Leroy Mock (Owner) with an address of 5211 Wylie Street, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ

Title Report

GF Number: 7910-13-0498

Date: January 23, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

Leroy Mock (by Deeds filed for record under Harris County Clerk's File Nos. J664774 and R739434)

Property Description: (Map ID# 68) (Tax ID# 014-141-000-0011)

The North One-half (N 1/2) of Lot Four (4), in Block Three (3), of Finn Subdivision out of the Gagne Homestead, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Notice of Lien for work or improvements, filed May 30, 1986 by Health Officer, City of Houston, in the Office of the County Clerk of Harris County, Texas, under Clerk's File No. K559500, to secure the repayment of the sum of \$180.00 plus interest and costs, for cutting weeds, clearing and cleaning of the subject property.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁴⁷ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁴⁸ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Sixteen (16), in Block Two (2), of Liberty Road Estates, a subdivision in Harris County, Texas according to the map and plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Chamesha Louise Randall (Owner) and devisee of the estate Johnnie Ellis with an address of 4611 Hawk Meadow Drive, Katy, Texas 77449. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-13-0497

Date: January 23, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

John Ellis and wife, Louise Ellis (by Deed filed for record under Volume 2458, Page 665 of the Deed Records of Harris County, Texas) (See notes)

Property Description: (Map ID# 75) (Tax ID# 040-266-010-0017)

Lot Sixteen (16), in Block Two (2), of Liberty Road Estates, an unrecorded subdivision of a 5-1/40th acre tract out of Lot Eight (8), Second Tier from Buffalo Bayou out of the Harris and Wilson Two League Grant in Harris County, Texas and being the same land conveyed to John Grado and V. Billitti by Mary Alice Alexander, et vir, by Deed dated September 14, 1894, recorded in Volume 79 at Page 242 of the Deed Records of Harris County, Texas, and said Lot Number Sixteen (16), in Block Two (2), Liberty Road Estates being more particularly described by metes and bounds as follows:

Beginning at the Northwest corner of said 5-1/40th acre tract;

Thence East 126 feet to a point in the North line of said 5-1/40th acre tract;

Thence South 200 feet along a line parallel to the West line of Lavender Street for Northwest corner of tract to be conveyed;

Thence East 106 feet along a line parallel to the North line of said 5-1/40th acre tract for North east corner;

Thence South 50 feet along the West line of Lavender Street for Southeast corner;

Thence West 106 feet along a line parallel to the North line of said 5-1/40th acre tract for Southwest corner;

Thence North 50 feet along a line parallel to the West line of Lavender Street for Northwest corner and place of beginning.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

Those as set forth by instrument filed for record under Volume 2458, Page 665 of the Deed Records of Harris County, Texas.

Exceptions:

- a) Building set-back line 20 feet in width along the front property line(s), as set forth by instrument filed for record under Volume 2458, Page 665 of the Deed Records of Harris County, Texas.
- b) Building set-back line 3 feet in width along the side property line(s), as set forth by instrument filed for record under Volume 2458, Page 665 of the Deed Records of Harris County, Texas.
- c) Utility easement 5 feet wide along the rear property line, as set forth by instrument filed for record under Volume 2458, Page 665 of the Deed Records of Harris County, Texas.
- d) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's file No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lavender Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

- 1) Notice of child support Lien filed July 28, 2005, under Harris County Clerk's File No. Y648125, against John Ellis, in the principal amount of \$3,660.00, plus costs and interest.
- 2) Notice of Federal Tax Lien filed April 18, 2006, under Harris County Clerk's File No. Z234237, against John Ellis, in the principal amount of \$78,735.00.
- 3) Abstract of Judgment filed October 15, 2010, under Harris County Clerk's File No. 20100444676, styled LHR, Inc., vs. John Ellis, in the principal amount of \$13,986.00, plus cost, interest and attorney's fees.

Notes:

- Harris County Appraisal District reflects the Estate of Johnnie Ellis as the current tax payer of the subject property. We find of record numerous heirship/probate proceedings pertaining to individuals with names similar to John Ellis filed for record in Harris County, Texas. However, we are unable to match any of the said proceedings to John Ellis, record owner.
- We find no heirship/probate proceedings pertaining to Louise Ellis, record owner, filed for record in Harris County, Texas.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

CITY CLERK
HARRIS COUNTY, TEXAS

NOTICE OF LIEN

By direction of the City Council of the City of Houston (in Harris County, Texas) notice is hereby given that such City Council, being the governing body of said City, did by ordinance passed and approved January 12, 1977, determine that it is necessary that the hereinafter designated portions of Lavender, Clementine and various other streets in the City of Houston, Texas, known as topping Project No. 303

be improved, and did order that the same be improved in accordance with certain plans and specifications in such ordinance referred to, and did order that a portion of the cost of such improvement be specially assessed as a lien upon property abutting upon said portion of said streets, all as provided by Article 1105-b, Revised Civil Statutes; and notice is hereby given as required by Article 1220-a, Revised Civil Statutes; that a portion of the cost of such improvement is to be and will be specially assessed as a lien upon property abutting thereon.

The respective portion of the street as contained in the attached lists are referred to as Topping Project No. 303.

Done and signed by me, the City Secretary of said City in its name, this 12th day of January, 1977, by direction of its City Council given and contained in the ordinance aforesaid.

MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Ten (10), and the North Three (3) feet of Lot Nine (9), Liberty Road Estates, an unrecorded subdivision of the Northwest portion of the Gagne tract in Harris County, Texas according to the map and plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Mary D. Hutchins, daughter and sole heir of Essie Lee Hutchins (Owner) with an address of 2938 Lavender Street, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-13-0479

Date: January 22, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

Essie Lee Hutchins (by Warranty Deed filed for record under Harris County Clerk's File No. P469225)

Property Description: (Map ID# 76) (Tax ID# 040-266-010-0019)

Lot Ten (10), and the North Three (3) feet of Lot Nine (9), Liberty Road Estates, an unrecorded subdivision, same being a resubdivision of a tract of 5.140 acres out of the Northwest portion of the Gagne Tract, which is the middle portion of Lot Eight (8), Second Tier from Buffalo Bayou, out of the Harris & Wilson Two League Grant in Harris County, Texas and being the same land conveyed to John Grado and V. Billitti by Mary Alice Alexander, et vir, by deed dated September 14, 1894, recorded in Volume 79, Page 242 of the Deed Records of Harris County, Texas. Said Lot Ten (10) and North Three (3) feet of Lot Nine (9), Liberty Road Estates is further described by metes and bounds as follows to wit:

Beginning at the Northeast corner of said 5.140 acre tract;

