Attachment 5: Air Emission Permit No. 12300391-102 showing only SIP conditions to be incorporated by reference

The attached version of Air Emission Permit No. 12300391-102 contains only the SIP conditions that will be relevant upon approval of this submittal by EPA. This document is used by EPA to incorporate these permit conditions by reference into federal law.

Air Individual Permit Major Amendment 12300391-102

Permittee: Bulk Silos Facility name: Bulk Silos

> 2145 Childs Road Saint Paul, MN 55106 Ramsey County

Operating permit issuance date: November 17, 2006

Expiration date: Non-expiring Permit * All Title I Conditions do not expire

Major Amendment: June 3, 2021

Permit characteristics: State; Limits to avoid Part 70/ Limits to avoid NSR; Limits to avoid NSR

Each new or revised condition designated "Title I Condition: 40 CFR 50.6 (SIP for PM10)" is not effective or enforceable until approved by U.S. Environmental Protection Agency (EPA) as a State Implementation Plan (SIP) revision under Title I of the Clean Air Act.

The emission units, control equipment and emission stacks at the stationary source authorized in this permit amendment are as described in the submittals listed in the Permit Applications Table.

This permit amendment supersedes Air Emission Permit No. 12300391-101 and authorizes the Permittee to modify and operate the stationary source at the address listed above unless otherwise noted in the permit. The Permittee must comply with all the conditions of the permit. Any changes or modifications to the stationary source must be performed in compliance with Minn. R. 7007.1150 to 7007.1500. (Any additions or changes to conditions incorporated into Minnesota's State Implementation Plan (SIP) under 40 CFR § 52.1220, designated "Title I Condition: 40 CFR 50.6 (SIP for PM10)" must go through the federal SIP approval process before becoming effective.) Terms used in the permit are as defined in the state air pollution control rules unless the term is explicitly defined in the permit.

Unless otherwise indicated, all the Minnesota rules cited as the origin of the permit terms are incorporated into the SIP under 40 CFR § 52.1220 and as such are enforceable by EPA Administrator or citizens under the Clean Air Act.

2. Where to send submittals

Send submittals that are required to be submitted to the U.S. EPA regional office to:

Chief Air Enforcement Air and Radiation Branch EPA Region V 77 West Jackson Boulevard Chicago, Illinois 60604

Each submittal must be postmarked or received by the date specified in the applicable Table. Those submittals required by Minn. R. 7007.0100 to 7007.1850 must be certified by a responsible official, defined in Minn. R. 7007.0100, subp. 21. Other submittals shall be certified as appropriate if certification is required by an applicable rule or permit condition.

Send submittals that are required by the Acid Rain Program to:

U.S. Environmental Protection Agency Clean Air Markets Division 1200 Pennsylvania Avenue NW (6204N) Washington, D.C. 20460

Send any application for a permit or permit amendment to:

Fiscal Services – 6th Floor Minnesota Pollution Control Agency 520 Lafayette Road North St. Paul, Minnesota 55155-4194

Also, where required by an applicable rule or permit condition, send to the Permit Document Coordinator notices of:

- a. Accumulated insignificant activities
- b. Installation of control equipment
- c. Replacement of an emissions unit, and
- d. Changes that contravene a permit term

Unless another person is identified in the applicable Table, send all other submittals to:

Or

AQ Compliance Tracking Coordinator Industrial Division Minnesota Pollution Control Agency 520 Lafayette Road North St. Paul, Minnesota 55155-4194 Email a signed and scanned PDF copy to:
submitstacktest.pca@state.mn.us
(for submittals related to stack testing)

AQRoutineReport.PCA@state.mn.us
(for other compliance submittals)
(See complete email instructions in "Routine Air Report Instructions Letter" at
http://www.pca.state.mn.us/nwqh472.)

Permit expires: Non-expiring Permit Page 5 of 63

3. Facility description

The Bulk Silos (Facility) is located at 2145 Childs Road, Saint Paul, Ramsey County, Minnesota.

Bulk Silos is a Portland cement distribution terminal. The facility currently operates six silos with pollution control equipment used for storage and distribution of cementitious products. The material is currently received by rail, stored in the silos, and distributed by truck. The main sources of emissions are Particulate Matter (PM), Particulate Matter less than 10 microns (PM10), and Particulate Matter less than 2.5 microns (PM2.5). Emissions are controlled by baghouses on all of the operations at the facility.

