

## How to update the DfE logo on current DfE-certified products

To update the DfE logo on a product that has already received DfE certification, review is required from both Office of Pollution Prevention and Toxics (OPPT) and Office of Pesticide Programs (OPP)—please see the steps in the diagram below.

Note that if your submission includes other label amendments beyond updating the DfE logo, the request will still be expedited, but the decision timeline may vary depending on the complexity of the label changes. Please outline any such changes clearly in your fast track amendment cover letter.

For guidelines on proper use of the new DfE logo, please contact [thompson.tony@epa.gov](mailto:thompson.tony@epa.gov).