THENCE South 50 feet for place of beginning, being the Northeast corner of the tract herein described, and at a point in the East line of the Pancamo tract;

THENCE South 53 feet along the East line of the Pancamo tract a distance of 53 feet for the Southeast corner;

THENCE West a distance of 106.3 feet to a point in the East line of Lavender Street for the Southwest corner;

THENCE North a distance of 53 feet, same being the Southwest corner of Lot 11;

THENCE East a distance of 106.3 feet to the place of beginning.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's File No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lavender Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

NOTICE OF LIEN

130

By direction of the City Council of the City of Houston (in Harris County, Texas) notice is hereby given that such City Council, being the governing body of said City, did by ordinance passed and approved January 12, 1977, determine that it is necessary that the hereinafter designated portions _____ of Lavender, Clementine and various other streets in the City of Houston, Texas, known as topping Project No. 303

_____ be improved, and did order that the same be improved in accordance with certain plans and specifications in such ordinance referred to, and did order that a portion of the cost of such improvement be specially assessed as a lien upon property abutting upon said portion of said streets, all as provided by Article 1105-b, Revised Civil Statutes; and notice is hereby given as required by Article 1220-a, Revised Civil Statutes; that a portion of the cost of such improvement is to be and will be specially assessed as a lien upon property abutting thereon.

The respective portion of the street as contained in the attached lists are referred to as Topping Project No. 303.

Done and signed by me, the City Secretary of said City in its name, this 12th day of January, 1977, by direction of its City Council given and contained in the ordinance aforesaid.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁵¹ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁵² Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS §

§

COUNTY OF HARRIS §

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Tract Six-B (6-B), Block One (1), of Liberty Road Estates, a subdivision in Harris County, Texas, according to the Map or plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Zearlene Osborn, by Contract for Deed from Clark Investment Company (Owner) with an address of 2934 Lavender Street, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-13-0512

Date: January 23, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

Clark Investment Company (by Deeds filed for record under Volume 2009, Page 337 and Volume 2015, Page 716, both of the Deed Records of Harris County, Texas)

Property Description: (Map ID# 77) (Tax ID# 040-266-010-0021)

Tract Six-B (6B), in Block One (1), of Liberty Road Estates, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 1, Page 55 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's file No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lavender Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

Notes:

- Harris County Appraisal District describes the subject property as Tract 6B, however we find no conveyance describing same. According to the Appraisal Map, the subject property is comprised of portions of Lots 8 and 9, in Block 1 of Liberty Road Estates, unrecorded.
- Harris County Appraisal District reflects Zearlene Osborn as the current tax payer, however we find no conveyance out of Clark Investment Company or into Zearlene Osborn.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

The West 42 feet of Lot 8, in Block 6, of Fairgrounds Park Annex, an addition in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Catherine Hall Lawrence (Owner) with an address of 5014 Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

Title Report

GF Number: 7910-13-0311

Date: January 16, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

Herbert B. Hall and Nealie Hall, his wife (by Deed filed for record under Volume 2391, Page 650 of the Deed Records of Harris County, Texas)

Property Description: (Map ID# 81) (Tax ID# 052-257-000-0008)

The West 42 feet of Lot Eight (8), in Block Six (6), of Fairground Park Annex, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 499, Page 70 of the Deed Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Paving Lien Notice filed on January 31, 1977, (topping project no. 303), filed under Harris County Clerk's File No. F029142, (Film Code No. 157-20-1662), executed by the City of Houston, showing portions of Lelia Street, and assessing a portion of the cost thereof, against the owners of the property abutting thereon.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

The East eight feet of Lot Eight (8) and all of the adjoining lot Nine (9), in block Six (6), of Fairground Park Annex, a Subdivision, a subdivision In Harris County, Texas according to the Map or Plat records thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Manuel Castillo (Owner) with an address of 5015 Lelia, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

Manuel M. Castillo (by Warranty Deed filed for record under Harris County Clerk's File No. Y888905)

Property Description: (Map ID# 82) (Tax ID# 052-257-000-0009)

The East 8 feet of Lot Eight (8) and all of the adjoining Lot Nine (9), in Block Six (6), of Fairground Park Annex, a subdivision in Harris County, Texas according to the map or plat thereof, recorded in Volume 499, Page 70 of the Deed Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

None of record.

Exceptions:

- a) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Vendor's Lien retained in Deed dated November 4, 2005, filed for record on November 9, 2005, under Harris County Clerk's File No. Y888905, executed by K.A.P. Investments, Inc., to Manuel M. Castillo, securing one certain promissory note of even date therewith in the principal amount of \$71,000.00, payable to the order of Sterling Financial Investment; said note and Lien being additionally secured by Deed of Trust of even date therewith, in favor of Thomas F. Vettors, as Trustee, with all terms, conditions and stipulations contained therein; including any additional indebtedness secured thereby, as same having been filed for record November 9, 2005 under County Clerk's File No. Y888906. The note and Lien as described herein and as security for the repayment thereof, having been assigned to JPMorgan Chase Bank, N. A., in instrument filed for record under Clerk's File No. Y888907, in the Office of Real Property Records of Harris County, Texas.

Involuntary Liens:

- 1) Notice of Federal Tax Lien filed January 9, 2004, under Harris County Clerk's File No. X314847, against Manuel Castillo, in the principal amount of \$16,302.00.
- 2) Abstract of Judgment filed August 30, 2005, under Harris County Clerk's File No. Y730650, styled the State of Texas, vs. Manuel Castillo, in the principal amount of \$500.00, plus cost, interest and attorney's fees.
- 3) Abstract of Judgment filed September 20, 2012, under Harris County Clerk's File No. 20120433419, styled CACH, LLC, vs. Manuel Castillo, in the principal amount of \$3,196.00, plus cost, interest and attorney's fees.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Institutional Control

Associated Information: Appendices 4, 5

RAP Worksheet 2.4

ID No.: SWR ID 31547

Page 83 of 100

Report Date: December 7, 2015

Complete this worksheet if an institutional control will be used as part of the response action. Include a draft of the proposed institutional controls in Appendix 4. Provide a list of landowners from whom landowner concurrence will be requested, as necessary, in Appendix 5.

Specify the property for which this applies. 3010 Fontinot, Houston, TX 77026 (Map ID 83, HCAD ID 1280850010001)

Repeat this worksheet for each different property for which an institutional control will be used.