The major amendment is for the construction of three new silos (EQUI 8, EQUI 9, and EQUI 10), a new bucket elevator (EQUI 5), and nine new fabric filters (TREA 7, TREA 8, TREA 10, TREA 11, TREA 12, TREA 13, TREA 14, TREA 15, and TREA 16). Three existing fabric filters will be replaced (TREA 1 with TREA 5, TREA 2 with TREA 6, and TREA 3 with TREA 9). The Facility will also be adding barge unloading, and the material will be conveyed pneumatically from the barges to the storage silos. Many permit requirements are triggered by the startup of "the Project" which is defined as the startup of EQUI 5, EQUI 8, EQUI 9, and/or EQUI 10.

After startup of the Project, product will no longer be unloaded into Silo 3 (EQUI 11). This silo will serve as a storage silo for the cementitious product in Silos 7, 8, and 9 (EQUIS 8, 9, and 10) as it is transferred from these silos, to the bucket elevator, to EQUI 11, and eventually to the truck loading operation (EQUI 4).

Permit issued: June 3, 202112300391-102Permit expires: Non-expiring PermitPage 6 of 63

5. Limits and other requirements

Requirement number	Requirement and citation
TFAC 1	Childs Road Terminal
5.1.1	This permit requires modeling to demonstrate compliance with the National Ambient Air Quality Standards (NAAQS). The Permittee may not make any change at the source that would result in an increase in PM10 or PM2.5 emissions until it can be demonstrated that emissions from the facility as permitted do not cause an exceedance of the NAAQS. This includes changes that might otherwise qualify as insignificant modifications and minor or moderate amendments. [40 CFR pt. 51, Minn. R. 7007.0800, subp. 2(A)&(B), Minn. R. 7009.0020-7009.0090, Minn. Stat. 116.07, subd. 4a(a), Title I Condition: 40 CFR pt. 51.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.1.2	ACTIVITIES NOT REQUIRING A MODIFICATION TO THE SIP: The Permittee is authorized to make changes to the facility without obtaining a modification to the SIP as long as the change does not increase from any emission point, the PM10 emission rates (either lb/hr or gr/dscf) or overall PM10 emissions, or alter equipment or parameters described in Appendix A, which forms the basis of the PM10 modeling. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.1.3	ACTIVITIES REQUIRING A MODIFICATION TO THE SIP: Activities requiring a modification of the SIP prior to the Permittee commencing the activity include, but are not limited to, the following: 1. Any decrease in stack emissions exit velocity contained in Appendix A, Table 1; 2. Any decrease in the exit point heat content of stack emissions contained in Appendix A, Table 1; 3. Any reduction in stack height below that contained in Appendix A, Table 1; 4. Any increase in stack exit diameter above that contained in Appendix A, Table 1; and 5. Any construction or modification of structures that increase the effective structural dimensions contained in Appendix A, Table 1. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.1.4	Upon startup of the Project: ACTIVITIES REQUIRING A MODIFICATION TO THE SIP: Activities requiring a modification of the SIP prior to the Permittee commencing the activity include, but are not limited to, the following: 1. Any decrease in stack emissions exit velocity contained in Appendix A, Table 2; 2. Any decrease in the exit point heat content of stack emissions contained in Appendix A, Table 2; 3. Any reduction in stack height below that contained in Appendix A, Table 2; 4. Any increase in stack exit diameter above that contained in Appendix A, Table 2; and 5 Any construction or modification of structures that increase the effective structural dimensions contained in Appendix A, Table 2. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.1.5	General Operation and Maintenance Requirements for the SIP: The Permittee shall operate and maintain the process and control equipment described in Appendix A according to the parameters set forth in Appendix A. The parameters were used in the computer modeling performed to demonstrate that the Childs Road portion of the PM10 maintenance area will attain compliance with the PM10 NAAQS. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.1.6	Shutdown or Breakdown of Pollution Control Equipment: In an event of a shutdown or breakdown of pollution control equipment, the Permittee shall follow the shutdown and breakdown procedures found in Minn. R. 7019.1000. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.1.7	Construction and Operation of SIP Emission Units: The Permittee may begin actual construction of new emission units or modification to existing emission units upon permit issuance. However, the

Permit Issued: June 3, 202112300391-102Permit Expires: Non-expiring PermitPage 9 of 63

