

Building Community & Ecological Restoration at Cook Pond

Workforce Development

- Plant identification & education for youth & community
- Trail maintenance & green infrastructure training for 16 youth: In-house & from Save The Bay
- Leadership development with local partners & community members

Trail & Flora Restoration

- Trash removal
- Invasives removal (Knotweed, phragmites)
- Maintaining/trimming non-natives via Leave No Trace practice
- Improving accessibility over wetland & flooded areas

Stormwater Management

- Training from Save The Bay on stormwater BMPs
- Discovery of mosquito larvae breeding
- Creation of stormwater retrofit recommendation plans by Green Team to pass to City of Fall River
