**Re: Final NPDES Permit for Hyperion Water Reclamation Plant (NPDES Permit No. CA0109991)**

Dear Director Romero:

Enclosed please find the final National Pollutant Discharge Elimination System (NPDES) permits for the subject facility. EPA posted a public notice of proposed action on EPA's website, accepting public comment from September 13, 2022 to October 13, 2022. The effective date of the permit is May 1, 2023, unless a petition for permit review is filed with the Environmental Appeals Board (EAB).<sup>1</sup> Review of the permit can be requested within 30 days of this notice by any person who filed comments on the proposed permit conditions. Review is requested by filing a petition with the Clerk of the EAB. The petition must identify the contested permit condition or other specific challenge to the permit decision and clearly set forth, the petitioner's contentions for why the permit decision should be reviewed.

If you have any questions regarding the final permit or permitting process, please contact Peter Kozelka of the NPDES permits section at [kozelka.peter@epa.gov](mailto:kozelka.peter@epa.gov).

Sincerely,

/s/

Tomás Torres  
Director, Water Division

Enclosures: Final Permit and Fact Sheet for Hyperion WRP  
Response to Comments Document

cc: Jenny Newman, Acting Executive Officer, Los Angeles Regional Water Quality Control Board