Requirement number	Requirement and citation
	Permittee shall not operate any new emission unit or modified emission unit until any required SIP amendment is approved by EPA. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.1.8	Permanent Records for SIP: The Permittee shall permanently maintain the following information together with all amendments, revisions, and modifications to this information:
	1. The Permittee shall maintain a file or files of information on the design, construction and operation of each emission facility, emission source, stack, structures pertinent to modeling for downwash, and any other information required to conduct PM10 ambient air quality modeling of emissions from the facility.
	2. The Permittee shall maintain a file at the facility which includes all PM10 emission compliance demonstration plans which upon approval by the MPCA or EPA become integral and enforceable parts of the SIP. [40 CFR pt. 51, Minn. R. 7007.0800, subp. 5, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.1.9	Non-Permanent Records for SIP: The Permittee shall retain all records at the stationary source for a period of six (6) years from the date of the required monitoring, sample, measurement, or report that corresponds with a State Implementation Plan (SIP) Title I Condition include, but not limited to the following:
	 Monitoring, Testing (if required by the Commissioner, and other Records); Startup, Shutdown, Bypass and Breakdown for each piece of process equipment, control
	equipment, emission stack, and monitoring system; 3. Any exceedance of an emission limitation or opacity limitation and any noncompliance with an
	operational requirement at the facility; 4. All required documents, records, reports and plans in a form suitable for determination of the
	facility's compliance with the SIP by EPA or MPCA staff.
	The Permittee shall maintain the information at the facility in files which are easily accessible of inspection by EPA or MPCA staff, and are available for inspection. [40 CFR pt. 51, Minn. R. 7007.0800, subp. 5, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.1.10	Reporting: The Permittee may undertake certain changes to the facility without obtaining a modification to the SIP. However, if the Permittee does make a change, and if the change in any way affects PM10 emissions (reduces the amount or changes the concentration, size, character, velocity, direction, or location of PM10 emissions) the Permittee shall notify the Commissioner in writing at least 30 days prior to undertaking the change. The notification shall describe the change and why it does not require a modification of the SIP. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]

5.21.14	Pressure Drop >= 0.5 and <= 6.0 inches of water, unless a new range is set pursuant to Minn. R. 7017.2025, subp. 3 based on the values recorded during the most recent MPCA-approved performance test where compliance was demonstrated. The new range shall be implemented upon receipt of the Notice of Compliance letter granting preliminary approval. The range is final upon issuance of a permit amendment incorporating the change.
	If the recorded pressure drop is outside the required range, the emissions during that time shall be considered uncontrolled until the pressure drop is once again within the required range. The period of time for which the pressure drop is considered out of range shall be reported as a deviation. The Permittee shall record the pressure drop at least once every 24 hours when in operation. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP)]
TREA 7	Silo 1 Baghouse
5.22.1	Upon startup of TREA 7: The Permittee shall vent emissions from EQUI 7 to TREA 7 whenever EQUI 7 operates, and operate and maintain TREA 7 at all times that any emissions are vented to TREA 7. The Permittee shall document periods of non-operation of the control equipment TREA 7 whenever EQUI 7 is operating. [40 CFR pt. 51, Minn. R. 7007.0800, subp. 2(A)&(B), Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y, Title I Condition: Avoid major modification under 40 CFR 52.21(b)(2) & Minn. R. 7007.3000, Title I Condition: Avoid major source under 40 CFR 52.21(b)(1)(i) & Minn. R. 7007.3000, To avoid major source under 40 CFR 70.2 & Minn. R. 7007.0200]
5.22.2	If the Permittee replaces TREA 7, the replacement control must meet or exceed the control efficiency requirements of TREA 7 as well as comply with all other requirements of TREA 7. Prior to making such a change, the Permittee shall apply for and obtain the appropriate permit amendment, as applicable.
	If no amendment is needed for the replacement, the Permittee shall submit an electronic notice to the Agency using Form CR-05. The notice must be received by the Agency seven working days prior to the commencement/start of replacement. [40 CFR pt. 51, Minn. R. 7007.0800, subp. 2(A)&(B), Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y, Title I Condition: Avoid major modification under 40 CFR 52.21(b)(2) & Minn. Permit Issued: June 3, 202112300391-102Permit Expires: Non-expiring PermitPage 40 of 63

