

Does your community face brownfields challenges?

Maybe? I'm not sure.

Take a look at EPA's [Understanding Brownfields](#) and contact your [regional TAB provider](#).

Yes, my community knows we have brownfield sites. We need help with:

Learning the brownfields process, getting started with a site inventory and beginning site assessment activities.

Contact your [regional TAB provider](#) and to learn more about [Targeted Brownfields Assessment](#).

Developing a plan for safely reusing our brownfield site(s).

Contact your [regional TAB provider](#) or EPA region to access [Land Revitalization](#) resources.

Accessing resources available to small, rural, Tribal, and disadvantaged communities.

Connect with [State & Tribal Technical Assistance](#) providers.

Issues specific to Tribes, land banks, nonprofits, or displacement.

Connect with [specialized technical assistance](#) providers.

No, we don't.

That's great! However, properties can become contaminated over time due to past or current land uses. Look at EPA's [Understanding Brownfields](#) or contact your [regional TAB provider](#) for more information.