Institutional Control	Type of Institutional Control ⁶³				Property Ownership		Anticipated Filing Date ⁶⁴
	Deed Notice	Restrictive Covenant	VCP Certificate of Completion	Equivalent zoning or governmental ordinance	Check if pertinent tract of land is owned by the person	Check if the pertinent tract of land is owned by an innocent owner or operator	
Document use of commercial/industrial land use (§350.31(g))							
Document use of physical or institutional control under Remedy Standard B §350.31(g))		X				X	Within 120 days of RAP approval
Document notice of on-going long term response action (§350.31(h))							
Document use of occupational inhalation criteria as RBELs (§350.74(b)(1))							
Document variance from the default exposure factors (§350.74(j)(2)(L))							
Document the use of a non-default soil exposure area (§350.51(l)(3)&(4))							
Document WCU exclusion area (§350.33(f)(2))							
Document establishing a PMZ (§350.33(f)(4)(C)(I))		X				X	Within 120 days of RAP approval
Document the demonstration of technical impracticability (§350.33(f)(3)(F))		X				X	Within 120 days of RAP approval
Relocation of soils containing COCs for reuse (§350.36(b)(4) and (c)(4))							

⁶³ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁶⁴ Specify date or amount of time after RAP approval.

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Title Report

GF Number: 7910-13-0323

Date: January 16, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

True Vine Baptist Church, a/k/a True Vine Missionary Baptist Church, a/k/a Greater True Vine Baptist Church, a/k/a Greater True Vine Missionary Baptist Church (by Deeds filed for record under Volume 1285, Page 139 and Volume 1656, Page 572 of the Deed Records and under Clerk's File Nos. P517012, S874736, T009320, T924667 and x213261, all of Harris County, Texas)

Property Description: (Map ID# 83) (Tax ID# 128-085-001-0001)

Reserve "A", in Block One (1), of Greater True Vine Missionary Baptist Church, a subdivision in Harris County, Texas according to the map or plat thereof, recorded under Film Code No. 599251, of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

Those as set forth by instrument(s) filed for record under Film Code No. 599251 of the Map Records of Harris County, Texas.

Exceptions:

- a) Building set-back line 10 feet in width along the north, west and south property line(s), as shown by the recorded plat of said subdivision.
- b) Drainage easement 15 feet in width on each side of the centerlines of all natural drainage courses as shown by the recorded plat of said subdivision.

- c) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Deed of Trust dated April 18, 2007, filed for record on April 19, 2007, under County Clerk's File No. 20070237684, in the office of the County Clerk of Harris County, Texas, executed by Greater True Vine Missionary Baptist Church, in favor of David B. Terry, as Trustee, securing the obligations as set out in that certain promissory note of even date therewith in the principal amount of \$300,000.00, payable to the order of Comerica Bank, and subject to all terms, conditions and stipulations contained therein; including any additional indebtedness secured thereby.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY: TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

Title Report

GF Number: 7910-13-0329

Date: January 16, 2013

Texas American Title Company ("Title Company") certifies that a diligent search of the real property records of Texas American Title Company's title plant has been made, as to the herein described property, and as of 8:00 AM on the 9th day of January, 2013, we find the following:

Title Vested In:

True Vine Baptist Church, a/k/a True Vine Missionary Baptist Church, a/k/a Greater True Vine Baptist Church, a/k/a Greater True Vine Missionary Baptist Church (by Deeds filed for record under Volume 1285, Page 139 and Volume 1656, Page 572 of the Deed Records and under Clerk's File Nos. P517012, S874736, T009320, T924667 and X213261, all of Harris County, Texas)

Property Description: (Map ID# 84) (Tax ID# 128-085-002-0001)

Reserve "A", in Block Two (2), of Greater True Vine Missionary Baptist Church, a subdivision in Harris County, Texas according to the map or plat thereof, recorded under Film Code No. 599251 of the Map Records of Harris County, Texas.

SUBJECT TO: Claims of present occupants; discrepancies in area and boundaries; unpaid bills for Labor or Material in connection with recent repairs or new improvements; Unpaid Taxes; changes in Marital or Corporate Status of owner(s) since date of purchase; Homestead Rights or Claims.

Restrictions:

Those as set forth by instrument(s) filed for record under Film Code No. 599251 of the Map Records of Harris County, Texas.

Exceptions:

- a) Building set-back line 10 feet in width along the south and east property line(s), as shown by the recorded plat of said subdivision.
- b) Drainage easement 15 feet in width on each side of the centerlines of all natural drainage courses as shown by the recorded plat of said subdivision.

- c) Subject property is located within the City of Houston or within its extra territorial jurisdiction (within 5 miles of the city limits but outside another municipality) and is subject to the terms, conditions, and provision of City of Houston Ordinance No. 85-1878 and 99-262, pertaining to, among other things the platting and re-platting of real property and to the establishment of building lines. A certified copy of said ordinance was filed of record on August 1, 1991, under Harris County Clerk's File No. N253886.

Property Liens:

- 1) Deed of Trust dated April 18, 2007, filed for record on April 19, 2007, under County Clerk's File No. 20070237684, in the office of the County Clerk of Harris County, Texas, executed by Greater True Vine Missionary Baptist Church, in favor of David B. Terry, as Trustee, securing the obligations as set out in that certain promissory note of even date therewith in the principal amount of \$300,000.00, payable to the order of Comerica Bank, and subject to all terms, conditions and stipulations contained therein; including any additional indebtedness secured thereby.

Involuntary Liens:

None of record.

CAUTION: PROTECTION IS AFFORDED ONLY UNDER THE TERMS OF THE PROPOSED TITLE INSURANCE POLICY. TEXAS AMERICAN TITLE COMPANY (AND ITS UNDERWRITERS OF TITLE INSURANCE) ASSUME NO LIABILITY FOR ERRORS OR OMISSIONS IN HIS REPORT OR FOR VERBAL STATEMENTS.

This is a copy of a preliminary report made for the use of Texas American Title Company only, to determine whether a title insurance policy can be issued. If a copy is furnished to the parties to the transaction, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the results of the Company's title search (upon which only the Company may rely.) None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company should not be liable by reason of furnishing this report or for any verbal statements related thereto. Neither the Company nor its underwriters shall be liable for any title defect unless a title insurance policy is issued by the Company insuring against such defect, and the applicable premium paid therefore. The liability shall then exist only under the terms of the policy (as prescribed by the State Board of Insurance of the State of Texas) and as measured and limited thereby.

Notice: Texas American Title Company disclaims any warranties, expressed or implied, concerning this information. This information is solely for the use of the party requesting it and no one else. Texas American Title Company liability for errors and/or omissions in this information shall be limited to the amount paid for this report. By accepting this form the party requesting the information agrees that the disclaimer of warranties, and liability limitation contained in this paragraph is a part of its contract with Texas American Title Company and shall cover all actions whether arising hereunder by statute, in contract, or in tort.

