

SECTION 10.56.290: Measurement and Reporting of Emissions

- A. The Director may require any person responsible for emission of air pollutants to make or have made at the owner's expense tests to determine the quantity and quality of the emission of air pollutants from any source. The Director may specify testing methods to be used. The Director may require that such tests be conducted in the presence of his representative. The Director shall be given a copy of the test results in writing and signed by the person responsible for the tests. All tests and calculations shall be made under the direction of a professional engineer registered in the State or be a graduate of an accredited engineering school, and be experienced in his field of endeavor.
- B.
1. At the completion of any new installation, or any significant alterations, the Director may require the owner or person responsible to conduct such tests as are necessary to establish the amount of air pollutants emitted from such equipment or control apparatus. Such tests shall be made at the expense of the owner and shall be conducted in a manner approved by the director. The Director may require that such tests be conducted in the presence of his representative.
 2. In all new installations, there shall be provided sampling ports of a size, number and location as the Director may require, safe access to each port, any other sampling and testing facilities as the Director may require.
 3. Any person proposing to conduct a test for the purpose of demonstrating compliance with an applicable emission standard shall notify the Director of the intent to test not less than thirty (30) days prior to the proposed test date. The notification shall contain at least the following:
 - a. A statement outlining the purpose of the proposed test;
 - b. A description of the source and emission point to be tested;
 - c. A detailed description of the test protocol; and
 - d. A timetable setting forth the dates on which the testing will be conducted and a date by which the test results will be submitted to the Director.
- C. The Director may conduct tests of air pollutants from any source. Upon request of the Director, the person responsible for the source to be tested shall provide, at not expense to the Board, necessary holes in stacks or ducts and such other safe and proper sampling and testing facilities, including a suitable power source, exclusive of instruments and sensing devices as may be necessary for proper determination of the level of air pollutants.

- D. The Director may require the owner or operator of any air pollutant source discharging air pollutants, at the expense of the owner or operator, to install, use and maintain such monitoring equipment as the Director shall prescribe, sample such emissions in accordance with methods as the Director shall prescribe on air pollutant emissions and fuel analyses shall be recorded, compiled and submitted in a format as prescribed by the Director.
- E. The owner or operator of any air pollution source permitted in accordance with the provisions of Section 10.56.020 and 10.56.040 must submit to the Director by March 31 of each year the actual annual emissions of all regulated pollutants emitted by the source during the previous calendar year. This information shall be submitted in writing upon forms furnished by the Metropolitan Health Department. The data must be certified by a company official that the information is accurate to the best of his knowledge.
(Note: Revisions to Section 10.56.290. D and a new paragraph 10.56.290.E were submitted to EPA on November 16, 1994. However, these revisions were not acted on [61 FR 47055] because the federal requirement to which the revisions pertain is not yet final.)
