I. DISTRIBUTION LIST

DOJ: david.l.gordon@usdoj.gov

EPA: spielmann.lee@epa.gov
plossl.carl@epa.gov

DNER: nildasanchez@drna.pr.gov
mariavrodriguez@drna.pr.gov

MTA: carlos@cwlllegal.com
dbattle@cstlawpr.com
jramirez@amrclaw.com
cagosto674@gmail.com

II. REPORT ORGANIZATION

As part of the USA-MTA Civ. No. 3:21-01087-DRD Stipulation and Preliminary Injunction Order, MTA shall prepare and submit monthly reports regarding the performance of its obligations under this Order until completion of the requirements of Paragraphs 3 through 10 of this Order. Each report shall cover the period ending on the last day of each month. Each report must be sent to DOJ, EPA, and DNER on or before the 15th day of the month following the reporting period. Each monthly report shall include:

- i. description of compliance with each requirement of this Order;
- ii. the volume, acreage and location of the Intermediate Cover that was applied;
- iii. the volume and disposition of leachate and leachate-contaminated stormwater collected;
- iv. results of any sampling analysis performed; and
- v. Notification of any noncompliance with this Order, including a statement describing the noncompliance and its underlying causes, and proposed measures and an implementation schedule to correct the noncompliance.

The monthly report is divided into four sections.

Section 1 presents a summary of the order requirements and the compliance status for each requirement. *Please note that Task ID's are not related to the order assigned paragraphs.*

Section 2 will include detail information or supporting documentation regarding the compliance status of each requirement in need of comprehensive description or status details.

Section 3 is a projection of next month activities.

Section 4 includes all the attachments included with the report.

III. Section 1: SUMMARY

Municipality of Toa Alta Civ. No. 3:21-01087-DRD		
Reporting Period:	September 1 to September 30, 2022	
Reporting Number:	02	
Reporting Official:	Nivia Ayala, PE/TerraTek	
Reporting Date:	10/14/2022	
Description of Compliance with each requirement of the Order		
ID	Requirement	Compliance Status
1	Daily Cover	Daily cover was completed prior to April 30, 2022.
2	Cessation of Waste Disposal	In-Compliance
3	Posting of Signs	In Compliance
4	Intermediate Cover	Intermediate cover is schedule to start by October 1, 2022. However, MTA is still waiting for DNER funds to acquire specified cover material and contract an independent contractor to perform the required task. Please see Additional comment for ID 4 item.
5	Maintenance of Cover	Monthly Maintenance for applied daily cover is performed for compliance assurance. Please see Attachment 1 for Inspection reports.
6	Slope Stability	Short Term Controls were completed by May 1. 2022. Diversion works to prevent stormwater runoff on the top deck for entering the North Slope Area and erosion controls. Maintenance is performed monthly. Safety Barrier fencing was still pending installation during the reporting period, even though it has an active Purchase Order the supplier was not able to deliver the materials during the reporting period. Please see additional comments for ID 6 Item.
7	Leachate Management	Due to Hurricane Fiona direct impact to Puerto Rico, the whole island was affected by a complete electrical power blackout on September 17, 2022, that lasted several weeks at different locations. MTA submitted a time extension request for an additional 20 days, until October 20, 2022. The request was granted on September 29, 2022 by Mr. Mark Gallagher, Esq.
8	Stormwater Management	
8a	Short Term Controls	Because of Hurricane Fiona effect at the Toa Alta Municipality a mitigation effort started on September 15, 2022, in order to prepare for the direct impact of the Hurricane. As part of those efforts the Municipality Public Works Department collected debris and rubble for critical areas prompted to flooding. Because that debris is subject to FEMA Disaster Recovery Assistance, MTA needs to collect all debris to comply with FEMA 325 Debris Management Guide. Please see comments for ID 8a item. A monthly routine for pest control will be implemented for both North and South Ponds. Catch basins, ditches, swales and channels were inspected weekly, when necessary, cleaned of accumulated debris and eliminate any observed standing/stagnant water. When applicable, catch basins, ditches, swales, and channels were periodically mowed and cleaned.

