# Healthy Child Care & Early Learning Facilities Self-Assessment

You work hard every day to ensure that children can grow, learn and play in a safe and healthy environment. This self-assessment will support your awareness of environmental exposures and provide resources to address identified concerns. After taking the assessment and using the provided resources, your childcare or early learning center will provide an environment with greater health, safety and quality for children, families, and staff.

There are three possible responses to each question: Yes, No and Not Applicable.

- Yes = All is well, no action required at this time. Please reassess next time you perform the self-assessment.
- No = There is an opportunity to make improvements. Resources provided can help you determine what next steps you take.
- N/A = Not applicable to your facility. Continue to the next question.

It is recommended that the assessment be completed on a quarterly basis, unless the item is indicated as annual, and more frequently in situations where it is warranted (ex. chronic physical symptoms displayed by children/staff, seasonal changes, geographical location, and context, etc.).

This document shows all of the resources included when a user selects "no" for each question.

## **Outdoor Air Quality**

1. Is the exterior environment free from smoke and strong odors?

O Yes	O No	○ N/A
		help provide information on how smoke and odors might be harmful to and how to protect yourself:
		Indoor Air Quality in Schools and Commercial Buildings <a href="https://epa.gov/indoor-ildfires-and-indoor-air-quality-schools-and-commercial-buildings">https://epa.gov/indoor-ildfires-and-indoor-air-quality-schools-and-commercial-buildings</a> (EPA)