Requirement number	Requirement and citation
5.26.14	Pressure Drop >= 0.5 and <= 6.0 inches of water, unless a new range is set pursuant to Minn. R. 7017.2025, subp. 3 based on the values recorded during the most recent MPCA-approved performance test where compliance was demonstrated. The new range shall be implemented upon receipt of the Notice of Compliance letter granting preliminary approval. The range is final upon issuance of a permit amendment incorporating the change.
	If the recorded pressure drop is outside the required range, the emissions during that time shall be considered uncontrolled until the pressure drop is once again within the required range. The period of time for which the pressure drop is considered out of range shall be reported as a deviation. The Permittee shall record the pressure drop at least once every 24 hours when in operation. [40 CFR pt. 51, Title I Condition: 40 CFR pt. 52, subp. Y]
TREA 12	Silo 8 Baghouse
5.27.1	The Permittee shall vent emissions from EQUI 9 to TREA 12 whenever EQUI 9 operates, and operate and maintain TREA 12 at all times that any emissions are vented to TREA 12. The Permittee shall document periods of non-operation of the control equipment TREA 12 whenever EQUI 9 is operating. [40 CFR pt. 51, Minn. R. 7007.0800, subp. 2(A)&(B), Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y, Title I Condition: Avoid major modification under 40 CFR 52.21(b)(2) & Minn. R. 7007.3000, Title I Condition: Avoid major source under 40 CFR 52.21(b)(1)(i) & Minn. R. 7007.3000, To avoid major source under 40 CFR 70.2 & Minn. R. 7007.0200]
5.27.2	If the Permittee replaces TREA 12, the replacement control must meet or exceed the control efficiency requirements of TREA 12 as well as comply with all other requirements of TREA 12. Prior to making such a change, the Permittee shall apply for and obtain the appropriate permit amendment, as applicable.
	If no amendment is needed for the replacement, the Permittee shall submit an electronic notice to the Agency using Form CR-05. The notice must be received by the Agency seven working days prior to the commencement/start of replacement. [40 CFR pt. 51, Minn. R. 7007.3000, Title I Condition: Avoid major source under 40 CFR 52.21(b)(1)(i) & Minn. R. 7007.3000, To avoid major source under 40 CFR 70.2 & Minn. R. 7007.0200]

 Permit Issued: June 3, 2021
 12300391-102

 Parmit Forming Name (1) and 10 a

Permit Expires: Non-expiring Permit Page 48 of 63

Requirement number	Requirement and citation
5.31.7	Recordkeeping of Visible Emissions: The Permittee shall record every 24 hours during operation the time and date of each visible emission inspection and whether or not any visible emissions were observed, and take the appropriate corrective actions.
	The permittee shall record every calendar day the total time the emission unit is in operation during that calendar day. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.31.8	Visible Emissions: The Permittee shall check the fabric filter stack (STRU 33) for any visible emissions once each day of operation during daylight hours. [40 CFR pt. 51, Minn. R. 7007.0800, subps. 4-5, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.31.9	Recordkeeping of Pressure Drop. The Permittee shall record every 24 hours, if in operation, the time and date of each pressure drop reading and whether or not the recorded pressure drop was within the range specified in this permit and take the appropriate corrective actions. If pressure drop range exceed the permitted limit, the Permittee shall report it as a deviation in the Company's semiannual report. The permittee shall record every calendar day the total time the emission unit is in operation during that calendar day. [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
5.31.14	Pressure Drop >= 0.5 and <= 6.0 inches of water, unless a new range is set pursuant to Minn. R. 7017.2025, subp. 3 based on the values recorded during the most recent MPCA-approved performance test where compliance was demonstrated. The new range shall be implemented upon receipt of the Notice of Compliance letter granting preliminary approval. The range is final upon issuance of a permit amendment incorporating the change.
	If the recorded pressure drop is outside the required range, the emissions during that time shall be considered uncontrolled until the pressure drop is once again within the required range. The period of time for which the pressure drop is considered out of range shall be reported as a deviation. The

	Permittee shall record the pressure drop at least once every 24 hours when in operation. [40 CFR pt.
	51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]

6. Submittal/action requirements

This section lists most of the submittals required by this permit. Please note that some submittal requirements may appear in the Limits and Other Requirements section, or, if applicable, within a Compliance Schedule section.