		<p>The diesel tank secondary containment was inspected weekly, when necessary, cleaned of accumulated debris and eliminate any observed standing/stagnant water. As a complimentary to source reduction a monthly larvicide program will start during next quarter.</p> <p>The larvicide program will be applied at the Sedimentation Ponds and other identified areas with standing water within the Toa Alta Municipal Landfill and its facilities.</p>
8b	Survey of Leachate Seeps	Should be completed by December 1, 2022
8c	Stormwater Management Plan	Should be provided by January 1, 2023
8d	Discharges of Stormwater Not from Pond	N/A
8e	Discharge/Disposal of Pond Liquid	N/A
Additional Requirements		
	The volume, acreage, and location the Intermediate Cover that was applied.	N/A
	The volume and disposition of leachate contaminated stormwater collected.	None
	Results Of Any Sampling Analysis Performed	None
	Notification Of Noncompliance	Safety Barrier fencing was still pending installation during the reporting period, even though it has an active Purchase Order the supplier was not able to deliver the materials during the reporting period.

IV. SECTION 2: DETAIL INFORMATION OR SUPPORTING DOCUMENTATION OF EACH REQUIREMENT IN NEED OF COMPREHENSIVE DESCRIPTION OR STATUS DETAILS

A. COMPLETED REQUIREMENTS

Access:

Access is granted to the United States and the Commonwealth of Puerto Rico, and their employees, representatives and contractors, to conduct the necessary inspections and studies, including and the applicable records review to evaluate existing conditions, following the agreed terms in the Stipulation.

Daily Cover:

Daily Cover at the facility was completed on April 30, 2022. All areas of exposed waste were covered by Daily Cover. See Attachment 4 for aerial pictures of the facility.

Cessation of Waste Disposal:

The cessation of waste disposal at the facility was completed by March 30, 2022. However, as agreed in the Stipulation, the temporary storage of construction and demolition (C&D) waste, bulk household waste (durable goods such as mattresses, furniture, and appliances), or yard waste (vegetation waste generated by land maintenance) for final disposal at a different landfill is active and been performed on a daily basis.

Posting of Signs:

A sign with a size of four foot by five foot was installed at the landfill entrance. See the attached picture.

B. ID 4: Intermediate Cover

As has been explained numerous times throughout the process, the Municipality needs the funding to perform several of the required tasks, commencing with the Intermediate Cover Task, as it is one of the more costly initial tasks to be performed. The following is a chronological order of the Municipality performed steps to negotiate and acquire the funds to perform this task:

Rural Development:

1. On May 18, 2020, the Municipality submitted a Notice of Intent to Rural Development requesting the award of funds under the Disaster Mitigation Assistance Grant for the landfill.
2. On September 4, 2020, the Municipality amended its request to include the landfill closure, post-closure activities and possible expansion.
3. On July 16, 2021, the Municipality received a Rural Development email confirming that all the required documents for the appropriate Disaster Mitigation Assistance Grant for the landfill was completed.
4. On August 22, 2022, the Municipality held a Public Hearing related to the grant funds requested.
5. USDA Rural Grant Program, MTA submitted a final Environmental Assessment to: Quiles, Danna - RD, San Juan, PR <danna.quiles@usda.gov>; Cabrera, Jose - RD, San Juan, PR <Jose.Cabrera@usda.gov>; Davila, Sandimary - RD, San Juan, PR

<Sandimary.Davila@usda.gov>; Gonzalez, Melvin - RD, SAN JUAN, PR
<Melvin.Gonzalez@usda.gov>. The document was submitted on September 30, 2022.

6. As of today, the Rural Development process is still on-going, but have not yet completed.

Department of Natural and Environmental Resources (DNER)

1. The DNER, during the EPA Public Hearing held on February 23, 2022, stated publicly and during the hearing that they would make available to the Municipality the required funds for the appropriate landfill closure.
2. As a result of DNER public comments, a meeting was held on March 24, 2022 between the Municipality, DNER and La Fortaleza to discuss the details related to the funds availability.
3. On March 31, 2022, the Municipality provided the required information by the DNER, including the schedule and cost estimate in order for said agency to prepare a Memorandum of Understanding (MOU) that would provide the necessary funds to the Municipality for the landfill's closure activities.
4. After continuous inquiries by the Municipality, the DNER on June 10, 2022, finally provided a draft MOU for the funds access. The Municipality issued its comments to the MOU on July 12, 2022.
5. As of today, and after significant follow-up efforts with the DNER, they have not responded with the final version of the MOU and the availability of funds.