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot seven of Ballard Gardens, A subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Eine Barrientos with an address of 5006 Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ. These restrictions shall be a covenant running with the land.

For additional information, contact:

TCEQ
Central Records
12100 Park 35 Circle,
Building E
Austin, Texas 78753

Mail: TCEQ - MC 199
P O Box 13087
Austin, Texas 78711-3087

TCEQ Program and Identifier No.: TCEQ SWR No. 31547

This Restrictive Covenant may be rendered of no further force or effect only by a release executed by the TCEQ or its successor agencies and filed in the same Real Property Records as those in which this Restrictive Covenant is filed.

ABSTRACTORS CERTIFICATE
for
5006 Lucile St

We have checked the records on the following property up through and including October 14, 2014, and find as follows:

PROPERTY:

Lot 7 of Ballard Gardens, a subdivision out of the Harris and Wilson Survey in Harris County, Texas, as per plat thereof recorded in Volume 1528, Page 725 of the Deed Records of Harris County, Texas, being more particularly described by metes and bounds attached hereto.

TITLE VESTED IN:

Eine Barrientos by virtue of Deed filed for record under Harris County Clerk's File No. Y038108. (See requirement below)

LIENS:

None of record.

ABSTRACTS OF JUDGMENT, FEDERAL TAX LIENS, ETC.:

None of record.

NOTE: The record owner acquired title to the subject property by Deed filed for record under Harris County Clerk's File No. Y038108, executed by Calvin Norton, Dorothy Norton Bell, Millie Norton Rawls, Clifton Norton and Fedrick D. Norton, Individually and as heirs of the Estate of R. L. Norton, Deceased, and Kerry Norton, Wadrick Norton, Craig Norton, Gregory Norton, Debra Norton, Ida Marie Norton, Individually and as heirs to the Estate of Robert L. Norton, Jr., Deceased. We are unable to locate an Affidavit of Heirship or Probated Will on either R. L. Norton, Deceased or Robert L. Norton, Jr., Deceased. Therefore, proof of their death and heirship must be obtained and filed in the Office of the County Clerk of Harris County, Texas.

NOTICE: STARTEX TITLE COMPANY ASSUMES NO LIABILITY FOR ERRORS OR OMISSIONS IN THIS REPORT OR FOR VERBAL STATEMENTS. THIS IS A COPY OF A PRELIMINARY REPORT MADE FOR STARTEX TITLE COMPANY ONLY, FOR SPECIFIC PURPOSES, AND IT MAY OR MAY NOT BE COMPLETE FOR THE PURPOSE OF OTHERS. If a copy is furnished to other parties, it is to facilitate preparation of the necessary instruments, to point out curative requirements, if any, and to show the result of the Company's title research (upon which only the Company may rely). None of the information contained herein, or the absence of other information, constitutes a representation to any party, other than the Company, as to the status of the title. If a title defect or encumbrance should exist which is not disclosed hereon, the Company shall not be liable by reason of furnishing this report or for any verbal statements related thereto. This shall in no way be construed as Commitment for Title Insurance.

THIS CERTIFICATE SHALL NOT CONSTITUTE A COMMITMENT TO ISSUE TITLE INSURANCE, AND THE LIABILITY HEREUNDER IS LIMITED TO THE CONSIDERATION PAID HEREOF.

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot 8 of Ballard Gardens, a subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Trustees of Norton's Temple COGIC (Owner) with an address of 5008 Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lots Four (4) and Five (5) in Block Six (6) of Fairgrounds Park Annex, a subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Trustees of Norton's Temple COGIC (Owner) with an address of 5008 Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

⁷³ Check the appropriate box(es) to indicate the type of institutional control required for the proposed response action.

⁷⁴ Specify date or amount of time after RAP approval.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

The North 42 feet by 80 feet of the West part of Lot 3, in Block 6, of Fairgrounds Park Annex, an addition in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Catherine Hall Lawrence (Owner) with an address of 5014 Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS
COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Nine (9) of Block Five (5) of Fairground Park addition 8, a subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Verna Cormier Harrison Heir and devisee of Anton Cormier (Owner) with an address of 5017 Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Ten (10) of Block Five (5) of Fairground Park addition 8, a subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Verna Cormier Harrison Heir and devisee of Joseph and Lillie Cormier (Owner) with an address of 5017 Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

For additional information, contact:

EXHIBIT “3”
MAINTENANCE AND MONITORING

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

The West Twenty-five (W-25'), of the South one-half (S ½) of Lot Eleven (11) of Block Two (2) of fairground Park Addition, an addition in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Leticia Serna and Jose A. Martinez (Owner) with an address of 5023 Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

Restrictive Covenant

STATE OF TEXAS
COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

The south ½ of lot twelve (12) and the adjoining east twenty five feet of the south ½ of Lot eleven (11) block two (2) of the Fairground Park addition, A subdivision in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Alean Dorn with an address of 3101 Fontinot Lucille, Houston, Texas 77026. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ. These restrictions shall be a covenant running with the land.

For additional information, contact:

**EXHIBIT “3”
MAINTENANCE AND MONITORING**

Monitoring wells located near the property in the City of Houston right of way (ROW) listed in the table below will be sampled for chemicals of concern (COCs) (see Table C-1) on a semi-annual basis. At each well, the presence of light and dense non-aqueous phase liquids (LNAPL and DNAPL, respectively) will be measured using a decontaminated oil-water interface probe, or equivalent measuring device. The probe will be lowered into the well until the instrument indicates contact of the probe with the NAPL surface, if present, then the top of the water surface, and to the total depth of the well to evaluate for the presence of DNAPL. The depth to NAPL and water measurements will be referenced to the surveyed reference point at the top of the well casing. Levels will be measured to the nearest 0.01 foot and recorded on the water level measurement form. A peristaltic pump with dedicated tubing will be used to purge groundwater from each monitoring well using micro-purging techniques (anticipated purge rate of 0.1 L/min or less). Purge water will be monitored for specific conductance, pH, temperature, dissolved oxygen, oxidation-reduction potential (Redox), and turbidity. Purging will be continued until the field parameters have stabilized per the sampling plan, after which a groundwater sample will be collected for laboratory analysis. Groundwater purged from monitoring wells will be containerized and removed from the property and stored on the Union Pacific Railroad Company property at 4910 Liberty Road. Laboratory analysis will be performed for the COCs on a standard turnaround basis. Analytical results from the groundwater sampling will be submitted to the TCEQ on an annual basis.

Monitoring wells will be inspected on a semi-annual basis for signs of damage, including well pads, casing, locks, and, protective covers.

