

Water Infrastructure Improvements for the Nation (WIIN) Act Grants

The WIIN Act addresses, supports, and improves America's drinking water infrastructure. The three grants were established to promote public and environmental health by providing investment in the nation's small and disadvantaged communities, their public water systems, and schools and child care facilities to address lead exposure in drinking water, other contaminants, and compliance issues.

Objective

Funding Amount

Who Receives Funding

Public water systems; tribes; nonprofit organizations; municipalities; and states, interstate, or intermunicipal agencies

States, territories, and tribes

States, territories, and tribes

Deadline for participating states to submit their final application was June 1, 2020. Awardees were selected on October 23, 2020

Applications opened on www.Grants.gov in September 2021. The next deadline is June 30, 2022

State allotments were announced for states, territories, and tribes on March 15, 2021

Reduce lead exposure in drinking water through lead service line replacement and treatment improvement projects for public water systems and remediation projects in schools and child care facilities

Assist small, underserved and disadvantaged communities comply with the Safe Drinking Water Act through infrastructure projects; technical, managerial, and financial capacity building activities; and contaminant-specific activities

Assist in implementing voluntary programs in schools and child care facilities to establish best practices, reduce lead contamination, and establish trust between schools/child care facilities and their communities to test for lead in drinking water

FY21: \$20 M
FY22*: \$81.5 M

FY21: \$26 M
FY22*: \$41 M

FY21: \$26.5 M
FY22*: \$36.5 M

Highlights

In 2020, 947 schools and 1,758 child care facilities were tested for lead in drinking water using WIIN grant funding

Grants have been awarded to 74 small and disadvantaged communities in 39 states, territories, and tribal communities in FY2018 and FY2019

Ten projects have been awarded to reduce lead exposure in drinking water by replacing thousands of lead service lines and removing potential sources of lead in hundreds of schools and child care facilities across the United States

*FY22 funding amounts are estimates based on a presidential budget and do not necessarily reflect final appropriations.