At this time, the Municipality is analyzing the different alternatives at their disposal in order to advance the execution of the required Intermediate Cover tasks.

C. ID 6: Safety Barrier Fencing

Presently, MTA is going over the contracting and finance process to contract the installation of the safety barrier. Materials are already on site. The shortage on the chain supply of these kind of construction materials have a delay of three (3) months. As MTA is required to follow purchasing and finances municipal process.

D. ID7: Leachate Management Plan

A North Slope Leachate Interception System Design was submitted for EPA's comments and approval on January 4, 2022 (please see attachment 3). The EPA issued its evaluation and comments, which were then incorporated into a final design plan, that was finally approved by EPA on March 7, 2022. As part of the meetings and discussions with DNER, the execution of this design was agreed to be included and incorporated into the MOU for the appropriate assignment of funds, since the construction cost estimate for this project is approximately \$195,000.

At this time the Municipality is presently working on completing the comprehensive leachate management plan, in which a conceptual plan should be submitted by October 20, 2022. Several technical discussions have taken place with Mr. Carl Plossl from EPA and Dr. Tim Townsend regarding the possibility of reaching at least a 90% reduction in releases of leachate from the unlined portion of the Landfill.

E. ID8a: Hurricane Fiona Debris Management

As part of the Public Assistance Debris Management Guide (FEMA-325) The Federal government may provide grants through the Public Assistance Program to reimburse the response and recovery efforts of an applicant (State and local governments, and certain private non-profit organizations) for residentially declared disasters. To receive supplemental disaster assistance under the Public Assistance Program, applicants must meet FEMA eligibility criteria.

Eligible debris work must be in the public interest, which is defined as work necessary to meet the following:

- Eliminate immediate threats to life, public health and safety;
- Eliminate immediate threats of significant damage to improved public or private property;
- Ensure economic recovery of the affected community to the benefit of the community-at-large; or
- Mitigate the risk to life and property by removing substantially damaged structures and associated appurtenances as needed to convert property acquired through a FEMA hazard mitigation program to uses compatible with open space, recreation, or wetlands management practices.

Debris monitoring procedures should be established and included in the debris management plan for the applicant's financial interest, especially if the applicant has contracted for any component of the debris removal operation. Monitoring debris removal operations achieves two objectives:

- Verifying that the work completed by the contractor is within the contract scope of work
- Providing the required documentation for Public Assistance grant reimbursement

Failure to document eligible work and costs may jeopardize Public Assistance grants. In Federally declared disasters, FEMA periodically validates the applicant’s monitoring efforts to ensure that eligible debris is being removed and processed efficiently.

To make sure MTA does not jeopardize the Public Assistance Grant from FEMA. MTA need to wait for FEMA to quantify the amount of debris removed and after that procedure the debris can be finally disposed at a permitted facility.

F. Additional task performed and activities during this report period

We understand that all efforts within the signed Stipulation and Preliminary Injunction Order should be tied-in to Closure Activities for the unlined cell and the SE lined cell. To incorporate all related parties into the discussion for Closure and to make sure we all follow an achievable path for commencement of the closure activities, as soon as the required funding becomes available to the Municipality. As such, an official meeting was held with DNER personnel (Mrs. Maria V. Rodriguez, Mr. Carmelo Vazquez, Mr. Pedro Guevara) to discuss the vision of the Closure Plan that is presently being prepared. Our expectations id to have a Closure Conceptual Design by October 30, 2022 and commence technical discussions with DNER staff in order to reach agreements on the Closure Strategy that will allow the preparation and submittal of a Final Closure Design.

V. SECTION 3: PROJECTION OF NEXT MONTH ACTIVITIES

October 7, 2022:

Weekly Inspection

October 13, 2022:

Technical discussion with Mr. Carl Plossl to discuss Help Model calculations submitted September 14, 2022 to Mr. Plossl.

October 14, 2022:

Weekly Inspection

October 20, 2022:

Submit Leachate Management Plan initial document.

October 21, 2022:

Weekly Inspection

October 28, 2022

These dates are subject to change.