Restrictive Covenant

STATE OF TEXAS

COUNTY OF HARRIS

This Restrictive Covenant is filed to provide information concerning certain environmental conditions and use limitations pursuant to the Texas Commission on Environmental Quality (TCEQ) Texas Risk Reduction Program Rule (TRRP) found at 30 Texas Administrative Code (TAC), Chapter 350, and affects the real property (Property) described in Exhibit 1 attached hereto and incorporated herein by reference.

Lot Seven (7) and Eight (8) in Block Seven (7), of Fairgrounds Park Annex, an addition in Harris County, Texas according to the map or plat thereof.

Portions of the soils and/or groundwater of the Property contain certain identified chemicals of concern causing those portions of the Property to be considered an Affected Property as that term is defined in the TRRP.

The portion considered to be Affected Property is described on Exhibit 2, which is part of the plume management zone shown in Exhibit 3 attached hereto and incorporated herein by reference.

This Restrictive Covenant is required for the following reasons:

The Affected Property is subject to the TRRP requirements for properties with an area overlying a TCEQ-approved plume management zone. A plume management zone is defined as an area of groundwater containing concentrations of chemicals of concern exceeding the TCEQ-approved protective concentration levels for the site, plus any additional area allowed by the TCEQ in accordance with 30 TAC §350.33(f)(4). A plume management zone was established so that the chemicals of concern in the groundwater are managed such that human exposure is prevented and that other groundwater resources are protected. The attached Exhibit 3 provides the location and extent of the plume management zone and describes the maintenance and monitoring required. This maintenance and monitoring is required until TCEQ approves some modification of those requirements.

As of the date of this Restrictive Covenant, the record owner of fee title to the Property is Thomas Blodget (Owner) with an address of 17 Stonewall, Irvine Ca. 92620. In consideration of the Response Actions by Union Pacific (Responder), approval of the Response Action Completion Report, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Owner has agreed to place the following restrictions on the Property in favor of the TCEQ and the State of Texas, to-wit:

1. Exposure to groundwater underlying the Affected Property for any purpose is prohibited until such time when all of the chemicals of concern no longer exceed their

respective protective concentration levels. The maintenance and monitoring described in Exhibit 4 is required. Any modification of this restrictive covenant is prohibited without prior approval of TCEQ.

2. These restrictions shall be a covenant running with the land.

TO: Eric C. Matzner, P.G.

FROM: Paul Shanklin

DATE: December 22, 2015

RE: Union Pacific Railroad – Houston Wood Preserving Works, TCEQ SWR No. 31547/IHW Permit/Compliance Plan No. 50343 - Summary of Good-Faith efforts to identify and locate property owners regarding in connection with restrictive covenant

The Environmental team at Union Pacific has been working to obtain consent from landowners located in the area of affected groundwater to place restrictive covenants on their properties since August 2014, with the beginning developments of the Plume Management Zone (PMZ). Prior to contacting landowners, Title Reports were prepared by Texas American Title Company from the real property records for the properties in the area of the PMZ. In late August 2014, on behalf of Union Pacific, outside counsel for Union Pacific (now “Baker Wotring”) sent letters by regular and certified mail to landowners identified as having property in the PMZ. The letter complied with the requirements of 30 T.A.C. § 350.111(c) and included a copy of the restrictive covenant. Baker Wotring then contacted Ministers and Pastors that have churches and congregations in the affected neighborhood to arrange a community meeting. Baker Wotring contracted with local residents to distribute flyers throughout the affected area informing the property owners of a meeting to discuss the effect of contaminants found on their property. The informational flyers were placed on every piece of property located within the PMZ.

The community meeting took place at the Greater True Vine Baptist Church on September 11, 2014 and approximately 189 persons attended the meeting. The Environmental team of UP attorneys, staff and outside counsel (collectively the “Team”) explained to the residents that *none* of the properties in the area use the groundwater for drinking; rather, they are on city drinking water provided by the City of Houston. None of the City of Houston groundwater supply wells are in the area of the Site. In addition, no groundwater drinking wells have been identified in the area. The Team further explained that in order to ensure that the shallow groundwater is not used in the future, the Team was contacting the landowners in the area to request that they execute a restrictive covenant which would prohibit use of the shallow groundwater on their property. The residents were informed that the restrictive covenant would be filed in the property records as part of planned work at the site to institute a Plume Management Zone. The Team answered questions from the local residents well into the evening. Maps were displayed identifying the affected properties that Union Pacific was asking to be

subject to the restrictive covenants. Title documents which indicated the rightful owners were also provided.

The Team took names and addresses of the owners and made arrangements with each owner to meet them individually to explain the need for the restrictive covenant and to make sure each person claiming ownership had the proper documentation to execute the covenant. Since September 11, 2014, Team members have made visits to the community on over 150 occasions and spoken to over 200 people who have claimed ownership in properties within the PMZ. There has been no community opposition to placing the restrictive covenant on the deed records. To date approximately 72% of owners have notarized documents indicating their agreement with the deed recordation. Despite these efforts, there are still some properties for which ownership cannot be determined or where owners cannot be located.

Re: Request for Agreement for Restrictive Covenant on 2910 Lavender St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Mr. Carrington:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

A handwritten signature in black ink that reads "Geoffrey Reeder". The signature is written in a cursive, slightly slanted style.

Geoffrey Reeder, P.G.

Re: Request for Agreement for Restrictive Covenant on 2909 Lavender St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Sir or Madam:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Re: Request for Agreement for Restrictive Covenant on 2813 Fontinot St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Mr. and Mrs. Coto:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

Geoffrey Reeder, P.G.

Dear Mr. and Mrs. Longoria:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

A handwritten signature in blue ink that reads "Geoffrey Reeder". The signature is written in a cursive style.

Geoffrey Reeder, P.G.

Re: Request for Agreement for Restrictive Covenant on 5105 Liberty Rd for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Mr. Gonzalez:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

A handwritten signature in blue ink that reads "Geoffrey Reeder". The signature is written in a cursive style with a large initial "G".

Re: Request for Agreement for Restrictive Covenant on 5113 Liberty Rd for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Sir or Madam:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Re: Request for Agreement for Restrictive Covenant on 5201 Wylie St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Ms. Jefferson:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

A handwritten signature in blue ink that reads "Geoffrey Reeder". The signature is written in a cursive style with a large initial "G".

Re: Request for Agreement for Restrictive Covenant on 5201 Liberty Rd for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Sir or Madam:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Re: Request for Agreement for Restrictive Covenant on 5311 Liberty Rd for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Sir or Madam:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

Geoffrey Reeder, P.G.

