of Ypsilanti, County of Washtenaw, )  
State of Michigan. )

SIP No. 03-1982

STIPULATION FOR ENTRY OF CONSENT ORDER  
AND  
FINAL ORDER

This proceeding resulted from allegations by the staff of the Air Quality Division of the Department of Natural Resources (hereinafter referred to as the "Staff"). The Staff alleges that General Motors Corporation, Hydra-matic Division, a Delaware corporation (hereinafter referred to as the "Company"), located in the Township of Ypsilanti, County of Washtenaw, State of Michigan, is emitting particulate matter from Boiler No. 5 which, if not reduced by December 31, 1982, will be in excess of allowable limits as established by Administrative Code 1980 AACRS, R 336.1331. The Company and the Staff agree to the termination of this proceeding by entry of a Final Order by consent.

The Company and the Staff agree as follows:

1. The Company admits that the Chief of the Air Quality Division of the Department of Natural Resources is authorized by resolution of the Air Pollution Control Commission (hereinafter "Commission") adopted June 28, 1977, as agent of the Commission to enter into this Final Order by consent.
2. The Company stipulates that the Chief of the Air Quality Division of the Department of Natural Resources is charged with the investigation and enforcement of all orders, regulations, rules, standards and statutes of the State of Michigan concerning the emission and control of air contaminants.

3. The Company stipulates that the termination of this matter by a Final Order to be entered as a Consent Order is proper and acceptable.

4. The Company and the Staff agree that the signing of this Stipulation is for settlement purposes only and does not constitute an admission by the Company that the law has been violated. Both Staff and the Company agree that the particulate emissions from Boiler No. 5 should be abated to achieve compliance with the aforementioned regulations in accordance with the following schedule:

- (a) By the effective date of this Order, the Company shall submit to Staff, pursuant to the Commission's rules, plans and specifications and an application for an installation permit describing the air pollution control device(s) and/or other equipment to be used to control the particulate emissions from Boiler No. 5 to obtain compliance with the Commission's rules.
- (b) By the effective date of this Order, the Company shall submit to the Staff evidence to substantiate that the required air pollution control device(s) and/or other equipment to be used to control the particulate emissions from Boiler No. 5 have been placed on order with the manufacturer.
- (c) By May 1, 1982, and after receiving the installation permit referred to in paragraph (a), above, the Company shall begin on-site installation of said air pollution control device(s) and/or other equipment and notify the Staff in writing that this installation has begun.
- (d) By September 1, 1982, the Company shall have placed in operation said air pollution control device(s) and/or other equipment and notify the Staff in writing that the device(s) and/or equipment have been placed in operation.
- (e) By November 1, 1982, the Company shall complete the testing (conducted according to procedures approved by Staff) of said air pollution control device(s) and/or other equipment and submit to the Staff the detailed report of the test data and results.

(f) After November 1, 1982, the particulate emissions from Boiler No. 5 shall not exceed 0.30 pounds of particulate per 1,000 pounds of exhaust gases corrected to 50 percent excess air.

5. The Staff and the Company do not regard this abatement program as a variance subject to the 12-month limitation specified in Section 22 of the Air Pollution Act, being MCLA 336.32. Approval of this abatement program is not a major state action for purposes of further environmental review pursuant to Executive Order 1974-4.

6. Staff and the Company both acknowledge that a public hearing on this abatement program was held on April 20, 1982. Both Staff and the Company consent to enforcement of this Stipulation and Final Order in the same manner and by the same procedures for all final orders entered pursuant to Section 16 of 1972 PA 257, MCLA 336.26, including enforcement pursuant to 1970 PA 127, MCLA 691.1201 et. seq.; MSA 14.528(201) et. seq.

FINAL ORDER

This Commission having had opportunity to review the above stated Stipulation for Entry of Consent Order, and this Commission having authorized the Chief of the Air Quality Division of the Department of Natural Resources as agent of the Commission to enter into consent orders,

IT IS ORDERED that this Consent Order shall be entered in the record of this Commission as stated herein.