TFAC 1	Childs Road Terminal
6.1.1	PM10 Performance Test Corrective Actions: The Permittee shall submit a computer dispersion modeling protocol for PM10 refined modeling: Due 180 days after the Permittee receives a 2nd notice of noncompliance (NON) from the MPCA stating that they have failed to pass the PM10 emission rate performance test at COMG 2, COMG 4, and/or EQUI 4. Upon receipt of the first NON, the Permittee will retest one more time to measure emissions. The protocol will describe the proposed modeling methodology and input data, in accordance with MPCA modeling guidance for Title V air dispersion modeling analyses. [40 CFR pt. 51, Minn. R. 7007.0800, subp. 2(A)&(B), Minn. R. 7009.0020-7009.0090, Minn. Stat. 116.07, subd. 4a(a), Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
6.1.2	PM < 10 micron: The Permittee shall submit computer dispersion modeling results due 270 calendar days after the Permittee receives a 2nd notice of noncompliance (NON) from the MPCA stating that they have failed to pass the PM10 emission rate performance test at COMG 2, COMG 4, and/or EQUI 4. [40 CFR pt. 51, Minn. R. 7007.0800, subp. 2(A) & (B), Minn. R. 7009.0020-7009.0090, Minn. Stat. 116.07, subd. 4a(a), Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]
6.1.5	Annual Report for SIP: due 30 days after end of each calendar year following Permit Issuance to the Commissioner. The report shall contain the following information: a record of data used in calculating PM10 emissions, and calculations of the PM10 emissions; a record of each unscheduled startup, shutdown, and breakdown of process and control equipment; a summary record of excess PM10 emissions, opacity exceedances and noncompliance with fugitive emissions requirements (or the Permittee shall state if no exceedances, and noncompliance conditions occurred in the calendar year [40 CFR pt. 51, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]

Requirement number	Requirement and citation
COMG 2	Unloading Silos
6.2.1	PM < 10 micron: The Permittee shall conduct an initial performance test due 180 calendar days after startup of the Project and at a minimum every 60 months thereafter to verify the emission factor of 0.0000863 lb/ton.
	The Commissioner will set the subsequent test frequency as stated in a Notice of Compliance (NOC) or Notice of Verification (NOV) letter with review of the initial performance test. Subsequent tests shall be completed no less than every 60-months by the due date (month and day) based on the initial test date or more frequently as stated in the NOC/NOV letter.
	If the Commissioner sets a test frequency at less than every 60 months, the Permittee must apply for an administrative amendment to incorporate the prescribed test frequency into the permit. A major amendment is required to reduce the test frequency once set in the permit.
	The performance test shall be conducted at worst-case conditions defined at Minn. R. 7017.2005, subp. 8 or at the operating conditions described at Minn. R. 7017.2025, subp. 2, using EPA Reference Methods 201A and 202, or other method approved by MPCA in the performance test plan approval.
	Testing shall be completed on two members of COMG 2. Testing shall be completed on a rotating basis such that no single silo within COMG 2 is tested twice before all other silos have been tested once.
	Testing conducted during the 60 days prior to a performance test due date will not reset the due date for future testing.
	Testing conducted more than 60 days prior to the specified due date satisfies this test due date requirement but will reset future performance test due dates based on the most recent performance test date. [40 CFR pt. 51, Minn. R. 7007.0800, subp. 2(A) & (B), Minn. R. 7017.2020, subp. 1, Title I Condition: 40 CFR 50.6(PM10 SIP), Title I Condition: 40 CFR pt. 52, subp. Y]

COMG 3	Existing Unloading Silos
6.3.1	PM < 10 micron: The Permittee shall conduct an initial performance test due 24 months after Permit Issuance Date and at a minimum every 60 months thereafter to verify the emission factor of 0.0000863 lb/ton.
	The Commissioner will set the subsequent test frequency as stated in a Notice of Compliance (NOC) or Notice of Verification (NOV) letter with review of the initial performance test. Subsequent tests shall be completed no less than every 60-months by the due date (month and day) based on the initial test date or more frequently as stated in the NOC/NOV letter.
	If the Commissioner sets a test frequency at less than every 60 months, the Permittee must apply for an administrative amendment to incorporate the prescribed test frequency into the permit. A major amendment is required to reduce the test frequency once set in the permit.
	The performance test shall be conducted at worst-case conditions defined at Minn. R. 7017.2005, subp. 8 or at the operating conditions described at Minn. R. 7017.2025, subp. 2, using EPA Reference Methods 201A and 202, or other method approved by MPCA in the performance test plan approval.
	Testing shall be completed on two members of COMG 3. Testing shall be completed on a rotating basis such that no single silo within COMG 3 is tested twice before all other silos have been tested once.
	Testing conducted during the 60 days prior to a performance test due date will not reset the due date for future testing.