Dear Mr. Damian:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Re: Request for Agreement for Restrictive Covenant on 5111 Wylie St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Ms. Perez:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

Geoffrey Reeder, P.G.

Dear Mr. and Mrs. Tolbert:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Re: Request for Agreement for Restrictive Covenant on 5011 Wylie St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Sir or Madam:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

A handwritten signature in blue ink that reads "Geoffrey Reeder". The signature is written in a cursive style with a large initial 'G'.

Dear Mr. Vital:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

A handwritten signature in blue ink that reads "Geoffrey Reeder". The signature is written in a cursive style.

Geoffrey Reeder, P.G.

Dear Mr. Thomas:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Re: Request for Agreement for Restrictive Covenant on 2920 Clementine St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Mr. Perkins:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

Geoffrey Reeder, P.G.

Re: Request for Agreement for Restrictive Covenant on 0 Lelia St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Ms. Pittman:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

A handwritten signature in blue ink that reads "Geoffrey Reeder". The signature is written in a cursive style.

Geoffrey Reeder, P.G.

Re: Request for Agreement for Restrictive Covenant on Leila St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Mr. Schrinsky:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

Geoffrey Reeder, P.G.

Re: Request for Agreement for Restrictive Covenant on 5009 Lelia St for Union Pacific Railroad Company – Houston Wood Preserving Works Facility 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Ms. Humphrey:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

A handwritten signature in blue ink that reads "Geoffrey Reeder". The signature is written in a cursive style.

Geoffrey Reeder, P.G.

RE: Request for Agreement for Restrictive Covenant on 5016 Lucille Street for Union Pacific Railroad Company – Houston Wood Preserving Works Facility, 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Sir or Madam:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to

prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting was held on September 11, 2014 at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street. There we provided more information and answered questions the residents had. Your property has been recently added to the affected area. If you have any questions for UPRR, please direct your questions to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, [\(281\) 350-7197](tel:2813507197), or to Paul A. Shanklin, Connelly Baker Wotring, 700 JPMorgan Chase Tower, 600 Travis, Houston, Texas 77002, 713-980-1737. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at [512-239-6363](tel:5122396363), or facsimile [512-239-6377](tel:5122396377), or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

RE: Request for Agreement for Restrictive Covenant on 0 Lucille Street for Union Pacific Railroad Company – Houston Wood Preserving Works Facility, 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Sir or Madam:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to

prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting was held on September 11, 2014 at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street. There we provided more information and answered questions the residents had. Your property has been recently added to the affected area. If you have any questions for UPRR, please direct your questions to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, [\(281\) 350-7197](tel:2813507197), or to Paul A. Shanklin, Connelly Baker Wotring, 700 JPMorgan Chase Tower, 600 Travis, Houston, Texas 77002, 713-980-1737. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at [512-239-6363](tel:5122396363), or facsimile [512-239-6377](tel:5122396377), or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

Geoffrey Reeder, P.G.

RE: Request for Agreement for Restrictive Covenant on 5019 Lucille Street for Union Pacific Railroad Company – Houston Wood Preserving Works Facility, 4910 Liberty Road, Houston, TX, Post-Closure Care Permit No. HW-50343, TCEQ SWR No. 31547

Dear Sir or Madam:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to

prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting was held on September 11, 2014 at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street. There we provided more information and answered questions the residents had. Your property has been recently added to the affected area. If you have any questions for UPRR, please direct your questions to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197, or to Paul A. Shanklin, Connelly Baker Wotring, 700 JPMorgan Chase Tower, 600 Travis, Houston, Texas 77002, 713-980-1737. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

Geoffrey Reeder, P.G.

Dear Mr. Damian:

As you may know, the Union Pacific Railroad Company (“UPRR”) has been conducting on-going environmental investigations at the Former Houston Wood Preserving Works Facility (“HWPW”) located at 4910 Liberty Road in Houston, Texas. UPRR has previously provided information to landowners that it could identify in the vicinity of the HWPW about the work being performed, including information regarding chemicals of concern (“COCs”) identified in the groundwater under or near their properties.

It is important to note that no groundwater drinking wells have been identified in the area and *none* of the properties in the area use the groundwater for drinking or irrigation. All of the properties receive drinking water provided by the City of Houston from water supplies outside the area.

Laboratory analytical data of groundwater samples have revealed concentrations of COCs in the shallow groundwater under the Site, and other properties in the area, in excess of the Texas Commission on Environmental Quality (“TCEQ”) Human Health Tier 1 Protective Concentration Levels (“PCLs”) for Residential Land Use. Data from a groundwater monitoring well near the HWPW indicates that your property is one of the properties in the area. In order to ensure that the shallow groundwater is not used in the future, we are contacting you and other landowners in the area to request that you execute a document called a restrictive covenant which would prohibit use of the shallow groundwater on your property.

This restrictive covenant would be filed in the property records as part of planned work at the Site to institute a Plume Management Zone (“PMZ”). The purpose of the

PMZ is to manage the COCs in the shallow groundwater (between 10 and 80 feet below the ground surface) to prevent human exposure and to protect other groundwater resources. In order to institute the PMZ, notice must be placed in the county deed records of a restriction from use of this shallow groundwater.

A copy of the restrictive covenant form is attached as Exhibit A to this letter. The purpose of this restrictive covenant is to give notice to anyone purchasing the property in the future of the restriction on the use of the shallow groundwater located beneath your property. As noted, your property currently receives water service from the City of Houston. This will not change. The groundwater beneath your property which will be restricted under this covenant is not currently being used, nor is there a likely use for it in the future. Therefore, the requested covenant will not affect the current or expected future use of the property.

In appreciation of your willingness to enter the restrictive covenant, UPRR intends to offer appropriate compensation for the agreement to file the restrictive covenant.

Someone from UPRR will be contacting you in the near future to discuss the proposed restrictive covenant and to answer any questions you may have about the procedure. A public meeting has also been scheduled for September 11, 2014 at 7 p.m. at the Greater True Vine Missionary Baptist Church at 3010 Fontinot Street to provide more information and to answer any questions you may have. In the meantime, any questions you have for UPRR should be directed to Mr. Geoffrey Reeder, UPRR Environmental Site Remediation Manager, 24125 Aldine Westfield Road, Spring, Texas 77373, (281) 350-7197. If you have any other questions regarding the request for a restrictive covenant, you may also contact the TCEQ Office of the Public Interest Counsel by phone at 512-239-6363, or facsimile 512-239-6377, or write to Office of Public Interest Counsel, MC 105, TCEQ, P.O. Box 13807, Austin, TX 78711-3087.

Sincerely,

A handwritten signature in blue ink that reads "Geoffrey Reeder". The signature is written in a cursive style.

Geoffrey Reeder, P.G.

STATISTICAL METHODOLOGY

APPENDIX 7 – STATISTICAL OR GEOSTATISTICAL METHODOLOGIES

The statistical methodologies that will be employed at the Union Pacific Railroad (UPRR) Houston Wood Preserving Works (HWPW) Site include the following:

1. Calculating statistical trends for chemicals of concern (COCs) in groundwater to evaluate potential increases in COCs; and
2. Calculating 95% upper confidence levels (UCLs) to demonstrate compliance with direct exposure criteria for surface soils.

Other statistical approaches may be used as appropriate for soil and groundwater data. The two approaches listed are discussed below.

Groundwater Trend Analysis

As part of the response action to address COCs in groundwater, monitored natural attenuation (MNA) is proposed to address the groundwater protective concentration limit (PCL) exceedance (PCLE) Zones identified at the Site. Trend analysis may be necessary to evaluate increasing trends when groundwater concentrations at the alternate points of exposure (POE) wells exceed the critical PCLs. Two approaches that may be conducted to evaluate statistical trends include the following:

- The Mann-Kendall Analysis; and
- Linear Regression Analysis

The selection of the statistical method will be assessed based on the data set. Typically, the Mann-Kendall test for trend is a nonparametric test that has no distributional assumptions and irregularly spaced measurement periods are permitted, where the Linear Regression is a parametric statistical procedure that is used for analyzing trends in data over time. However, other statistical approaches may also be used to evaluate trends. Details of the Mann-Kendall and linear regression analyses are provided below.

Mann-Kendall Analysis

General

The Mann-Kendall test is a non-parametric statistical procedure that is well suited for analyzing trends in data over time (Gilbert, 1987). The Mann-Kendall test can be viewed as a nonparametric test for zero slope of the first-order regression of time-ordered concentration data versus time. The Mann-Kendall test does not require any assumptions as to the statistical distribution of the data (e.g. normal, lognormal, etc.) and can be used with data sets which include irregular sampling intervals and missing data. The Mann-Kendall test is designed for analyzing a single groundwater constituent, multiple constituents are analyzed separately.

Mann-Kendall Statistic (S)

The Mann-Kendall statistic (S) measures the trend in the data. Positive values indicate an increase in constituent concentrations over time, whereas negative values indicate a decrease in constituent concentrations over time. The strength of the trend is proportional to the magnitude of the Mann-Kendall Statistic (i.e., larger magnitudes indicate a stronger trend).

Data for performing the Mann-Kendall Analysis should be in time sequential order. The first step is to determine the sign of the difference between consecutive sample results. $\text{Sgn}(x_j - x_k)$ is an indicator function that results in the values 1, 0, or -1 according to the sign of $x_j - x_k$ where $j > k$, the function is calculated as follows

$$\begin{aligned} \text{sgn}(x_j - x_k) &= 1 && \text{if } x_j - x_k > 0 \\ \text{sgn}(x_j - x_k) &= 0 && \text{if } x_j - x_k = 0 \\ \text{sgn}(x_j - x_k) &= -1 && \text{if } x_j - x_k < 0 \end{aligned}$$

The Mann-Kendall statistic (S) is defined as the sum of the number of positive differences minus the number of negative differences or

$$S = \sum_{k=1}^{n-1} \sum_{j=k+1}^n \text{sgn}(x_j - x_k).$$

The confidence on the Mann-Kendall statistic can be measured by assessing the S result along with the number of samples, n, to find the confidence in the trend by utilizing a Kendall probability table found in many statistical textbooks (e.g. Hollander, M. and Wolfe, D.A., 1973). The resulting confidence in the trend is applied in the Mann Kendall trend analysis.

Average

The arithmetic mean of a sample of n values of a variable is the average of all the sample values written as

$$\bar{x} = \frac{\sum_{i=1}^n x_i}{n}$$

Standard Deviation

The standard deviation is the square root of the average of the square of the deviations from the sample mean written as

$$s = \sqrt{\frac{\sum_{i=1}^n (x_i - \bar{x})^2}{n - 1}}.$$

The standard deviation is a measure of how the value fluctuates about the arithmetic mean of the data.

Coefficient of Variation (COV)

The Coefficient of Variation (COV) is a statistical measure of how the individual data points vary about the mean value. The coefficient of variation, defined as the standard deviation divided by the average or

$$C.O.V. = \frac{s}{\bar{x}}$$

Values less than or near 1.00 indicate that the data form a relatively close group about the mean value. Values larger than 1.00 indicate that the data show a greater degree of scatter about the mean.

Interpretation of Results: Mann-Kendall Analysis

- The COV is a statistical measure of how the individual data points vary about the mean value. Values less than or near 1.00 indicate that the data form a relatively close group about the mean value. Values larger than 1.00 indicate that the data show a greater degree of scatter about the mean.
- The Mann-Kendall statistic (S) measures the trend in the data. Positive values indicate an increase in constituent concentrations over time, whereas negative values indicate a decrease in constituent concentrations over time. The strength of the trend is proportional to the magnitude of the Mann-Kendall Statistic (i.e., larger magnitudes indicate a stronger trend).
- The “Confidence in Trend” is the statistical confidence that the constituent concentration is increasing (S>0) or decreasing (S<0).
- The “Concentration Trend” for each well is determined according to the following rules, where COV is the coefficient of variation:

MANN-KENDALL ANALYSIS DECISION MATRIX

Mann-Kendall Statistic	Confidence in Trend	Concentration Trend
S > 0	> 95%	Increasing
S > 0	90 - 95%	Probably Increasing
S > 0	< 90%	No Trend
S ≤ 0	< 90% and COV ≥ 1	No Trend
S ≤ 0	< 90% and COV < 1	Stable
S < 0	90 - 95%	Probably Decreasing
S < 0	95%	Decreasing

Linear Regression Analysis

General

As discussed in the EPA Statistical Analysis of Groundwater Monitoring Data at RCRA Facilities – Unified Guidance (EPA, 2009), a common method to measure a linear trend is to compute a linear regression of concentration data when plotted against the time or date of sample collection. Each point along a linear regression trend line is an estimate of the true mean concentration at that point in time. Therefore, a linear regression can be used to assess whether or not the population mean at an alternate point of exposure (POE) well has significantly increased or decreased.

Linear regression is valid if the data set is parametric. Other assumptions for using the statistical technique is that the difference between each concentration measurement and its predicted value from the regression equation are approximately normal in distribution and homoscedastic (i.e., equal in variance at different times and for different mean concentration levels). Significant skewness or the presence of outliers can invalidate the trend analysis based on linear regression. Also, standard linear regression methods do not account for non-detects or missing data values at selected sampling events. Therefore, linear regression is best used for data sets that have few if any non-detects (EPA, 2009).

A minimum of 8 to 10 measurements is generally necessary to compute a linear regression. The regression residuals should be statistically independent and the analysis should be based on reliably quantified measurements. If not, a calculated “trend” may be an artifact induced by changes in quantitation limits over time. Such artifacts of plotting and data reporting should not be considered real trends.

The procedures for calculating the linear regression are taken from the EPA Unified Guidance (EPA, 2009):

Step 1. Construct a time series plot of the compliance point measurements. If a discernible trend is evident, compute a linear regression of concentration against sampling date (time), letting x_i denote the i th concentration value and t_i denote the i th sampling date. Estimate the linear slope \hat{b} with the formula:

$$\hat{b} = \sum_{i=1}^n \frac{(t_i - \bar{t})x_i}{n - 1} \times s_i^2$$

This estimate then leads to the regression equation, given by:

$$\hat{x}_i = \bar{x} + \hat{b} (t - \bar{t})$$

where \bar{t} denotes the mean sampling date, s_i^2 is the variance of sampling dates, \bar{x} is the mean concentration level, and \hat{x}_i represents the estimated mean concentration at time t .

Note: though the variable t above represents time, it could just as easily signify another variable, perhaps a second constituent for which an association with x is estimated.

Step 2. Compute the regression residual at each sampling event i with equation:

$$r_i = x_i - \hat{x}_i$$

Check the set of residuals for lack of normality and significant. Also, plot the residuals against the estimated regression values (\hat{x}_i) to check for non-uniform vertical thickness in the scatter cloud. Make a similar check by plotting the residuals against the sampling dates (t_i).

If the residuals are non-normal and substantially skewed and/or the scatter clouds appear to have a definite pattern (e.g., funnel-shaped; “U”-shaped; or, residuals mostly positive on one end of graph and mostly negative on the other end, instead of randomly scattered around the horizontal line $r = 0$), repeat **Steps 1** and **2** after first attempting a normalizing transformation.

Step 3. Calculate the estimated variance around the regression line (also known as the *mean squared error* [MSE]) with the following equation:

$$s_e^2 = \frac{1}{n-2} \sum_{i=1}^n r_i^2$$

Step 4. Compute the standard error of the linear regression slope coefficient using the s_e^2 result from Step 3.

$$se(\hat{b}) = \sqrt{s_e^2 / \sum_{i=1}^n (t_i - \bar{t})^2}$$

Step 5. Test whether the trend is significantly different from zero by forming the t -statistic ratio in the following equation:

$$t_b = \hat{b} / se(\hat{b})$$

This t -statistic (t_b) has $n-2$ degrees of freedom [df]. Given a level of significance (α), choose the critical point (t_{cp}) for the test as the $(1-\alpha) \times 100$ th percentage point of the Student's t -distribution with $(n-2)$ df or $t_{cp} = t_{1-\alpha, n-2}$. Compare t_b against the critical point. If $t_b > t_{cp}$, conclude that the slope of the trend is both positive and significantly different from zero at the α -level of significance. If $t_b < -t_{cp}$, conclude there is a significant decreasing trend. If neither exists, there is insufficient evidence of an increasing or decreasing trend.

Both of these calculations can be conducted using various computer statistical software. One approach is to use the Monitoring and Remediation Optimization System (MAROS) Software (AFCEE, 2006) or U.S. Environmental Protection Agency (EPA) ProUCL software program (EPA, 2013).

Statistical Determination of 95% Upper Confidence Limit (UCL) for COC Concentrations in Surface Soils

As discussed in the Response Action Plan (RAP), surface soils with cPCL exceedances in the Southern Disposal Ditch (SDD) (SWMU 2), Inactive Wastewater Lagoon (AOC 6), and areas north of the AST Area (SWMU 8) will be consolidated in the area of SWMUs 4, 5, and 8 using the EPA Area of Contamination (AOC) policy. As allowed under the EPA AOC policy, soils may be consolidated within the AOC (defined at the Site as the “Affected Property”) and not be considered to be removed from the land or generated. Based on the current areas delineated, the estimated volume of soil to be consolidated from these areas is approximately 23,000 cubic yards. However, prior to consolidation of the soils and construction of the cap, additional soil samples will be collected to refine the surface soil PCLE Zone to ensure the proper area of excavation and cap area construction (see RAP Attachments 2A-1a and 2A-1b).

Additional soil sampling will be conducted to evaluate the representative concentrations of chemicals of concern (COCs) in surface soil using statistics assuming a ½-acre default area for the current surface soil PCLE Zone near the Inactive Waste Water Lagoon (AOC 6) and the southern end of the SDD (SWMU 2) in accordance with 30 TAC §350.51(1). The proposed additional sampling was developed based on at least eight surface soil samples collected within a ½-acre exposure area.

In accordance with 30 TAC§350.79(2)(A), the statistical test will be performed to determine if COCs in surface soils at the Site exceeded the critical PCL ($^{Tot}SOIL_{Comb}$) established during the critical PCL development process conducted as part of the APAR (PBW, 2010). 30 TAC§350.79(2)(A) states that the requirement of a response action may be determined by using an appropriate statistical method. The statistical method identified in the TRRP rule is as follows:

- (i) The null hypothesis (H_0) is that the mean of the COC concentrations in the affected property is equal to or greater than the critical PCL;
- (ii) The alternative hypothesis (H_a) is that the mean COC concentration is less than the critical PCL;
- (iii) The test is performed at a Type I error rate of 5%; and
- (iv) Any statistical model used for testing this hypothesis set must be demonstrated to meet these performance standards.

For the surface soil COCs, the analysis will be performed to determine the mean concentration in surface soils in the area of AOC 6 with a Type I error rate of 5%. This analysis will be performed using the EPA’s ProUCL software program (EPA, 2013) to calculate a distribution-free (i.e., nonparametric) 95% upper confidence limit (UCL) concentration from the selected data set, including non-detect concentration values (i.e., represented by the sample quantitation limit). ProUCL calculates various types of the 95% UCLs, and then makes a recommendation for the most appropriate UCL type. The 95% UCL of the arithmetic mean for each ½-acre study area will be calculated using ProUCL. Soil data sets will be evaluated for outliers to identify hot spots for excavation. The statistical analysis will evaluate removal of hot spot areas and reassess the 95% UCL for a given COC to the cPCL for that exposure area. The primary COC in this area defining the PCLE Zone is benzo(a)pyrene, which limiting PCL is the $^{Tot}Soil_{Comb}$ PCL.
